On a related issue, no comments were received disagreeing with eliminating the waiver authority of State Directors on loan agreements and making loan agreements mandatory for all labor housing loans.

4. Responsibility for Labor Housing Processing and Servicing

One comment was received concerning this change delegating processing and servicing exclusively to the District Office. Although this is an internal matter concerning delegation of duties, the OIG Audit indicated the delegation instruction was not clear to the field staff and resulted in confusion over whether the County or District Office staffs had the primary processing and servicing responsibilities. The normal functions currently being performed by the County Offices (processing, servicing, and collections) may remain in place based on the

delegation of authority by the District Director.

Environmental Impact Statement

This document has been reviewed in accordance with 7 CFR part 1940, subpart G, "Environmental Program." It is the determination of FmHA that this action does not constitute a major Federal action significantly affecting the quality of the human environment and, in accordance with the National Environmental Policy Act of 1969, Public Law 91–190, an environmental impact statement is not required.

This program/activity is listed in the Catalog of Federal Domestic Assistance under numbers 10.405, Farm Labor Housing Loans and Grants, and 10.427, Rural Rental Assistance Payments (Rental Assistance), and are subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials (7 CFR part 3015, subpart V, 48 FR 29112, June 24, 1983).

The Administrator has determined that this final action will not have a significant economic impact on a substantial number of small entities because it contains normal business recordkeeping requirements and minimal essential reporting requirements. This action will effect labor housing borrowers, rents, and labor housing tenants with above-moderate-income.

Executive Order 12778

The proposed regulation has been reviewed in light of Executive Order 12778 and meets the applicable standards provided in sections 2(a) and (2)(b)(2) of that Order. Provisions within this part which are inconsistent with state law are controlling. All administrative remedies pursuant to 7 CFR part 1900 subpart B must be exhausted prior to filing suit.

List of Subjects

7 CFR Part 1930

Accounting, Administrative practice and procedure, Grant programs—Housing and community development, Loan programs—Housing and community development, Low and moderate income housing—Rental, and Reporting requirements.

7 CFR Part 1944

Farm labor housing, Migrant farmworkers, Nonprofit organizations, Public housing, Rent subsidies, and Rural housing.

7 CFR Part 1951

Loan programs—Agriculture and Rural areas.

7 CFR Part 1965

Real Property—Security servicing for multiple housing loans.

Therefore, chapter XVIII, title 7, Code of Federal Regulations is amended as follows:

PART 1930—GENERAL

1. The authority citation for part 1930 continues to read as follows:

Authority: 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23 and 2.70.

Subpart C—Management and Supervision of Multiple Family Housing Borrowers and Grant Recipients

2. Exhibit B of subpart C is amended by revising paragraphs VI.B.6.a.(5), VII C.1., and VII.C.2.; and by adding paragraph VI.B.6.A.(7) to read as follows:

Exhibits to Subpart C

Exhibit B—Multiple Housing Management Handbook

* * * * *

VI. Renting Procedure

* * * * *

B. * * *

6. * * *

a. * * *

(5) Tenants residing in RRH units who are ineligible, because their adjusted annual income exceeds the maximum for the RRH project, will be charged the FmHA approved Note Rate rental rate for the size of unit occupied in a Plan II RRH project. In projects operated under Plan I, ineligible tenants will be charged rental surcharge of 25 percent of the approved Note Rate rental rate.

* * * * *

(7) Tenants residing in off-farm LH units, who are ineligible because there adjusted annual income exceeds the maximum for the area will be charged the lesser of the required shelter cost contribution set out in paragraph II RR of this exhibit or the prevailing market rent rate for the project as determined by subpart D of part 1944 of this chapter. For on-farm tenants, rent determination may be subject to local discretion with limitations is set out in subpart D of part 1944 of this chapter. Excess rent shall be remitted to the Agency for credit to the Rural Housing Insurance Fund.

* * * * *

VII. Verification and Certification of Tenant or Member Income and/or Employment

* * * * *

C. * * *

1. *Verification of Income from all sources.* Income verification is required for domestic farm laborers, including migrant farmworkers, except in instances where housing is provided rent free on a farm as part of employment compensation for farm labor. When the tenants do not have easily verifiable income, the borrower may project income expected to be received by the tenants during occupancy for determining eligibility and subsidy assistance.

2. *Farm Labor employment verification.* Farm work verification is required for all domestic farm laborers, including migrant farmworkers, and all off-farm LH tenants must have sufficient income from employment that meets the definition of domestic farm labor. Employment verification is in addition to income verification for those tenants described in paragraph VII.C.1. of this exhibit. Verification must be documented and filed in the "Tenant Record File" or in the borrower loan docket.

* * * * *

2A. In Exhibit B of this subpart, paragraph VII D is amended in the third sentence by changing the reference "paragraph VI S" to "paragraph VI G".

PART 1944—HOUSING

3. The authority citation for part 1944 continues to read as follows:

Authority: 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23 and 2.70.

Subpart D—Farm Labor Housing Loan and Grant Policies, Procedures and Authorizations

4. Section 1944.153 is amended by revising the definition of "Substantial portion of income" to read as follows:

§ 1944.153 Definitions.

* * * * *

Substantial portion of income. That portion of income received which has been derived from farm labor performed by a farm laborer as defined in this section.

(1) To determine if income is considered substantial, the measure to be used will be:

(i) For housing rented to farm laborers and owned by public bodies and public or private nonprofit organizations when charging rent:

(A) Actual dollars earned from farm labor by domestic farm laborers other than migrant farmworkers must equal at least 65 percent of the annual income limits indicated for the Standard Federal regions, as shown in Exhibit J of this subpart (which is available in any FmHA office). For migrant farmworkers living in seasonal housing the actual dollars earned from farm labor by a domestic farm laborer must equal at least 50 percent of annual limits as shown in Exhibit J of this subpart.

(B) An alternate measure for determining substantial portion of income when actual earnings are not available may be the duration of time a farm laborer worked on a farm as a domestic farm worker during the preceding 12 months. In order to be considered as substantial the farm

laborer must have worked at least 110 whole days in farm work. For purposes of this section one whole day is the equivalent of at least 7 hours. When using a period of more than one year, a yearly average amounting to at least 110 days per year must be computed.

(ii) For housing owned by a farmer, family farm partnership, family farm corporation, or an association of farmers which was initially provided on a nonrental basis, substantial portion of income is earned down housing is provided by the owner as part of employment compensation for farm labor.

(2) When a natural disaster has occurred, such as a drought, flood, freeze, etc., figures for the last full year of work will be used to determine substantial portion of income under paragraph (1) of this definition.

(3) The tenant who qualifies as a domestic farm laborer in order to reside or continue to reside in any project with a nonrestrictive farm labor clause in the mortgage covenants (see § 1944.176(d)(5) of this subpart) must not have adjusted annual income which exceeds the moderate income limit as shown in Exhibit C of subpart A of part 1944 of this chapter (which is available in any FmHA office), for the appropriate household size and appropriate geographical area. Tenants residing in housing which was initially rent free without the non-restrictive labor clause in the mortgage covenants (i.e. on-farm site projects where the tenant must work for the farm owner) need not certify income (see paragraph (1)(ii) of this definition), and need not be low or moderate income tenants in order to be eligible to occupy a unit.

(i) Income and exempted income for purposes of this subpart are defined in paragraph II A, B, and C of Exhibit B of subpart C of part 1930 of this chapter.

(ii) For servicing purposes, an exception to the moderate income rule is permitted in accordance with paragraph VI of Exhibit B of subpart C of part 1930 of this chapter.

* * * * *

5. Section 1944.154 is amended by adding paragraphs (d) and (e) to read as follows:

§ 1944.154 Priorities for tenants' occupancy.

* * * * *

(d) *Tenant Occupancy records.* (1) For tenants of housing owned by farm borrowers, rent is not charged and employment related occupancy restrictions do apply (reference § 1944.164(h) for additional guidance). The borrower shall have each tenant execute a verification of occupancy and farm labor on Exhibit K–1, Verification of Domestic Farm Labor and Occupancy in Rent Free Housing, on initial occupancy of the dwelling unit. The borrower shall retain the properly completed forms and make them available for FmHA Inspection only for the current tenant(s) and to supplement the annual reporting requirements required in the loan agreement. If the housing is not occupied on a year-round basis, then the report should list the names of the migrants or seasonal farmworkers attached to Exhibit K–1.

(2) For tenants of housing when rent is charged and employment restrictions do not apply (reference § 1944.164(h) for additional guidance). The borrower shall be guided by the procedures referenced in paragraph (c) of this section.

(e) *Ineligible occupants.* (1) For housing owned by farm borrowers. Ineligible occupants are immediate relatives of the borrower(s) and anyone who is not employed in domestic farm labor, as defined in § 1944.153 of this subpart. Normally, occupancy of labor housing owned by farm borrowers is restricted to employees of the farmer or is governed by an employment contract with the farmer. Occupancy of housing owned by farm borrowers, regardless of the site (on-farm or in town), may be occupied by ineligibles with the permission of the State Director.

(2) *For housing owned by organizations.* Ineligible occupants are defined in Exhibit B of subpart C of part 1930 of this chapter.

6. Section 1944.155 is revised to read as follows:

§ 1944.155 Responsibility for LH processing and servicing.

All LH loan and/or LH grant application processing and servicing is the responsibility of the FmHA District Director with redelegation authority for on-farm labor housing loans.

7. Section 1944.164 is amended by revising paragraph (g)(2) to read as follows:

§ 1944.164 Limitations and conditions.

* * * * *

(g) * * *

(2) All other loan applicants of this subpart will execute a loan agreement in substantially the same format as Exhibit D of this subpart (for rental units) or Exhibit K of this subpart (for non-rental units). Any necessary changes must be approved by OGC.

* * * * *

8. Section 1944.164(o) is amended in the second sentence by revising the reference "§ 1944.176(c)(2)" to "§ 1944.176(d)(2)".

9. Section 1944.164 (p) is amended by revising the reference "§ 1944.176(c)(2)" to "§ 1944.176 (d)(2)."

10. Section 1944.176 is amended by redesignating current paragraphs (c), (d), (e) and (f) as paragraphs (d), (e), (f) and (g) respectively; by removing newly redesignated paragraph (d)(5) and redesignating paragraphs (d) (6) and (7) as (d) (5) and (6); and by adding new paragraph (c) to read as follows:

§ 1944.176 Loan and/or grant closing.

* * * * *

(c) *LH loan agreement.* A LH loan agreement, prepared and authorized as provided in § 1944.164 (g) of this subpart will be dated and executed by the applicant on the date of loan approval. The executed agreement will be filed with the mortgage or other security instrument in the District Office case file.

* * * * *

11. Section 1944.181 is revised to read as follows:

§ 1944.181 Loan Servicing.

(a) For general purposes, LH loans and grants will be serviced in accordance with this subpart B of part 1924, subpart C of part 1930, and subpart D of part 1944 of this chapter. Requests for rent increases will be processed in accordance with Exhibit C of subpart C of part 1930 of this chapter for nonprofit organizations.

(b) For special servicing of LH loans when the Loan Agreement was waived. There will be many instances where the loan agreement was waived because of a loan agreement waiver provision in this regulation that was in effect for more than 10 years. As a result of regulation change, the State Director shall notify all LH loan farm borrowers within 180 days of the effective date of this regulation, that such labor housing borrowers will be:

(1) Requested to sign a loan agreement;

(2) Required to report tenant occupancy, at least annually (reference Exhibit K–1 of this subpart); and

(3) Provided with Exhibit K–1 of this subpart.

(i) The above action need not be completed: If there is existing servicing action where a management agreement exists and such agreement is sufficient to satisfy the notification items, or; If there is a pre-existing loan agreement, and paragraphs (b) (2) and (3) of this section are addressed. If the existing loan agreement does not include annual occupancy reporting, then the borrower must be notified in accordance with paragraphs (b) (2) and (3) of this section.

(ii) Refusal of the borrower to participate in the regulatory change should be documented. It shall be the responsibility of the State Director to determine if compliance reviews should be increased from the minimum required by procedure. Additional servicing guidance may be found in subpart N of part 1951 and subpart B (with special emphasis on Exhibit F) of part 1965 of this chapter.

(c) All special servicing needs for LH loans to farm borrowers should be incorporated in a management agreement in addition to a loan agreement. Examples of special servicing needs are: When the housing is temporarily not needed for farm laborers; When rent is being charged; When occupied by ineligibles, or; When farmers share housing costs with the borrower in exchange for the occupant(s) labor. The use of a management agreement is not limited to the examples cited. Whenever the management agreement is for a purpose unrelated to agriculture, the farmer should understand that the housing should be returned to the original loan purpose as soon as practical. A final consideration in loan servicing should be to sell the Labor Housing outside of the program when the farmer can no longer use the housing in his farming operation.

11A. Section 1944.200 is added to read as follows:

§ 1944.200 OMB Control Number.

The reporting and recordkeeping requirements contained in this regulation have been approved by the Office of Management and Budget and have been assigned OMB control number 0575–0045. Public reporting burden for this collection of information is estimated to vary from 5 minutes to 150 hours per response, with an average of 11 hours per response including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Department of Agriculture, Clearance Officer, OIRM, room 404–W, Washington, DC 20250; and to the Office of Management and Budget, Paperwork Reduction Project (OMB# 0575–0045), Washington, DC 20503.

12. Exhibit K of subpart D is added and reads as follows:

Exhibits to Subpart D

Exhibit K

LOAN AGREEMENT

(LH Insured Loan to Farm Borrowers to Provide Housing for the Farm Borrower's Farming Operations)

A. General provisions:

1. This agreement is entered into _____(Date).

2. This agreement is between _____

_____

_____

(borrower's name whether one or more), whose mailing address is

_____

_____

_____, and the United States of America, acting through the Farmers Home Administration, United States Department of Agriculture (the Government).

3. This agreement is made in return for receiving Labor Housing (LH) loan assistance from the Government totaling $_____ as evidenced by a Promissory Note dated _____. This assistance is made with the understanding that housing is to be provided to Domestic Farm Laborers on a rent free basis. Any rents collected without the written consent of the Government are the responsibility of the borrower and shall be refunded by the borrower to the tenants.

4. The borrower agrees to comply with Government regulations governing the LH loan program.

5. This agreement is in addition to any other agreements entered into with the Government, such as any promissory note, mortgage or deed of trust, loan approval requirements, etc.

B. Rent and Occupancy.

Occupancy of the housing will be limited to domestic farmworkers or migrant farmworkers as defined by the Government, unless the Government gives prior written approval for other occupancy, except that in no case will a member of the borrower's immediate family occupy the housing.

The borrower agrees:

1. To meet the LH loan objectives by providing decent, safe, and sanitary housing for eligible tenants;

2. To provide the housing rent free to eligible farmworker tenants;

3. To get the Government's prior approval before collecting utility charges (i.e. electricity, fuel, water, waste disposal, etc.) or requiring a refundable damage deposit or cleaning fee from tenants;

4. To get the Government's prior approval if there is a need to permit occupancy by tenants who are not working in the borrower's farming operation or not normally eligible to occupy the housing unit; and

5. To get the Government's prior approval if there is a need to charge rent to tenants or change any existing rents. To provide a management plan, which meets requirements set out in Government regulations, whenever rents are charged to tenants. The management plan will describe how the housing operation will be conducted.

C. Recordkeeping.

The borrower agrees:

1. To provide the Government financial information as required by Government regulations;

2. To provide annual verification of employment of eligible tenants as occupancy changes, not less than once per year; and

3. To keep information required by Government regulations and make the information available for Government inspection, to include tenant nonrent affidavits.

D. Compliance with Federal, State, and Local Laws and Regulations.

The borrower agrees to comply with applicable Federal, State, and local laws and regulations, including but not limited to, the following:

1. To provide equal housing opportunities to tenants;

2. To operate the housing in a safe environment;

3. To maintain comprehensive property insurance on the property taken as security;

4. To pay taxes and assessments on the property taken as security; and

5. To make the security property available for inspection by the Government.

E. Disposition of LH Security Property.

The borrower agrees:

1. Not to sell or otherwise dispose of property taken as security for the LH loan without the Government's prior written approval;

2. Not to sell or enter into any business arrangement which may potentially or actually place the housing operation under the management or control of another party without the prior approval of the Government; and

3. To prohibit any liens to be taken on the security property without the prior approval of the Government.

F. Enforcement Considerations.

The. borrower understands that any violation of the terms of this agreement may enable the Government to declare the note immediately due and payable and may adversely affect the borrower's ability to obtain other Government loans or grants.

G. General Provisions.

This agreement may be cited in the security instrument and other instruments or agreements as the "Loan Agreement of _____19__." (date of this instrument)

H. Signature(s).

_____

Signature of Borrower

_____

Witness

_____

Signature of Borrower

_____

Witness

13. Exhibit K–1 of subpart D is added and read as follows:

Exhibit K–1

Date _____

SUBJECT: Verification of Domestic Farm Labor and Occupancy in Rent Free Housing

_____

_____

(borrower's name or the farm's business name)

On_____, __, I/We became the occupant(s) of the rent free dwelling owned by the above named borrower. The dwelling is provided as a condition of my farm labor employment.

If the rent free status changes, I/we will notify the Farmers Home Administration at:

_____Office
_____Phone number
_____
_____
_____, occupant
_____
_____

Distribution:

Original to occupant.

1 copy for borrower's records to be kept available for inspection upon request by Farmers Home Administration for all current tenants.

14. Exhibit M of Subpart D is added and reads as follows:

Exhibit M

Market Rent Determination for Labor Housing Projects

I. *Objective.* The objective of this exhibit is to provide guidance for a market rent determination for Labor Housing (LH) when the farmworker is not required to live on the farm (§ 1944.176(d)(5) of this subpart) or when it is necessary to determine a rent for farmer owned housing.

II. *Purpose.* When an eligible farmworker becomes ineligible because of above-moderate-income and has been granted permission to continue residing in the unit in accordance with paragraph VI B 5 or 6 of Exhibit B of subpart C of part 1930 of this chapter, then an appropriate rent must be formulated that must not exceed the market rent for the local area as determined in accordance with the provisions set out in this exhibit.

III. *Determination.* Whenever a market rent determination is required for one or more LH resident(s), the market rent will be computed by using the most recently approved Form FmHA 1930–7, "Statement of Budget and Cash Flow," and substituting a new debt service computation based on the project's development cost. The amortization factor for the Farm Labor Housing-State Director Exception interest rate as published in FmHA Instruction 440.1 (available in any FmHA office) will be used with a 33 year term. The rate used for amortization for debt service in the market rent budget should be rounded down to the nearest eighth of a percent. For example, 9.95 percent would be rounded to 9.875. The market rent is computed on a basis of the project's initial development cost and subsequent loans and grants. In contrast, the "basic" rent debt service is computed 1 percent loans offset by the construction grants.

The market rent determination, one set, will remain in place for the project; therefore, the determination must be recorded in a narrative statement which must be filed with the Promissory Note.

IV. *Limitations.* If the market rent determined in the proceeding paragraph is found to exceed the conventional market rents in the area (within an approximate 48 kilometer or (30 mile) radius or the effective market area or other appropriate geographical or local boundary) by more than $20, then the LH market rent will be limited to the prevailing market rent. Prevailing market rents may be determined from such sources as recent Rural Rental Housing Market studies or recent area classified advertisements (within the last two months), documented, and adjusted for comparability. Documentation should be similar to the information found in Exhibit A–4 of this subpart, with the advertisements attached. The adjustment for comparability should consider unit size, bedroom mix, age, and amenities. This rental determination is not intended to survey housing used exclusively for farm labor rental housing, but to determine a fair conventional market rent for an above-moderate-income farmworker and family.

PART 1951—SERVICING AND COLLECTIONS

15. The authority citation for part 1951 continues to read as follows:

Authority: 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23 and 2.70.

Subpart F—Analyzing Credit Needs and Graduation of Borrowers

16. § 1951.261 (d)(3) is amended by revising the reference § 1944.176 (c)(2)" to "§ 1944.176 (d)(2)."

PART 1965—REAL PROPERTY

17. The authority citation for part 1965 continues to read as follows:

Authority: 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23 and 2.70.

Subpart B—Security Servicing for Multiple Housing Loans

18. § 1965.65 (g)(5) is amended by revising the reference "§ 1944.176 (c)(1)" to "§ 1944.176 (d)(1)."

Dated: October 9, 1992.

La Verne Ausman,

Administrator, Farmers Home Administration.

BILLING CODE 3410–07–M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 238

[INS No. 1376–92]

RIN 1115–AC24

Contracts With Transportation Lines; Signatory Authority

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Interim rule with requests for comments.

SUMMARY: This interim rule amends 8 CFR part 238 by delegating signatory authority to enter into contracts under the purview of section 238 of the Immigration and Nationality Act (the Act) to the Executive Associate Commissioner for Operations. This change is necessary as a result of a reorganization which occurred within the Immigration and Naturalization Service (the Service). In addition, this rule amends the reference citations to conform with the appropriate paragraphs within section 238 of the Act.

DATES: This rule is effective December 17, 1992. Interested persons are invited to submit written comments on or before January 19, 1993.

ADDRESSES: Please submit written comments, in triplicate, to the Records Systems Division, Director, Policy Directives and Instructions Branch, Immigration and Naturalization Service, 425 I Street, NW., room 5304, Washington, DC 20536. Please include INS number 1376–92 on your correspondence to ensure proper and timely handling.

FOR FURTHER INFORMATION CONTACT: Una Brien, Assistant Chief Inspector, Inspections Division, Immigration and Naturalization Service, 425 I Street, NW., room 7228, Washington, DC 20536, telephone (202) 514–2681.

SUPPLEMENTARY INFORMATION: Under the current regulations, the Regional Commissioners have signatory authority to enter into contracts under the purview of section 238 of the Act. As a result of a reorganization within the Service, a new position entitled "Executive Associate Commissioner for Operations" was established. The Executive Associate Commissioner for Operations is now responsible for the duties extant in the Enforcement and Examinations components of the Service, and related responsibilities that were formerly exercised by the Regional Commissioners. Therefore, this rule amends 8 CFR part 238 to reflect this change by transferring the signatory authority to enter into contracts under section 238 of the Act from the Regional Commissioners to the Executive Associate Commissioner for Operations. The Executive Associate Commissioner for Operations may designate an Immigration Officer to enter into contracts in his stead.

This rule also amends the reference citations contained in 8 CFR part 238 to correspond with the appropriate paragraphs within section 238 of the Act. These changes are necessitated by Immigration and Nationality Act Amendments of 1986, section 7, Public

Law 99–653, dated November 14, 1986, which repealed subparagraph (a) of section 238 of the Act, and renumbered the remaining subparagraphs. Carriers listed in 8 CFR 238.2(b)(1) are no longer subject to agreements entered into on Form I–421 because subparagraph (a) of section 238 of the Act has been repealed and therefore the list of carriers has been removed from the regulations.

The Service's implementation of this rule as an interim rule, with provision for post-promulgation public comments, is based upon the "good cause" exception found at 5 U.S.C. 553(b)(A)–(B) and 553(d)(2)–(3). The reasons and the necessity for the immediate implementation of this interim rule are as follows: This rule relates to agency management and organization with respect to the reassigned responsibilities to the Executive Associate Commissioner for Operations. It also interprets the statutory changes made as a result of Public Law 99–653. A notice and comment period would have been impracticable and contrary to the public interest.

In accordance with 5 U.S.C. 605(b), the Commissioner of the Immigration and Naturalization Service certifies that this rule does not have a significant adverse economic impact on a substantial number of small entities. This rule is not a major rule within the meaning of section 1(b) of E.O. 12291, nor does this rule have Federalism implications warranting the preparation of a Federalism Assessment in accordance with E.O. 12612.

List of Subjects in 8 CFR Part 238

Administrative practice and procedures, Air carriers, Aliens, Government contracts, Travel.

Accordingly, part 238 of chapter I of title 8 of the Code of Federal Regulations is amended as follows:

PART 238—CONTRACTS WITH TRANSPORTATION LINES

1. The authority citation for part 238 continues to read as follows:

Authority: 8 U.S.C. 1103, 1228, 8 CFR part 2.

2. Section 238.1 is revised to read as follows:

§ 238.1 Contracts.

The contracts with transportation lines referred to in section 238(a) of the Act may be entered into by the Executive Associate Commissioner for Operations, or by an Immigration Officer designated by the Executive Associate Commissioner for Operations on behalf of the government and shall be documented on Form I–420. The contracts with transportation lines referred to in section 238(c) of the Act shall be made by the Commissioner on behalf of the government and shall be documented on Form I–426. The contracts with transportation lines desiring their passengers to be preinspected at places outside the United States shall be made by the Commissioner on behalf of the government and shall be documented on Form I–425; except that contracts for irregularly operated charter flights may be entered into by the Executive Associate Commissioner for Operations or an Immigration Officer designated by the Executive Associate Commissioner for Operations and having jurisdiction over the location where the inspection will take place.

3. Section 238.2 is revised to read as follows:

§ 238.2 Transportation lines bringing aliens to the United States from or through foreign contiguous territory or adjacent islands.

Form I–420 shall be signed in duplicate and forwarded to the Headquarters Office of Inspections. After acceptance, each Regional Office of Inspections, the district office and the carrier will be furnished with one copy of the agreement. The transmittal letter to the Headquarters Office of Inspections shall indicate whether the signatory to the agreement is a subsidiary or affiliate of a line which has already signed a similar agreement. Correspondence regarding ancillary contracts for office space and other facilities to be furnished by transportation lines at Service stations in Canada shall be similarly handled.

Dated: November 19, 1992.

Gene McNary,

Commissioner, Immigration and Naturalization Service.

BILLING CODE 4410–10–M

DELAWARE RIVER BASIN COMMISSION

18 CFR Part 401

Amendment to Administrative Manual—Rules of Practice and Procedure

AGENCY: Delaware River Basin Commission.

ACTION: Final rule.

SUMMARY: At its December 9, 1992 business meeting the Delaware River Basin Commission amended its Administrative Manual—Rules of Practice and Procedure in relation to Commission review of electric generation and cogeneration projects. The Commission's Rules of Practice and Procedure presently require Commission review and approval of all projects involving a withdrawal of surface or ground water whenever the daily average withdrawal during any month exceeds 100,000 gallons per day (gpd). Similarly, review and approval by the Commission of all discharges of wastewater to surface or ground waters having a design capacity of 50,000 gpd or more is also required. One or both of these requirements generally trigger Commission review of major electric generating projects. However, the Rules of Practice and Procedure do not specifically address similar electric generation or cogeneration projects if they elect to use an existing source of water supply and the Commission has been made aware of the fact that several such projects are under consideration. The depletive water use from these projects could have a substantial impact on the water resources of the Basin. Further, since the Commission as a matter of policy has imposed special requirements on new electric generating facilities regarding the replacement of depletive water use during critical hydrologic periods, the Commission has amended its Rules of Practice and Procedure by the addition of a new project review category under Section 3.8 of the Compact: electric generating or cogenerating facilities designed to consumptively use in excess of 100,000 gpd of water during any 30-day period.

The Commission recognizes the need to consider all large consumptive water uses and has asked staff to survey large water purveyors to obtain information on major depletive water users. Based on the results of that survey, the Commission may consider extending review authority to other large consumptive water users.

EFFECTIVE DATE: December 9, 1992.

ADDRESSES: Copies of the Commission's Administrative Manual—Rules of Practice and Procedure are available from the Delaware River Basin Commission, P.O. Box 7360, West Trenton, New Jersey 08628.

FOR FURTHER INFORMATION CONTACT: Susan M. Weisman, Commission Secretary, Delaware River Basin Commission: Telephone (609) 883–9500 X203.

SUPPLEMENTARY INFORMATION: The Commission held a public hearing on the proposed amendments on December 9, 1992 as noticed in the October 8, 1992 and December 3, 1992 issues of the **Federal Register** (Vol. 57, No. 196 page

46354 and Vol. 57, No. 233, page 57159). Based upon testimony received and further deliberation, the Commission has amended its Rules of Practice and Procedure.

TENNESSEE VALLEY AUTHORITY

18 CFR Part 1301

Freedom of Information Act

AGENCY: Tennessee Valley Authority (TVA).

ACTION: Final rule.

SUMMARY: The Tennessee Valley Authority is amending its Freedom of Information Act regulations to reflect administrative changes within TVA.

EFFECTIVE DATE: December 17, 1992.

FOR FURTHER INFORMATION CONTACT: Mark R. Winter, TVA, 1101 Market Street (MR 2F), Chattanooga, TN 37402-2801, telephone number: (615) 751-2523.

SUPPLEMENTARY INFORMATION: This rule was not published in proposed form since it relates to agency practice. Since this rule is nonsubstantive, it is being made effective immediately, December 17, 1992.

List of Subjects in 18 CFR Part 1301

Administrative practice and procedure, Freedom of Information, Privacy Act, Sunshine Act.

For the reasons set forth in the preamble, title 18, chapter XIII of the Code of Federal Regulations is amended as follows:

PART 1301—PROCEDURES

1. The authority citation for part 1301 continues to read as follows:

Authority: 16 U.S.C. 831-831dd, 5 U.S.C. 552.

2. Section 1301.1 is amended by revising the introductory text of paragraph (b) to read as follows:

§ 1301.1 Records.

* * * * *

(b) *Requests.* Requests to inspect and copy TVA records shall be directed to the TVA FOIA Officer, TVA Records and Information Management, Information Support Services, Tennessee Valley Authority, 400 Summit Hill Drive, Knoxville, TN 37902-1499. A request shall:

* * * * *

§ 1301.1 [Amended]

3. Section 1301.1 is amended by revising the second and third sentences of paragraph (c)(1)(i) to read as follows:

* * * * *

(c) * * *

(1) * * *

(i) * * * Initial determinations shall be made by the TVA FOIA Officer or the TVA FOIA Officer's designee. If the initial determination is not to comply with the request, the notice to the person making the request shall include a statement of the reasons for the denial of the request; a notice of the right of the person making the request to appeal the denial to the Vice President, Facilities Services, and the time limits therefor; and the name and job title of the person responsible for the initial determination.

* * * * *

§ 1301.1 [Amended]

4. Section 1301.1 is amended by revising the first sentence of paragraph (c)(1)(ii) to read as follows:

* * * * *

(c) * * *

(1) * * *

(ii) For the purposes of this paragraph, a request is deemed to be received by TVA only when it is physically delivered to the TVA FOIA Officer and meets all the requirements of paragraph (b) of this section. * * *

* * * * *

§ 1301.1 [Amended]

5. Section 1301.1 is amended by revising the first and second sentences of paragraph (c)(2)(i) to read as follows:

* * * * *

(c) * * *

(2) * * * (i) If the initial determination is to deny the request, the person making the request may appeal such action to the Vice President, Facilities Services. Such an appeal must be taken within 30 days after the person's receipt of the initial determination and is taken by delivering a written notice of appeal to the Vice President, Facilities Services, TVA, 400 Summit Hill Drive, Knoxville, TN 37902-1499. * * *

* * * * *

§ 1301.1 [Amended]

6. Section 1301.1 is amended by revising the third sentence of paragraph (c)(2)(ii) to read as follows:

* * * * *

(c) * * *

(2) * * *

(ii) * * * Determinations of appeals under this section shall be made by the Vice President, Facilities Services, or the Vice President, Facilities Services' designee. * * *

* * * * *

§ 1301.1 [Amended]

7. Section 1301.1 is amended by revising the second sentence of paragraph (c)(3)(i) to read as follows:

* * * * *

(c) * * *

(3) * * *

(i) * * * Such extension may not exceed 10 working days, and a decision to make such extension shall be made by the TVA FOIA Officer, or the TVA FOIA Officer's designee.

* * * * *

§ 1301.1 [Amended]

8. Section 1301.1 is amended by revising the fourth sentence of paragraph (c)(3)(ii) to read as follows:

* * * * *

(c) * * *

(3) * * *

(ii) * * * A decision to make an extension under this paragraph shall be made by the Vice President, Facilities Services, or the Vice President, Facilities Services' designee.

* * * * *

John J. O'Donnell,

Vice President, Facilities Services.

BILLING CODE 6120-08-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Social Security Administration

20 CFR Part 404

RIN 0960–AD18

Federal Old-Age, Survivors, and Disability Insurance Benefits; Extending Old-Age, Survivors, Disability, and Hospital Insurance Coverage to Certain State and Local Government Employees

AGENCY: Social Security Administration, HHS.

ACTION: Final rules.

SUMMARY: We are amending our regulations to reflect a statutory change as provided in section 11332 of Public Law (Pub. L.) 101–508, the Omnibus Budget Reconciliation Act of 1990 (OBRA '90). This statutory change extends mandatory Social Security old-age, survivors, disability, and hospital insurance (OASDHI) coverage to certain services performed by individuals who are employees of a State, a political subdivision of a State, or any wholly owned instrumentality of one or more of the above, and who are not members of the employer's retirement system. The statute also provides an exclusion from its coverage for certain listed services. The effect of this change is to provide OASDHI coverage and benefits to some employees whose services were previously excluded from the definition of mandatory covered employment.

EFFECTIVE DATES: December 17, 1992. The provisions of section 11332 of Public Law 101–508 apply to services performed after July 1, 1991.

FOR FURTHER INFORMATION CONTACT: Duane Heaton, Legal Assistant, 3–B–1 Operations Building, 6401 Security Boulevard, Baltimore, MD 21235, (301) 965–8470.

SUPPLEMENTARY INFORMATION:

Background

Prior to OBRA '90, services performed by individuals who were employees of a State (other than the District of Columbia, Guam, or American Samoa), a political subdivision of a State, or any wholly owned instrumentality thereof, were generally not covered under Social Security unless the State entered into a voluntary coverage agreement with the Secretary of Health and Human Services (the Secretary) as provided under section 218 of the Act. Although all States entered into agreements with the Secretary, many of the States excluded certain services from coverage. Many of these excluded services also were not under any public retirement plan. As a result, a part of the workforce was not participating in any public retirement plan and was not covered by Social Security. OBRA '90 provides mandatory OASDHI coverage for much of this workforce that was not under any public retirement plan.

In these final regulations, we are amending the Social Security regulations to reflect section 11332 of OBRA '90. Section 11332 amends section 210(a) of the Social Security Act (the Act) by extending mandatory OASDHI coverage to certain services performed by individuals who are employees of a State (other than the District of Columbia, Guam, or American Samoa), a political subdivision of a State, or any wholly owned instrumentality of one or more of the foregoing, and who are not members of the employer's retirement system. For purposes of administering this statute, the term "retirement system" has the meaning given in section 218(b)(4) of the Act, except as provided in regulations prescribed by the Secretary of the Treasury. Section 218(b)(4) states that "retirement system" means a pension, annuity, retirement, or similar fund or system established by a State or a political subdivision thereof.

The statute provides an exclusion from mandatory coverage for services performed:

1. By an individual who is employed to relieve him or her from unemployment;
2. In a hospital, home, or other institution by an individual who is a patient or inmate thereof;
3. By an individual as an employee serving on a temporary basis in case of fire, storm, snow, earthquake, flood, or other similar emergency;
4. By an election official or election worker if the remuneration paid in a calendar year for such service is less than $100; or
5. By an employee in a position compensated solely on a fee basis which is treated, pursuant to section 211(c)(2)(E) of the Act, as a trade or business for purposes of inclusion of the fees in net earnings from self-employment.

In addition, exclusions from coverage set forth in other provisions of the Act such as the exclusion for services performed by students employed in public schools, colleges, and universities will continue to be applicable. Coverage for these students will continue to be provided at the option of the State under section 218 of the Act and such coverage which was provided prior to July 2, 1991, the effective date of OBRA section 11332, will continue.

Finally, the statute provides that services mandatorily covered under section 11332 of OBRA '90 may not be covered under a voluntary section 218 agreement.

Regulations Changes

We are amending the regulations to reflect section 11332 of Public Law 101–508 and to make a technical and clarifying change to § 404.1020(a). Specifically, we are amending the regulations as follows:

- The mandatory coverage and applicable exclusions are reflected in subpart K in a revised § 404.1020(a);
- The treatment of certain State and local government employees paid by fees is reflected in a revised § 404.1073;
- In revised §§ 404.1200 and 404.1201 of subpart M, we explain there is also mandatory OASDHI coverage, provide a cross-reference to § 404.1020(a), and make clear that subpart M regulations only apply to section 218 agreements, as appropriate;
- In revised § 404.1209 we explain that services mandatorily covered under section 11332 may not be covered under a section 218 agreement; and
- We also have made a technical change to § 404.1020(a) to make it clear that work as an employee of the District of Columbia, Guam, or American Samoa is not excluded from Social Security coverage if the work is covered under § 404.1021 or § 404.1022. This clarification reflects section 210(a)(7)(C), (D), and (E) of the Act and is consistent with our longstanding policy reflecting these statutory provisions. Without this technical change, § 404.1020(a) is potentially confusing on this point due to the fact that § 404.1004 defines the term "State" to include the District of Columbia, Guam, and American Samoa.

These revisions are non-discretionary; they are needed to reflect enacted legislation. For that reason, any cost impact from the policies these revisions codify is attributable to the legislation and not to the regulations.

Regulatory Procedures

Dispensing with the Notice of Proposed Rulemaking and Public Comment

We are publishing the above amendments to the regulations as final rules instead of proposed rules. The Department of Health and Human Services, even when not required by statute, as a matter of policy, generally follows the Administrative Procedure Act (APA) notice of proposed rulemaking and public comment

procedures specified in 5 U.S.C. 553 in the development of its regulations. The APA provides exceptions to its notice and comment procedures when an agency finds there is good cause for dispensing with such procedure. Section 553(b)(B) of the APA exempts application of notice and comment rulemaking procedure "when the agency for good cause finds * * * that notice and public procedures thereon are impracticable, unnecessary, or contrary to the public interest." We are dispensing with notice and comment rulemaking in the case of these regulations because such rulemaking is unnecessary since this change merely conforms the regulations to the controlling statute, does not involve administrative discretion, and does not independently affect the rights of claimants.

Executive Order No. 12291

The estimated impact on the trust funds for fiscal years (FY) 1991–1995 is as follows ($ in millions):

	FY 1991	FY 1992	FY 1993	FY 1994	FY 1995
Increase in OASDI payroll taxes	$467	$2,122	$2,275	$2,459	$2,661
Increase in HI payroll taxes	8	30	21	12	4
Increase in OASDI benefit payments	neg	neg	4	9	15

The overall increase in costs will exceed the threshold amount for a major rule under Executive Order 12291. However, because the policy codified in these regulations ultimately relates to transfer payments (i.e., benefit payments to members of the public), OMB has waived the requirement for a regulatory impact analysis for this rule.

Regulatory Flexibility Act

We certify that these final regulations will not have a significant economic impact on a substantial number of small entities, including small governmental jurisdictions. Any economic impact involved in the regulations reflecting section 11332 of Public Law 101–508 results directly from the statutory amendments, not from the regulations. Therefore, we believe that a regulatory flexibility analysis as provided in Public Law 96–354, the Regulatory Flexibility Act, is not required.

Paperwork Reduction Act

These final regulations impose no additional reporting and recordkeeping requirements subject to Office of Management and Budget clearance.

(Catalog of Federal Domestic Assistance: Programs Nos. 93.800 Medicare—Hospital Insurance; 93.801 Medicare—Supplementary Medical Insurance; 93.802 Social Security—Disability Insurance; 93.803 Social Security—Retirement Insurance; 93.805 Social Security—Survivor's Insurance.)

List of Subjects in 20 CFR Part 404

Administrative practice and procedure; Death benefits; Disability benefits; Old-Age, Survivors, and Disability Insurance.

Editorial note: This document was received at the Office of the Federal Register December 10, 1992.

Dated: October 7, 1991.

Gwendolyn S. King,

Commissioner of Social Security.

Approved: December 18, 1991.

Louis W. Sullivan,

Secretary of Health and Human Services.

For the reasons set out in the preamble, part 404 of title 20 of the Code of Federal Regulations is amended as follows:

1. The authority citation for subpart K of part 404 is revised to read as follows:

Authority: Secs. 205(a), 209, 210, 211, 226, 226A, 229(a), 230, 231, and 1102 of the Social Security Act; 42 U.S.C. 405(a), 409, 410, 411, 426, 426–1, 429(a), 430, 431, and 1302; secs. 1151(d)(2)(C), 1704, and 1882 of Pub. L. 99–514, 100 Stat. 2505, 2779, and 2914; sec. 9003 of Pub. L. 100–203, 101 Stat. 1330–287; secs. 1011B(a)(23)(B) and 8013 of Pub. L. 100–647, 102 Stat. 3486 and 3789.

2. Section 404.1020 is amended by adding paragraphs (a)(3) and (a)(4) to read as follows:

§ 404.1020 Work for States and their political subdivisions and instrumentalities.

(a) * * *

(3) You perform services after July 1, 1991, as an employee of a State (other than the District of Columbia, Guam, or American Samoa), a political subdivision of a State, or any wholly owned instrumentality of one or more of the foregoing and you are not a member of a retirement system of such State, political subdivision, or instrumentality. Retirement system has the meaning given that term in section 218(b)(4) of the Act, except as provided in regulations prescribed by the Secretary of the Treasury. This paragraph does not apply to services performed—

(i) As an employee employed to relieve you from unemployment;

(ii) In a hospital, home, or other institution where you are a patient or inmate thereof;

(iii) As an employee serving on a temporary basis in case of fire, storm, snow, earthquake, flood, or other similar emergency;

(iv) As an election official or election worker if the remuneration paid in a calendar year for such service is less than $100; or

(v) As an employee in a position compensated solely on a fee basis which is treated, pursuant to section 211(c)(2)(E) of the Act, as a trade or business for purposes of inclusion of the fees in net earnings from self-employment; or

(4) The work is covered under § 404.1021 or § 404.1022.

* * * * *

3. Section 404.1073 is amended by revising paragraph (b)(1), redesignating paragraph (b)(2) as (b)(3), and adding a new paragraph (b)(2) to read as follows:

§ 404.1073 Public office.

* * * * *

(b) *State and local governmental employees paid by fees.* (1) *Voluntary coverage under section 218 of the Act.* The services of employees of States and political subdivisions, including those in positions paid solely on a fee-basis, may be covered as employment by a Federal-State agreement under section 218 of the Act (see subpart M of this part). States, when entering into these agreements, have the option of excluding under the agreement coverage of services in positions paid solely by fees. If you occupy a position paid solely on a fee-basis and the State has not covered your services under section 218 of the Act, you are considered to be engaged in a trade or business.

(2) *Mandatory old-age, survivors, disability, and hospital insurance coverage.* Beginning with services performed after July 1, 1991, Social Security coverage (old-age, survivors, disability, and hospital insurance) is mandatory, with certain exceptions, for services performed by employees of a State, a political subdivision of a State, or of a wholly owned instrumentality of one or more of the foregoing, if the employees are not members of a retirement system of the State, political

subdivision, or instrumentality. Among the exclusions from such mandatory coverage is service performed by an employee in a position compensated solely on a fee-basis which is treated pursuant to section 211(c)(2)(E) of the Act as a trade or business for purposes of inclusion of such fees in the net earnings from self-employment.

* * * * *

4. The authority citation for subpart M of part 404 is revised to read as follows:

Authority: Secs. 205, 210, 218, and 1102 of the Social Security Act; 42 U.S.C. 405, 410, 418, and 1302; sec. 12110 of Pub. L. 99–272, 100 Stat. 287, sec. 9002 of Pub. L. 99–509, 100 Stat. 1970.

5. Section 404.1200 is amended by revising the title of the section, designating the present text as (a), adding a new heading to paragraph (a), and adding a new paragraph (b) to read as follows:

§ 404.1200 General.

(a) *Coverage under section 218 of the Act.* * * *

(b) *Mandatory old-age, survivors, disability, and hospital insurance coverage.* Under section 210(a)(7)(F) of the Act, mandatory old-age, survivors, disability, and hospital insurance coverage is extended to certain services performed after July 1, 1991, by individuals who are employees of a State (other than the District of Columbia, Guam, or American Samoa), a political subdivision of the State, or any wholly owned instrumentality of one or more of the foregoing, and who are not members of the employer's retirement system. Certain services are excluded from such mandatory coverage (see § 404.1020(a)(3).

6. Section 404.1201 is amended by revising paragraph (a) to read as follows:

§ 404.1201 Scope of this subpart regarding coverage and wage reports and adjustments.

* * * * *

(a) Coverage under section 218 of the Act—

* * * * *

7. Section 404.1209 is amended by adding paragraph (f) to read as follows:

§ 404.1209 Mandatorily excluded services.

* * * * *

(f) Services covered under section 210(a)(7)(F) of the Act. (See § 404.1200(b).)

[FR Doc. 92–30391 Filed 12–16–92; 8:45 am]

BILLING CODE 4190–29–M

20 CFR Part 404

[Regulations No. 4]

RIN 0960–AC45

Federal Old-Age, Survivors and Disability Insurance; Extension of Social Security Coverage to Certain Workers; Medicare Only Coverage of Certain State and Local Government Employees; Medicare Qualified Government Employment

AGENCY: Social Security Administration, HHS.

ACTION: Final rules.

SUMMARY: We are revising several rules in Subpart K—Employment, Wages, Self-Employment, and Self-Employment Income—Part 404 of title 20 of the Code of Federal Regulations. These revisions reflect statutory enactments that—Extend Social Security coverage to certain work situations; and extend Medicare coverage to certain employees of States and their local governments.

We are also amending certain regulatory provisions of part 404, Subpart E—Deductions; Reductions; and Nonpayments of Benefits—to reflect the manner in which these statutory enactments affect the annual earnings test.

EFFECTIVE DATE: December 17, 1992.

FOR FURTHER INFORMATION CONTACT: L.V. Dudar, Legal Assistant, Office of Regulations, Social Security Administration, 6401 Security Boulevard, Baltimore, MD 21235, (410) 965–1795.

SUPPLEMENTARY INFORMATION:

Extension of Social Security Coverage

The Omnibus Budget Reconciliation Act of 1987 (OBRA 1987)—Public Law 100–203—contains several provisions extending and revising Social Security coverage to certain workers. An OBRA 1987 provision concerning coverage of agricultural work was subsequently amended by a provision of the Technical and Miscellaneous Revenue Act of 1988 (TAMRA)—Public Law 100–647. The amendments to the rules to reflect these statutory provisions are as follows.

Section 404.1015 Family Services

Based on section 210(a)(3)(A) of the Social Security Act (the Act), as amended by section 9005 of OBRA 1987, we are amending § 404.1015 to provide that the coverage exclusion that was applicable to a child under age 21 who is an employee of his or her parent(s) applies only when the child is under age 18. However, section 210(a)(3)(B) of the Act, as amended by section 9005 of OBRA 1987, provides that we continue to exclude from coverage the nonbusiness work or domestic service a child, age 18 through 20, may perform as an employee of his or her parent(s) and our revisions to the regulations reflect this requirement. At age 21, any work a child performs for his or her parent(s) is covered.

Based on section 210(a)(3) of the Act, as amended by section 9004 of OBRA 1987, we are deleting a paragraph of § 404.1015 and amending two other paragraphs of this section pertaining to spousal employment. These changes provide that service performed by a person working for his or her spouse is no longer excluded from coverage unless the work is nonbusiness or domestic work.

Section 404.1019 Work as a Member of a Uniformed Service of the United States

Based on section 210(l)(1) of the Act, as amended by section 9001 of OBRA 1987, we are amending paragraph (a) of this section to show that we will now provide Social Security coverage for inactive duty training performed by a member of a uniformed service.

Section 404.1055 Payments for Agricultural Labor

We are amending this section to reflect the change in coverage of agricultural labor required by the amendments of section 209(a)(7) of the Act (formerly section 209(h)(2) of the Act), by section 9002 of OBRA 1987 and section 8017 of TAMRA. These statutory changes provide that all cash payments to an employee for agricultural labor are covered wages if the employer's total expenditures for agricultural labor in the calendar year equal or exceed $2,500 annually irrespective of how much the individual was paid. If the employer's total annual expenditures are less than $2,500, cash payments to an employee of $150 or more are wages, but any amount below $150 is not wages. For a hand harvest laborer (i.e., seasonal agricultural labor), irrespective of the employer's expenditures for agricultural labor, cash payments of less than $150 annually are not wages if he or she (1) is paid on a piece rate basis as a hand harvester in a piece rate operation, (2) commutes to the farm daily, and (3) was employed less than 13 weeks in agriculture in the preceding calendar year. The earnings are covered, as under prior law, if the employer pays the employee $150 or more in a year. The provision in the regulation at § 404.1055(c) which covered an agricultural employee who works at

least 20 days for an employer for cash pay computed on a time basis (the 20-day test) has been eliminated as a result of section 9002 of OBRA 1987 with respect to remuneration paid for agricultural labor after December 31, 1987.

Section 404.1058 Special Situations

This section is amended to reflect one statutory provision. We will include as wages pay to members of a uniformed service while on inactive duty for training to reflect section 9001 of OBRA 1987. See also the amendment to § 404.1019—Work as a member of a uniformed service of the United States—discussed above.

Extension of Medicare Coverage

We are amending § 404.1018b—Medicare qualified government employment—to reflect the enactment of sections 9129 and 13205 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA of 1985—Pub. L. 99–272), which amends section 210(p) of the Act to provide for Medicare coverage, subject to certain exceptions, of employees of State and local political subdivisions. This Medicare protection applies mostly to State and local government employees hired after March 31, 1986, who are not covered under title II of the Social Security Act because the State did not enter into a coverage agreement with the Secretary of Health and Human Services under section 218 of the Social Security Act providing for such coverage. The employees who come under the scope of the COBRA of 1985 legislation are thus covered under Medicare but may not be under Social Security. The amended § 404.1018b also lists the categories of State and local government employees described under section 210(p)(2) of the Act as added by section 13205(b)(1) of COBRA 1985. The amended § 404.1018b also reflects the amendments to section 210(p)(2) of the Act by the enactment of section 1985(b)(18) of the Tax Reform Act of 1986 (Pub. L. 99–514), which excludes from mandatory Medicare coverage, election officials or election workers whose remuneration for such service is less than $100 in a calendar year. Section 11332 of the Omnibus Budget Reconciliation Act of 1990 (OBRA 1990—Pub. L. 101–508) mandated coverage of the services of most State and local employees not covered under a State or local employer's retirement system which are not already covered under a section 218 agreement, effective for services performed after July 1, 1991. We also are amending § 404.1020—Work for States and their political subdivisions and instrumentalities, § 404.1021—Work for the District of Columbia, and § 404.1022—American Samoa or Guam to include references to the pertinent § 404.1018b provisions.

Medicare coverage had previously been extended to Federal employment as the result of the enactment of section 278 of the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97–248). These Medicare coverage provisions have been implemented by a separate regulation published on October 4, 1988 (53 FR 38943) (see § 404.1018b).

Annual Earnings Test Changes—Subpart E of Part 404

We are amending paragraph (c)(3) of § 404.429—Earnings; defined—to refer to the amended § 404.1055—Payments for agricultural labor (see above). The amended § 404.1055 reflects changes in agricultural labor coverage for remuneration paid after December 31, 1987, as required by the enactment of section 9002 of OBRA 1987 as later amended by section 8017 of TAMRA. Also, we are deleting the table of annual wage limitations from paragraph (c)(1) of § 404.429 since this table duplicates the table under § 404.1047. Paragraph (c)(1) of § 404.429 as amended will refer to the table under § 404.1047.

Public Comments

These rules were published as a notice of proposed rulemaking (NPRM) at 55 FR 37488 on September 12,1990. We received no comments on the proposed rules.

Deletion of Previously Published Section

The NPRM contained a proposed change which added a new § 404.1097 concerning income earned as a corporate director. The proposed change was dictated by section 9022 of OBRA 1987 with respect to the treatment of earnings of corporate directors for performance of services as a director. This proposed regulatory change, however, was subsequently negated by section 5123 of OBRA 1990 which reinstituted the rule as it existed prior to OBRA 1987. These final rules, therefore, contain no reference to earnings of a corporate director for services performed as a director since the statutory basis for this regulatory change no longer exists.

These regulations are non-discretionary; they are needed to reflect enacted legislation. For that reason any cost impact from the policies these revisions codify is attributable to the legislation and not to this regulation.

Regulatory Procedures

Executive Order 12291

These final regulations have been reviewed under Executive Order 12291 to determine whether a major rule is involved. Two provisions of these final regulations reflect statutory provisions with a significant cost impact on the public. The two provisions and their estimated costs are the following:

1. Social Security coverage of persons performing inactive duty training—estimated yearly costs starting in 1988 have risen to $452 million in FY 1992 and $474 million in FY 1993 with an estimated 1.4 million persons affected.

2. Medicare coverage of State and local employees—estimated yearly costs starting in 1986 have risen to $1,418 million in FY 1992 and $1,585 million in FY 1993 with an estimated 2 million employees affected.

The other legislative changes codified in this regulation will increase costs to the public by $8 million per year in FY 1992 and FY 1993. The overall increase in costs will exceed the threshold amount for a major rule under Executive Order 12291. However, because the policy codified in this regulation ultimately relates to transfer payments (i.e., benefit payments to members of the public), OMB has waived the requirement for a regulatory impact analysis for this rule.

Paperwork Reduction Act

These final regulations impose no reporting/recordkeeping requirements subject to Office of Management and Budget clearance.

Regulatory Flexibility Act

The Secretary certifies that these final rules will not have a significant economic impact on a substantial number of small entities. Small businesses should not be significantly affected by any of the statutory provisions reflected in these regulations and the tax collected and paid should be insignificant. The statutory provision extending Medicare to State and local government employees will cause some small governmental entities, whose employees had not previously been covered by Medicare, to have to pay the Medicare tax. However, this regulation simply reflects a statutory provision already in effect and implemented by IRS since March 31, 1986 (see Internal Revenue Service Bulletin No. 1986–28 (July 14, 1986)) and by the Health Care Financing Administration (42 CFR 406.15). Consequently, these final regulations have no overall economic impact. Therefore, a regulatory flexibility analysis, as provided in

Public Law 96–354, the Regulatory Flexibility Act, is not required.

Editorial Note: This document was received by the Office of the Federal Register on December 10, 1992.

Dated April 20, 1992.

Gwendolyn S. King,

Commissioner of Social Security.

Approved: July 22, 1992.

Louis W. Sullivan,

Secretary of Health and Human Services.

Part 404 of chapter III, title 20 of the Code of Federal Regulations is amended as follows:

PART 404—FEDERAL OLD-AGE, SURVIVORS AND DISABILITY INSURANCE (1950-)

1. The authority citation for subpart E of part 404 continues to read as follows:

Authority: Secs. 202, 203, 204 (a) and (e), 205(a), 222(b), 223(e), 224, 227, and 1102 of the Social Security Act; 42 U.S.C. 402, 403, 404 (a) and (e), 405(a), 422(b), 423(e), 424, 427, and 1302.

2. Section 404.429 is amended by revising paragraphs (c)(1) and (c)(3) to read as follows:

§ 404.429 Earnings; defined.

* * * * *

(c) * * *

(1) Remuneration in excess of the amounts in the annual wage limitation table in § 404.1047;

* * * * *

(3) Payments for agricultural labor excluded under § 404.1055.

* * * * *

3. The authority citation for subpart K of part 404 continues to read as follows:

Authority: Secs. 205(a), 209, 210, 211, 226, 226A, 229(a), 230, 231, and 1102 of the Social Security Act; 42 U.S.C. 405(a), 409, 410, 411, 426, 426–1, 429(a), 430, 431, and 1302; Secs. 1151(d)(2)(C), 1704, and 1882 of Pub. L. 99–514, 100 Stat. 2505, 2779, and 2914; Sec. 9003 of Pub. L. 100–203, 101 Stat. 1330–287; Secs. 1011B(a)(23)(B) and 8013 of Pub. L. 100–647, 102 Stat. 3486 and 3789.

4. Section 404.1015 is amended by removing present paragraph (a)(1), redesignating the present paragraph (a)(2) as paragraph (a)(1) and revising this redesignated paragraph, adding a new paragraph (a)(2), revising paragraph (a)(3), and revising the paragraph (a)(4) introductory text to read as follows:

§ 404.1015 Family services.

(a) * * *

(1) You work while under age 18 in the employ of your parent;

(2) You do nonbusiness work (see § 404.1058(a)(3) for an explanation of nonbusiness work) or perform domestic service (as described in § 404.1057(b)) as an employee of your parent while under age 21;

(3) You do nonbusiness work as an employee of your son, daughter, or spouse; or

(4) You perform domestic service in the private home of your son, daughter or spouse as an employee of that son, daughter or spouse unless—

* * * * *

5. Section 404.1018b is revised to read as follows:

§ 404.1018b Medicare qualified government employment.

(a) *General.* The work of a Federal, State, or local government employee not otherwise subject to Social Security coverage may constitute Medicare qualified government employment. Medicare qualified government employment means any service which in all ways meets the definition of "employment" for title II purposes of the Social Security Act, except for the fact that the service was performed by a Federal, State or local government employee. This employment is used solely in determining eligibility for protection under part A of title XVIII of the Social Security Act (Hospital Insurance) and for coverage under the Medicare program for end-stage renal disease.

(b) *Federal employment.* If, beginning with remuneration paid after 1982, your service as a Federal employee is not otherwise covered employment under the Social Security Act, it is Medicare qualified government employment unless excluded under § 404.1018(c).

(c) *State and local government employment.* If, beginning with service performed after March 31, 1986, your service as an employee of a State or political subdivision (as defined in § 404.1202(b)), Guam, American Samoa, the District of Columbia, or the Northern Mariana Islands is excluded from covered employment solely because of section 210(a)(7) of the Social Security Act which pertains to employees of State and local governments (note §§ 404.1020 through 404.1022), it is Medicare qualified government employment except as provided in paragraphs (c) (1) and (2) of this section.

(1) An individual's service shall not be treated as employment if performed—

(i) By an individual employed by a State or political subdivision for the purpose of relieving that individual from unemployment;

(ii) In a hospital, home, or other institution by a patient or inmate thereof as an employee of a State, political subdivision, or of the District of Columbia;

(iii) By an individual, as an employee of a State, political subdivision or the District of Columbia serving on a temporary basis in case of fire, storm, snow, earthquake, flood, or other similar emergency;

(iv) By an individual as an employee included under 5 U.S.C. 5351(2) (relating to certain interns, student nurses, and other student employees of hospitals of the District of Columbia government), other than as a medical or dental intern or a medical or dental resident in training; or

(v) By an election official or election worker paid less than $100 in a calendar year for such service.

(2) An individual's service performed for an employer shall not be treated as employment if—

(i) The service would be excluded from coverage under section 210(a)(7) of the Social Security Act which pertains to employees of State and local governments;

(ii) The service is performed by an individual who—

(A) Was performing substantial and regular service for remuneration for that employer before April 1, 1986;

(B) Was a bona fide employee of that employer on March 31, 1986; and

(C) Did not enter into the employment relationship with that employer for purposes of meeting the requirements of paragraphs (c)(2)(ii) (A) and (B) of this section; and

(iii) After March 31, 1986, but prior to the service being performed, the employment relationship with that employer had not been terminated.

6. Section 404.1019 is amended by revising paragraph (a) to read as follows:

§ 404.1019 Work as a member of a uniformed service of the United States.

(a) Your work as a member of a uniformed service of the United States is covered under Social Security (unless creditable under the Railroad Retirement Act), if—

(1) On or after January 1, 1957, the work is service on active duty or active duty for training but not including service performed while on leave without pay; or

(2) On or after January 1, 1988, the work is service on inactive duty training.

* * * * *

7. Section 404.1020 is amended by revising present paragraph (a)(2), redesignating present paragraph (b) as paragraph (c), adding a new paragraph (b), and revising redesignated paragraphs (c)(4)(ii)(B) and (c)(4)(iv)(B) to read as follows:

§ 404.1020 Work for States and their political subdivisions and instrumentalities.

(a) *General.*

* * * * *

(2) The work is *covered transportation service* as defined in section 210(k) of the Act (see paragraph (c) of this section).

(b) *Medicare qualified government employment.* Notwithstanding the provisions of paragraph (a) of this section, your work may be covered as Medicare qualified government employment (see § 404.1018b(c) of this subpart).

(c) * * *

(4) * * *

(ii) * * *

(B) Covered by a general retirement system which contains special provisions that apply only to employees described in paragraph (c)(4)(i)(B) of this section;

* * * * *

(iv) * * *

(B) The general retirement system described in paragraph (c)(2)(ii) of this section was in effect on December 31, 1950.

* * * * *

8. Section 404.1021 is amended by adding paragraph (c) to read as follows:

§ 404.1021 Work for the District of Columbia.

* * * * *

(c) *Medicare qualified government employment.* If your work is not covered under Social Security, it may be covered as Medicare qualified government employment (see § 404.1018b(c) of this subpart).

9. Section 404.1022 is amended by adding paragraph (d) to read as follows:

§ 404.1022 American Samoa or Guam.

* * * * *

(d) *Medicare qualified government employment.* If your work is not covered under Social Security, it may be covered as Medicare qualified government employment (see § 404.1018b(c) of this subpart).

10. Section 404.1055 is revised to read as follows:

§ 404.1055 Payments for agricultural labor.

(a) *The $2,500 expenditures and $150 cash-pay tests.* Your cash payments in a calendar year after 1987 from an employer for agricultural labor (see § 404.1056) are wages if—

(1) Your employer's total expenditures for agricultural labor in that year are $2,500 or more, regardless of how much you were paid, or

(2) Your employer's total expenditures for agricultural labor are less than $2,500 in that year and your employer paid you $150.00 or more in that year.

(b) *Exceptions to the $2,500 expenditures and $150 cash-pay tests.* (1) Noncash payments for agricultural labor are not wages under either the $2,500 expenditures or $150 cash-pay test.

(2) Your cash payments in a calendar year from an employer for agricultural labor are not wages, irrespective of your employer's total annual expenditures for agricultural labor, if you are a hand harvest laborer (i.e., seasonal agricultural labor), and—

(i) Your employer paid you less than $150 in that year;

(ii) You are paid on a piece rate basis in an operation which has been, and is customarily and generally recognized in the region of employment as paying on a piece rate basis;

(iii) You commute daily from your permanent residence to the farm on which you are so employed; and,

(iv) You were employed in agriculture less than 13 weeks during the previous calendar year.

Example: In 1988, A (not a hand harvest laborer) performs agricultural labor for X for cash pay of $144 in the year. X's total agricultural labor expenditures for 1988 are $2,450. Neither the $150 cash-pay test nor the $2,500 expenditures test is met. Therefore, X's payments to A are not wages.

(c) *When cash-pay is creditable as wages.* (1) If you receive cash pay from an employer for services which are agricultural labor and for services which are not agricultural labor, we count only the amounts paid for agricultural labor in determining whether cash payments equal or exceed $150. If the amounts paid are less than $150, we count only those amounts paid for agricultural labor in determining the wages to credit the individual if the $2,500 expenditures test is met (for periods beginning on or after January 1, 1988) or the 20-day work test described in paragraph (c) of this section (for periods of time prior to 1988).

Example: Employer X operates a store and also operates a farm. Employee A, who regularly works in the store, works on X's farm when additional help is required for the farm activities. In calendar year 1988, X pays A $140 cash for agricultural labor performed in that year, and $2,260 for work in connection with the operation of the store. Additionally, X's total expenditures for agricultural labor in 1988 were $2,010. Since the cash payments by X to A in the calendar year 1988 for agricultural labor are less than $150, and total agricultural labor expenditures were under $2,500, the $140 paid by X to A for agricultural labor is not wages. The $2,260 paid for work in the store is wages.

(2) The amount of cash pay for agricultural labor that is creditable to an individual is based on cash paid in a calendar year rather than on amounts earned during a calendar year.

(3) If you receive cash pay for agricultural labor in any one calendar year from more than one employer, we apply the $150 cash-pay test and $2,500 total expenditures test to each employer.

(d) *Application of the $150 cash-pay and 20-day tests prior to 1988.* (1) For the time period prior to 1988, we apply either the $150 a year cash-pay test or the 20-day test. Cash payments are wages if you receive $150 or more from an employer for agricultural labor or under the 20-day test if you perform agricultural labor for which cash pay is computed on a time basis on 20 or more days during a calendar year. For purposes of the 20-day test, the amount of the cash pay is immaterial, and it is immaterial whether you also receive payments other than cash or payments that are not computed on a time basis. If cash paid to you for agricultural labor is computed on a time basis, the payments are not wages unless they are paid in a calendar year in which either the 20-day test or the $150 cash-pay test is met.

11. Section 404.1058 is amended by revising paragraph (c)(1), adding introductory text to paragraph (c)(2), and adding paragraph (c)(4) to read as follows:

§ 404.1058 Special situations.

* * * * *

(c) * * *

(1) *The standard.* We include as the wages of a member of the uniformed services—

(i) Basic pay, as explained in paragraph (c)(3) of this section, for performing the services described in paragraph (a)(1) of § 404.1019 of this subpart; or

(ii) Compensation, as explained in paragraph (c)(4) of this section, for performing the services described in paragraph (a)(2) of § 404.1019 of this subpart.

(2) *Wages deemed paid.* These following provisions apply to members

of the uniformed services who perform services as described in paragraph (a)(1) of § 404.1019 of this subpart.

* * * * *

(4) *Compensation.* "Compensation" refers to the remuneration received for services as a member of a uniformed service, based on regulations issued by the Secretary concerned (as defined in 37 U.S.C. 101(5) under 37 U.S.C. 206(a), where such member is not entitled to the basic pay (as defined by paragraph (3) of this section).

Certain Cash or Deferred Arrangements and Employee and Matching Contributions Under Employee Plans; Correction

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correcting amendment.

SUMMARY: This document contains corrections to the final regulations (T.D. 8357), which were published Wednesday, March 25, 1992 (57 FR 10289), relating to certain cash or deferred arrangements (CODAs) and employee and matching contributions under employee plans.

EFFECTIVE DATE: August 15, 1991.

FOR FURTHER INFORMATION CONTACT: Catherine Livingston Fernandez, 202-622-6030, (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

The final regulation that is the subject of this correction replaces all of the 1988 proposed and final regulations on these subjects, and the amendments to regulations under section 401 (k) and (m) of the Internal Revenue Code of 1986, issued on May 14, 1990.

Need for Correction

As published, T.D. 8357 contains an error which may prove to be misleading and is in need of clarification.

List of Subjects for 26 CFR 1.401-0 Through 1.419A-2T

Bonds, Employee benefit plans, Income taxes, Pensions, Reporting and recordkeeping requirements, Securities, Trusts and trustees.

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Accordingly, 26 CFR part 1 is corrected by making the following correcting amendment:

Paragraph 1. The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. In § 1.401(k)-1 (f)(3)(ii), the first sentence in the concluding text is revised to read as follows:

§ 1.401(k)-1 Certain cash or deferred arrangements.

* * * * *

(f) * * *
(3) * * *
(ii) * * *

Recharacterized excess contributions continue to be treated as employer-contributions that are elective contributions for all other purposes under the Internal Revenue Code, including sections 401(a) (other than 402(a)(4) and 401(m)), 404, 409, 411, 412, 415, 416, and 417. * * *

BILLING CODE 4830-01-M

DEPARTMENT OF JUSTICE

Parole Commission

28 CFR Part 2

Paroling, Recommitting and Supervising Federal Prisoners; Domestic and Foreign Travel by Federal Parolees

AGENCY: Parole Commission, Justice.

ACTION: Final rule.

SUMMARY: The U.S. Parole Commission is amending its regulations to change the procedure by which travel requests from federal parolees are approved. Current Commission procedures require Parole Commission approval for any parolee who requests permission to travel outside the contiguous forty-eight states of the United States. Approval for travel within the contiguous forty-eight states of the United States may be granted by the U.S. Probation Office. This rule change allows the U.S. Probation Office to grant and deny requests for travel within the United States, including Alaska and Hawaii, as well as the U.S. Territories. Parole Commission approval will be required only for a request to travel to a foreign country.

EFFECTIVE DATE: January 19, 1993.

FOR FURTHER INFORMATION CONTACT: Richard Preston, Office of General Counsel, telephone (301) 492-5959.

SUPPLEMENTARY INFORMATION: The Commission has decided to allow U.S. Probation Offices to determine whether a parolee should be permitted to travel not only within the contiguous forty-eight states of the United States, but also to Alaska and Hawaii, as well as the U.S. Territories (*e.g.*, Puerto Rico, Guam and the Virgin Islands). The Commission has decided that this procedure is appropriate because continuing parole supervision by a U.S. Probation Officer is available for any parolee who is granted permission to travel to these destinations. Coordination of supervision may be arranged between the U.S. Probation Officers concerned, who can also determine the appropriateness of the travel request itself.

The Commission will retain its requirement for approval by a U.S. Parole Commissioner in the case of any request to travel to a foreign country. These requests must be closely examined because no supervision will be available for the parolee, and a variety of sensitive questions may be involved (*e.g.*, travel to a foreign country that prohibits entry to individuals convicted of certain felonies, or travel to a foreign country that is known for its bank secrecy laws by a parolee who has not adequately accounted for the proceeds for his crime). The Commission will also continue to review all requests for recurring travel and extended vacation travel.

Executive Order 12291 and Regulatory Flexibility Statement

The U.S. Parole Commission has determined that this final rule is not a major rule within the meaning of Executive Order 12291. The rule will not have a significant economic impact upon a substantial number of small entities, within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 605(b).

List of Subjects in 28 CFR Part 2

Administrative practice and procedure, Probation and parole, Prisoners.

Accordingly, the U.S. Parole Commission adopts the following amendment to 28 CFR part 2:

PART 2—[AMENDED]

1. The authority citation for 28 CFR part 2 continues to read as follows:

Authority: 18 U.S.C. 4203(a)(1) and 4204(a)(6).

2. Section 2.41 is amended by revising paragraph (b) to read as follows:

§ 2.41. Travel approval.

* * * * *

(b) Specific advance approval by the Commission is required for all foreign travel, employment requiring recurring travel more than fifty miles outside the district (except employment at offshore locations), and vacation travel outside the district exceeding thirty days. A request for such permission shall be in writing and must demonstrate a substantial need for such travel.

* * * * *

Dated: November 3, 1992.

Edward F. Reilly, Jr.,

Chairman, U.S. Parole Commission.

BILLING CODE 4410-01-M

DEPARTMENT OF THE INTERIOR

U.S. Geological Survey

30 CFR Part 400

RIN 1028-AA04

Regulations for Obtaining Federal Assistance in Financing Explorations for Mineral Reserves, Excluding Organic Fuels, in the United States, its Territories and Possessions

AGENCY: U.S. Geological Survey, Interior.

ACTION: Final rule.

SUMMARY: The U.S. Geological Survey (USGS) has reviewed its regulations for currency, adequacy, and continued need. Consequently, the USGS is removing the Regulations for Obtaining Federal Assistance in Financing Explorations for Mineral Reserves, Excluding Organic Fuels, in the United States, its Territories and Possessions because the program has had no funding authority since 1979, and it is doubtful that funding will be authorized in the foreseeable future.

EFFECTIVE DATE: January 19, 1993.

FOR FURTHER INFORMATION CONTACT: Gary C. Curtin, 913 National Center Reston, Virginia 22092, 703-648-4242.

SUPPLEMENTARY INFORMATION:

Response to Public Comment

No comments were received from the public in response to the proposed rule as published in the Federal Register (57 FR 43411) on September 21, 1992.

Required Analyses

The Department of the Interior has determined this document is not a major rule under E.O. 12291 and certifies this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). Because the program has not been funded since 1979, removal of the regulations will not adversely affect the Nation's economy or any small entities in industry or Government.

This action will have no potential for significant environmental impact and is categorically excluded from the requirements for compliance with the National Environmental Policy Act of 1969, as amended (Pub. L. 91-190, 83 Stat. 852).

Paperwork Reduction Act

No information collection or recordkeeping has been required under the regulations since 1989.

Executive Order No. 12778

The Department has certified to the Office of Management and Budget that this proposed regulation meets the applicable standards provided in Sections 2(a) and 2(B) of Executive Order No. 12778.

Author

The principal author of this proposed rule is Gary Curtin, Geologic Division, U.S. Geological Survey.

List of Subjects in 30 CFR Part 400

Government contracts, Grant programs-natural resources, Mineral resources, Mineral royalties.

PART 400—[REMOVED]

Under the authority of 30 U.S.C. 642(e) and for the reasons stated above, 30 CFR part 400 is removed.

Dated: November 16, 1992.

Harlan L. Watson,

Principal Deputy Assistant Secretary—Water and Science.

BILLING CODE 4310-31-M

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 914

Indiana Permanent Regulatory Authority

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule; approval of amendment.

SUMMARY: OSM is announcing the approval of a proposed amendment to the Indiana permanent regulatory program (hereinafter referred to as the Indiana program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendment consists of proposed changes to the Indiana Surface Mining Rules at 310 Indiana Administrative Code (IAC) 12-3, 12-8, and 12-9 concerning reclamation fees. The amendment specifies the requirements for payment of the reclamation fee established by Indiana Code (IC) 13-4.1-3-2. The amendment is intended to revise the Indiana program to be consistent with the corresponding Federal regulations.

EFFECTIVE DATE: December 17, 1992.

FOR FURTHER INFORMATION CONTACT: Roger W. Calhoun, Director, Indianapolis Field Office, Office of Surface Mining Reclamation and Enforcement, Minton-Capehart Federal Building, 575 North Pennsylvania Street, room 301, Indianapolis, IN 46202, Telephone (317) 226-6166.

SUPPLEMENTARY INFORMATION:

I. Background on the Indiana Program.
II. Submission of Amendment.
III. Director's Findings.
IV. Summary and Disposition of Comments.
V. Director's Decision.
VI. Procedural Determinations.

I. Background on the Indiana Program

On July 29, 1982, the Indiana program was made effective by the conditional approval of the Secretary of the Interior. Information pertinent to the general background on the Indiana program, including the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Indiana program can be found in the July 26, 1982, Federal Register (47 FR 32017). Subsequent actions concerning the conditions of approval and program amendments are identified at 30 CFR 914.15 and 914.16.

II. Submission of Amendment

By letter dated May 7, 1992 (Administrative Record No. IND-1079), the Indiana Department of Natural

Resources (IDNR) submitted a proposed amendment to the Indiana program. The proposed amendment would repeal 310 IAC 12–3–8, 12–3–9, 12–8–4, and 12–8–8. A new rule would be added at 310 IAC 12–9 which would address the applicability of reclamation fees, fee payment, and production records.

OSM announced receipt of the proposed amendment in the July 14, 1992, **Federal Register** (57 FR 31162), and in the same notice, opened the public comment period on the adequacy of the proposed amendment. The public comment period ended on August 13, 1992. The scheduled public hearing was not held as no one requested an opportunity to provide testimony.

By letter dated October 20, 1992 (Administrative Record Number IND–1160), Indiana informed OSM of changes made to the proposed rules during Indiana's rule promulgation process. The changes are nonsubstantive and are discussed in the findings, below.

III. Director's Findings

Set forth below, pursuant to SMCRA and the Federal regulations at 30 CFR 732.15 and 732.17, are the Director's findings concerning the proposed amendment to the Indiana program. Revisions which are not discussed below concern nonsubstantive wording changes.

1. 310 IAC 12–9–1 Scope

This proposed new provision provides that proposed rule 310 IAC 12–9 sets forth the requirements for payment of the reclamation fee under IC 13–4.1–3–2. The Indiana statute at IC 13–4.1–3–2 provides permit application fee requirements which include a fee based on assessment of five and one-half cents per ton of coal produced. OSM approved the addition of the per-tonnage permit fee as a replacement to the previously approved permit application fee plus a permit fee of $125 per acre described in the application in the December 13, 1991, **Federal Register** (56 FR 64997). SMCRA at section 507(a) and the Federal regulations at 30 CFR 777.17 provide that each permit application shall be accompanied by a fee determined by the regulatory authority. The Federal provisions also authorize the regulatory authority to develop procedures which would enable the cost of the fee to be paid over the term of the permit. The Director finds the proposed provisions to be no less effective than SMCRA and the Federal regulations.

2. 310 IAC 12–9–2 Reclamation Fee

Proposed new subsection (a) provides that until July 1, 1995, a reclamation fee of five and one-half cents per ton of coal produced for sale, transfer, or use is required. Proposed new subsection (b) provides for that until July 1, 1995, a reclamation fee of one cent per ton of coal produced from Indiana shall be paid by all operators of underground coal mining operations with no support facilities located within Indiana, but producing coal from reserves located within Indiana. The Director finds these proposed provisions to be no less effective than the Federal regulations at 30 CFR 777.17 which provides that each permit application shall be accompanied by a fee determined by the regulatory authority and that such cost may be paid over the term of the permit.

Proposed new subsection (c) provides that the reclamation fee shall be determined based upon the weight of the coal at the time of initial bona-fide sale, transfer of ownership, or use by the operator. The proposed provision also specifies how bona-fide sale, transfer of ownership, or use shall be determined. There is no direct Federal counterpart to the proposed provisions at subsection (c). Proposed new subsection (d) provides that an operator may take a calculated weight reduction to allow for the weight of excess moisture in the coal subject to specified requirements. The Federal regulations at 30 CFR 777.17 provide that the regulatory authority may develop procedures to allow a reclamation fee to be paid over the term of a permit, but do not provide examples of such procedures. Indiana has chosen to adopt procedures similar to those at 30 CFR 870.12 concerning abandoned mine reclamation fund fee collection. The Director finds that Indiana's proposed fee collection procedures are not inconsistent with the Federal regulations and that the proposed reclamation fee is no less effective than the Federal regulations at 30 CFR 777.17.

3. 310 IAC 12–9–3 Fee Payment

Proposed new subsection (a) provides that each operator shall pay the reclamation fee concurrently with the Federal reclamation fee under SMCRA. Proposed subsections (b) and (c) provide reporting and payment procedures, while proposed subsection (d) provides delinquent payment procedures. During the promulgation process, Indiana clarified subsection (b) by adding that report form DOR–1 is "set out in the Division of Reclamation, Reclamation Fee Handbook, Revised August 1991." Indiana also added language at subsection (c) to clarify that "wire transfer, if available, can be used for payment of the reclamation fee, and the operation shall submit a copy of Form DOR–1 within five (5) days of the transfer." There are no direct Federal counterparts to the proposed provisions. However, Indiana's proposed provisions are similar to those at 30 CFR 870.15 concerning abandoned mine reclamation fee payment. The Director finds that Indiana's proposed fee payment provisions are not inconsistent with the Federal regulations and that the proposed reclamation fee payment provisions are no less effective than the Federal regulations at 30 CFR 777.17.

4. 310 IAC 12–9–4 Production Records

Proposed subsection (a) provides that any person engaging in or conducting a surface coal mining operation shall maintain current records that contain minimum specified information. Proposed subsection (b) provides the IDNR with access to the records of any surface coal mining operation for the purpose of determining compliance with rule 310 IAC 12–9. Proposed subsection (c) provides that any person engaging in or conducting a surface coal mining operation shall make available any book or record necessary to substantiate the accuracy of reclamation fee reports and payments. Subsection (c) also provides for copying of information, confidentiality of information, and auditing of OSM information in lieu of an IDNR audit of a permittee's books or records. Proposed subsection (d) provides that coal production books and records must be kept for a period of six years. Subsection (e) provides the procedures the IDNR shall use to estimate production if such records are not kept or not provided, and procedures an operator shall follow to request that the IDNR revise such an estimate. During the promulgation process for these rules, Indiana clarified proposed 310 IAC 12–9–4 by deleting the word "surface" in five locations. The deletions changed the phrase "surface coal mining operation" to read "coal mining operation." The deletions are intended to clarify that reference is made to coal mining operations and not limited to only surface coal mining operations.

There are no direct Federal counterparts to the proposed provisions. However, Indiana's proposed provisions are similar to those at 30 CFR 870.16 concerning abandoned mine reclamation production records. The Director finds that Indiana's proposed production records provisions are not inconsistent with the Federal regulations and that the proposed

production records provisions are no less effective than the Federal regulations at 30 CFR 777.17.

5. 310 IAC 12–3–8; 12–3–9; 12–8–4; and 12–8–8 Repealed

Indiana proposes to delete these provisions and to replace them with the proposed provisions at 310 IAC 12–9 discussed above at Findings 1 through 4. As discussed in the Findings above, the Director finds that the proposed provisions concerning Indiana's reclamation division fund reclamation fee, are no less effective than the Federal regulations. Therefore, the Director finds that the proposed deletion of 310 IAC 12–3–8; 12–3–9; 12–8–4; and 12–8–8 will not render the Indiana program less effective than the Federal regulations.

IV. Summary and Disposition of Comments

Public Comments

The public comment period announced in the July 14, 1992, **Federal Register** (57 FR 31162) ended on August 13, 1992. No public comments were received and a public hearing was not held as no one requested an opportunity to provide testimony.

Agency Comments

Pursuant to section 503(b) of SMCRA and the implementing regulations at 30 CFR 732.17(h)(11)(i), comments were solicited from various Federal agencies with an actual or potential interest in the Indiana program. No comments were received.

V. Director's Decision

Based on the above findings, the Director is approving the program amendment submitted by Indiana on May 7, 1992, and amended by letter dated October 20, 1992. The Federal regulations at 30 CFR part 914 codifying decisions concerning the Indiana program are being amended to implement this decision. This final rule is being made effective immediately to expedite the State program amendment process and to encourage States to conform their programs with the Federal standards without delay. Consistency of State and Federal standards is required by SMCRA.

EPA Concurrence

Under 30 CFR 732.17(h)(11)(ii), the Director is required to obtain the written concurrence of the Administrator of the Environmental Protection Agency (EPA) with respect to any provisions of a State program amendment that relate to air or water quality standards promulgated under the authority of the Clean Water Act (33 U.S.C. 1251 *et seq.*) or the Clean Air Act (42 U.S.C. 7401 *et seq.*). The Director has determined that this amendment contains no provisions in these categories and that EPA's concurrence is not required.

VI. Procedural Determinations

Executive Order 12291

On July 12, 1984, the Office of Management and Budget (OMB) granted the Office of Surface Mining Reclamation and Enforcement (OSM) an exemption from section 3, 4, 7 and 8 of Executive Order 12291 for actions related to approval or conditional approval of State regulatory programs, actions and program amendments. Therefore, preparation of a regulatory impact analysis is not necessary and OMB regulatory review is not required.

Executive Order 12778

The Department of the Interior has conducted the reviews required by section 2 of Executive Order 12778 and has determined that, to the extent allowed by law, this rule meets the applicable standards of subsections (a) and (b) of that section. However, these standards are not applicable to the actual language of State regulatory programs and program amendments since each such program is drafted and promulgated by a specific State, not by OSM. Under sections 503 and 505 of the Surface Mining Control and Reclamation Act (SMCRA) (30 U.S.C. 1253 and 1255) and 30 CFR 730.11, 732.13 and 732.17(h)(10), decisions on proposed State regulatory programs and program amendments submitted by the States must be based solely on a determination of whether the submittal is consistent with SMCRA and its implementing Federal regulations and whether the other requirements of 30 CFR parts 730, 731, and 732 have been met.

National Environmental Policy Act

No environmental impact statement is required for this rule since section 702(d) of SMCRA (30 U.S.C. 1292(d)) provides that agency decisions on proposed State regulatory program provisions do not constitute major Federal actions within the meaning of section 102(2)(c) of the National Environmental Policy Act, 42 U.S.C. 4332(2)(C).

Paperwork Reduction Act

This rule does not contain information collection requirements that require approval by the Office of Management and Budget under the Paperwork Reduction Act, 44 U.S.C. 3507 *et seq.*

Regulatory Flexibility Act

The Department of the Interior has determined that this rule will not have a significant economic impact on a substantial number of entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The State submittal which is the subject of this rule is based upon counterpart Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic effect upon a substantial number of small entities. Hence, this rule will ensure that existing requirements previously promulgated by OSM will be implemented by the State. In making the determination as to whether this rule would have a significant economic impact, the Department relied upon the data and assumptions for the counterpart Federal regulations.

List of Subjects in 30 CFR Part 914

Intergovernmental relations, Surface mining, Underground mining.

Dated: October 28, 1992.

David G. Simpson,

Acting Assistant Director, Eastern Support Center.

For the reasons set out in the preamble, title 30, chapter VII, subchapter T of the Code of Federal Regulations is amended as set forth below:

PART 914—INDIANA

1. The authority citation for part 914 continues to read as follows:

Authority: 30 U.S.C. 1201 *et seq.*

2. Section 914.15 is amended by adding a new paragraph (qq) to read as follows:

§ 914.15 Approval of regulatory program amendments.

* * * * *

(pp) [Reserved]

(qq) The following amendment (Program Amendment Number 92–2) to the Indiana program as submitted to OSM on May 7, 1992, and amended by letter dated October 20, 1992, is approved effective December 17, 1992.

(1) Addition of the following Indiana regulations:

310 IAC 12–9–1	Scope
310 IAC 12–9–2	Reclamation Fee
310 IAC 12–9–3	Fee Payment
310 IAC 12–9–4	Production Records

(2) Repeal of the following Indiana regulations:

310 IAC 12–3–8
310 IAC 12–3–9

310 IAC 12–8–4
310 IAC 12–8–8

[FR Doc. 92–30481 Filed 12–16–92; 8:45 am]
BILLING CODE 4310–05–M

30 CFR Part 917

Kentucky State Abandoned Mine Land Program; Expanded Eligibility Criteria, Acid Mine Drainage Treatment and Abatement Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule; approval of amendments.

SUMMARY: OSM is announcing the approval of proposed program amendments to the Kentucky State Abandoned Mine Land Reclamation (AMLR) Plan (hereinafter referred to as the Kentucky AMLR plan), and Kentucky Revised Statutes (KRS) Chapter 350, under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendments were filed in response to changes to SMCRA made by the Abandoned Mine Land (AML) Reclamation Act of 1990 (Pub. L. 101–508) which was enacted on November 5, 1990, and became effective October 1, 1991. The amendments revise Kentucky's AMLR Plan and KRS Chapter 350 to be consistent with the changes to SMCRA.

EFFECTIVE DATE: December 17, 1992.

FOR FURTHER INFORMATION CONTACT: William J. Kovacic, Director, Lexington Field Office, Office of Surface Mining Reclamation and Enforcement, 2675 Regency Road, Lexington, Kentucky 40503, Telephone (606) 233–2896.

SUPPLEMENTARY INFORMATION:

I. Background on the Kentucky Program.
II. Submission of Amendment.
III. Director's Findings.
IV. Summary and Disposition of Comments.
V. Director's Decision.
VI. Procedural Determinations.

I. Background on the Kentucky Program

On May 18, 1982, the Secretary of the Interior conditionally approved the Kentucky program. Information pertinent to the general background and revisions to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval can be found in the May 18, 1982, **Federal Register** (47 FR 21404–21435). Subsequent actions concerning the conditions of approval and proposed amendments are identified at 30 CFR 917.11, 917.13, 917.15, 917.16 and 917.17.

On May 18, 1982, the Secretary of the Interior approved the Kentucky AMLR plan. Information pertinent to the general background on the Kentucky AMLR Plan including the Secretary's findings, the disposition of comments and a detailed explanation of the approval of the Kentucky AMLR Plan can be found in the May 18, 1982, **Federal Register** (47 FR 21435–21439). Subsequent actions concerning AMLR Plan amendments are identified at 30 CFR 917.21.

II. Submission of Amendment

By letter dated June 24, 1992, (Administrative Record No. K–63), Kentucky submitted a proposed amendment modifying the Kentucky AMLR plan. The amendment consists of revisions to the narratives in Chapter 3, Goals and Obligations, and Chapter 15, Maps of Eligible Lands and Waters.

OSM announced receipt of the proposed amendment in the September 14, 1992, **Federal Register** (57 FR 41897), and in the same notice, opened the public comment period and provided opportunity for a public hearing on the adequacy of the proposed amendment. The comment period closed on October 14, 1992.

By Letter dated July 30, 1992 (Administrative Record Number KY–1171), Kentucky submitted a proposed program amendment consisting of seven bills effecting Kentucky Revised Statutes Chapter 350 and a resolution that were enacted by the 1992 Regular Session of the Kentucky General Assembly. Included among the seven bills was Senate Bill 191 (SB–191) which made several revisions to KRS Chapter 350 for consistency with SMCRA as amended by Public Law 101–508, the "Abandoned Mine Reclamation Act of 1990." OSM is separating SB–191 from the July 30, 1992, submission so that it can be considered together with Kentucky's June 24, 1992, revision to its AMLR Plan.

OSM announced receipt of the July 30, 1992, amendment in the September 23, 1992, **Federal Register** (57 FR 43952), and in the same notice, opened the public comment period and provided opportunity for a public hearing on the adequacy of the amendment. The comment period closed on October 23, 1992.

III. Director's Findings

Set forth below, pursuant to SMCRA and the Federal regulations at 30 CFR part 884, and 30 CFR 732.15 and 732.17 are the Director's findings concerning the proposed amendment to the Kentucky AMLR Plan and the revisions to Kentucky's Revised Statutes. Any minor revisions not specifically discussed below are found to be no less stringent than SMCRA and no less effective than the Federal regulations. Revisions not specifically discussed below contain language similar to the corresponding Federal rules, concern nonsubstantive wording changes, or revised cross-references and paragraph notations to reflect organizational changes resulting from this amendment.

A. Revisions to Kentucky's AMLR Plan

(1) Goals and Obligations (30 CFR 884.13(c)(1))

Kentucky is revising this part of the plan in order to incorporate a reference to Public Law 101–508 (The Abandoned Mine Land Reclamation Act of 1990), which amended Title IV of Public Law 95–87 (SMCRA) effective October 1, 1991. Kentucky is also replacing the phrase "mined areas which were left without adequate reclamation prior to enactment of the law", with the phrase "eligible lands and waters, as defined in Chapter 15". In addition, Kentucky is adding a reference to conditions which endanger the "general welfare" of the public. The Director finds that the proposed changes which reference the revisions to SMCRA made by P.L. 101–508 and which provide overall clarity to Kentucky's AMLR Plan are not inconsistent with the requirements of SMCRA.

(2) Maps of Eligible Lands and Waters (30 CFR 884.13(f)(i))

Kentucky is revising this part of the plan to include among those lands and waters eligible for reclamation activities under Title IV of SMCRA, those post-1977 abandoned mine lands and water made eligible for reclamation by the AML Reclamation Act of 1990, which amended SMCRA. By letter dated October 6, 1992, Kentucky corrected several typographical errors in the amendment to Chapter 15, page 15–1, "Maps and Eligible Lands and Water." The amendment as corrected, extends eligibility to those Priority I and II sites for which there are insufficient funds to provide adequate reclamation or abatement and that resulted from: (1) Interim period coal mining operations that occurred between August 4, 1977 and May 18, 1982, or (2) permitted coal mining facilities which operated on or after August 4, 1977, and ended on or before November 5, 1990, and during this period the surety for the mine operator became insolvent. The revision also provides that there must be no

continuing responsibility for reclamation by the operator, permittee, or agent of the permittee under State or Federal statutes.

Section 402(g)(4)(B) of SMCRA provides for the expenditure of funds for the reclamation or drainage abatement of sites if the surface coal mining operation occurred during the period beginning August 4, 1977, and either (a) Ending on or before the date of approval of the State program, or (b) ending on or before the enactment of section 402(g)(4), and during which period the surety of the mine operator became insolvent.

The Director finds Kentucky's proposed amendments to the "Maps of Eligible Lands and Waters" section of its plan to be no less stringent than the requirements of section 402(g) of SMCRA.

B. Revisions to Kentucky's Revised Statutes (KRS) Chapter 350 That Are Substantively Identical to the Corresponding Federal Statute (SMCRA)

KRS Ch 350	Subject	SMCRA
350.560(2)	Reclamation Fees; Allocation of Funds.	402(g)(4).
350.560(3)	Reclamation Fees; Allocation of Funds.	402(g)(4)(C).
350.553(1)	Certification; Completion of Coal Reclamation.	411(a).
350.553(2)	Certification; Eligible Lands, Waters, and Facilities.	411(b).
350.553(3)	Certification; Priorities.	411(c).
350.553(4)	Certification; Specific Sites and Areas not Eligible.	411(d).
350.553(5)	Certification; Utilities and Other Facilities.	411(e).
350.553(6)	Certification	411(f).
350.553(7)	Certification; Application of Other Provisions.	411(g).
350.597(2)	Reclamation Fee; Allocation of Funds.	402(g)(6).

Because the above revisions are identical in meaning to the corresponding provisions of SMCRA, the Director finds that Kentucky's rules are no less stringent than the Federal statute.

c. Revisions to Kentucky's Revised Statutes (KRS) Chapter 350 That Are Not Substantively Identical to the Corresponding Federal Statute (SMCRA)

a. Section 1 of SB–191 amended KRS 350.550(3) by adding a new subparagraph (d) which provides that the AML reclamation fund shall also consist of the interest credited to the fund pursuant to section 401(e) of Pub. L. 95–87 and allocated to the Commonwealth of Kentucky. The corresponding Federal provisions, set forth at section 401(b)(5) of SMCRA, similarly provide that the Abandoned Mine Land Reclamation Fund shall include interest credited to the fund under section 401(e) of SMCRA. The Director finds that the revision provides for the addition of such amounts to Kentucky's fund if an allocation is made to the Commonwealth, and does not establish a specific entitlement to such an allocation and, therefore, is no less stringent than the requirements of SMCRA.

b. Section 1 of SB–191 amends KRS 350.550(4) by adding at subparagraph (g) as one of the purposes for which the AML reclamation fund may be used, a reference to Section 507(c) of SMCRA relating to the Small Operator Assistance Program (SOAP). Section 402(g)(3)(A) of SMCRA provides for the expenditure of amounts available in the fund for the purpose of Section 507(c). The Director finds that Kentucky's addition at KRS 350.550(4) is no less stringent than the requirements of section 402(g) of SMCRA.

c. Section 2 of SB–191 amends KRS 350.560 by adding subsection (4) which provides for the use of funds, allocated to Kentucky by the Secretary of the Interior, in connection with protecting, repairing, replacing, constructing or enhancing facilities relating to water supply, including water distribution facilities and treatment plants, to replace water supplies adversely affected by coal mining practices. The new rule further provides that if the adverse effect occurred both prior to and after August 3, 1977, KRS 350.560 (1) and (2) will not be construed to prohibit use of funds for the purposes cited if the adverse effects occurred predominantly prior to August 3, 1977. This provision is similar to the rule contained in section 403(b) of SMCRA. However, the Federal rule provides for the expenditure of up to 30 percent of the funds allocated to the States in any year through grants made available under sections 402(g) (1) and (5) of SMCRA, while Kentucky's proposal refers to 30 percent of funds allocated through annual grants, without specific reference to sections 402(g) (1) and (5). The Director finds that since the only allocations currently received, or anticipated, by Kentucky are through grants made available under sections 402(g) (1) and (5) of SMCRA, the provisions of KRS 350.560(4) are no less stringent than the requirements of section 403(b) of SMCRA.

d. Section 2 of SB–191 amends KRS 350.560 by adding section (5) which provides that where the Governor has made a certification under KRS 350.553 and the Secretary of the Interior has concurred, the reclamation categories set forth at KRS 350.553(2) shall take effect, supplanting the categories set forth at KRS 350.560 (1), (2) and (4). The Director finds that KRS 350.560(5) is not inconsistent with the requirements of SMCRA and is approving the provisions of that rule with the understanding that Kentucky will deal with post-certification coal problems pursuant to the provisions of KRS 350.560 (1), and (2) and (4).

e. Section 4 of SB–191 amends KRS Chapter 350 by adding section 350.597(1) which provides that the Finance and Administration Cabinet shall establish a special trust fund which may receive and retain up to 10 percent of the total grants made annually by the Secretary of the Interior, pursuant to section 402(g)(6) and (7) of SMCRA. This provision is similar to the Federal provision set forth at section 402(g)(6) of SMCRA. However, the Federal provision refers to 10 percent of the total of the grants made annually under section 402(g)(1) and (5) of SMCRA whereas, Kentucky's proposal refers to 10 percent of the total grants made annually. The Director finds that since the only allocations currently received, or anticipated, by Kentucky are through grants made available under sections 402(g)(1) and (5) of SMCRA, the provisions of KRS 350.597(1) are no less stringent than the requirements of section 402(g)(6) of SMCRA.

IV. Summary and Disposition of Comments

Public Comments

The public comment periods and opportunities to request a public hearing were announced as follows: (1) For the submission dated June 24, 1992 (Administrative Record Number K–63), in the September 14, 1992, **Federal Register** (57 FR 41897); and (2) For the submission dated July 30, 1992 (Administrative Record Number KY–1171), in the September 23, 1992, **Federal Register** (57 FR 43952). The comment periods closed on October 14, 1992, and October 23, 1992.

respectively. No one requested an opportunity to testify at the scheduled public hearings so no hearings were held.

By letter dated October 14, 1992, the Kentucky Resources Council (KRC) filed comments regarding the revisions to Kentucky's AMLR Plan. The KRC stated that the narrative description of eligible lands and waters in Chapter 15, page 15–1, does not accurately reflect the two criteria for eligibility of post-Act abandoned mine lands for AML expenditures. In addition, the KRC feels that the paraphrasing of the purposes of Title IV of SMCRA as set forth in Chapter 3 of Kentucky's AMLR plan, does not accurately reflect the goals enumerated in 30 U.S.C. 1233.

As set forth in the Director's Findings section herein, the Director has reviewed Kentucky's submission and determined that the proposed revisions to Kentucky's AMLR plan are no less stringent than, nor inconsistent with, the requirements of SMCRA.

Agency Comments

Pursuant to section 503(b) of SMCRA and the implementing regulations of 30 CFR 732.17(h)(11)(i), comments were solicited from various government agencies with an actual or potential interest in the Kentucky program. The U.S. Forest Service, Bureau of Mines, Mine Safety and Health Administration, and Bureau of Land Management generally considered the amendment to be acceptable or submitted an acknowledgement with no comment.

V. Director's Decision

Based on the above findings, the Director is approving the program amendments to the Kentucky Abandoned Mine Land Reclamation Plan and the revisions to the Kentucky Revised Statute Chapter 350 as submitted by Kentucky on June 24, 1992, and July 30, 1992, respectively.

The Federal rules at 30 CFR part 917 codifying decisions concerning the Kentucky program are being amended to implement this decision. This final rule is being made effective immediately to expedite the State program amendment process and to encourage the State to conform its program with the Federal standards without delay. Consistency of State and Federal standards is required by SMCRA.

EPA Concurrence

Under 30 CFR 732.17(h)(11)(ii), the Director is required to obtain the written concurrence of the Administrator of the Environmental Protection Agency (EPA) with respect to any provisions of a State program amendment which relate to air or water quality standards promulgated under the authority of the Clean Water Act (33 U.S.C. 1251 *et seq.*) or the Clean Air Act (42 U.S.C. 7401 *et seq.*). The Director has determined that this amendment contains no provisions in these categories and that EPA's concurrence is not required.

VI. Procedural Determinations

Executive Order 12291

On March 30, 1992, the Office of Management and Budget (OMB) granted the Office of Surface Mining Reclamation and Enforcement (OSM) an exemption from sections 3, 4, 7 and 8 of Executive Order 12291 for actions related to approval or disapproval of State and Tribal abandoned mine land reclamation plans and revisions thereof. Therefore, preparation of a regulatory impact analysis is not necessary and OMB regulatory review is not required.

Executive Order 12778

The Department of the Interior has conducted the reviews required by section 2 of Executive Order 12778 and has determined that, to the extent allowed by law, this rule meets the applicable standards of subsections (a) and (b) of that section. However, these standards are not applicable to the actual language of State and Tribal abandoned mine land reclamation plans and revisions thereof since each such plan is drafted and adopted by a specific State or Tribe, not by OSM. Decisions on proposed State and Tribal abandoned mine land reclamation plans and revisions thereof submitted by a State or Tribe are based on a determination of whether the submittal meets the requirements of Title IV of the Surface Mining Control and Reclamation Act (SMCRA) (30 U.S.C. 1231–1243) and the applicable Federal regulations at 30 CFR parts 884 and 888.

National Environmental Policy Act

No environmental impact statement is required for this rule since agency decisions on proposed State and Tribal abandoned mine land reclamation plans and revisions thereof are categorically excluded from compliance with the National Environmental Policy Act (42 U.S.C. 4332) by the Manual of the Department of the Interior (516 DM 6, appendix 8, paragraph 8.4B(29)).

Paperwork Reduction Act

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under the Paperwork Reduction Act, 44 U.S.C. 3507 *et seq.*

Regulatory Flexibility Act

The Department of the Interior has determined that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et. seq.*). The State submittal which is the subject of this rule is based upon Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic effect upon a substantial number of small entities. Hence, this rule will ensure that existing requirements established by SMCRA or previously promulgated by OMS will be implemented by the State. In making the determination as to whether this rule would have a significant economic impact, the Department relied upon the data and assumptions in the analyses for the corresponding Federal regulations.

List of Subjects in 30 CFR Part 917

Intergovernmental relations, Surface mining, Underground mining, Abandoned mine land reclamation.

Dated: October 30, 1992.

David G. Simpson,

Acting Assistant Director, Eastern Support Center.

For the reasons set forth in the preamble, title 30, chapter VIII, subchapter T of the Code of Federal Regulations is amended as set forth below:

PART 917—KENTUCKY

1. The authority citation for part 917 continues to read as follows:

Authority: 30 U.S.C. 1201 *et seq.*

2. 30 CFR 917.15 is amended by adding a new paragraph (nn) to read as follows:

§ 917.15 Approval of regulatory program amendments.

* * * * *

(nn) The following amendments to Kentucky Revised Statutes (KRS) submitted to OSM on July 30, 1992, are approved effective December 17, 1992.

Amendments to KRS Chapter 350 sections 350.550, 350.553, 350.560 and 350.597 as contained in Senate Bill 191.

3. 30 CFR 917.21 is amended by adding a new paragraph (c) to read as follows:

§ 917.21 Amendment to approved Kentucky abandoned mine land reclamation plan.

* * * * *

(c) The following amendments submitted to OSM on June 24, 1992, are approved effective on December 17,

1992. The amendments consist of the following modifications to the Kentucky program:

Revisions to the following provisions of the Kentucky Abandoned Mine Land Reclamation Plan:

Chapter 3—Goals and Obligations

Chapter 15—Maps of Eligible Lands and Waters

30 CFR Part 920

Maryland Regulatory Program; Small Operator Assistance Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule; approval of amendment.

SUMMARY: OSM is announcing the approval of a proposed amendment to the Maryland regulatory program (hereinafter referred to as the Maryland program) approved under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendment expands the coverage of Maryland's Small Operator Assistance Program (SOAP) and makes certain changes to Maryland's public notice and hearing regulations. The amendment revises the Maryland program to be no less effective than the corresponding Federal regulations.

EFFECTIVE DATE: December 17, 1992.

FOR FURTHER INFORMATION CONTACT: Robert Biggi, Director, Harrisburg Field Office, Harrisburg Transportation Center, 4th and Market Streets, suite 3C, Harrisburg, PA 17101; Telephone: (717) 782-4036.

SUPPLEMENTARY INFORMATION:

I. Background on the Maryland Program.
II. Submission of Amendments.
III. Director's Findings.
IV. Summary and Disposition of Comments.
V. Director's Decision.
VI. Procedural Determinations.

I. Background on the Maryland Program

On February 18, 1982, the Secretary of the Interior approved the Maryland program. Information regarding the general background on the Maryland program, including the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Maryland program can be found in the February 18, 1982, **Federal Register** (47 FR 7214). Actions taken subsequent to the approval of the Maryland program are identified at 30 CFR 920.12, 30 CFR 920.15, and 30 CFR 920.16.

II. Submission of Amendments

By letter dated July 14, 1992, the Maryland Bureau of Mines (Maryland) submitted a program amendment to OSM (Administrative Record No. MD-556.00). The proposed amendment, House Bill Number 1284, revises section 7-505 of the Natural Resources Article of the Annotated Code of Maryland (the Code) by: (a) Increasing the SOAP coal eligibility limit for any surface coal mining operator from 100,000 tons to 300,000 tons; (b) modifying the State's public notice and hearing procedures; (c) deleting provisions for the amendment of a permit; and (d) referencing State and Federal pollution standards. The amendment also revises section 7-206 by specifying the bond release and reclamation responsibilities of Maryland's Land Reclamation Committee (the Committee).

OSM announced receipt of the proposed amendment in the September 11, 1992, **Federal Register** (57 FR 41712) and in the same notice opened the public comment period and provided opportunity for a public hearing on the adequacy of the proposed amendment. The comment period closed on October 13, 1992.

III. Director's Findings

Set forth below, pursuant to SMCRA and the Federal regulations at 30 CFR 732.17, are the Director's findings concerning the proposed amendment submitted on July 14, 1992. Any revisions not specifically addressed below are found to be no less stringent than SMRA and no less effective than the Federal rules.

Revisions which are not discussed below revise cross-references and paragraph notations to reflect organizational changes resulting from this amendment.

Revisions to Maryland's Regulations that are Substantively Identical to the Corresponding Federal Regulations

State regulation	Subject	Federal counterpart
Maryland Annotated Code 7-505(c)(4).	Soap	SMCRA Section 507(c).

Revisions to Maryland's Regulations that are not Substantively Identical to the Corresponding Federal Regulations

Maryland is revising section 7-205 by transferring the provisions of paragraphs (b)(2) and (c) to paragraphs (A), (B), and (C) of section 7-206. The provisions of paragraphs (b)(2) and (c) have previously been approved.

Maryland is revising section 7-206(A) of the Code to require that the Committee approve a permit applicant's proposed reclamation plan. The Committee is required to publish a public notice in a newspaper of general circulation in the county of the proposed mining operation announcing receipt of a proposed reclamation plan. The public notice shall include certain identifying information and must announce that written comments and requests for a public informational hearing will be received by the Committee for at least 30 days after the newspaper publication. If a hearing is requested, the Committee is required to hold the meeting 15 to 60 days after it provides public notice. Written comments are to be accepted until the date of the hearing. The Committee is required to approve or reject the proposed plan after the hearing and notify the applicant, Department of Natural Resources (the Department), and participants of its decision.

The Federal regulations at 30 CFR 773.13 pertaining to public participation and 30 CFR 773.19(b) pertaining to notification procedures require the regulatory authority to provide public notice of a permit application and to notify the applicant of its decision regarding approval or disapproval of the permit. The permit application includes a reclamation plan. Maryland's currently approved implementing regulations at the Code of Maryland Administrative Regulations (COMAR) 08.13.09.04 pertaining to permit reviews are substantively identical to the Federal regulations at 773.13 and 773.19(b). In addition, Maryland is providing for separate public notice and hearing procedures for reclamation plans. There is no comparable requirement in SMCRA or the Federal regulations to provide for separate notice and hearing procedures for a reclamation plan. However, the Director finds the proposed revisions at 7-206(A) not inconsistent with the Federal regulations at 30 CFR 773.13 and 30 CFR 773.19(b).

Maryland is revising section 7-505(a) of the Code to delete the provision for amended permits. The Federal regulations at 30 CFR part 773 pertaining to permits do not provide for permit amendments. The Director finds the proposed deletion at section 7-505(a) does not render the Maryland program less effective than the Federal regulations.

Maryland is revising section 7-505(d) of the Code to require that the Department conduct a public

informational hearing if one is requested pertaining to an application for permit or permit revision. The current Maryland rules provide for a joint public hearing conducted by the Department and the Committee. The Department is required to grant, modify, or deny the application and notify the applicant and any participants of its decision in writing. The permit applicant has the burden of establishing the application's compliance with all applicable rules and regulations. The Federal regulations at 30 CFR 773.13(c) provide for informal conferences on permit applications. The Federal regulations at 30 CFR 773.15(a)(2) provides that the permit applicant shall have the burden of establishing the application's compliance with all requirements of the regulatory program. The Federal regulations at 30 CFR 773.19(b) provide for the written notification to the applicant by the regulatory authority of its decision to approve or disapprove a permit application. Maryland's currently approved implementing regulations at COMAR 08.13.09.04K (2) and (4) are substantively identical to the Federal regulations. The Director finds the proposed revisions at section 7–505(d) when considered along with COMAR 08.13.09.04K (2) and (4), no less effective than the Federal regulations at 30 CFR 773.13(c), 30 CFR 773.15(a)(2), and 30 CFR 773.19(b).

The provisions of paragraph (d)(5), with the exception of the last sentence, have been transferred to section 7–206(A)(4). The last sentence, which has been deleted, prohibits the Department from approving a permit or permit revision if the Committee rejects the plan. Because the Federal regulations at 30 CFR 773.15 pertaining to the review of permit applications do not include this requirement, the Director finds that the proposed deletion does not render the Maryland program less effective than the Federal regulations.

Maryland is revising section 7–505(f) to require that the operator be responsible for the prevention of stream pollution in excess of Federal or State standards. The current statute requires the operator to comply with standards established by the Department. The Federal rules at section 515(b) of SMCRA pertaining to environmental protection performance standards prohibit contributions of suspended solids to streamflow in excess of Federal or State requirements. The Director finds the proposed revision to section 7–505(f) no less effective than the Federal rule at section 515(b) of SMCRA.

Maryland is revising section 7–505(j) to require that the Director of the Bureau of Mines follow certain notification procedures if a permit application or permit revision is not approved. The current statute specifies the notification procedures for a permit application or amended application. The Federal regulations at 30 CFR 773.19(b) and 30 CFR 774.15(e) pertaining to notification procedures for permits and permit revisions require that the regulatory authority issue written notification of its decision to certain parties. The Director finds the proposed revision at section 7–505(f) no less effective than the Federal regulations at 30 CFR 773.19(b) and 30 CFR 774.15(e).

IV. Summary and Disposition of Comments

Public Comments

The public comment period announced in the September 11, 1992, **Federal Register** (57 FR 41712) ended on October 13, 1992. No public comments were received and a public hearing was not held as no one requested an opportunity to provide testimony.

Agency Comments

Pursuant to section 503(b) of SMCRA and the implementing regulations at 30 CFR 732.17(h)(11)(i), comments were solicited from various Federal agencies with an actual or potential interest in the Maryland program. The Department of the Interior, Bureau of Mines, the Department of Labor, Mine Safety and Health Administration, and the Department of Agriculture, Soil Conservation Service, all concurred without comment.

V. Director's Decision

Based on the above findings, the Director is approving the program amendment submitted by Maryland on July 14, 1992.

The Federal regulations at 30 CFR part 920 codifying decisions concerning the Maryland program are being amended to implement this decision. This final rule is being made effective immediately to expedite the State program amendment process and to encourage states to bring their programs in conformity with the Federal standards without undue delay. Consistency of State and Federal standards is required by SMCRA.

EPA Concurrence

Under 30 CFR 732.17(h)(11)(ii), the Director is required to obtain the written concurrence of the Administrator of the Environmental Protection Agency with respect to any provisions of a State program amendment which relate to air or water quality standards promulgated under the authority of the Clean Water Act (33 U.S.C. 1251 *et seq.*) or the Clean Air Act (42 U.S.C. 7401 *et seq.*). The Director has determined that this amendment contains no such provisions.

VI. Procedural Determinations

Executive Order 12291

On July 12, 1984, the Office of Management and Budget (OMB) granted the Office of Surface Mining Reclamation and Enforcement (OSM) an exemption from sections 3, 4, 7 and 8 of Executive Order 12291 for actions related to approval or conditional approval of State regulatory programs, actions and program amendments. Therefore, preparation of a regulatory impact analysis is not necessary and OMB regulatory review is not required.

Executive Order 12778

The Department of the Interior has conducted the reviews required by section 2 of Executive Order 12778 and has determined that, to the extent allowed by law, this rule meets the applicable standards of subsections (a) and (b) of that section. However, these standards are not applicable to the actual language of State regulatory programs and program amendments since each such program is drafted and promulgated by a specific State, not by OSM. Under sections 503 and 505 of the Surface Mining Control and Reclamation Act (SMCRA) (30 U.S.C. 1253 and 1255) and 30 CFR 730.11, 732.13 and 732.17(h)(10), decisions on proposed State regulatory programs and program amendments submitted by the States must be based solely on a determination of whether the submittal is consistent with SMCRA and its implementing Federal regulations and whether the other requirements of 30 CFR parts 730, 731, and 732 have been met.

National Environmental Policy Act

No environmental impact statement is required for this rule since section 702(d) of SMCRA (30 U.S.C. 1292(d)) provides that agency decisions on proposed State regulatory program provisions do not constitute major Federal actions within the meaning of section 102(2)(c) of the National Environmental Policy Act, 42 U.S.C. 4332(2)(C).

Paperwork Reduction Act

This rule does not contain information collection requirements that require approval by the Office of Management and Budget under the

Paperwork Reduction Act, 44 U.S.C. 3507 *et seq.*

Regulatory Flexibility Act

The Department of the Interior has determined that this rule will not have a significant economic impact on a substantial number of entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The State submittal which is the subject of this rule is based upon counterpart Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic effect upon a substantial number of small entities. Hence, this rule will ensure that existing requirements previously promulgated by OSM will be implemented by the State. In making the determination as to whether this rule would have a significant economic impact, the Department relied upon the data and assumptions for the counterpart Federal regulations.

List of Subjects in 30 CFR Part 920

Intergovernmental relations, Surface mining, Underground mining.

Dated: October 29, 1992.

David G. Simpson,

Acting Assistant Director, Eastern Support Center.

For the reasons set out in the preamble, title 30, chapter VII, subchapter T of the Code of Federal Regulations is amended as set forth below:

PART 920—MARYLAND

1. The authority citation for part 920 continues to read as follows:

Authority: 30 U.S.C. 1201 *et seq.*

2. In § 920.15, a new paragraph (s) is added to read as follows:

§ 920.15 Approval of amendments to State regulatory programs.

* * * * *

(s) The following amendment submitted to OSM on July 14, 1992, is approved effective December 17, 1992. The amendment consists of the following modifications to the Maryland program:

(1) Revision of the following statutes of the Maryland Annotated Code:

7–505(a), (c), (d), (f), (j)—Permits.

(2) Addition of the following statute to the Maryland Annotated Code: 7–206—Reclamation Plan, Hearings.

(3) Deletion of the following statutes from the Maryland Annotated Code: 7–205(b)(2), (c)—Land Reclamation Committee.

7–505(d)(5)—Reclamation Plan.

BILLING CODE 4310–05–M

DEPARTMENT OF DEFENSE

Department of the Navy

32 CFR Part 706

Certifications and Exemptions Under the International Regulations for Preventing Collisions at Sea, 1972; Amendment

AGENCY: Department of the Navy, DOD.

ACTION: Final rule.

SUMMARY: The Department of the Navy is amending its certifications and exemptions under the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS), to reflect that the Judge Advocate General of the Navy has determined that USS HAMPTON (SSN 767) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with certain provisions of the 72 COLREGS without interfering with its special functions as a naval submarine. The intended effect of this rule is to warn mariners in waters where 72 COLREGS apply.

EFFECTIVE DATE: November 30, 1992.

FOR FURTHER INFORMATION CONTACT: Captain R.R. Rossi, JAGC, U.S. Navy, Admiralty Counsel, Office of the Justice Advocate General, Navy Department, 200 Stovall Street, Alexandria, VA 22332–2400, Telephone number: (703) 325–9744.

SUPPLEMENTARY INFORMATION: Pursuant to the authority granted in 33 U.S.C. 1605, the Department of the Navy amends 32 CFR part 706. This amendment provides notice that the Judge Advocate General of the Navy, under authority delegated by the Secretary of the Navy, has certified that USS HAMPTON (SSN 767) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with 72 COLREGS: Rule 21(c), pertaining to the arc of visibility of the stemlight; Annex I, section 2(a)(i), pertaining to the height of the masthead light: Annex 1, section 2(k), pertaining to the height and relative positions of the anchor lights; and Annex 1, section 3(b), pertaining to the location of the sidelights. Full compliance with the above-mentioned 72 COLREGS provisions would interfere with the special functions and purposes of the vessel. The Judge Advocate General of the Navy has also certified that the aforementioned lights are located in closest possible compliance with the applicable 72 COLREGS requirements.

Notice is also provided to the effect that USS HAMPTON (SSN 767) is a member of the SSN–688 class of vessels for which certain exemptions, pursuant to 72 COLREGS, Rule 38, have been previously authorized by the Secretary of the Navy. The exemptions pertaining to that class, found in the existing tables of § 706.3, are equally applicable to USS HAMPTON (SSN 767).

Moreover, it has been determined, in accordance with 32 CFR parts 296 and 701, that publication of this amendment for public comment prior to adoption is impracticable, unnecessary, and contrary to public interest since it is based on technical findings that the placement of lights on this vessel in a manner differently from that prescribed herein will adversely affect the vessel's ability to perform its military functions.

List of Subjects in 32 CFR Part 706

Marine safety, Navigation (water), and Vessels.

PART 706—[AMENDED]

Accordingly, 32 CFR part 706 is amended as follows:

1. The authority citation for 32 CFR part 706 continues to read:

Authority: 33 U.S.C. 1605.

§ 706.2 [Amended]

2. Table One of § 706.2 is amended by adding the following vessel:

Vessel	Number	Distance in meters of forward masthead light below minimum required height. Section 2(a)(i), Annex I
USS Hampton	SSN 767	3.5

3. Table Three of § 706.2 is amended by adding the following vessel:

Vessel	Number	Masthead light arc of visibility rule 21(A)	Side lights arc of visibility rule 21(B)	Stern lights arc of visibility rule 21(C)	Side lights distance inboard of ship sides in meters annex I section 3(b)	Stern lights distance forward of stern in meters rule 21(C)	Forward anchor lights height above hull in meters annex I section 2(k)	Anchor lights relationship of aft light to forward light in meters annex I section 2(k)
USS Hampton	SSN 767			209	4.3	6.1	3.4	1.7 below

Dated: November 30, 1992.

Approved:

W.L. Schachte, Jr.,

Rear Admiral, JAGC, U.S. Navy, Acting Judge Advocate General.

BILLING CODE 3810–AE–M

32 CFR Part 706

Certifications and Exemptions Under the International Regulations for Preventing Collisions at Sea, 1972; Amendment

AGENCY: Department of the Navy, DoD.

ACTION: Final rule.

SUMMARY: The Department of the Navy is amending its certifications and exemptions under the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS), to reflect that the Judge Advocate General of the Navy has determined that USS CAPE ST. GEORGE (CG 71) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with certain provisions of the 72 COLREGS without interfering with its special functions as a naval cruiser. The intended effect of this rule is to warn mariners in waters where 72 COLREGS apply.

EFFECTIVE DATE: December 2, 1992.

FOR FURTHER INFORMATION CONTACT: Captain R.R. Rossi, JAGC, U.S. Navy, Admiralty Counsel, Office of the Judge Advocate General, Navy Department, 200 Stovall Street, Alexandria, VA 22332–2400, Telephone number: (703) 325–9744.

SUPPLEMENTARY INFORMATION: Pursuant to the authority granted in 33 U.S.C. 1605, the Department of the Navy amends 32 CFR part 706. This amendment provides notice that the Judge Advocate General of the Navy, under authority delegated by the Secretary of the Navy, has certified that USS CAPE ST. GEORGE (CG 71) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with 72 COLREGS, Annex I, section 3(a), pertaining to the location of the forward masthead light in the forward quarter of the ship, the placement of the after masthead light, and the horizontal distance between the forward and after masthead lights, without interfering with its special functions as a naval cruiser. The Judge Advocate General of the Navy has also certified that the aforementioned lights are located in closest possible compliance with the applicable 72 COLREGS requirements.

Moreover, it has been determined, in accordance with 32 CFR parts 296 and 701, that publication of this amendment for public comment prior to adoption is impracticable, unnecessary, and contrary to public interest since it is based on technical findings that the placement of lights on this vessel in a manner differently from that prescribed herein will adversely affect the vessel's ability to perform its military functions.

32 CFR Part 706

Certifications and Exemptions Under the International Regulations for Preventing Collisions at Sea, 1972; Amendment

AGENCY: Department of the Navy, DoD.

ACTION: Final rule.

SUMMARY: The Department of the Navy is amending its certifications and exemptions under the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS), to reflect that the Judge Advocate General of the Navy has determined that USS CHARLOTTE (SSN 766) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with certain provisions of the 72 COLREGS without interfering with its special functions as a naval submarine. The intended effect of this rule is to warn mariners in waters where 72 COLREGS apply.

EFFECTIVE DATE: November 30, 1992.

FOR FURTHER INFORMATION CONTACT: Captain R.R. Rossi, JAGC, U.S. Navy, Admiralty Counsel, Office of the Judge Advocate General, Navy Department, 200 Stovall Street, Alexandria, VA

22332–2400, Telephone number: (703) 325–9744.

SUPPLEMENTARY INFORMATION: Pursuant to the authority granted in 33 U.S.C. 1605, the Department of the Navy amends 32 CFR part 706. This amendment provides notice that the Judge Advocate General of the Navy, under authority delegated by the Secretary of the Navy, has certified that USS CHARLOTTE (SSN 766) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with 72 COLREGS: Rule 21(c), pertaining to the arc of visibility of the sternlight; Annex I, section 2(a)(i), pertaining to the height of the masthead light; Annex 1, section 2(k), pertaining to the height and relative positions of the anchor lights; and Annex 1, section 3(b), pertaining to the location of the sidelights. Full compliance with the above-mentioned 72 COLREGS provisions would interfere with the special functions and purposes of the vessel. The Judge Advocate General of the Navy has also certified that the aforementioned lights are located in closest possible compliance with the applicable 72 COLREGS requirements.

Notice is also provided to the effect that USS CHARLOTTE (SSN 766) is a member of the SSN–688 class of vessels for which certain exemptions, pursuant to 72 COLREGS, Rule 38, have been previously authorized by the Secretary of the Navy. The exemptions pertaining to that class, found in the existing tables of § 706.3, are equally applicable to USS CHARLOTTE (SSN 766).

Moreover, it has been determined, in accordance with 32 CFR parts 296 and 701, that publication of this amendment for public comment prior to adoption is impracticable, unnecessary, and contrary to public interest since it is based on technical findings that the placement of lights on this vessel in a manner differently from that prescribed herein will adversely affect the vessel's ability to perform its military functions.

Certifications and Exemptions Under the International Regulations for Preventing Collisions at Sea, 1972; Amendment

AGENCY: Department of the Navy, DoD.

ACTION: Final rule.

SUMMARY: The Department of the Navy is amending its certifications and exemptions under the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS), to reflect that the Judge Advocate General of the Navy has determined that USS SPRINGFIELD (SSN 761) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with certain provisions of the 72 COLREGS without interfering with its special functions as a naval submarine. The intended effect of this rule is to warn mariners in waters where 72 COLREGS apply.

EFFECTIVE DATE: November 4, 1992.

FOR FURTHER INFORMATION CONTACT: Captain R.R. Rossi, JAGC, U.S. Navy, Admiralty Counsel, Office of the Judge Advocate General, Navy Department, 200 Stovall Street, Alexandria, VA 22332–2400, Telephone number: (703) 325–9744.

SUPPLEMENTARY INFORMATION: Pursuant to the authority granted in 33 U.S.C. 1605, the Department of the Navy amends 32 CFR part 706. This amendment provides notice that the Judge Advocate General of the Navy, under authority delegated by the Secretary of the Navy, has certified that USS SPRINGFIELD (SSN 761) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with 72 COLREGS: Rule 21(c), pertaining to the arc of visibility of the sternlight; Annex I, section 2(a)(i), pertaining to the height of the masthead light; Annex 1, section 2(k), pertaining to the height and relative positions of the anchor lights; and Annex 1, section 3(b), pertaining to the location of the sidelights. Full compliance with the above-mentioned 72 COLREGS provisions would interfere with the special functions and purposes of the vessel. The Judge Advocate General of the Navy has also certified that the aforementioned lights are located in closest possible compliance with the applicable 72 COLREGS requirements.

Notice is also provided to the effect that USS SPRINGFIELD (SSN 761) is a member of the SSN–688 class of vessels for which certain exemptions, pursuant to 72 COLREGS Rule 38, have been previously authorized by the Secretary of the Navy. The exemptions pertaining to that class, found in the existing tables of § 706.3, are equally applicable to USS SPRINGFIELD (SSN 761).

Moreover, it has been determined, in accordance with 32 CFR parts 296 and 701, that publication of this amendment for public comment prior to adoption is impracticable, unnecessary, and contrary to public interest since it is based on technical findings that the placement of lights on this vessel in a manner differently from that prescribed herein will adversely affect the vessel's ability to perform its military functions.

List of Subjects in 32 CFR Part 706

Marine safety, Navigation (water), and Vessels.

PART 706—[AMENDED]

Accordingly, 32 CFR part 706 is amended as follows:

1. The authority citation for 32 CFR part 706 continues to read:

Authority: 33 U.S.C. 1605.

§ 706.2 [Amended]

2. Table One of § 706.2 is amended by adding the following vessel:

Vessel	Number	Distance in meters of forward masthead light below minimum required height. § 2(a)(i), Annex I
USS Springfield.	SSN 761	3.5

3. Table Three of § 706.2 is amended by adding the following vessel:

Vessel	Number	Masthead light arc of visibility rule 21(A)	Side lights arc of visibility rule 21(B)	Stern lights arc of visibility rule 21(C)	Side lights distance inboard of ship sides in meters annex I section 3(b)	Stern lights distance forward of stern in meters rule 21(C)	Forward anchor lights height above hull in meters annex I section 2(k)	Anchor lights relationship of aft light to forward light in meters annex I section 2(k)
USS Springfield	SSN 761	.....	.....	205	4.2	6.2	3.5	1.7 below

Dated: November 4, 1992.

Approved:

W.L. Schachte, Jr.,

Rear Admiral, JAGC, U.S. Navy, Acting Judge Advocate General.

BILLING CODE 3810–AE–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

[COTP Baltimore, MD, Regulation 92–05–31]

Safety Zone Regulation: Upper Chesapeake Bay, Patapsco River, Elk River, C&D Canal, MD

AGENCY: Coast Guard, DOT.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard Marine Safety Office Baltimore is establishing a temporary moving safety zone for the upper Chesapeake Bay, Elk River, Chesapeake and Delaware Canal (C&D Canal), Patapsco River and Ruckert Terminal Pier C, Baltimore, Maryland. The safety zone is necessary to protect vessels, the port community and the environment from potential safety and environmental hazards associated with the transit of a Liquefied Petroleum Gas (LPG) Vessel. This emergency rule provides explicit instructions for the LPG vessel and any vessels operating in the vicinity of the LPG vessel.

EFFECTIVE DATES: This regulation is effective from 8 a.m. December 15, 1992 to 12 a.m. December 17, 1992, unless terminated sooner by the Captain of the Port, Baltimore, MD.

FOR FURTHER INFORMATION CONTACT: Lieutenant (jg) Mark Williams, U.S. Coast Guard Marine Safety Office, Baltimore, U.S. Custom House, 40 South Gay Street, Baltimore, Maryland 21202–4022, (410) 962–5104.

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. 553, a notice of proposed rule making has not been published for this regulation and good cause exists for making it effective in less than 30 days from the date of publication in the **Federal Register**. Adherence to normal rule making procedures would not have been possible. Specifically, the vessel operator plans commencing said operations within 30 days of Coast Guard approval. Approval for this LPG facility was not granted until November 12, 1992, and the company's target operational start-up date is December 7, 1992. Publishing an NPRM and delaying the safety zone's effective date would be contrary to the public interest and immediate action is needed to protect the environment and mariners against potential hazards associated with the transit of a vessel transporting liquefied petroleum gas.

Drafting Information

The drafters of this regulation are LT (jg) Mark Williams, project officer for the Captain of the Port, Baltimore, Maryland, and Lieutenant Commander K.B. Letourneau, project attorney, Fifth Coast Guard District Legal Staff.

Discussion of Regulations

This safety zone includes a specific area around the LPG vessel while it is underway in a loaded or prepped condition, at anchor and during cargo or LPG transfer operations. The safety zone also will be in effect while the vessel, in a loaded condition transits the upper Chesapeake Bay to Ruckert Terminal, Pier C via the Patapsco river, to conduct LPG cargo tank cooling and preparations. Upon completion of tank preparation operations, the vessel will then transit the Patapsco River, Upper Chesapeake Bay, Elk River and then through the C&D Canal to the Sun Oil Company Refinery, Marcus Hook, Pennsylvania. This Safety Zone will extend 100 yards forward and aft of the vessel, and 50 yards on either side of the vessel while the vessel is underway. Additionally, no vessel may approach within 100 feet of the LPG vessel in a loaded or prepped condition while the LPG vessel is moored, nor anchor within 100 yards from the LPG vessel. These regulations are necessary to control all commercial and recreational traffic and to provide for the safety of life and property on navigable waters during the transit of the loaded or prepped LPG vessel. Since the main shipping channels will not be closed, the impacts on routine navigation are expected to be minimal.

Regulatory Evaluation

This final rule is not considered major under Executive Order 12291 and not significant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979).

The Coast Guard also considered the impact of this regulation on small entities and concluded that such impact is expected to be minimal. Therefore, the Coast Guard certifies under 5 U.S.C. 605(b), that this regulation will not have a significant economic impact on a substantial number of small entities.

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the final rule does not raise sufficient federalism implications to warrant the preparation of a Federalism Assessment.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Final Regulations

In consideration of the foregoing, part 165 of title 33, Code of Federal Regulations is amended as follows:

1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 C.F.R. 1.05–1(g), 6.04–1, 6.04–1, 6.04–6, and 160.5; 49 C.F.R. 1.46.

2. A temporary § 165.T0591 is added to read as follows:

§ 165.T0591 Moving Safety Zone: Chesapeake Bay, Elk River, C&D Canal, Patapsco River, Baltimore, Maryland.

(a) *Location.* The following area is a safety zone: While transiting the upper Chesapeake Bay, Patapsco River, Elk River, and C&D Canal, the waters surrounding the Liquefied Petroleum Gas vessel 100 yards forward and aft, 50 yards on either side of the vessel while underway, and transiting the bay, and 100 feet on all sides of the vessel while moored or at anchor, while the vessel contains Liquid Petroleum gas, either loaded or prepped.

(b) *Definitions.* The designated representative of the Captain of the Port is any Coast Guard commissioned, warrant or petty officer who has been authorized by the Captain of the Port Baltimore, Maryland to act on his behalf. The following officers have or will be designated by the Captain of the Port: The Coast Guard Patrol Commander, the senior boarding officer on each vessel enforcing the safety zone and the Duty Officer at the Marine Safety Office Baltimore, Maryland.

(i) The Captain of the Port and the Duty Officer at the Marine Safety Office, Baltimore, Maryland can be contacted at telephone number (410) 962–5105.

(ii) The Coast Guard Patrol Commander and the senior boarding officer on each vessel enforcing the safety zone can be contacted on VHF–FM channels 16 and 81.

(c) *Local Regulations.* (1) If the LPG vessel is in a loaded or prepped condition it may not transit if visibility is or is expected to be less than two (2) miles. If during the transit visibility becomes less than two (2) miles, the LPG vessel must seek safe anchorage and notify the COTP immediately.

(2) If during the transit of the loaded LPG vessel an emergency situation or navigational equipment problem occurs that affects the safety of the cargo or safe navigation of the vessel, the vessel must seek the nearest safe anchorage and notify the Captain of the Port, Baltimore, MD immediately.

(3) While in a loaded condition, the LPG vessel will be escorted by at least one commercial tug during any movement which occurs above the William Preston Lane Memorial Bridge (Bay Bridge).

(4) The LPG vessel will be escorted by at least one commercial tug during transit from the cargo terminal at Ruckert Terminal Pier C to the entrance to the C&D Canal.

(5) While moored, the LPG vessel must have at least two wire cable mooring lines (firewarps) rigged fore and aft on the outboard side of the vessel within six feet of the water's edge for emergency towing hook-up.

(6) While underway, the LPG vessel must have at least two wire cable mooring lines (firewarps) rigged fore and aft on the vessel within six feet of the water's edge for emergency towing hook-up should the need arise.

(7) Unless exempted by the COTP, the LPG vessel will be escorted by a Coast Guard escort vessel from the LPG Facility at Ruckert Terminal, Pier C, to the Francis Scott Key Memorial Bridge during the outbound transit. The Vessel will also be escorted by a Coast Guard vessel on its inbound transit, from the Francis Scott Key Memorial Bridge to the LPG Facility at Ruckert Terminal, Pier C, if in a loaded condition.

(8) All vessels operating within and approaching the safety zone must maintain a continuous radio guard on channels 13 and 16 VHF–FM while underway.

(9) Overtaking may take place only under conditions where the overtaking is to be completed well before any bends in the channel. Before any overtaking occurs, the pilots, masters and/or operators of both vessels must clearly agree on all factors including vessel speeds, time and location of overtaking.

(10) Above the C&D Canal, the LPG vessel and an oncoming vessel shall not meet at a relative speed greater than twenty (20) knots, or greater than prevailing weather conditions deem prudent. Meeting situations on river or severe channel bends shall be avoided.

(11) Except in times of emergency or with COTP permission, anchoring by the LPG vessel in other than approved anchorages is prohibited.

(12) Transfer of Liquefied Petroleum Gas at anchor or while bunkering is prohibited.

(13) To lesson the dangers of collision and decrease the effects of wake on the LPG vessel. The master, person in charge and/or pilot of the transiting vessel are responsible for ensuring passage at safe speed and should use vessel size and characteristics to determine the safe speed necessary to comply with this requirement. When the LPG vessel is moored at Ruckert Terminal, Pier C, all vessel's transiting this area shall operate at the minimum speed sufficient to maintain steerage.

(14) While at anchor or moored and experiencing periods of sustained winds in excess of 25 knots, but less than 40 knots, the LPG vessel must keep the main engine in a 5 minute standby condition. If sustained winds are 40 knots or over, the main propulsion plant must be on line.

(15) Venting of cargo vapors and inert medium while in the navigable waters of the United States is prohibited.

(16) The operator of any vessel in the immediate vicinity of this safety zone shall:

(i) Contact the LPG Vessel on VHF channels 16 or 13 for passing, meeting or overtaking instructions.

(ii) Stop the vessel immediately upon being directed to do so by any commissioned, warrant, or petty officer on board a vessel displaying a Coast Guard Ensign.

(iii) Proceed as directed by any commissioned, warrant, or petty officer on board a vessel displaying a Coast Guard Ensign.

(iv) Any vessel may anchor outside of the regulated area specified in paragraph (2)(a) of this section, but may not block a navigable channel.

(17) Except for persons or vessels authorized by the Coast Guard Patrol Commanders, no person or vessel may enter or remain in the regulated area.

(d) *Effective Date:* This regulation is effective from 8 a.m. December 15, 1992 to 12 a.m. December 17, 1992, unless sooner terminated by the Captain of the Port, Baltimore, Maryland.

Dated: December 8, 1992.

R.L. Edmiston,

Captain, U.S. Coast Guard, Captain of the Port, Baltimore, Maryland.

BILLING CODE 4910–14–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[IL 33–1–5347; FRL–4521–4]

Approval and Promulgation of Implementation Plans; Illinois

AGENCY: United States Environmental Protection Agency (USEPA).

ACTION: Final rule.

SUMMARY: On June 26, 1987 (52 FR 24036), as corrected on July 31, 1987 (52 FR 28570), USEPA proposed in the alternative either to promulgate for Illinois federal rules for issuance of

construction permits to new and modified air pollution sources located in or affecting nonattainment areas in Illinois (New Source Review or NSR rules), or to approve draft NSR rules then in the process of being adopted by the State, with the understanding that prior to final approval by USEPA the State would complete adoption of the rules. Public comment was solicited on these proposed actions. On March 24, 1987, Illinois submitted to USEPA NSR rules which had been formally adopted by the State. This final rule approves the incorporation of the Illinois NSR rules into the State's SIP. This action also provides direct final approval of Illinois' existing Operating Permit program as satisfying USEPA's recently-adopted criteria regarding federal enforceability. Because USEPA considers this finding to be noncontroversial, it is being undertaken without prior proposal. Finally, this final rule also responds to public comment received on the proposal.

As a consequence of these actions, USEPA is lifting the growth moratorium in all primary nonattainment areas in Illinois which has been in effect since May 26, 1981, when the United States Court of Appeals for the Seventh Circuit overturned USEPA's earlier approval of NSR rules in *Citizens for a Better Environment* v. *United States*, 649 F.2d 522 (7th Cir. 1981).

DATES: These actions will be effective February 16, 1993 unless proper notice is received within 30 days that significant adverse or critical comments regarding USEPA's finding that the State's operating permit program satisfies federal enforceability criteria will be submitted. If such notice is received, timely notice will be published in the **Federal Register**, indicating that USEPA's approval of the federal enforceability aspects of the Illinois operating permit provisions is withdrawn. As is explained in more detail below, USEPA may also withdraw approval of the State's NSR regulations at the same time.

ADDRESSES: Copies of the requested SIP revisions, technical support documents and public comments received are available at the following address: United States Environmental Protection Agency (AR–18J), Region 5, Air and Radiation Division, Regulation Development Branch, 77 West Jackson Boulevard, Chicago, Illinois 60604.

Copies of the regulations being incorporated by reference in today's rule are available for inspection at: Public Information Reference Unit, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

Comments on this rulemaking should be addressed to: J. Elmer Bortzer, Chief (AR–18J), Regulation Development Section, Regulation Development Branch, United States Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, IL 60604.

FOR FURTHER INFORMATION CONTACT: Ronald J. Van Mersbergen, (312) 886–6056.

SUPPLEMENTARY INFORMATION: On June 26, 1987 (52 FR 24036), as corrected on July 31, 1987 (52 FR 28570) (by publication of the text of the proposed Federal NSR promulgation which had been inadvertently omitted from the June 26, 1987 proposed rule), USEPA proposed to promulgate federal NSR rules for Illinois, or, in the alternative, to approve NSR rules drafted by the State, which the State was then in the process of adopting. USEPA proposed to condition approval of the State rules on the requirement that the final NSR rules submitted by Illinois be substantially the same as the State's NSR rules under consideration at the time of USEPA's proposed approval. Public comment was solicited on these proposed actions. Today's final rule responds to the public comments received, and approves for incorporation into the Illinois SIP the State's NSR rules, as finally adopted by the Illinois Pollution Control Board (IPCB) on March 24, 1988, and subsequently, submitted to USEPA. Since USEPA is approving the State NSR rules, it promulgates no federal rules.

At the time of USEPA's proposal, it was assumed by both the State and USEPA that in light of the decision in *Citizens for a Better Environment*, State operating permits issued by Illinois were, as a general proposition, "federally enforceable" for purposes of limiting a source's "potential to emit" under the NSR program. However, on June 28, 1989 (54 FR 27274), USEPA promulgated amendments to its NSR regulations. These amendments clarified the criteria which must be met by a state's operating permit program in order for the operating permit program to be approved by USEPA and incorporated into a SIP, under section 110 of the Clean Air Act (CAA).

Because of the way in which the Illinois NSR program is structured, approval of the State's operating permit program is a prerequisite to federal enforceability of any state operating permit. To assure that the operating permit program satisfies the new requirements, Illinois has submitted to USEPA for its approval, Illinois' previously-adopted regulations governing operating permits.

Since approval of Illinois' operating permit program has a direct bearing on any approval of its NSR rules, USEPA will address Illinois' operating permit program submissions first.

I. The Illinois Operating Permit Program

Background

The term "federally enforceable," defined at, e.g., 40 CFR 51.165(a)(1)(xiv), is a term of art under the NSR program that serves three principal purposes. First, a permit that is federally enforceable may be used to limit voluntarily the "potential to emit" of a new source so as to keep the source's emissions below the NSR major source applicability thresholds. Second, voluntary permit limits on the potential to emit of an existing major stationary source undertaking a modification can be used to prevent, through intra-source netting, increasing its emissions above the significance levels that would trigger a major modification. In either the first or second scenario, the source lawfully avoids the need to obtain a preconstruction permit under part D (or part C) of title I of the CAA. See, e.g., 40 CFR 51.165(a)(1)(iii). Third, if a new or modified source in a nonattainment area exceeds an applicability threshold and is subject to nonattainment NSR requirements, it must obtain external emissions offsets in accordance with sections 173(a)(1) and 173(c). The emissions reductions provided by the offsetting source must be federally enforceable in order to be creditable. 40 CFR 51.165(a)(3)(ii)(E).

Construction permits issued in accordance with a SIP-approved or USEPA-promulgated NSR program have always been considered federally enforceable. Such construction permit programs include the nonattainment NSR program applicable to major new sources and major modified sources located in nonattainment areas under part D of title I, see CAA sections 172(a)(5) and 173, and 40 CFR 51.165 and 40 CFR part 51, appendix S; the prevention of significant deterioration program applicable to major new sources and major modified sources located in attainment or unclassifiable areas under part C of title I, see CAA section 165, and 40 CFR 51.166 and 52.21; and the general or "minor source" NSR program applicable to the construction or modification of any stationary source under section 110 of title I without regard to whether the new source exceeds the statutory "major" source thresholds or to whether the modification exceeds the regulatory "significance" levels for "major"

modifications, see CAA section 110(a)(2)(C) (formerly 110(a)(2)(D), and 40 CFR 51.160–164.

Prior to the Clean Air Act Amendments of 1990, however, states were not required to have a distinct operating permit program under the Act. Until 1989, the requirements that must be met by a voluntary operating permit program to enable permits issued thereunder to be deemed federally enforceable for NSR purposes were uncertain. At that time, USEPA promulgated five criteria for approving a state operating permit program as part of the SIP. See 54 FR 27274, 27282 (June 28, 1989). The following discussion compares the Illinois regulations and procedures governing the State's operating permit program with these five criteria.

First Criterion

"The state operating permit program (i.e. the regulations or other administrative framework describing how such permits are issued) is submitted to and approved by EPA into the SIP."

On January 31, 1972 and April 4, 1979, IEPA submitted the regulations and administrative framework for supporting a permit review program to meet the requirements of 40 CFR 51.160 [51.18(j) at the time of submittal]. USEPA on May 31, 1972 (37 FR 10862) and February 21, 1980 (45 FR 11477) approved the program for issuing construction and operating permits to new sources, and modifications to sources. These permit review procedures have remained in effect in Illinois since that time. The State now desires to have that permit program approved for issuing operating permits to any existing source. Therefore, on September 18, 1991, the State submitted section 9(b) and section 9.1 of the State Environmental Protection Act (State Act) to supplement the earlier submittal. Since section 9(b) was incorporated into Illinois' SIP on May 31, 1972, USEPA is taking no action on section 9(b) in this rule. USEPA's approval of section 9.1 provides legal support for the operating permit program and satisfies the first criterion.

Second Criterion

"The SIP imposes a legal obligation that operating permit holders adhere to the terms and limitations of such permits (or subsequent revisions of the permit made in accordance with the approved operating permit program) and provides that permits which do not conform to the operating permit program requirements and the requirements of EPA's underlying regulations may be deemed not 'federally enforceable' by EPA."

Section 9(b) of the State Act says "No person shall * * * construct, install, or operate any equipment, facility, vehicle, vessel, or aircraft capable of causing or contributing to air pollution * * * without a permit granted by the Agency, or in violation of any conditions imposed by such permit."

Section 9(b) satisfies the initial part of the second approval criterion in that the operating permit holder is considered in violation of the State Act if he does not abide by the permit conditions. Section 9(b) furthermore comports with the definition "federally enforceable" found in 40 CFR part 165(a)(1)(xiv). This definition states that federal enforceability includes "operating permits issued under an EPA-approved program that is incorporated into the State Implementation Plan and expressly requires adherence to any permit issued under such program."

The latter part of the second approval criterion requires that the SIP has provisions which allow USEPA to deem a permit not "federally enforceable" under certain conditions. In approving the State operating permit program, USEPA is determining that Illinois' program allows USEPA to deem an operating permit not "federally enforceable" for purposes of limiting potential to emit and to offset creditability. Such a determination will (1) be done according to appropriate procedures, and (2) be based upon the permit, permit approval procedures or permit requirements which do not conform with the operating permit program requirements and the requirements of USEPA's underlying regulations. Based on this interpretation of Illinois program, USEPA finds that the second criterion for approving an operating permit program has been met by the State.

Third Criterion

"The State operating permit program requires that all emissions, limitations, controls and other requirements imposed by such permits, will be at least as stringent as any other applicable limitation or requirement contained in the SIP or enforceable under the SIP, and that the program may not issue permits that waive, or make less stringent, any limitation or requirement contained in or issued pursuant to the SIP, or that are otherwise 'federally enforceable' (e.g. standards established under sections 111 and 112 of the Act)."

With respect to issuing operating permits with limits less stringent than the SIP, section 39 of the Illinois Act which was incorporated into the Illinois SIP on May 31, 1972 (37 FR 10862) provides in pertinent part:

> When the Board [Illinois Pollution Control Board or IPCB] has by regulation required a permit for the construction, installation, or operation of any type of facility, equipment, vehicle, vessel, or aircraft, it shall be the duty of the Agency [Illinois Environmental Protection Agency] to issue such a permit upon proof by the applicant that the facility, equipment, vehicle vessel, or aircraft will not cause a violation of this Act or of regulations hereunder. The Agency shall adopt such procedures as are necessary to carry out its duties under this Section. In granting permits the Agency may impose such conditions as may be necessary to accomplish the purposes of this Act, and as are not inconsistent with the regulations promulgated by the Board hereunder * * *

Since State-issued operating permits must comport with all State regulations, which would include the regulations adopted to implement the SIP, the State cannot issue operating permit limits less stringent than the regulations in the SIP. Furthermore, section 9.1 of the Illinois Act which is being incorporated into the SIP today clearly indicates that "It is the purpose of this section to avoid the existence of duplicative, overlapping or conflicting State and Federal regulatory systems". USEPA interprets this language to mean that both the IEPA and IPCB must act in a manner consistent with all pertinent federal statutes and regulations including the SIP. In addition, section 201.160 of Subpart D: Permit Applications and Review Process of Part 201 of Title 35 of the Illinois Administrative Code which was incorporated into the Illinois SIP as Rule 103(b)(6)(A–F) on February 21, 1980 (45 FR 11477) provides that:

> No operating permit shall be granted unless the applicant submits proof to the Agency that:
>
> (A) The emission source or air pollution equipment has been constructed or modified to operate so as not to cause a violation of the Act [Illinois Environmental Protection Act] or of this Chapter [Chapter 1: Pollution Control of Title 35 of the Illinois Administrative Code], or has been granted a variance therefrom by the Board and is in full compliance with such variance, and * * *
>
> It should be noted that Chapter 1 contains the State rules that comprise the SIP.

Section 9.1 d.2 of the State Act, which becomes part of the approved SIP by today's action, states that "no person shall * * * construct, install, modify, or operate any equipment, building, facility, source or installation which is subject to regulation under sections 111, 112, 165, or 173 of the Clean Air Act except in compliance with the requirements or such sections and federal regulations adopted pursuant thereto, and no such action shall be

undertaken without a permit granted by the Agency or in violation of any condition imposed by such permit. Any denial of such a permit or any conditions imposed in such a permit shall be reviewable by the Board in accordance with section 40 of the Act."

Section 9.1 d.2 thus requires that State permits comply with the provisions of the CAA and federal regulations adopted pursuant to the CAA. To issue a permit with a limit less stringent than federal requirements or a State SIP rule is not allowed by the State Act. Permits reviewable by the IPCB in accordance with section 40 can only have their limits changed if the IPCB finds that IEPA has made an error. Section 40 does not have provisions which allow altering emission limits other than to correct clerical error by the IEPA. There is no authority in section 40 of the State Act to grant a waiver from a permit limit. Based on these provisions, USEPA has determined that the State authority to grant permits is properly restrained by the terms of the SIP, as required by the third criteria.

Fourth Criterion

"The limitations, controls, and requirements in the operating permits are permanent, quantifiable and otherwise enforceable as a practical matter."

USEPA has reviewed the Illinois operating permit program and is satisfied that it requires the state to issue permits which meet the requirements of this provision. While the permits do expire the conditions they impose must be complied with during the entire term of the permit as well as during the transition to a renewal permit. Section 9.1(f) of the State Act states that, "if a complete application for a permit renewal is submitted to the Agency at least 90 days prior to expiration of the permit, all of the terms and conditions of the permit shall remain in effect until final administrative action has been taken on the application." This provision of the State Act uses language similar to the federally proposed title V operating permit rules which are intended to provide permanency to the limits in title V permits, which have expiration dates. This approach to making permit limits permanent is thus approvable by USEPA.

Illinois' permit conditions are characteristically written so that they are quantifiable and enforceable as a practical matter. Limits and averaging times are consistent with test methods and procedures. If USEPA in the future determines that an individual permit condition is not quantifiable or practically enforceable, it can deem the permit not "federally enforceable" within the means of the NSR regulations. The State's current practice and regulatory provisions meet the fourth criterion for permit program approval.

Fifth Criterion

"The permits are issued subject to public participation." This means that the State agrees, as part of its program to provide USEPA and the public with timely notice of the proposal and issuance of such permits, and to provide USEPA, on a timely basis, with a copy of each proposed (or draft) and final permit intended to be federally enforceable. This process might also provide for an opportunity for public comment on the permit application prior to the issuance of the final permit.

On September 25, 1985, USEPA approved Illinois' rules governing public participation in the air permit program for major sources in nonattainment areas. These rules provide for public notification prior to permit issuance and an opportunity for public comment.

The public comment procedure and commitments to follow them in issuing operating permits which were submitted by IEPA, are approvable as meeting the fifth criterion.

In the preamble to the regulations that USEPA promulgated on June 28, 1989 (54 FR 27274), which set forth the five criteria outlined above for a federally enforceable operating permit program, USEPA indicated that it would "consult with States on methods by which existing operating permits could be made federally enforceable under a subsequently approved State operating program." (54 FR 27284). The preamble then went on to suggest two possible means of securing USEPA approval of previously issued permits—either submitting the permits in bulk to USEPA as a SIP revision or reissuing existing permits on a source by source basis. *Id.* These two options were not intended to be a complete list of alternatives. Rather they were suggested as two possible ways by which a state could make previously issued operating permits federally enforceable. Because both options could require the State to spend considerable resources in reprocessing otherwise valid operating permits, the USEPA has evaluated additional approaches. The USEPA today finds the existing Illinois SIP regulations to be consistent with federal requirements. If the State followed its own procedures, each permit issued under this regulation was subject to public notice and comment and prior USEPA review. Therefore, USEPA will consider all operating permits issued which were processed in a manner consistent with both the State regulations and the five criteria to be federally enforceable with the promulgation of this rule provided that any permits that the State wishes to make federally enforceable are submitted to USEPA and accompanied by documentation that the procedures approved today have been followed. USEPA will expeditiously review any individual permits so submitted to ensure their conformity to the program requirements.

Today's approval of the State's operating permit program for the purpose of issuing federally enforceable operating permits is intended as a mechanism for making the operating permits used to implement the requirements of the Act, including section 110 and part D of title I federally enforceable. After the effective date of this rule, operating permits issued by Illinois in conformance with the five criteria listed above will be considered federally enforceable. Additionally, operating permits issued subsequent to the incorporation of the Illinois operating permit program into the SIP but before the effective date of this rule will also be considered federally enforceable if the State submits them to USEPA along with documentation that they were issued in conformance with the five criteria listed above.

Prior to the 1990 Amendments of the Act, there was no express federal requirement for a SIP to include an operating permit program. Only a construction permit program was directly required. However, Illinois and many other states voluntarily included an operating permit program in their SIPs to assist them in regulating emission sources. The Illinois operating permit program covers all emission sources regardless of the source's potential to emit. In contrast, all states are required by title V of the Act Amendments of 1990 to adopt and submit to USEPA an operating permit program by November 15, 1993, regulating the following: Major sources, sources subject to a hazardous air pollutant standard under section 112 of the Act, sources subject to new source performance standards under section 111 of the Act, sources affected under the acid rain provisions of title V of the Act, sources required to have a preconstruction review permit pursuant to the prevention of significant deterioration (PSD) or NSR program under title I of the Act. In addition, USEPA may add or exempt from the title V permitting program any other

non-major sources in a category designated by USEPA upon performing appropriate rulemaking.

USEPA will go through rulemaking on Illinois' title V permit program after it has been received from the State. Today's rule has no bearing on Illinois' obligation to adopt an operating permit program meeting the requirements of title V by November 15, 1993. Although states may well choose to develop title V permit programs that address more sources than the population mandated by the Act and USEPA's implementing regulations in 40 CFR part 70, it is probable that states will continue to permit some sources pursuant to operating permit programs approved into the SIP, such as the one developed by Illinois. This is because states may prefer to permit smaller and less significant sources pursuant to such programs, rather than the somewhat more extensive title V program requirements. The USEPA recognizes that such program can be a useful supplement to the title V program in carrying out the goals of the Act. Accordingly, the USEPA wishes to confirm that it will continue to review state operating permit programs pursuant to the criteria in the June 28, 1989 **Federal Register** referenced above.

II. The Illinois New Source Review Rules

Changes From Draft Rules to Final NSR Rules

A. The draft, at § 203.107, under the definition of "allowable emissions", paragraph (a)(1), stated that part of allowable emissions is "the applicable standards set forth in 40 CFR part 60 or 40 CFR part 61." The final rule for this paragraph states that part of allowable emissions is "any applicable standards adopted by USEPA pursuant to section 111 and 112 of the Clean Air Act (42 U.S.C. 74011 et. seq.) and made applicable in Illinois pursuant to section 9.1(b) of the Environmental Protection Act." Section 9.1 makes all New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAPS) enforceable in Illinois by the State. (There is further discussion in item II.E. of the definition of Lowest Achievable Emission Rate (LAER)). Therefore, it is concluded that this change is nonsubstantive and does not change the form of the draft rules as proposed by USEPA.

B. In 203.112, the State exchanged the word "or" for "and" in identifying the terms "'building', 'structure', 'facility'" so that the final rule has the phrase "'building', 'structure', and 'facility'". In the way these terms are used to define "stationary source" in the regulations (section 203.136), there is no substantive change in meaning; the exchange of words only adds clarification and does not change the form of the draft rules as proposed by USEPA.

C. The earlier definition of the terms "'building', 'structure', and 'facility'" in section 203.112(b)(1), referring to materials being transferred, was supplemented with the following language, "irrespective of ownership or industrial grouping." This wording adds clarity to the concept that the materials being transferred should be part of a "building, structure and facility." USEPA has determined that this is not a substantive change in the definition and does not change the form of the draft rules as proposed by USEPA.

D. The final State rule added a definition of "Nonattainment Area" in section 203.127 which was not in the draft rule as proposed by USEPA. The definition simply says a nonattainment area is an area which is so designated under the CAA. Since the State did not have a definition of "nonattainment area" in its draft NSR rules, the only definition in existence during the public comment period was the federal definition. Since this addition is no more than an inclusion of that which was already in existence as federal law, it does not constitute a substantive change, and does not change the form of the draft rules as proposed by USEPA.

E. The definition of "LAER," as it appears in section 203.301, adds the following language: "In no event shall the application of this term permit a proposed new or modified stationary source to emit any pollutant in excess of the amount allowable under an applicable new source performance standard adopted by USEPA pursuant to section 111 of the Clean Air Act and made applicable in Illinois pursuant to section 9.1 of the Act." (Section 9.1 of the Act refers to the Illinois Environmental Protection Act).

The phrase "and made applicable in Illinois pursuant to section 9.1 of the Act" may appear to limit the minimum level of LAER in some cases to action by Illinois. However, this is not the case. Section 9.1.b reads as follows: "The provisions of section 111 of the Federal Clean Air Act (42 U.S.C. 7411), as amended, relative to standards of performance for new stationary sources * * * are applicable in the State and are enforceable under this Act." USEPA interprets this to mean that any NSPS promulgated by the Administrator are immediately enforceable by the State of Illinois. Based on this understanding we are approving the definition of LAER.

F. In the final version of the rules in section 203.303(c)(1), the following language is added: "and made applicable in Illinois pursuant to section 9.1 of the Environmental Protection Act."

As discussed in E above, this language only recognizes in the NSR rules the incorporation by reference of Federal Standards promulgated pursuant to sections 110 and 111 of the Clean Air Act. This is not considered a substantive change, and does not change the form of the draft rules as proposed by USEPA.

G. The following language is added to the earlier draft rule in section 203.303(d)(1): "Effective stack height means actual stack height plus plume rise. Where actual stack height exceeds good engineering practice, as determined pursuant to 40 CFR 51.100 (1987) (no future amendment or edition are included), the creditable stack height shall be used."

This language merely confirms that the State NSR rules will follow stack height requirements established by USEPA in 1987. (see 52 FR 24712, July 1, 1987.) This is considered clarifying language, not a substantive change, and does not change the form of the draft rules as proposed by USEPA.

Major Features of the State Rule

A. Federal Enforceability

The term, "Federally enforceable" in 40 CFR 51.165(a)(1)(xiv) "means all limitations and conditions which are enforceable by the Administrator, including any permit requirements established pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR part 51, subpart I, including operating permits issued under an EPA-approved program that is incorporated into the state implementation plan and expressly requires adherence to any permit issued under such program." The term "permit" in State rule section 203.303(b)(5) includes only construction and operating permits. As this has been discussed, State construction permits have been made federally enforceable by an earlier program approval pursuant to 40 CFR part 51 subpart I (see 37 FR 10862, May 31, 1972 and 45 FR 11472, February 21, 1980). State operating permits will today be made federally enforceable by USEPA's approval of the State operating permit program. Section 9(b) of the State Act prohibits a person from violating any condition imposed by such a permit.

As discussed above, the provisions of 40 CFR 51.165 require federal enforceability in three matters, (1)

providing offsets, (2) defining potential to emit, and (3) providing creditable emission reductions for netting. Also, the term "federally enforceable" is mentioned in two other areas in the federal regulations (in the definition of allowable emissions and in the definition of major modification). The absence of the federally enforceable language from these areas in the State rules does not make the State rule less stringent than the federal requirement. For instance, State rule section 203.303, Baseline and Emission Offsets Determination, uses the term "enforceable by permit condition" to make an offset enforceable. All such offsets are federally enforceable since all of the permits in question are issued pursuant to USEPA-approved permitting programs and thus are federally enforceable. Specifically, the State construction permit program has been approved and the State operating permit program is approved in today's action.

In sections 203.107 (Allowable Emissions), 203.128 (Potential to Emit), and 203.208 (Net Emission Determination), the State uses the term "enforceable" and not "federally enforceable". USEPA discussed the interpretation of these terms with the State as they impact federal enforceability. The State clarified its interpretation of these terms in a February 27, 1992, letter from Bharat Mathur, Chief, Bureau of Air, IEPA to David Kee, Director, Region V, Air and Radiation Division, USEPA, which is part of the administrative record. The clarification, which is an express part of today's approval, indicates that Illinois interprets these terms so that federal enforceability is maintained. USEPA is, therefore, able to approve these sections.

B. Dual Source Definition

The State rule has a "dual definition of source" in contrast to a plantwide definition. The term "stationary source" as defined in section 203.136 includes any building, structure, facility or installation. The terms building, structure and facility are each defined in section 203.112 as encompassing all emitting activities at a plant, while the term "installation" in section 203.125 specifies identifiable pieces of equipment. Stationary source is defined in two ways (1) as all activities of a plant (plantwide) and (2) as each activity of a plant considered separately.

C. Vessel Emissions

The Illinois regulation section 203.112 defines source to include all activities of vessels and other conveyances transferring materials to and from a source as part of the source, irrespective of ownership or industrial grouping. This definition does not conflict with the implementation of the January 17, 1984, District of Columbia Court of Appeals remand of the Federal vessel emission rules to USEPA for further consideration. See *Natural Resources Defense Counsel* v. *USEPA* 725 F.2d 761 (C.A.D.C. 1984).

D. Stack Height

The June 26, 1987, **Federal Register** Notice proposing to approve the Illinois NSR rules indicated that the USEPA would not approve a NSR rule until the State's stack height rule is approved as a SIP revision. USEPA approved the Illinois stack height rule on August 14, 1989 (54 FR 32073).

E. Growth Allowance

USEPA is approving the definition of "available growth margin" in section 203.110 with the understanding that there is at present no growth allowance incorporated in the SIP. Any growth allowance that Illinois may seek to have incorporated in the SIP in the future must comply with the Clean Air Act and the USEPA policy. The Clean Air Act Amendments (CAAA) of 1990 restrict where new allowances may be established. Revised sections 172(c)(4) and 173(a)(1)(B) limit new growth allowances to only those portions of a nonattainment area which have been formally targeted for economic growth by the Administrator, in consultation with the Secretary of Housing and Urban Development.

IV. Public Comments

There were several comments on the proposed rule approval of June 26, 1987, and July 31, 1987. Those comments which relate specifically to the proposed approval of the State promulgated rule are addressed here.

A. Comment: One commenter felt that USEPA should have provided clearer guidance to the State with respect to vessel emissions, by recommending that stack emissions from vessels not be included in those attributed to a stationary source.

USEPA Response: As discussed above in III.C Vessel Emissions, USEPA recommendations to the State during the public comment period and regulation development period related only to the approvability of the State's proposal in light of the remand of the Federal vessel emission rules to USEPA by the District of Columbia Circuit Court of Appeals. Because USEPA's rules had been remanded, USEPA was unable at that time to state whether or not the forthcoming rules would require that vessel emissions be included in emissions attributed to a stationary source. USEPA was only able to advise the State that it could approve a rule which attributed vessel emissions to a stationary source.

B. Comment: The Ohio air pollution control agency encouraged the approval of the State promulgated rule rather than a federally promulgated rule because section 101(a)(3) of the CAA places the primary responsibility of controlling air pollution at the state level. The State encouraged the lifting of sanctions as rapidly as possible.

USEPA Response: None required.

C. Comment: IEPA made two comments with respect to the State promulgated rule. First, it fully supports federal approval of the rule. Second, it indicates that the IPCB changed from a plant-wide definition in its draft rule to the dual source definition in the final rule after USEPA indicated that, "while USEPA intended to propose the plant-wide definition, it could not state with certainty that it could in fact finally adopt that definition."

USEPA Response: USEPA is responding to this comment because of the potential inference that USEPA is promoting the dual source definition of source. This advice was provided to the State prior to the finalization of a policy under development for the approval of plant-wide definitions and during a time when the proposed approvals of plant-wide definitions were threatened with law suits. At that time, the dual source definition was clearly approvable under provisions of the CAA which allow a State to adopt more stringent requirements than those required to meet the federal NSR requirements. However, since that time, many jurisdictions have adopted the plant-wide definition after USEPA successfully defended the plant-wide definition in *Chevon U.S.A.* v. *Natural Resources Defense Council Inc.* 407 US 837 1984. Further the CAAA of 1990 endorse the plant-wide definition. For example, section 182(c)(6) provides that the new source review provisions shall ensure that increased emissions of volatile organic compounds shall not be considered de minimis for purposes of determining permit requirement applicability unless the increase aggregated with all other net increases in emissions from the source over any period of five consecutive calendar years including the year in which the increase occurred is less than 25 tons. Thus, while Illinois remains free to adopt a dual source definition, that provision is not required by USEPA for approval of SIP revisions.

D. Comment: A group of Illinois industries asserted a preference for the plant-wide definition and opposed the Illinois promulgated rule with the dual source definition. The group reasoned that the plant-wide definition encouraged modernization more than the dual source definition would. Therefore, the air quality standards would be met faster and reasonable further progress would be maintained more easily.

USEPA Response: Because these commentors provided no evidence to support their contentions, USEPA need not respond to their claim that plant-wide definition is better for the environment. The dual source definition remains approvable under the federal regulations, so Illinois' submittal may be approved.

E. Comment: The State of Wisconsin opposes the lifting of sanctions in Illinois because it believes that section 110(a)(2)(i) of the CAA requires sanctions if the SIP does not meet the requirements of Part D. Wisconsin offers the following as proof that Part D requirements are not met: (1) the USEPA on July 14, 1987, proposed to disapprove the Illinois ozone SIP; (2) section 172(b)(8) requires emission limits, schedules of compliance and such other measures as may be necessary to meet the requirements of section 172, however, USEPA has not approved the SIPs for ozone, carbon monoxide, sulfur dioxide; and (3) with respect to section 172(b)(4), which requires a current emission inventory, the State of Illinois only updates one-fourth of its inventory of sources a year.

USEPA Response: It is USEPA's position that the construction ban was imposed specifically for the lack of an approvable NSR rule. Under the CAAA of 1977, section 110(a)(2)(I) of the statute required USEPA to place certain nonattainment areas under a federally imposed construction ban where the State failed to have an implementation plan meeting all of the requirements of part D of the CAA. The 1990 CAAA contains a Savings Clause in section 110(n)(3) that preserves certain existing 110(a)(2)(I) construction bans in place at passage, including bans imposed by virtue of a finding that the State did not have an adequate NSR permitting program as required by section 172(b)(6) of the 1977 CAAA. All other construction bans imposed pursuant to section 110(a)(2)(I) (except in SO_2 nonattainment areas) are lifted as a result of the new statutory provision. Thus, the 1990 CAAA does not impose categorically any new construction ban for failure to attain the NAAQS or failure to satisfy the 1977 CAAA requirements. Instead, the 1990 CAAA creates new schedules for meeting new planning and attainment requirements. If Illinois fails to meet these new deadlines, it will force certain statutorily-mandated sanctions—including higher offset ratios and loss of highway construction appropriations. Construction bans are no longer appropriate for the failure to achieve attainment or to comply with the attainment planning requirements. Accordingly, since USEPA is today approving NSR rules, the existing construction ban can be lifted.

While USEPA is today lifting this general construction ban, USEPA retains authority to impose a partial or complete construction ban should Illinois issue permits in a manner inconsistent with the NSR requirements of the CAAA.

The CAAA require Illinois to submit revised NSR nonattainment area plans by certain dates. The NSR plan for sulfur dioxide nonattainment areas which was due May 15, 1992, has not been submitted. The State's NSR particulate matter (PM) plan which is due June 30, 1992, has not been received. Revisions for ozone nonattainment areas are due November 15, 1992. As the deadlines for the submittal of NSR nonattainment area plans pass, USEPA will act on the State's submittals or lack thereof in a separate administrative action. USEPA may consider taking action under section 113(a)(5) if the State issues a major NSR permit in a nonattainment area without further updating the corresponding NSR plan to reflect the new requirements. See General Preamble, April 16, 1992 (57 FR 13498), at 13555–6.

F. Comment: Wisconsin commented that Illinois' NSR program is deficient because it does not have provisions which will ensure that construction or modification of minor sources will not interfere with attainment or maintenance of a national standard in nonattainment areas.

USEPA Response: The Illinois SIP revisions approved today provide adequate safeguards to protect the NAAQS from emissions increases associated with minor source growth. First, Illinois has a new source review program applicable to minor new sources and minor modifications that is included in the SIP pursuant to the requirement in CAA section 110(a)(2)(C) and 40 CFR 51.160 that all states adopt a permit or similar program to regulate the construction or modification of any stationary source. Section 201.142 of the Illinois regulations requires, as part of minor source preconstruction review, an assessment of the air quality impact of the new or modified minor source, and a prohibition against permit issuance where it would interfere with attainment of the NAAQS. In addition, section 203.302(a), obligates the State to secure offsets from new and modified major sources sufficient to assure reasonable further progress taking into account minor source growth. Finally, USEPA requires States to account for minor source growth as part of the State's attainment demonstration. See, e.g., General Preamble, 57 FR 13498, 13508 (April 16, 1992). The USEPA will thus have an opportunity to review and approve the State's strategy for countering any minor source growth as part of USEPA's approval of the attainment plan.

G. Comment: Wisconsin indicated that Illinois does not provide adequate public comment for minor sources and, therefore, the SIP is deficient and continuation of construction ban is required.

USEPA Response: Wisconsin's charge that Illinois fails to provide an adequate opportunity for public comment on all of its minor source permits does not require USEPA to continue the construction moratorium. The CAAA largely eliminated construction bans imposed by USEPA prior to passage of the 1990 Amendments. A saving clause, section 110(n)(3) of the CAAA, retains construction bans imposed by USEPA for the failure, *inter alia*, to submit a NSR permitting plan as required by section 172(b)(6) (now section 172(c)(5)) of the CAAA. As discussed, this is the type of construction ban now in effect in Illinois. Under section 110(n)(3), the ban only continues until the Administrator finds that the SIP of the area includes the NSR permitting requirements set forth in section 172(c)(5). That provision requires a NSR permitting program for the "construction and operation of new or modified *major* stationary sources anywhere in the nonattainment areas." (Emphasis added) By today's action, USEPA is approving a NSR permitting program for major stationary sources that satisfies section 172(c)(5). It is buttressed by a federally enforceable, minor source permitting program applicable to minor new sources and minor modifications to existing sources that affords public notice and comment for most minor source permits, including all synthetic minor permits [1]

[1] Synthetic minor permits are permits of sources whose potential to emit would subject them to prevention of significant deterioration (PSD) requirements but who chose to limit their potential to emit through an operating restriction or emission controls to escape PSD requirements.

and minor source permits that involve netting, the minor source permits most relevant to the major source program. Because USEPA today finds that Illinois has adopted an adequate NSR permitting program for major stationary sources, USEPA must comply with 110(n)(3) and lift the previously-existing construction ban. However, USEPA will continue to review Illinois' minor source permitting program as it is applied to all minor sources to ensure that it meets the requirements of USEPA regulations, including the public participation requirements set forth in 40 CFR 51.161.

V. Final Rulemaking Actions

1. After consideration of the material submitted by the State of Illinois which supplemented the permit program which was approved for the construction and operation of new sources and new modifications, USEPA has determined that State regulations and procedures are approvable in accordance with the five criteria published in the June 28, 1989, Federal Register for an operating permit program. USEPA approves the incorporation of this program into the SIP for the purpose of issuing federally enforceable operating permits. Therefore, emission limitations and other provisions contained in operating permits issued by the State in accordance with the applicable Illinois SIP provisions, approved herein, shall be federally enforceable by USEPA, and by any person in the same manner as other requirements of the SIP.

2. For the reasons stated above, and in consideration of the public comments received in response to the proposed rulemaking, USEPA approves the incorporation of the Illinois NSR rules into the SIP. These rules are contained in Illinois Administrative Code, Title 35 Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Part 203: Major Stationary Sources Construction and Modification.

3. As a consequence of the two rulemaking actions listed above, USEPA is lifting the growth moratorium in all primary nonattainment areas which has been in effect since May 26, 1981, when the United States Court of Appeals for the Seventh Circuit overturned USEPA's earlier approval of the NSR rules for Illinois on State law procedural grounds in *Citizens for a Better Environment* v. *United States* 649 F.2d 522 (7th Cir. 1981).

Because USEPA considers the approval of the Illinois operating permit program as satisfying the 1989 federally enforceable criteria to be noncontroversial, it is approving Illinois' operating permit program today without prior proposal. This action will be effective (60 days from the date of publication) unless, within 30 days of its publication, notice is received that adverse or critical comments will be submitted bearing solely on this finding, that the operating permit program satisfies the 1989 federally enforceable criteria.

If such notice is received, this action will be withdrawn before the effective date by publishing two subsequent notices. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period. If no such comments are received, the public is advised that this action will be effective on February 16, 1993.

USEPA believes that federal enforceability of the State's operating permit program is a necessary requirement for federal approval of the States' NSR rules. Therefore, if USEPA withdraws its finding regarding the State's operating permit program it will also withdraw its approval of the NSR rules unless a suitable mechanism for ensuring federal enforceability of offset and other NSR requirements can be identified. Final rulemaking on the State's NSR rules thus may be held in abeyance until final rulemaking is taken on the operating permit program.

Similarly, USEPA cannot lift the growth moratorium in all primary nonattainment areas until the NSR rules are approved for incorporation in the SIP. Therefore, USEPA will withdraw its rulemaking lifting the growth moratorium if it withdraws its approval of the NSR rules. The growth moratorium will not be lifted until USEPA approves the incorporation of NSR rules into the SIP.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 16, 1993. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. [See section 307(b)(2).]

List of Subjects in 40 CFR Part 52

Air pollution control, Environmental protection, Incorporation by reference, Intergovernmental relations.

Note: Incorporation by reference of the State Implementation Plan for the State of Illinois was approved by the Director of the Federal Register on July 1, 1982.

Dated: September 29, 1992.

William K. Reilly,

Administrator.

For the reasons set out in the preamble, part 52, title 40 of the Code of Federal Regulations is amended.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7671q.

Subpart O—Illinois

2. Section 52.720 is amended by adding paragraphs (c)(84) and (c)(85) to read as follows:

§ 52.720 Identification of plan.

* * * * *

(c) * * *

(84) On September 18, 1991, and November 18, 1991, the State submitted documents intended to satisfy federal requirements for an operating permit program which can issue federally enforceable operating permits.

(i) Incorporation in Reference.

(A) Public Act 87–555, an Act to amend the Environmental Protection Act by changing section 9.1, effective September 17, 1991. (Ch. 111 1/2, par. 1009.1) par. 1009.1(a), (b), (c), (d) and (f).

(85) On March 24, 1988, the State submitted rules for issuance of construction permits to new and modified air pollution sources located in or affecting nonattainment areas (New Source Review rules).

(i) Incorporation by reference.

(A) Illinois Administrative Code, Title 35 Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Part 203: Major Stationary Sources.

3. Section 52.736 is revised by removing and reserving paragraph (a) and adding paragraph (b).

§ 52.736 Review of new sources and modifications.

(a) [Reserved]

(b) The rules submitted by the State on March 24, 1988, to satisfy the requirements of the Clean Air Act are approved. These rules are part 203: Major Stationary Sources Construction

and Modification as effective March 22, 1991. The moratorium on construction and modification of new sources in nonattainment areas as provided in section 110(a)(2)(I) of the Clean Air Act is revoked.

4. Section 52.737 is added to read as follows:

§ 52.737 Operating permits.

Emission limitation and other provisions contained in operating permits issued by the State in accordance with the provisions of the federally approved permit program shall be the applicable requirements of the federally approved Illinois SIP for the purpose of section 113 of the Clean Air Act and shall be enforceable by USEPA and by any person in the same manner as other requirements of the SIP. USEPA reserves the right to deem an operating permit not federally enforceable. Such a determination will be made according to appropriate procedures, and be based upon the permit, permit approval procedures or permit requirements which do not conform with the operating permit program requirements or the requirements of USEPA's underlying regulations.

[FR Doc. 92-30440 Filed 12-16-92; 8:45 am]
BILLING CODE 6560-50-M

GENERAL SERVICES ADMINISTRATION

41 CFR Part 101-34

[FPMR Amendment E-273]

Supply Support for Disasters and National Security Emergencies

AGENCY: Federal Supply Service, GSA.

ACTION: Final rule.

SUMMARY: This regulation cancels the authority for GSA Handbook, Emergency Supply Support Operations, which is no longer needed and provides changes for acquiring personal property and nonpersonal services from GSA during major disasters and national emergencies. These changes are necessary to reflect the broad scope of emergency response situations and provide a basic framework for GSA supply support. It is anticipated that this framework will be utilized Governmentwide for incorporation into emergency plans and procedures.

EFFECTIVE DATE: December 17, 1992.

FOR FURTHER INFORMATION CONTACT: William M. Wilson, Office of Strategic Planning and Marketing (703-305-7992).

SUPPLEMENTARY INFORMATION: The General Services Administration (GSA) has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. GSA has based all administrative decisions underlying this rule on adequate information concerning the need for and consequences of this rule; has determined that the potential benefits to society from this rule outweigh the potential costs; has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

List of Subjects in 41 CFR Part 101-34

Government property management, Emergency supply support.

For the reasons set forth in the preamble, 41 CFR part 101-34 is amended to read as follows:

PART 101-34—EMERGENCY SUPPLY SUPPORT

1. The authority citation for part 101-34 continues to read as follows:

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c).

2. The heading of part 101-34 is revised as set forth above.

3. Section 101-34.000 is revised to read as follows:

§ 101-34.000 Scope of part.

This part provides for GSA supply support to Federal agencies during major natural and technological disasters and national security emergencies.

4. Section 101-34.001 is revised to read as follows:

§ 101-34.001 Applicability.

The provisions of this part are applicable to all executive agencies.

§ 101-34.002 and 101-34.003 [Removed]

5. Sections 101-34.002 and 101-34.003 are removed.

Subpart 101-34.1—Emergency Operations

6. The heading of subpart 101-34.1 is revised.

7. Section 101-34.100 is revised to read as follows:

§ 101-34.100 Scope of subpart.

This subpart provides for acquiring personal property and nonpersonal services from GSA during major disasters and national emergencies.

8. Section 101-34.101 is revised to read as follows:

§ 101-34.101 Requests for GSA support in acquiring supplies and services.

(A) Normal or established emergency FEDSTRIP/MILSTRIP requisitioning and order processing procedures shall be followed (refer to the latest editions of the GSA Supply Catalog or the GSA Federal Supply Service Customer Assistance Guide for general information). Ordering agencies shall use normal or emergency funding citations. When emergency conditions result in material shortages or other developments occur, changes may be instituted in supply methods or procedures.

(b) Requisitions and requests for acquisition support shall be processed in accordance with the assigned priority designator code and/or the assigned Defense Priorities and Allocations System (DPAS) rating.

(c) All agencies are encouraged to pre-position stocks of essential supplies and equipment to allow for 15-30 days of operation at their emergency operating facilities. Agencies supporting Federal response plans should maintain sufficient stocks of essential supplies, equipment, and materials to operate response elements independently for up to 7 days. A regularly maintained list of items expedites inventorying, stocking, and replenishment.

9. Section 101-34.102 is revised to read as follows:

§ 101-34.102 GSA emergency operation and coordination centers, and customer service director program.

(a) GSA will establish, based on the severity of the emergency, an emergency operation center at GSA Central Office. Emergency coordination centers may also be established at each GSA service headquarters and/or regional offices. Continuous 24-hour operation will be provided when necessary.

(b) Regional field supply liaison services are normally provided through the customer service director (CSD) program. Located in every GSA region and overseas, the CSD program will continue to provide assistance during an emergency.

§§ 101-34.103, 101-34.104 and 101-34.105 [Removed]

10. Sections 101-34.103, 101-34.104, and 101-34.105 are removed.

Subpart 101-34.2 (§ 101-34.200)—[Removed and Reserved]

11. Subpart 101-34.2 (§ 101-34.200) is removed and reserved.

Dated: November 19, 1992.

Richard G. Austin,

Administrator of General Services.

BILLING CODE 6820–24–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Part 69

[CGD 92–058]

Tonnage Measurement of Vessels

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is amending its tonnage measurement regulations for vessels by updating the list of organizations authorized to measure vessels, by extending application of the Simplified Measurement System to all barges over 79 feet in overall length not engaged on a foreign voyage, and by eliminating, in most instances, the need to file an additional form for Simplified Measurement. These amendments are necessary to update the regulations and align them with changes in the tonnage measurement laws.

EFFECTIVE DATE: December 17, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Donald W. Goebel, Vessel Documentation and Tonnage Survey Branch, (202) 267–1103.

SUPPLEMENTARY INFORMATION:

Drafting Information

The principle persons involved in drafting this document are Mr. Donald W. Goebel, Project Manager, Vessel Documentation and Tonnage Survey Branch, and Mr. Stephen H. Barber, Project Counsel, Office of Chief Counsel.

Regulatory Information

This rule is being issued as a final rule without opportunity for public comment and made effective on the date of publication in the **Federal Register**. This rulemaking is limited to the following administrative changes and corrections:

1. It aligns 46 CFR 69.11 with statutory changes intended to relieve the burden on barge owners by allowing them to use the less costly, quicker Simplified Measurement System on their barges of 79 feet or more in overall length not engaged on a foreign voyage.

2. It updates 46 CFR 69.15(a) by adding the name of a second organization to the list of organizations already approved by the Coast Guard to measure vessels. This change benefits vessel owners and operators by informing them of an additional source for measurement services.

3. It reduces the paperwork burden on vessel owners by eliminating, in most instances, the need to complete an additional application form when the data is available already on another Coast Guard form.

4. It corrects three minor printing errors in the existing regulations.

For these reasons, the Coast Guard for good cause finds, under 5 U.S.C. 553 (b)(B) and (d)(3), that notice and public procedure thereon before the effective date of the final rule are unnecessary and that the final rule should be made effective in less than 30 days after publication.

Discussion of Changes

1. On November 16, 1990, Public Law 101–595 amended the vessel tonnage measurement law (46 U.S.C. subtitle II, part J) so as to allow all barges ("non-self-propelled vessels") of 79 feet or more in overall length not engaged on a foreign voyage to be measured under the Simplified Measurement System. This rulemaking amends 46 CFR 69.11 to align the tonnage measurement regulations with the statutory amendment.

2. This rulemaking updates 46 CFR 69.15(a), which lists the organizations authorized by the Coast Guard to measure vessels, by adding Det Norske Veritas Classification (USA) Inc. (DNV/USA). Under 46 U.S.C. 14103, the Coast Guard is authorized to delegate the authority to measure vessels and to issue appropriate certificates of measurement for U.S. vessels. Section 69.27 of title 46 of the Code of Federal Regulations sets forth the procedures by which an organization qualifies for such a delegation. On March 12, 1992, the Coast Guard approved the application of DNV/USA for delegation of this authority. This rulemaking simply adds DNV/USA's name to 46 CFR 69.15(a), the provision listing these authorized organizations.

3. This rulemaking allows vessels owners applying for measurement under the Simplified Measurement System to submit a form completed by vessel's builder instead of the application form specified in 46 CFR 69.205. Coast Guard form CG–1261, entitled "Builder's Certification and First Transfer of Title," has been revised to request the same information regarding the vessel's dimensions as that requested by the form presently specified (form CG–5397, entitled "Application for Simplified Measurement"). (The revised form CG–1261, as approved by the Office of Management and Budget on April 14, 1992, is illustrated on page 10570 of volume 57 of the **Federal Register** (March 16, 1992)). Thus, if the vessel's builder has completed a revised form CG–1261, the vessel's owner may submit that form to apply for Simplified Measurement instead of form CG–5397. This option simply relieves the vessel's owner of the burden of compiling the necessary information and completing a form.

4. This rulemaking corrects three minor printing errors in the regulations. In 46 CFR 69.5(a)(4), the word "Commandment" should read "Commandant". The reference in 46 CFR 69.119 to "§ 69.177(g)(3)" should read "§ 69.117(g)(3)". There is no § 69.177(g)(3). In the section heading for 46 CFR 69.169, the word "except" should read "exempt".

Regulatory Evaluation

This rule is not major under Executive Order 12291 and not significant under the "Department of Transportation Regulatory Policies and Procedures" (44 FR 11040; February 26, 1979). The Coast Guard expects the economic impact of this rule to be so minimal that a full Regulatory Evaluation is unnecessary.

This rule is administrative in nature and conforms the vessel tonnage measurement regulations to a statutory amendment, updates the list of organizations delegated measurement authority by the Coast Guard, and provides an optional application form. The only impact this rule will have results from eliminating, in most instances, the need to complete a Coast Guard form CG–5397 to apply for Simplified Measurement. This will save approximately one hour per application or a total of 10,000 hours per year industry wide.

Small Entities

As a rule not required to be published first as a notice of proposed rulemaking, this rule is exempt from the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule aligns existing regulations with a statutory amendment, references a Coast Guard delegation of authority already in effect, and eliminates, in most instances, the need to complete an application form. This rule will not have a significant economic impact on a substantial number of small entities.

Collection of Information

This rule contains no collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). The collection of information burden imposed on vessel owners by 46 CFR 69.205 would be lessened by the submission of form CG–

1261, if one has been completed by the vessel's builder.

Federalism

The Coast Guard has analyzed this rule under the principles and criteria contained in Executive Order 12612 and has determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environment

The Coast Guard considered the environmental impact of this rule and concluded that, under section 2.B.2 of Commandant Instruction M16475.1B, this rule is categorically excluded from further environmental documentation. This rule is administrative in nature and concerns the procedures for measuring vessels. It clearly has no environmental impact. A Categorical Exclusion Determination is available in docket for inspection or copying at the office of the Executive Secretary, Marine Safety Council, U.S. Coast Guard Headquarters, 2100 Second Street, SW., room 3406, Washington, DC 20593–0001.

List of Subjects in 46 CFR Part 69

Measurement standards, Reporting and recordkeeping requirements, Vessels.

For the reasons set out in the preamble, the Coast Guard amends 46 CFR part 69 as follows:

PART 69—MEASUREMENT OF VESSELS

1. The authority citation for part 69 continues to read as follows:

Authority: 46 U.S.C. 14102, 14103; 49 CFR 1.46. Sec. 69.27 issued under 44 U.S.C. 3507; 49 CFR 1.45.

§ 69.5 [Amended]

2. In § 69.5, paragraph (a)(4), remove the word "Commandment" and add, in its place, the word "Commandant".

3. In § 69.11, paragraph (a)(2)(vi) is added and paragraph (d) is revised to read as follows:

§ 69.11 Determining the measurement system or systems for a particular vessel.

(a) * * *

(2) * * *

(vi) A non-self-propelled vessel not engaged on a foreign voyage, unless the owner requests measurement under this system.

* * * * *

(d) *Simplified Measurement System (subpart E).* This system may be applied, at the owner's option, instead of the Standard Measurement System to the following vessels:

(1) A vessel that is under 79 feet in overall length.

(2) A vessel of any length that is non-self-propelled and not engaged on a foreign voyage.

(3) A vessel of any length that is operated only for pleasure and operated only on the Great Lakes.

4. In § 69.15, paragraph (a) is revised to read as follows:

§ 69.15 Organizations authorized to measure vessels.

(a) Except as under paragraphs (c) and (d) of this section, all U.S. vessels to be measured or remeasured under the Convention, Standard, or Dual Measurement Systems must be measured by the American Bureau of Shipping (ABS Americas) or Det Norske Veritas (DNV/USA). Applications for measurement must be directed to ABS Americas, 16855 Northchase Drive, Houston, TX 77060–6008, (713) 874–6416, or to Det Norske Veritas Classification (USA) Inc., 80 Grand Avenue, suite 201, River Edge, NJ 07661, (201) 488–0112.

* * * * *

§ 69.119 [Amended]

5. In § 69.119, paragraph (c), remove "§ 69.177(g)(3)" and add, in its place, "§ 69.117(g)(3)".

69.169 [Amended]

6. In § 69.169, in the section heading, remove the word "except" and add, in its place, the word "exempt".

7. Section 69.205 is revised to read as follows:

§ 69.205 Application for measurement services.

To apply for measurement under the Simplified Measurement System, the owner of the vessel must complete and submit a current issue of Coast Guard form CG–5397 or submit a completed, current issue of Coast Guard form CG–1261 to the Coast Guard Port of Documentation Office at the port where the vessel will be documented. (See part 67, appendix D, of this chapter for a list of these offices.)

Dated: November 2, 1992.

R.C. North,

Captain, U.S. Coast Guard, Acting Chief, Office of Marine Safety, Security and Environmental Protection.

BILLING CODE 4910–14–M

GENERAL SERVICES ADMINISTRATION

48 CFR Parts 517 and 552

[APD 2800.12A, CHGE 43]

General Services Administration Acquisition Regulation; Use and Exercise of Options

AGENCY: Office of Acquisition Policy, GSA.

ACTION: Final rule.

SUMMARY: The General Services Administration Acquisition Regulation (GSAR) is amended to revise Subpart 517.2, Options, to facilitate the use and exercise of options in appropriate circumstances and link the use and exercise of options with GSA's objective of pursuing longer term contractual relationships with quality vendors. The change also adds section 552.217–71 to provide the text of the provisions, Notice Regarding Option(s).

EFFECTIVE DATE: December 15, 1992.

FOR FURTHER INFORMATION CONTACT: Ida M. Ustad, Office of GSA Acquisition Policy, (202) 501–1224.

SUPPLEMENTARY INFORMATION:

A. Background

GSA has obtained a class deviation from the current Federal Acquisition Regulation (FAR) coverage on the use of options in order to support its Quality Contractor Program. However, GSA believes these changes may be appropriate for Governmentwide use. Accordingly, GSA will recommend the Civilian Agency Acquisition Council consider establishing a FAR case to examine whether the FAR should be revised in a similar manner.

B. Public Comments

This rule was published in the **Federal Register** for public comment on March 13, 1992 (57 FR 8856). Public comments supporting the proposed rule were received from the Laborers' International Union of North America and the Association for Information and Image Management. Specific comments were also received from the American Bar Association on several sections of the proposed rule. All public comments and comments from GSA contracting activities were considered in formulating this final rule.

C. Executive Order 12291

The Director, Office of Management and Budget (OMB), by memorandum dated December 14, 1984, exempted certain agency procurement regulations from Executive Order 12291. The exemption applies to this rule.

D. Regulatory Flexibility Act

GSA certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601 et seq.

E. Paperwork Reduction Act

This rule does not contain any recordkeeping or information collection requirements that require the approval of OMB under 44 U.S.C. 3501 et seq.

List of Subjects in 48 CFR Parts 517 and 552

Government procurement.

1. The authority citation for 48 CFR parts 517 and 552 continues to read as follows:

Authority: 40 U.S.C. 486(c).

PART 517—OPTIONS

2. Section 517.200 is added to read as follows:

517.200 Scope of subpart.

This subpart prescribes policies and procedures for the use and exercise of options. When a requirement in this subpart is inconsistent with FAR 17.2, this subpart takes precedence. When a requirement of this subpart is inconsistent with GSAR 536.6, the latter subpart takes precedence. A class deviation from the FAR has been approved to implement GSA's Quality Contractor Program. This subpart applies to contracts including those for (a) services involving the construction, alteration, or repair (including dredging, excavating, and painting) of buildings, bridges, roads, or other kinds of real property; (b) architect-engineer services; (c) automatic data processing (ADP) equipment and systems; and (d) telecommunications equipment and services.

517.201 [Removed]

3. Section 517.201 is removed.

4. Section 517.202 is added to read as follows:

517.202 Use of options.

(a) The inclusion of options in contracts under appropriate circumstances is encouraged. The use of options may reduce procurement lead time and associated costs, ensure continuity of contract support, improve overall contractor performance, and facilitate longer term contractual relationships with those contractors that continuously meet or exceed quality performance expectations outlined in the contract.

(b) Inclusion of an option is normally in the Government's interest where—

(1) Additional supplies or services may be required during the contract term;

(2) Additional supplies or services may be required beyond the initial contract term and either multiyear contracting authority is not available or its use is inappropriate;

(3) There is a need for continuity of supply or services support;

(4) Funds are not available for the entirety of the Government's needs, but are likely to become available during the contract term; or

(5) The contract is with an emerging small business with minimal performance history in the contract supply or service and the basic quantity is intended to be a learning or testing quantity.

(c) Inclusion of an option may not be appropriate where the circumstances described in FAR 17.202(b)(2) and 17.202(c) (1) and (3) exist or where the market prices for the supplies or services are likely to change substantially and an economic price adjustment clause will not adequately protect the Government's interests.

5. Section 517.203 is added to read as follows:

517.203 Solicitations.

Solicitations containing options to extend (see FAR 17.208 (f) and (g)) should normally inform offerors of the potential for entering into a long term contractual relationship with the GSA subject to a continuing need and the successful offeror's ability to perform at levels which meet or exceed the agency's quality performance expectations.

6. Section 517.204 is revised to read as follows:

517.204 Contracts.

The head of the contracting activity must approve exceeding the 5-year limitations specified in FAR 17.204(e) for individual contracts. The Associate Administrator for Acquisition Policy must approve requests to exceed the limitations for classes of contracts. The contract file for individual approvals and the requests for approval of classes of contracts must support the need to exceed the 5-year limitation. This section does not apply to contracts for automatic data processing (ADP) equipment and systems or to contracts for telecommunications equipment and services.

7. Section 517.207 is revised to read as follows:

517.207 Exercise of options.

(a) If the option was not evaluated as part of the original competition, a synopsis of the option before it is exercised is required unless exempt under FAR 5.202.

(b) In addition to the items listed in FAR 17.207(d), the contracting officer may consider whether the contractor's performance under the contract has met or exceeded the Government's expectation for quality performance, or whether another circumstance exists that would warrant an extended contractual relationship when deciding whether to exercise an option. The contracting officer must always determine the option price(s) is fair and reasonable before exercising an option.

8. Section 517.208 is revised to read as follows:

517.208 Solicitation provisions and contract clauses.

(a) In addition to other applicable provisions or clauses related to options, the contracting officer shall insert a provision substantially the same as the provision at 552.217–71, Notice Regarding Option(s), in solicitations for supplies or services when necessary to inform offerors of the importance GSA will place on past performance when considering whether to exercise options.

(b) The contracting officer shall insert a provision substantially the same as the provision at 552.217–70, Evaluation of Options, in solicitations for procurements under the Federal Supply Service (FSS) stock or special order program when (1) the solicitation contains an option to extend the term of the contract and (2) a firm-fixed price contract with economic price adjustment based on the Producer Price Index or alternative indicator of market price changes is contemplated.

9. Section 552.217–71 is added to read as follows:

552.217–71 Notice Regarding Option(s).

As prescribed in 517.208(a), insert the following provision:

Notice Regarding Option(s) (Nov 1992)

The General Services Administration (GSA) has included an option to [Insert "purchase additional quantities of supplies or services" or "extend the term of this contract" or "purchase additional quantities of supplies or services and to extend the term of this contract"] in order to demonstrate the value it places on quality performance by providing a mechanism for continuing a contractual relationship with a successful Offeror that performs at a level which meets or exceeds GSA's quality performance expectations as communicated to the Contractor, in writing, by the Contracting Officer or designated representative. When deciding whether to exercise the option, the Contracting Officer will consider the quality of the contractor's past performance under this contract in accordance with 48 CFR 517.207.

(End of Provision)

Dated: December 7, 1992.

Richard H. Hopf III,

Associate Administrator for Acquisition Policy.

BILLING CODE 6820-61-M

Proposed Rules

Federal Register
Vol. 57, No. 243
Thursday, December 17, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 17

Regulations Governing the Financing of Commercial Sales of Agricultural Commodities

AGENCY: Foreign Agricultural Service, USDA.

ACTION: Proposed rule; extension of comment period.

SUMMARY: This document extends the comment period relating to a proposed rule that would amend the regulations applicable to the financing of the sale and exportation of agricultural commodities pursuant to title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (Pub. L. 480) and also sets forth the basis for the Regulatory Flexibility Act certification in the preamble of such proposed rule.

DATES: Consideration will be given to written comments submitted in duplicate on or before January 13, 1993.

ADDRESSES: Comments should be sent to Christopher E. Goldthwait, Acting General Sales Manager, Foreign Agricultural Service, U.S. Department of Agriculture, room 4071 South Building, 14th and Independence, SW., Washington, DC 20250–1000.

FOR FURTHER INFORMATION CONTACT: Connie B. Delaplane, Director, Public Law 480 Operations Division, Export Credits, Foreign Agricultural Service, room 4549 South Building, U.S. Department of Agriculture, 14th and Independence, SW., Washington, DC 20250–1000. Telephone (202) 720–3664.

SUPPLEMENTARY INFORMATION: On November 12, 1992, we published in the **Federal Register** (57 FR 53607) a proposed rule that would amend the regulations applicable to the financing of the sale and exportation of agricultural commodities pursuant to title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (Pub. L. 480).

The preamble to the proposed rule included a certification that the rule would not have a significant economic impact on a substantial number of small entities. The entities impacted by the proposed rule would be those engaged in shipping agent activities. We are not aware of any shipping agents that are "small entities" that are presently involved in the types of activities being limited by the proposed rule. As regards the proposal to cap the level of commissions payable on a Title I, Public Law 480 transaction, we do not believe that this would result in any significant economic impact since most vessel offers are submitted by a ships broker, which shares in the 2½% brokerage commission. Also, any reduced income would, in large part, be offset by savings due to prohibitions on payments and benefits which have been permitted in the past.

Comments on the proposed rule were required to be submitted by December 14, 1992. However, in response to requests received we are extending this comment period to January 13, 1993. This extension will allow interested persons additional time in which to prepare comments on the proposed rule.

Signed at Washington, DC on December 11, 1992.

Christopher E. Goldthwait,

Acting General Sales Manager, Foreign Agricultural Service; and Vice President, Commodity Credit Corporation.

[FR Doc. 92–30549 Filed 12–16–92; 8:45 am]

BILLING CODE 3410–10–M

DEPARTMENT OF THE INTERIOR

Geological Survey

30 CFR Part 401

RIN 1028–AA03

State Water Research Institute Program

AGENCY: U.S. Geological Survey, Interior.

ACTION: Proposed rule.

SUMMARY: The U.S. Geological Survey (USGS) is proposing to amend the procedures used to evaluate the State Water Research Institutes to implement the changes to the Water Resources Research Act of 1984. This action is intended to reduce costs associated with the evaluation process for both the USGS and the institutes. The USGS is also proposing to remove references to obsolete documents, revise and clarify the requirements for new institutes, revise the requirements for expenditure of unobligated funds, and make other minor changes to bring the regulation in compliance with the amended Act.

DATES: Comments must be received on or before January 19, 1993.

ADDRESSES: Comments should be addressed to the Chief Hydrologist, U.S. Geological Survey, 424 National Center, Reston, Virginia 22092.

FOR FURTHER INFORMATION CONTACT: Allen Ford, Office of External Research, U.S. Geological Survey, Water Resources Division, 424 National Center, 12201 Sunrise Valley Drive, Reston, Virginia 22092, (703) 648–6806.

SUPPLEMENTARY INFORMATION:

Background

The State Water Research Institutes authorized by the Water Resources Research Act of 1984 (Pub. L. 98–242, 98 Stat. 97) and reauthorized by Water Research Institutes Authorization Through Fiscal Year 1994 (Pub. L. 101–397, 104 Stat. 852) support research, education, and information transfer activities. The 54 institutes in the program are administered and periodically evaluated under the provisions of 30 CFR part 401, adopted in May 1985. The reauthorization amended several provisions of the Water Resources Research Act of 1984, and the USGS is accordingly proposing minor revisions to the rule guiding the administration and evaluation of the institutes.

The existing rule guiding the evaluation of the institutes requires that five person teams visit each of the 54 institutes at least once every 5 years. The USGS is proposing minor revisions to the rule pertaining to institute evaluations by amending subpart E of 30 CFR 401.26 which describes the procedures used to evaluate the State Water Research Institutes. The reauthorization amends section 104(e) of the Water Resources Research Act of 1984 to give the Secretary of the Interior more discretion in the evaluation process. This action would revise the rule pertaining to institute evaluations such that: The size of the evaluation team could be decreased and its

composition changed; the evaluation team would visit only those institutes it considered, on the basis of submitted documentation, to be potential candidates for probation; the composition of the evaluation team would be changed; the evaluation team would consider only those institute activities funded under section 104 of the Water Resources Research Act of 1984; evaluation criteria not directly related to performance of the institutes would be eliminated; the evaluation team would be allowed more time to submit a written report of its findings. The proposed changes would: Lower the cost of the evaluation process to both the granting agency and the institutes by minimizing the number of institute site visits; permit greater consistency in the evaluation process by using, to the extent possible, only one evaluation team for all institutes; and base the evaluation only on demonstrated performance in the use of section 104 grants.

Section 401.11(a) of the rule requires that, if the full amount of the available grant funds for any fiscal year has not been requested as of the closing date for receipt of applications, any remaining funds shall be made available to the institutes for amended applications. The USGS is proposing to revise this section to state that any such remaining funds be made available to support competitively selected research projects under the terms of section 104(g) of the Act, as required by the reauthorization.

The USGS is proposing to amend § 401.11(g) to state that Federal funds received by the institutes shall be matched on a basis of no less than two non-Federal dollars for each Federal dollar, as required by the reauthorization.

The USGS is proposing to amend § 401.12(c) to remove references to obsolete documents and add references to new documents guiding the institutes' administration of the grants received under section 104 of the Act.

Public Participation

It is the policy of the Department of the Interior, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions or objections regarding the proposed amendments to the location identified in the ADDRESS section of this preamble. Comments must be received on or before January 19, 1993.

Required Analyses

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and certifies this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This proposed action will promote efficiency and economy by reducing costs for both the Government and the institutes. Therefore, it will not adversely affect the economy of the Nation or any small entity.

Environmental Effects

This action will have no potential for significant environmental impact and is categorically excluded from the requirements for compliance with the National Environmental Policy Act of 1969, as amended (Pub. L. 91–190, 83 Stat. 852)

Paperwork Reduction Act

The information collection requirements in §§ 401.11 and 401.19 have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et. seq.* and assigned clearance number 1028–0044.

Executive Order No. 12778

The Department has certified to the Office of Management and Budget that this proposed regulation meets the standards provided in Sections 2(a) and 2(b) of Executive Order No. 12778.

Author

The principal author of this proposed rule is Allen Ford, Water Resources Division, U.S. Geological Survey.

The Catalog of Federal Domestic Assistance program affected is No. 15.805, Assistance to State Water Research Institutes.

List of Subjects in 30 CFR Part 401

Colleges and universities, Grants programs-natural resources, Research, Water Resources.

For the reasons set out in the preamble, 30 CFR chapter IV is proposed to be amended as follows:

PART 401—STATE WATER RESEARCH INSTITUTE PROGRAM

1. The Authority citation for 30 CFR part 401 is revised to read as follows:

Authority: 42 U.S.C. 10303.

Subpart A—General

2. Section 401.4 is revised to read as follows:

§ 401.4 Information Collection.

(a) The information collection requirements contained in §§ 401.11 and 401.19 have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1028–0044. The information will be used to support water related research and provide performance reports on accomplishments achieved under Pub. L. 98–242, 98 Stat. 97 (42 U.S.C. 10303). This information allows the agency to determine compliance with the objectives and criteria of the grant programs. Response is mandatory in accordance with 30 CFR 401.11 and 401.19.

(b) Public reporting burden for the collection of information is estimated to average 84 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other suggestions for reducing the burden, to Paperwork Management Officer, U.S. Geological Survey, Paperwork Management Section, MS 208, Reston, Virginia, 22092 and the Office of Management and Budget, Paperwork Reduction Project (1028–0044), Washington, DC 20503.

Subpart B—Designation of Institutes; Institute Programs

3. Section 401.6 is amended by revising paragraph (c)(2) to read as follows:

§ 401.6 Designation of Institutes.

* * * * *

(c) * * *

(2) A management plan for meeting the requirements of the evaluation mandated by § 401.26.

Subpart C—Application and Management Procedures

4. Section 401.11 is amended by revising paragraphs (a) and (g) to read as follows:

§ 401.11 Application for grants.

(a) Subject to the availability of appropriated funds, but not to exceed a total of $10 million, an equal amount of dollars will be available to each qualified institute in each fiscal year to assist it in carrying out the purposes of the Act. If the full amount of the appropriated funds is not obligated by the close of the fiscal year for which they were appropriated, the remaining funds shall be made available in the succeeding fiscal year to support competitively selected research projects under the terms of section 104(g) of the Act. Selection and approval of such projects shall be based on criteria to be determined by the Director.

Announcement of such criteria shall be made by notice in the Federal Register. The granting agency may retain an amount up to 15 percent of total appropriation for administrative costs.

* * * * *

(g) The application shall provide assurance that non-Federal dollars will be available to share the costs of the proposed program. The Federal funds are to be matched on a basis of no less than two non-Federal dollars for each Federal dollar.

* * * * *

5. Section 401.12 is amended by revising paragraph (c) to read as follows:

§ 401.12 Program management.

* * * * *

(c)(1) Acceptance of the award document certifies the grantee's assurance that the grant will be administered in compliance with OMB regulations, policies, guidelines, and requirements as described in:

(i) Circular No. A–21, revised, Cost Principles of Educational Institutions;

(ii) Memorandum No. M–92–01, Coordination of Water Resources Information;

(iii) Circular No. A–88, revised, Indirect Cost Rates, Audit and Audit Followup at Educational Institutions;

(iv) Circular No. A–110, Uniform Administrative Requirements for Grants and Agreements with Institutions of Higher Education, Hospitals and other Nonprofit Organizations; and

(v) Circular No. A–124, Patents-Small Business Firms and Nonprofit Organizations.

(2) Copies of the documents listed in paragraph (c)(1) of this section shall be available from the granting agency.

Subpart E—Evaluation

6. Section 401.26 is revised to read as follows:

§ 401.26 Evaluation of institutes.

(a) Within 2 years of the date of its certification according to the provisions of § 401.6, each institute will be evaluated for the purpose of determining whether the national interest warrants its continued support under the provisions of the Act. That determination shall be on:

(1) The quality and relevance of its water resources research as funded under the Act;

(2) Its effectiveness as an institution for planning, conducting, or arranging for research;

(3) Its demonstrated performance in making research results available to users in the State and elsewhere; and

(4) Its demonstrated record in providing for the training of scientists through student involvement in its research program.

(b) An evaluation team, selected by the granting agency on the basis of the members' knowledge of water research and administration, shall evaluate each institute, and may with the concurrence of the granting agency, visit such institutes as it considers necessary. The team is to include at least one individual from the following categories:

(1) Employees of the Department of the Interior;

(2) University faculty or other professionals with relevant experience in the conduct of water resources research;

(3) Former directors of water research institutes; and

(4) University faculty or other professionals with relevant experience in information transfer.

(c) The granting agency may request recommendations for team selections from the National Research Council/National Academy of Sciences and from other organizations whose members include the types of individuals cited in paragraph (b) of this section.

(d) The granting agency shall, as an administrative cost, provide the funds for travel and per diem expense of the team members, within the maximum limits allowable under Federal travel regulations (41 CFR subtitle F).

(e) The granting agency has the right to select dates for evaluation visits, and notice of the team's visit shall be provided to the institute being evaluated at least 60 days in advance.

(f) It shall be the responsibility of each institute to provide such documentation of its activities and accomplishments as the granting agency and evaluation team may reasonably request. The request for this documentation shall be made at least 60 days prior to the due date of its receipt.

(g) The team shall, within 90 days after completion of its evaluation, submit a written report of its findings to the granting agency for transmittal to the institute. If an institute is found to have deficiencies in meeting the objectives of the Act, it shall be allowed 1 year to correct them and to report such action to the granting agency. The decision as to the institute's eligibility to receive further funding will rest with the granting agency.

(h) After the initial evaluation, each institute shall be reevaluated at least every 5 years.

Dated: November 16, 1992.

Harlan L. Watson,

Principal Deputy Assistant Secretary—Water and Science.

BILLING CODE 4310–01–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD7–92–112]

Drawbridge Operation Regulations; Okeechobee Waterway, Fort Myers, FL

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: At the request of Lee County, (the bridge owner), the Coast Guard proposes to change the regulations governing the Sanibel Causeway Drawbridge over San Carols Bay at Punta Rassa, by requiring a five (5) minute advance notice prior to opening of the bridge during certain hours. This action should relieve the bridge owner of the burden of having a bridge tender at the bridge site constantly available to open the draw, while still providing for the reasonable needs of navigation.

DATES: Comments must be received on or before February 1, 1993.

ADDRESSES: Comments may be mailed to Commander (oan), Seventh Coast Guard District, 909 SE. 1st Avenue, Miami, Florida 33131–3050, or may be delivered to room 406 at the above address between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is 305–536–4103.

The Commander, Seventh Coast Guard District maintains the public docket for this rulemaking. Comments will become part of this docket and will be available for inspection or copying at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. Ian MacCartney, Project Manager, Bridge Section, at (305) 536–4103.

SUPPLEMENTARY INFORMATION:

Request for Comments

The Coast Guard encourages interested persons to participate in this rulemaking by submitting written data, views, or arguments. Persons submitting comments should include their names and addresses, identify this rulemaking [CGD7–92–112] and the specific section of this proposal to which each comment applies, and give the reason for each comment. The Coast Guard requests that all comments and attachments be

submitted in an unbound format suitable for copying. If not practical, a second copy of any bound material is requested. Persons wanting acknowledgment of receipt of comments should enclose a stamped, self-addressed postcard or envelope.

The Coast Guard will consider all comments received during the comment period. It may change this proposal in view of comments.

The Coast Guard plans no public hearing. Persons may request a public hearing by writing to Mr. Ian MacCartney at the address under "ADDRESSES." The request should include reasons why a hearing would be beneficial. If it determines that the opportunity for oral presentations will aid this rulemaking, the Coast Guard will hold a public hearing at a time and place announced by a later notice in the **Federal Register**.

Drafting Information

The principal persons involved in drafting this document are Ian MacCartney, Project Manager, and Lieutenant J.M. Losego, Project Counsel.

Background and Purpose

The Sanibel Causeway Drawbridge which crosses San Carlos Bay, Okeechobee Waterway mile 151, presently opens on-signal except that from 11 a.m. to 6 p.m., the draw opens only on the quarter hour. The bridge owner has requested that from 10 p.m. to 6 a.m., the bridge be untended and allowed to open on signal if at least a five minute advance notice is given. The purpose of the request is to reduce the burden of staffing the bridge with full time bridgetenders during nighttime hours.

Discussion of Proposed Amendments

For the nighttime hours, statistics show that the span opens only once every third night during the hours requested. The bridge owner operates a toll booth East of the draw span. It operates 24 hours per day. Personnel at the toll booth will monitor a marine radio and dispatch an attendant to the bridge to operate the drawspan. This proposal should reduce the operating costs for the owner while still providing for the reasonable needs of navigation on the Okeechobee Waterway. Public vessels of the United States, vessels owned or operated by the state, county, or local government and used for public safety purposes, or vessels in a situation where a delay would endanger life or property shall, upon proper notification, be passed at any time.

Regulatory Evaluation

This proposal is not major under Executive Order 12291 and not significant under the Department of Transportation regulatory policies and procedures (44 FR 11040; February 26, 1979.) The Coast Guard expects the economic impact of this proposal to be so minimal that a regulatory evaluation is unnecessary. We conclude this because the bridge owner has agreed to open the draw with a five minute advance notice.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this proposal, if adopted, will have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632.) Because it expects the impact of this proposal to be minimal, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposal, if adopted, will not have a significant economic impact on a substantial number of small entities.

Collection of Information

This proposal contains no collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Federalism

The Coast Guard has analyzed this proposal under the principles and criteria contained in Executive Order 12612, and has determined that this proposal does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environment

The Coast Guard considered the environmental impact of this proposal and concluded that, under section 2.B.2.g.(5) of Commandant Instruction M16475.1B, promulgation of operating requirements or procedures for drawbridges is categorically excluded from further environmental documentation. A Categorical Exclusion Determination is available in the docket for inspection or copying where indicated under "ADDRESSES."

List of Subjects in 33 CFR Part 117

Bridges.

For the reasons set out in the preamble, the Coast Guard proposes to amend 33 CFR part 117 as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g).

2. In § 117.317, paragraph (k) is revised to read as follows:

§ 117.317 Okeechobee Waterway

* * * * *

(k) *Sanibel Causeway bridge, mile 151 at Punta Rassa.* The draw shall open on signal; except that from 11 a.m. to 6 p.m., the draw need open only on the hour, quarter hour, half hour, and three quarter hour. From 10 p.m. to 6 a.m. the draw will open on signal if at least a five minute advance notice is given. Exempt vessels shall be passed at any time.

Dated: December 2, 1992.

W.P. Leahy,

Rear Admiral, U.S. Coast Guard, Commander, Seventh Coast Guard District.

[FR Doc. 92–30501 Filed 12–16–92; 8:45 am]

BILLING CODE 4910–14–M

33 CFR Part 117

[CGD7–92–56]

Drawbridge Operation Regulations; Hillsborough River, Tampa Bay, Northern Part, FL

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: At the request of the City of Tampa, Hillsborough County and the Florida Department of Transportation (FDOT), (the bridge owners), the Coast Guard proposes to change the regulations governing seven drawbridges over the Hillsborough River by requiring two hour advance notice prior to opening the bridges. This action should relieve the bridge owners of the burden of having to staff the bridges with full-time bridge tenders to open the draws, while still providing for the reasonable needs of navigation.

DATES: Comments must be received on or before February 1, 1993.

ADDRESSES: Comments may be mailed to Commander (oan), Seventh Coast Guard District, 909 SE. 1st Avenue, Miami, Florida 33131–3050, or may be delivered to room 406 at the above address between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (305) 536–4103.

The Commander, Seventh Coast Guard District maintains the public docket for this rulemaking. Comments will become part of this docket and will

be available for inspection or copying at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. Ian MacCartney, Project Manager, Bridge Section, at (305) 536–4103.

SUPPLEMENTARY INFORMATION:

Request for Comments

The Coast Guard encourages interested persons to participate in this rulemaking by submitting written data, views, or arguments. Persons submitting comments should include their names and addresses, identify this rulemaking (CGD7–92–56) and the specific section of this proposal to which each comment applies, and give the reason for each comment. The Coast Guard requests that all comments and attachments be submitted in an unbound format suitable for copying. If not practical, a second copy of any bound material is requested. Persons wanting acknowledgment of receipt of comments should enclose a stamped, self-addressed postcard or envelope.

The Coast Guard will consider all comments received during the comment period. It may change this proposal in view of comments.

The Coast Guard plans no public hearing. Persons may request a public hearing by writing to Mr. Ian MacCartney at the address under **ADDRESSES**. The request should include reasons why a hearing would be beneficial. If it determines that the opportunity for oral presentations will aid this rulemaking, the Coast Guard will hold a public hearing at a time and place announced by a later notice in the **Federal Register**.

Drafting Information

The principal persons involved in drafting this document are Ian MacCartney, Project Manager, and Lieutenant J.M. Losego, Project Counsel.

Background and Purpose

The drawbridges at Kennedy Blvd., Platt Street, Brorein Street, Cass Street, and Laurel Street which cross the Hillsborough River, presently open on signal from 9 a.m. to 4 p.m., Monday through Friday and from 8 a.m. to 6 p.m. Saturdays, Sundays and Federal holidays. At all other times they open on signal if at least a two hour notice is given. The West Columbus Drive Drawbridge and West Hillsborough Drive Drawbridge open on signal from 8 a.m. to 6 p.m. At all other times the draws open on signal if at least a one hour notice is given. The bridge owners have requested that all seven bridges be allowed to open on signal if at least a two hour advance notice is given. The purpose of the request is to reduce the burden of staffing the bridges with full-time bridgetenders.

Discussion of Proposed Amendments

The three bridge owners have agreed to a single point of contact (POC) for navigation to begin the bridge opening sequence within two hours of a request. Public vessels of the United States, vessels owned or operated by the state, county, or local government and used for public safety purposes, or vessels in a situation where a delay would endanger life or property shall, upon proper notification, be passed through each drawbridge as soon as possible.

A Coast Guard evaluation of the proposal concluded that none of the bridges opened more than two times per day during the last several years.

This proposal should reduce the operating costs for the owners while still providing for the reasonable needs of navigation on the Hillsborough River.

Regulatory Evaluation

This proposal is not major under Executive Order 12291 and not significant under the Department of Transportation regulatory policies and procedures (44 FR 11040; February 26, 1979). The Coast Guard expects the economic impact of this proposal to be so minimal that a regulatory evaluation is unnecessary. We conclude this because the bridges seldom open for commercial navigation and the bridge owners have agreed to open the draws as quickly as possible after notification in specified circumstances such as a situation where a delay would endanger life or property.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this proposal, if adopted, will have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632). Because it expects the impact of this proposal to be minimal, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule will not have a significant economic impact on a substantial number of small entities.

Collection of Information

This proposal contains no collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Federalism

The Coast Guard has analyzed this proposal under the principles and criteria contained in Executive Order 12612, and has determined that this proposal does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environment

The Coast Guard considered the environmental impact of this proposal and concluded that, under section 2.B.2.g.(5) of Commandant Instruction M16475.1B, promulgation of operating requirements or procedures for drawbridges is categorically excluded from further environmental documentation. A Categorical Exclusion Determination is available in the docket for inspection or copying where indicated under **ADDRESSES**.

List of Subjects in 33 CFR Part 117

Bridges.

For the reasons set out in the preamble, the Coast Guard proposes to amend 33 CFR part 117 as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g).

2. In section 117.291, paragraph (c) is removed and paragraph (a) is revised to read as follows:

§ 117.291 Hillsborough River.

(a) The draws of the bridges at Platt Street, mile 0.0, Brorein Street, mile 0.16, Kennedy Boulevard, mile 0.4, Cass Street, mile 0.7, Laurel Street, mile 1.0, West Columbus Drive, mile 2.3, and West Hillsborough Avenue, mile 4.8, shall open on signal if at least two hours notice is given; except that, the draws shall open on signal as soon as possible after a request by a public vessel of the United States, a vessel owned or operated by the State, county or local government and used for public safety purposes, or a vessel in distress.

* * * * *

Dated: December 2, 1992.

W.P. Leahy,

Rear Admiral, U.S. Coast Guard, Commander, Seventh Coast Guard District.

[FR Doc. 92–30502 Filed 12–16–92; 8:45 am]

BILLING CODE 4910–14–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA–7057]

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are requested on the proposed base (100-year) flood elevations and proposed base flood elevation modifications for the communities listed below. The base (100-year) flood elevations are the basis for the floodplain management measures that the community is required either to adopt or to show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The comment period is ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

ADDRESSES: The proposed base flood elevations for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the following table.

FOR FURTHER INFORMATION CONTACT: William R. Locke, Chief, Risk Studies Division, Federal Insurance Administration, 500 C Street, SW., Washington, DC 20472, (202) 646–2766.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA or Agency) gives notice of the proposed determinations of base (100-year) flood elevations and modified base flood elevations for each community listed, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed base flood and modified base flood elevations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and are also used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in these buildings.

National Environmental Policy Act

This proposed rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Consideration. No environmental impact assessment has been prepared.

Regulatory Flexibility Act

The Federal Insurance Administrator has determined that this proposed rule is exempt from the requirements of the Regulatory Flexibility Act because proposed or modified base flood elevations are required by the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and are required to establish and maintain community eligibility in the National Flood Insurance Program. As a result, a regulatory flexibility analysis has not been prepared.

Regulatory Impact Analysis

This proposed rule is not a major rule under Executive Order 12291, February 17, 1981. No regulatory impact analysis has been prepared.

Executive Order 12612, Federalism

This proposed rule involves no policies that have federalism implications under Executive Order 12612, Fedealism, dated October 26, 1987.

Executive Order 12778, Civil Justice Reform

This proposed rule meets the applicable standards of section 2(b)(2) of Executive Order 12778.

List of Subjects in 44 CFR Part 67

Administrative practice and procedure, Flood insurance, Reporting and recordkeeping requirements. Accordingly, 44 CFR part 67 is proposed to be amended as follows:

PART 67—[AMENDED]

1. The authority citation for part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.*; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR 1979 Comp., p. 376.

§ 67.4 [Amended]

2. The tables published under the authority of § 67.4 are proposed to be amended as follows:

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 97

[PR Docket No. 92-289; FCC 92-533]

Notice of Creation of 222-225 MHz and 1240-1300 MHz Frequency Bands

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This proposal would create a small new sub-band and at 222.00-222.15 MHz where repeaters would be prohibited. It would also authorize frequency privileges for Novice Class operators in the entire 222-225 MHz band. Further, it would allow Novice Class operators to be licensees and control operators of repeaters in the 222-225 MHz band as well as in the 1270-1295 MHz segment of the 1240-1300 MHz band. The proposed rules are necessary so that there will be a small segment in the 222-225 MHz band where frequencies need not be shared with repeaters. Also, the proposed rules are needed to improve the operational standards for the amateur service. The effects of the proposed rule changes are to enhance experimentation possibilities, to provide Novices with opportunities to become more proficient in amateur service operations, and to use available spectrum more efficiently

DATES: Comments are due on or before February 23, 1993. Reply comments are due on or before March 23, 1993.

ADDRESSES: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Maurice J. DePont, Federal Communications Commission, Private Radio Bureau, Washington, DC 20554, (202) 632-4964.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, adopted November 30, 1992, and released December 11, 1992. The complete text of this Commission action, including the proposed rule amendments, is available for inspection and copying during normal business hours in the FCC Reference Center (room 239), 1919 M Street, NW., Washington, DC. The complete text of this Notice of Proposed Rule Making, including the proposed rule amendments, may also be purchased from the Commission's copy contractor, Downtown Copy Center (DCC), (202) 452-1422, 1990 M Street, NW., suite 640, Washington, DC 20036. DCC's FAX number is (202) 296-3780.

SUMMARY OF NOTICE OF PROPOSED RULE MAKING: 1. The proposed rule changes respond to petitions filed by The American Radio Relay League, Inc. (ARRL) and Dr. Michael C. Trahos. The ARRL requests that 222.00-222.15 MHz be designated as a frequency segment where repeaters are not allowed. The ARRL believes that a rule is needed to protect experimentation and other operations from repeater interference. In response to this request, some commenters argue that such a matter should be decided by the local frequency coordinator. The ARRL also requests expansion of the frequency privileges for Novice Class operators to encompass the entire 222-225 MHz band. Dr. Trahos requests that Novice Class operators be authorized to be licensees and control operators of repeaters in the 222-225 MHz band and in the 1270-1295 MHz Novice subband.

2. The proposed rules offer improvements in the operational standards for the amateur service. Experimentation would be facilitated. Novice Class operators could become more proficient in a wider variety of amateur service operations. They would also have more flexibility in selecting the mode of transmission. Choosing the appropriate mode would result in spectrum efficiency.

3. Comments are invited on the effect that the proposed rule changes would have on Novice Class licensees.

4. The proposed rules are set forth at the end of this document.

5. This is a non-restricted notice and comment rule making proceeding. *Ex parte* presentations are permitted, except during the Sunshine Agenda period, provided they are disclosed as provided in Commission rules. See generally 47 CFR 1.1202, 1.1203, and 1.1206(a).

6. In accordance with Section 605(b) of the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the Commission certifies that the proposed rules would not, if promulgated, have a significant economic impact on a substantial number of small business entities because the amateur stations that are the subject of this proceeding would not be authorized to transmit any communications that facilitate the business or commercial affairs of any party. See 47 CFR 97.113(a).

7. The proposal contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980, 44 U.S.C. 3501-3520, and found to contain

no new or modified form, information collection and/or record retention requirements, and will not increase or decrease burden hours imposed on the public.

8. This Notice of Proposed Rule Making and the proposed rule amendments are issued under the authority of sections 4(i) and 303 (c), (f), and (r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i) and 303 (c), (f), and (r).

9. A copy of this Notice of Proposed Rule Making will be forwarded to the Chief Counsel for Advocacy of the Small Business Administration.

Donna R. Searcy,

Secretary.

Proposed Rules

Part 97 of Chapter I of Title 47 of the Code of Federal Regulations is proposed to be amended as follows:

PART 97—AMATEUR RADIO SERVICE

1. The authority citation for Part 97 continues to read as follows:

Authority citation: 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply 48 Stat. 1064–1068, 1081–1105, as amended; 47 U.S.C. 151–155, 301–609, unless otherwise noted.

2. Section 97.201(b) is revised to read as follows:

§ 97.201 Auxiliary station.

* * * * *

(b) An auxiliary station may transmit only on the 1.25 m and shorter wavelength frequency bands, except the 222.00–222.15 MHz, 431–433 MHz, and 435–438 MHz segments.

* * * * *

3. Paragraphs (a) and (b) of § 97.205 are revised to read as follows:

§ 97.205 Repeater station.

(a) Any amateur station may be a repeater. A holder of any class operator license may be the control operator of a repeater, subject to the privileges of the class of operator license held.

(b) A repeater may receive and retransmit only on the 10 m and shorter wavelength frequency bands except the 28.0–29.5 MHz, 50.0–51.0 MHz, 144.0–144.5 MHz, 145.5–148.0 MHz, 222.00–222.15 MHz, 431.0–433.0 MHz, and 435.0–438.0 MHz segments.

* * * * *

4. The entry under VHF in § 97.301(f) is amended by revising the frequencies authorized for use by Novice Class operators in ITU Region 2 to read as follows:

§ 97.301 Authorized frequency bands.

* * * * *

(f) For a station having a control operator holding a Novice Class operator license:

Wavelength band	ITU region 1	ITU region 2	ITU region 3	Sharing requirements see § 97.303, paragraph:
VHF				
1.25 m	MHz	MHz	MHz	
	.....	222–225	.....	(a)
• • • • • • • •

BILLING CODE 6712–01–M

INTERSTATE COMMERCE COMMISSION

49 CFR Parts 1152 and 1201

[Ex Parte No. 274 (Sub-No. 26)]

Abandonment Proceedings: Elimination of the Review and Cost Data For All Years Prior to the Base Year Period

AGENCY: Interstate Commerce Commission.

ACTION: Proposed rule; extension of comment due date.

SUMMARY: By decision served November 9, 1992 (57 FR 53307, November 9, 1992), the Commission sought public comment by December 24, 1992, on the proposal to eliminate the requirement that abandonment applications include revenue and cost data for the two prior calendar years and that part of the current year prior to the filing of the application. By letter filed December 4, 1992, the Association of American Railroads (AAR) requests a 30-day extension until January 25, 1993, of the comment due date. AAR indicates additional time is needed because the current schedules of AAR's counsel and member road personnel do not permit sufficient time for an adequate and coordinated response on behalf of the railroad industry. The request will be granted.

DATES: Comments on the proposed changes are due on or before January 25, 1993.

ADDRESSES: Send an original and 10 copies of comments, referring to Ex Parte No. 274 (sub-No. 26), to: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: William T. Bono, (202) 927–5720; James R. Wells, (202) 927–6238 [TDD for hearing impaired: (2) 927–5721]

Decided: December 11, 1992.

By the Commission, Sidney L. Strickland, Jr., Secretary.

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 7035–01–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018—AB89

Endangered and Threatened Wildlife and Plants; Proposed Endangered Status for 22 Plants From the Island of Hawaii, State of Hawaii

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The U.S. Fish and Wildlife Service (Service) proposes endangered status pursuant to the Endangered Species Act of 1973, as amended (Act), for 22 plants: *Clermontia lindseyana* ('oha wai), *Clermontia peleana* ('oha wai), *Clermontia pyrulari* a ('oha wai),

Colubrina oppositifolia (kauila), *Cyanea copelandii* ssp. *copelandii* (haha), *Cyanea hamatiflora* ssp. *carlsonii* (haha), *Cyanea shipmanii* (haha), *Cyanea stictophylla* (haha), *Cyrtandra giffardii* (ha'iwale), *Cyrtandra tintinnabula* (ha'iwale), *Hesperocnide sandwicensis* (no common name (NCN)), *Ischaemum byrone* (Hilo ischaemum), *Isodendrion pyrifolium* (wahine noho kula), *Mariscus fauriei* (NCN), *Nothocestrum breviflorum* ('aiea), *Ochrosia kilaueaensis* (holei), *Plantago hawaiensis* (laukahi kuahiwi), *Portulaca sclerocarpa* (po'e), *Pritchardia affinis* (loulu), *Silene hawaiiensis* (NCN), *Tetramolopium arenarium* (NCN), and *Zanthoxylum hawaiiense* (a'e). All but seven of the taxa are or were endemic to the island of Hawaii, Hawaiian Islands; the exceptions are or were found on the islands of Niihau, Kauai, Oahu, Molokai, Lanai, and/or Maui as well as Hawaii. The 22 plant taxa and their habitats have been variously affected or are currently threatened by one or more of the following: competition for space, light, water, and nutrients by naturalized, introduced vegetation; habitat degradation by wild, feral, or domestic animals (axis deer, cattle, goats, pigs, and sheep); agricultural, military, and recreational activities; habitat loss and damage to plants from fires; predation by animals (cattle, goats, insects, and rats); and natural disasters (flooding and volcanic activity). Due to the small number of existing individuals and their very narrow distributions, these taxa and most of their populations are subject to an increased likelihood of extinction and/or reduced reproductive vigor from stochastic events. This proposal, if made final, would implement the Federal protection and recovery provisions provided by the Act. If made final, it would also make operative State regulations protecting these plants as endangered species. Comments and materials related to this proposal are solicited.

DATES: Comments from all interested parties must be received by February 16, 1993. Public hearing requests must be received by February 1, 1993.

ADDRESSES: Comments and materials concerning this proposal should be sent to Robert P. Smith, Field Supervisor, Pacific Islands Office, U.S. Fish Wildlife Service, 300 Ala Moana Boulevard, room 6307, P.O. Box 50167, Honolulu, Hawaii 96850. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Derral R. Herbst, at the above address (808/541–2749).

SUPPLEMENTARY INFORMATION:

Background

Clermontia lindseyana, Clermontia peleana, Clermontia pyrularia, Colubrina oppositifolia, Cyanea copelandii ssp. *copelandii, Cyanea hamatiflora* ssp. *carlsonii, Cyanea shipmanii, Cyanea stictophylla, Cyrtandra giffardii, Cyrtandra tintinnabula, Hesperocnide sandwicensis, Ischaemum byrone, Isodendrion pyrifolium, Mariscus fauriei, Nothocestrum breviflorum, Ochrosia kilaueaensis, Plantago hawaiiensis, Portulaca sclerocarpa, Pritchardia affinis, Silene hawaiiensis, Tetramolopium arenarium,* and *Zanthoxylum hawaiiense* are endemic to or have the majority of their populations on the island of Hawaii, Hawaiian islands. Thirteen of these taxa are endemic to the island of Hawaii; three additional taxa are now found only on Hawaii. One of these taxa is now or was previously also known from Niihau, one from Kauai, two from Oahu, four from Molokai, four from Lanai, and six from Maui.

The island of Hawaii is the southernmost, furthest east, and the youngest of the eight major Hawaiian Islands. This largest island of the Hawaiian archipelago comprises 4,038 square miles (sq mi) (10,458 sq kilometers (km)), or two-thirds of the land area of the State of Hawaii, giving rise to its common name, the "Big Island." The Hawaiian Islands are volcanic islands formed over a "hot spot," a fixed area of pressurized molten rock deep within the Earth. As the Pacific Plate, a section of the Earth's surface many miles thick, has moved to the northwest, the islands of the chain have separated. Currently, this hot spot is centered under the southeast part of the island of Hawaii, which is one of the most active volcanic areas on Earth. Five large shield volcanoes make up the island of Hawaii: Mauna Kea at 13,796 feet (ft) (4,205 meters (m)) and Kohala at 5,480 ft (1,670 m), both extinct; Hualalai, at 8,271 ft (2,521 m), which is dormant and will probably erupt again; and Mauna Loa, at 13,677 ft (4,169 m) and Kilauea, at 4,093 ft (1,248 m), both of which are currently active and adding land area to the island. Compared to Kauai, which is the oldest of the main islands and was formed about 5.6 million years ago, Hawaii is very young, with fresh lava and land up to 0.5 million years old (Cuddihy and Stone 1990, Culliney 1988, Department of Geography 1983, Macdonald *et al.* 1983).

Because of the large size and range of elevation of the island, Hawaii has a great diversity of climates. Windward (northeastern) slopes of Mauna Loa have rainfall up to 300 inches (in) (762 centimeters (cm)) per year in some areas. The leeward coast, shielded by the mountains from rain brought by trade winds, has areas classified as desert and receiving as little as 7.9 in (20 cm) of rain annually. The summits of Mauna Loa and Mauna Kea experience snowfall each year, and Mauna Kea was glaciated during the last Ice Age (Culliney 1988, Department of Geography 1983, Macdonald *et al*, 1983, Wagner *et al.* 1990).

Plant communities on Hawaii include those in various stages of primary succession on the slopes of active and dormant volcanoes, ones in stages of secondary succession following disturbance, and relatively stable climax communities. On Hawaii, vegetation is found in all classifications: Coastal, dryland, montane, subalpine, and alpine; dry, mesic, and wet; and herblands, grasslands, shrublands, forests, and mixed communities. The vegetation and land of the island of Hawaii have undergone much change through the Island's history. Since it is an area of active volcanism, vegetated areas are periodically replaced with bare lava. Polynesian immigrants, first settling on Hawaii by 750 A.D., made extensive alterations in lowland areas for agriculture and habitation. European contact with Hawaii brought intentional and inadvertent introductions of alien plant and animal species. In 1960, 65 percent of the total land area of the island of Hawaii was used for grazing, and much land has also been converted to modern cropland (Cuddihy and Stone 1990, Gagne and Cuddihy 1990).

The 22 taxa proposed in this rule occur between sea level and 8,600 ft (0 and 2,260 m) in elevation in various portions of the island of Hawaii. A few taxa are also found in central Kauai (one taxon), in the Waianae Mountains of Oahu (one taxon), on Eastern Molokai (three taxa), in central and southern Lanai (two taxa), and on East Maui (three taxa). Most of the proposed species exist as remnant plants persisting in grazed areas or in higher elevations which have only recently been heavily invaded by alien plant and animal species. The proposed taxa grow in a variety of vegetation communities (herbland, shrublands, and forests), elevational zones (coastal, lowland, montane, and subalpine), and moisture regimes (dry, mesic, and wet). One

taxon is found in each of two coastal habitats: Dry shrubland and mesic forest. In lowland habitats, five taxa are found in dry forest, four in mesic forest, and two in wet forest. In montane habitats, one taxon is found in wet herbland, three taxa in dry shrubland, three in dry forest, four in mesic forest, and five in wet forest. In the subalpine area, one taxon is found in dry shrubland and two taxa in dry forest.

The land on which these 22 plant taxa are found is owned by various private parties, the State of Hawaii (including conservation district lands, forest reserves, natural area reserves, State parks, and the State seabird sanctuary), or is owned or managed by the Federal government (including a U.S. Fish and Wildlife Service refuge, a U.S. Army military reservation and a military training area, a National Park, and a U.S. Coast Guard lighthouse area).

Discussion of the 22 Taxa Proposed for Listing

Rock (1957) named *Clermontia hawaiiensis* var. *grandis* on the basis of sterile specimens collected on the island of Hawaii in the 1950s. Later, after examining fertile material, he named the taxon *C. lindseyana* and also described a variety, var. *livida* (Rock 1962). The specific epithet commemorates Thomas Lindsey, a naturalist who brought the species to Rock's attention. St. John (1987a) described two other species, *C. albimontis* and *C. viridis*, but the author of the current treatment of the genus (Lammers 1990, 1991) considers St. John's species to fall within the range of *C. lindseyana* and recognizes no subspecific taxa.

Clermontia lindseyana of the bellflower family (Campanulaceae) is a terrestrial or epiphytic (not rooted in the soil) branched shrub or tree 8.2 to 20 ft (2.5 to 6 m) tall. The alternate, stalked, toothed leaves are 5 to 9 in (13 to 24 cm) long and 1.5 to 2.6 in (3.8 to 6.5 cm) wide. Two flowers, each with a stalk 0.4 to 1 in (1 to 2.5 cm) long, are positioned at the end of a main flower stalk 1 to 1.6 in (2.5 to 4 cm) long. The calyx (fused sepals) and corolla (fused petals) are similar in size and appearance, and each forms a slightly curved, five-lobed tube 2.2 to 2.6 in (5.5 to 6.5 cm) long and 0.4 to 0.7 in (0.9 to 1.8 cm) wide which is greenish white or purplish on the outside and white or cream-colored on the inside. The berries are orange and 1 to 1.6 in (2.5 to 4 cm) in diameter. This species is distinguished from others in this endemic Hawaiian genus by larger leaves and flowers, similar sepals and petals, and spreading floral lobes (Cuddihy *et al.* 1983; Lammers 1990, 1991).

Historically, *Clermontia lindseyana* was known from the island of Maui on the southern slope of Haleakala and from the island of Hawaii on the eastern slope of Mauna Kea and the eastern, southeastern, and southwestern slopes of Mauna Loa. One population of the species is known to be extant on Maui in Wailaulau Gulch on State-owned land. The 13 known populations on the island of Hawaii extend over a distance of about 53 by 13 mi (85 by 21 km). Populations are found near Laupahoehoe, in Piha, in Makahanaloa, near Puaakala, near Puu Oo, near Kulani Correctional Facility, near Kapapala, in Waiea Tract, near Kaapuna Lava Flow, and near Kahuku on privately and State-owned land. Approximately 125 to 175 individuals exist (Hawaii Heritage Program (HHP) 1991a1 to 1991a13). This species typically grows in *Acacia koa* (koa)—and *Metrosideros polymorpha* ('ohi'a)—dominated Montane Mesic Forests, often epiphytically, at elevations between 4,000 and 7,050 ft (1,220 and 2,150 m) (Gagne and Cuddihy 1990; HHP 1991a1 to 1991a13; Hawaii Plant Conservation Center (HPCC) 1991a; Lammers 1990, 1991). Associated species include *Coprosma* sp. (pilo), *Ilex anomala* (kawa'u), and *Myrsine* sp. (kolea) (HHP 1991a2, 1991a5; HPCC 1991a; Fern Duvall, Olinda Endangered Species Propagation Facility, pers. comm., 1992). The major threats to *Clermontia lindseyana* are competition from alien plant species such as *Passiflora mollissima* (banana poka) and *Pennisetum clandestinum* (Kikuyu grass), grazing and trampling by *Bos taurus* (cattle), and habitat disturbance by feral *Sus scrofa* (pigs) Cuddihy *et al.* 1983; HPCC 1991a; Pratt and Cuddihy 1991; F. Duvall and Arthur Medeiros, Haleakala National Park, pers. comms., 1992).

Clermontia peleana was first collected by John Lydgate at Hamakua, island of Hawaii, and listed as an unnamed variety of *C. gaudichaudii* by Hillebrand (1888). Rock later collected a specimen of the taxon near Kilauea, the volcano home of the Hawaiian goddess Pele, after whom he named the species (Rock 1913). Other names by which the species has been known include: *Clermontia gaudichaudii* var. *singuliflora* (Rock 1919b), *C. singuliflora* (Rock 1919b), *C. gaudichaudii* var. *barbata* (Rock 1919b), *C. clermontioides* var. *singuliflora* (Hochreutiner 1934); *C. clermontioides* var. *mauiensis*, a superfluous name (Hochreutiner 1934); and *C. clermontioides* var. *barbata* (St. John 1973). In the most recent treatment of the species (Lammers 1991), two subspecies of *C. peleana*, ssp. *singuliflora* and ssp. *peleana*, are recognized.

Clermontia peleana of the bellflower family is an epiphytic shrub or tree 5 to 20 ft (1.5 to 6 m) tall which grows on 'ohi'a, koa, *Cheirodendron trigynum* ('olapa), and *Sadleria* spp. (ama'u). The alternate, stalked, oblong or oval, toothed leaves reach a length of 3 to 8 in (8 to 20 cm) and a width of 1.2 to 2 in (3 to 5 cm). Flowers are single or paired, each on a stalk 1.2 to 1.8 in (3 to 4.5 cm) long with a main stalk 0.3 to 0.7 in (0.8 to 1.7 cm) long. Five small green calyx lobes top the hypanthium (basal portion of the flower). The blackish-purple (ssp. *peleana*) or greenish-white (ssp. *singuliflora*) petals, 2 to 2.8 in (5 to 7 cm) long and 0.3 to 0.5 in (0.8 to 1.3 cm) wide, are fused into a one-lipped, arching tube with five downcurved lobes. Berries of ssp. *peleana* are orange and 1 to 1.2 in (2.5 to 3 cm) in diameter; berries of ssp. *singuliflora* are unknown. This species is distinguished from others of the genus by its epiphytic growth habit; its small green calyx lobes; and its one-lipped, blackish-purple or greenish-white corolla (Lammers 1990, 1991).

Historically, *Clermontia peleana* ssp. *peleana* has been found only on the island of Hawaii on the eastern slope of Mauna Loa and the northeastern and southeastern slopes of Mauna Kea. Today, the taxon is found near Waiakaumalo Stream, by the Wailuku River, near Saddle Road, and between the towns of Glenwood and Volcano. The six known populations, which extend over a distance of about 12 by 5 mi (19 by 8 km), are located on State and Federally owned land and contain a total of approximately eight known individuals (HHP 1991b1 to 1991b7). *Clermontia peleana* ssp. *singuliflora* was formerly found on the island of Hawaii on the northern slope of Mauna Kea and on East Maui on the northwestern slope of Haleakala, but the taxon has not been seen in either place since early in the century and is believed to be extinct (HHP 1991c1 to 1991c3, Wagner *et al.* 1990). This species typically grows epiphytically in Montane Wet Forests dominated by koa, 'ohi'a, and *Cibotium* spp. and/or *Sadleria* spp. (tree ferns) at elevations between 1,740 and 3,800 ft (530 and 1,160m) (HHP 1991b1 to 1991b4, 1991b6, 1991b7; Lammers 1990, 1991). Associated species include 'olapa, *Melicope clusiifolia* (kolokolo mokihana), and *Scaevola chamissoniana* (naupaka kuahiwi) (HHP 1991b1; Warren L. Wagner, Smithsonian Institution, pers. comm., 1992). The major threats to *Clermontia peleana* are

habitat disturbance caused by feral pigs and illegal cultivation of *Cannabis sativa* (marijuana), *Rattus rattus* (roof or black rat) damage, flooding, and stochastic extinction and/or reduced reproductive vigor due to the small number of existing individuals (Bruegmann 1990, Center for Plant Conservation (CPC) 1990b).

A sterile specimen of *Clermontia pyrularia* was first collected on Mauna Kea, island of Hawaii, during the United States Exploring Expedition of 1840 and 1841 and was named *Delissea obtusa* var. ? *mollis* by Gray (1861b). Later, Hillebrand (1888) collected fertile specimens of the taxon and named it *C. pyrularia*, referring in the specific epithet to the fruits, which are sometimes shaped like those of *Pyrus* (pear).

Clermontia pyrularia of the bellflower family, a terrestrial tree 10 to 13 ft (3 to 4 m) tall, has alternate toothed leaves 5.9 to 11 in (15 to 28 cm) long and 1 to 2 in (2.5 to 5 cm) wide with winged petioles. A cluster of two, three, or sometimes up to five flowers has a main stalk 1.1 to 2.4 in (2.8 to 6 cm) long; each flower has a stalk 0.3 to 0.8 in (0.8 to 2 cm) long. Five small green calyx lobes top the hypanthium. The white or greenish-white petals are covered with fine hairs, measure 1.6 to 1.8 in (4 to 4.5 cm) long, and are fused into a curved two-lipped tube 0.2 to 0.3 in (5 to 8 mm) wide with five spreading lobes. The orange berry is inversely ovoid or inversely pear-shaped. This species is distinguished from others of the genus by its winged petioles; its small, green calyx lobes; its two-lipped flowers with white or greenish-white petals; and the shape of its berry (Lammers 1990, 1991).

Historically, *Clermontia pyrularia* has been found only on the island of Hawaii on the northeastern slope of Mauna Kea, the western slope of Mauna Loa, and the saddle area between the two mountains. Today, the species is found near the Humuula-Laupahoehoe boundary, near Hakalau Gulch, near Kealakekua, and near Kaawaloa. The five extant populations, which extend over a distance of about 47 by 6 mi (76 by 10 km), are located on privately, State, and Federally owned land. Although the exact number of individuals is not known, it is likely that not more than five individuals exist (HHP 1991d1 to 1991d6). This species typically grows in koa- and/or'ohi'a-dominated Montane Wet Forests and Subalpine Dry Forests at elevations between 3,000 and 7,000 ft (910 and 2,130 m) (HHP 1991d2 to 1991d5; Lammers 1990, 1991). Associated species include pilo, *Lythrum maritium* (pukamole), and *Rubus hawaiensis* ('akala) (HHP 1991d2, 1991aa). The major threat to *Clermontia pyrularia* is competition from alien grasses and shrubs in the forest understory and banana poka as well as stochastic extinction and/or reduced reproductive vigor due to the small number of existing populations and individuals (HHP 1991d2).

Colubrina oppositifolia was first collected by Remy in the 1850s and was named in 1867 by Adolphe Theodore Brongniart (Mann 1867). The specific epithet describes the plant's opposite leaf arrangement. St. John (1979) called Oahu plants *C. oppositifolia* var. *obatae*, but no subspecific taxa are recognized in the current treatment of the genus (Wagner *et al.* 1990).

Colubrina oppositifolia of the buckthorn family (Rhamnaceae), a tree 16 to 43 ft (5 to 13m) tall, has opposite, stalked, oval, thin, pinnately veined, toothless leaves with glands on the lower surface. Leaves measure 2.4 to 4.7 in (6 to 12 cm) long and 1.2 to 2.8 in (3 to 7 cm) wide in mature plants and are larger in seedlings. Ten to 12 bisexual flowers are clustered at the end of a main stalk 0.1 to 0.3 in (3 to 8 millimeters (mm)) long; each flower has a stalk about 0.07 to 0.1 in (2 to 3 mm) long which elongates in fruit. The five triangular sepals measure about 0.06 to 0.08 in (1.5 to 2 mm) long, and the five greenish-yellow or white petals are about 0.06 in (1.5 mm) long. The somewhat spherical fruit, 0.3 to 0.4 in (8 to 11 mm) long, is similar to a capsule and opens explosively when mature. This species can be distinguished from the one other species of the genus in Hawaii by its growth habit and the arrangement, texture, venation, and margins of its leaves (Wagner *et al.* 1990).

Historically, *Colubrina oppositifolia* was found on the island of Oahu in the central and southern Waianae Mountains and on the island of Hawaii in the following areas: The Kohala Mountains; the northern slope of Hualalai; and the western, southwestern, and southern slopes of Mauna Loa. Today, the species is known on Oahu in eastern Makaleha Valley, Mokuleia Forest Reserve, and Makua Valley; on Mt. Kaala; and near Honouliuli Contour Trail on private, State-owned, and Federally managed land. The 6 extant populations on Oahu, which extend over a distance of about 9 by 4 mi (14 by 6 km), contain approximately 94 known individuals (HHP 1991e1, 1991e2, 1991e5, 1991e9 to 1991e12). On the island of Hawaii, there are 7 extant populations which extend over a distance of about 16 by 4 mi (26 by 6 km), are located on privately and State-owned land, and contain about 185 to 205 known individuals. The species occurs along the Mamalahoa Highway on the northern slope of Hualalai as well as in Kapua and Puueo in the southernmost portion of the island (HHP 1991e3, 1991e4, 1001e6 to 1991e8, 1991e13 to 1991e16). This species typically grows in *Diospyros sandwicensis* (lama)-dominated Lowland Dry and Mesic Forests, often on a lava, at elevations between 800 and 3,000 ft (240 and 910m). Associated species include *Canthium odoratum* (alahe'e) and *Reynoldsia sandwicensis* ('ohe) (HHP 1991e3, 1991e8, 1991e9, 1991e15, 1991e16, HPCC 1991b). The major threats to *Colubrina oppositifolia* are competition from alien plant species such as *Lantana camara* (lantana), *Pennisetum setaceum* (fountain grass), and *Schinus terebinthifolius* (Christmas berry); habitat disturbance by feral pigs; plant damage and death from *Xylosandrus compactus* (black twig borer); fire; damage and disturbance from military exercises; and limited regeneration (HHP 1991e4, 1991e8, 1991e9, 1991e15, 1991e16; Joel Q. Lau, The Nature Conservancy of Hawaii, pers. comm., 1992).

Rock (1917) named *Cyanea copelandii* to honor his collecting companion, M.L. Copeland, with whom he first collected the species in 1914 on the island of Hawaii (Rock 1917). St. John (1987b, St. John and Takeuchi 1987), believing there to be no generic distinction between *Cyanea* and *Delissea*, transferred the species to the genus *Delissea*, the older of the two generic names, creating *D. copelandii*. The current treatment of the family (Lammers 1990), however, maintains the separation of the two genera, and plants found on the island of Hawaii are considered to be *C. copelandii* ssp. *copelandii*. Subspecies *haleakalaensis*, found on Maui, is not as rare.

Cyanea copelandii ssp. *copelandii* of the bellflower family is a shrub with a habit similar to that of a woody vine. The alternate, stalked, toothed leaves are 7.9 to 10.6 in (20 to 27 cm) long and 1.4 to 3.3 in (3.5 to 8.5 cm) wide and have fine hairs on the lower surface. Five to 12 flowers are clustered on the end of a main stalk 0.8 to 1.8 in (2 to 4.5 cm) long; each flower has a stalk 0.2 to 0.6 in (0.4 to 1.6 cm) long. The slightly hairy hypanthium is topped by five small, triangular calyx lobes. Petals, which are yellowish but appear rose-colored because of a covering of dark red hairs, are fused into a curved tube with five spreading lobes; the corolla is 1.5 to 1.7 in (3.7 to 4.2 cm) long about 0.2 in (4 to 5 mm) wide. Berries are dark orange and measure 0.3 to 0.6 in (0.7 to

1.5 cm) long. This subspecies is distinguished from ssp. *haleakalaensis*, the only other subspecies of *Cyanea copelandii*, by its narrower leaves. The species differs from others in this endemic Hawaiian genus by its growth habit and the size, shape, and dark red pubescence of its corolla (Lammers 1990).

Cyanea copelandii ssp. *copelandii*, which has been collected only at two sites on the southeastern slope of Mauna Kea near Glenwood, was last seen in 1957. This population, located on State-owned land, is still considered extant and contains an unknown number of individuals (HHP 1991f; Thomas Lammers, Field Museum, pers. comm., 1992). This taxon often grows epiphytically and is typically found in Montane Wet Forests at elevations between 2,200 and 2,900 ft (660 and 880 m) (Lammers 1990). Associated species include tree ferns (HHP 1991f). The major known threat to *Cyanea copelandii* ssp. *copelandii* is stochastic extinction and/or reduced reproductive vigor due to the single known population.

Using sterile type material, Rock (1957) named *Cyanea carlsonii* to honor Norman K. Carlson, who first saw the taxon (Degener *et al.* 1969). Carlson cultivated a plant of the taxon in his garden, from which Rock later described the flowers and fruit (Rock 1962). Recently, St. John (1987b, St. John and Takeuchi 1987) placed the genus *Cyanea* in synonymy with *Delissea*, resulting in the new combination *Delissea carlsonii*, but Lammers (1990) retains both genera in the currently accepted treatment of the family. He also considers the taxon to be a subspecies of another species, resulting in the name *C. hamatiflora* ssp. *carlsonii* (Lammers 1988).

Cyanea hamatiflora ssp. *carlsonii* of the bellflower family, a palm-like tree, grows 9.8 to 26 ft (3 to 8 m) tall and has alternate stalkless leaves 20 to 31 in (50 to 80 cm) long and 3 to 5.5 in (8 to 14 cm) wide. Clusters of 5 to 10 flowers have a main stalk 0.6 to 1.2 in (1.5 to 3 cm) long; each flower has a stalk 0.2 to 0.5 in (0.5 to 1.2 cm) long. The hypanthium is topped with five small narrow calyx lobes. The magenta petals are fused into a one-lipped tube 2.3 to 3.1 in (6 to 8 cm) long and 0.2 to 0.4 in (0.6 to 1.1 cm) wide with five downcurved lobes. The purplish-red berries are topped by the persistent calyx lobes. This subspecies is distinguished from ssp. *hamatiflora*, the only other subspecies, by its long flower stalks and larger calyx lobes. The species differs from others in the genus by its growth habit, its stalkless leaves, the number of flowers in each cluster, and the size and shape of the corolla and calyx (Lammers 1990).

Cyanea hamatiflora ssp. *carlsonii* is only known to have occurred at two sites on the island of Hawaii, on the western slope of Hualalai and the southwestern slope of Mauna Loa. These 2 extant populations, located on privately and State-owned land at Honuaulu Forest Reserve and Keokea, are about 28 mi (45 km) apart and contain approximately 19 individuals (HHP 1991gl, 1991g2; HPCC 1991c1 to 1991c3). This taxon typically grows in 'ohi'a-dominated Montane Wet Forests at elevations between 4,000 and 5,700 ft (1,220 and 1,740 m) (HHP 1991g1, 1991g2; Lammers 1990). Associated species include kawa'u, pilo and *Myoporum sandwicense* (naio) (HHP 1991g1). The major threats to *Cyanea hamatiflora* ssp. *carlsonii* are competition from alien plant species such as banana poka, grazing and trampling by cattle, and stochastic extinction and/or reduced reproductive vigor due to the small number of existing populations and individuals (HHP 1991g2; Carolyn Corn, Hawaii Department of Land and Natural Resources (Hawaii DLNR), *in litt.*, 1991).

Based on sterile specimens collected on the island of Hawaii during the United States Exploring Expedition of 1840 and 1841, Gray (1861b) noted *Cyanea grimesiana* var. ? *citrullifolia*. Rock collected the plant in 1955 in the company of Herbert Shipman, after whom he named it as a species, resulting in *Cyanea shipmanii* (Rock 1957).

Cyanea shipmanii of the bellflower family is an unbranched or few-branched shrub 8 to 13 ft (2.5 to 4 m) tall with small sharp projections, especially in young plants. The alternate, stalked leaves are 6.7 to 12 in (17 to 30 cm) long, 2.8 to 5.5 in (7 to 14 cm) wide, and deeply cut into 20 to 30 lobes per leaf. Flowers are covered with fine hairs and are clustered in groups of 10 to 15, the main stalk 0.4 to 1.2 in (1 to 3 cm) long and each flower stalk 0.4 to 0.6 in (1 to 1.5 cm) long. The hypanthium is topped with five small calyx lobes. The pale greenish-white petals, 1.2 to 1.4 in (3 to 3.6 cm) long, are fused into a curved five-lobed tube 0.1 to 0.2 in (3 to 4 mm) wide. The fruit is an ellipsoid berry. This species differs from others in the genus by its slender stems; stalked, pinnately lobed leaves; and smaller flowers (Lammers 1990).

Cyanea shipmanii has only been known from one population, located on the island of Hawaii on the eastern slope of Mauna Kea on privately owned land. When originally discovered, only 1 mature plant was found, with a total population size of less than 50 individuals (HHP 1991h). This species typically grows in koa- and 'ohi'a-dominated Montane Mesic Forests at elevations between 5,400 and 6,200 ft (1,650 and 1,900 m) (HHP 1991h, Lammers 1990). Associated species include kawa'u and kolea (HHP 1991h). The major threat to *Cyanea shipmanii* is stochastic extinction and/or reduced reproductive vigor due to the single existing population and the small number of known individuals.

Based on a specimen he collected in 1912 on Mauna Loa, island of Hawaii, Rock (1913) described *Cyanea stictophylla*, choosing the specific epithet to refer to the long and narrow leaves. Other names by which the taxon has been known include: *Cyanea palakea* (Forbes 1916), *C. quercifolia* var. *atropurpurea* (Wimmer 1953), *C. stictophylla var. inermis* (Rock 1957), and *C. nelsonii* (St. John 1976). St. John (St. John and Takeuchi 1987), believing there to be no generic distinction between *Cyanea* and *Delissea*, transferred the species to the genus *Delissea*, the older of the two generic names, creating *D. nelsonii*, *D. palakea*, *D. quercifolia* var. *atropurpurea*, *D. stictophylla*, and *D. stictophylla* var. *inermis* (St. John 1987b). The separation of the two genera is maintained in the current treatment of the family (Lammers 1990), and all the above listed taxa are considered to fall within the range of variation of *C. stictophylla*.

Cyanea stictophylla of the bellflower family is a shrub or tree 2 to 20 ft (0.6 to 6 m) tall, sometimes covered with small, sharp projections. The alternate, stalked, oblong, shallowly lobed, toothed leaves are 7.8 to 15 in (20 to 38 cm) long and 1.6 to 3.1 in (4 to 8 cm) wide. Clusters of five or six flowers have main flowering stalks 0.4 to 1.6 in (1 to 4 cm) long; each flower has a stalk 0.3 to 0.9 in (0.7 to 2.2 cm) long. The hypanthium is topped with five calyx lobes 0.1 to 0.2 in (2 to 4 mm) long and 0.04 and 0.1 in (1 to 2 mm) wide. The yellowish-white or purple petals, 1.4 to 2 in (3.5 to 5 cm) long, are fused into an arched, five-lobed tube about 0.2 in (5 to 6 mm) wide. The spherical berries are orange. This species differs from others in the genus by its lobed, toothed leaves and its larger flowers with small calyx lobes and deeply lobed corollas (Lammers 1990).

Historically, *Cyanea stictophylla* was known only from the island of Hawaii on the western, southern, southeastern, and eastern slopes of Mauna Loa. Today, the species is known to be extant near Keauhou and in South Kona on privately owned land. The 3 known

populations, which extend over a distance of about 38 by 10 mi (61 by 16 km), contain a total of approximately 15 individuals (HHP 1991i1 to 1991i3). This species, sometimes growing epiphytically, is found in koa- and 'ohi'a-dominated Lowland Mesic and Wet Forests at elevations between 3,500 and 6,400 ft (1,070 and 1,950 m) (HHP 1991i1 to 1991i3, Lammers 1990). Associated species include tree ferns, *Melicope volcanica* (alani), and *Urera glabra* (opuhe) (HHP 1991i1 to 1991i3). The major threat to *Cyanea stictophylla* is grazing and trampling by feral cattle as well as stochastic extinction and/or reduced reproductive vigor due to the small number of existing populations and individuals (F. Duvall, pers. comm., 1992).

Cyrtandra giffardii was first collected in 1911 on the island of Hawaii by Rock, who named the species to honor Walter M. Giffard, who collected a flowering specimen in 1918 (Rock 1919a).

Cyrtandra giffardii of the African violet family (Gesneriaceae) is a shrubby tree usually 10 to 20 ft (3 to 6 m) tall. The opposite, stalked, papery-textured, toothed leaves are usually 2.4 to 4.7 in (6 to 12 cm) long and 1 to 1.8 in (2.5 to 4.6 cm) wide and have a few tiny, coarse hairs on the upper surface. Clusters of three to five flowers have a moderate amount of short brown hairs throughout the cluster, a main stalk 1 to 1.4 in (2.5 to 3.5 cm) long, two linear bracts about 0.25 in (6 to 7 mm) long, and individual flower stalks 0.6 to 1.2 in (1.5 to 3 cm) long. The calyx, 0.1 to 0.4 in (3 to 9 mm) long, has an outer covering of short, soft brown hairs and is divided into five narrowly triangular lobes. The corolla consists of five fused white petals about 0.5 in (12 mm) long, with lobes about 0.08 to 0.1 in (2 to 3 mm) long. Only immature berries have been observed, and they were white and about 0.4 in (1 cm) long. Both this species and *Cyrtandra tintinnabula* are distinguished from others of the genus and others on the island of Hawaii by a combination of the following characteristics: The opposite, more or less elliptic, papery leaves; the presence of some hairs on the leaves and more on the inflorescences; the presence of three to six flowers per inflorescence; and the size and shape of the flowers and flower parts (Wagner *et al.* 1990).

Historically, *Cyrtandra giffardii* was found on the island of Hawaii on the northeastern slope of Mauna Kea near Kilau Stream and south to the eastern slope of Mauna Loa near Kilauea Center. The 3 extant populations on State-owned land are located near Kilau Stream, Stainback Highway, and Puu Makaala, extending over a distance of approximately 31 by 3 mi (50 by 5 km) and containing a total of about 14 to 20 plants (HHP 1991j1 to 1991j5; W. Wagner, pers. comm., 1992). This species typically grows in shady koa-,'ohi'a-, and tree fern-dominated Montane Wet Forests at elevations between 2,400 and 4,900 ft (720 and 1,500 m) (HHP 1991j1 to 1991j3, HPCC 1991d1, 1991d2, Wagner *et al.* 1990). Associated species include other taxa of *Cyrtandra* (ha'iwale), *Hedyotis* spp., and *Perrottetia sandwicensis* (olomea) (HHP 1991j1 to 1991j3; HPCC 1991d1; W. Wagner, pers. comm., 1992). The major threats to *Cyrtandra giffardii* are habitat disturbance and plant damage by feral pigs as well as stochastic extinction and/or reduced reproductive vigor due to the small number of existing populations (Stone 1985; W. Wagner, pers. comm., 1992).

Based on a plant he collected in 1909 on Mauna Kea, island of Hawaii, Rock named *Cyrtandra tintinnabula*. The specific ephithet describes the bell-shaped calyx of the plant (Rock 1919a).

Cyrtandra tintinnabula of the African violet family is a shrub 3.3 to 6.6 ft (1 to 2 m) tall with opposite, stalked, elliptical or oval, papery-textured leaves 5 to 10 in (13 to 26 cm) long and 2 to 4.8 in (5 to 12.3 cm) wide. Leaves, especially the lower surfaces, have yellowish-brown hairs. Flower clusters, densely covered with long soft hairs, comprise three to six flowers, a main stalk 0.4 to 0.7 in (1 to 1.8 cm) long, individual flower stalks 0.2 to 0.6 in (0.5 to 1.5 cm) long, and leaflike bracts. The green bell-shaped calyx is about 0.4 in (9 to 10 mm) long and has triangular lobes. The hairy white corolla, about 0.5 in (12 mm) long and about 0.2 in (5 mm) in diameter, is divided into five lobes, each about 0.1 in (3 mm) long. Fruit and seeds have not been observed. This species differs from *Cyrtandra giffardii* by its habit, its larger leaves, and its shorter flower stalks (Wagner *et al* 1990).

Historically, *Cyrtandra tintinnabula* was found only on the island of Hawaii on the northern to the eastern slopes of Mauna Kea. Today, 3 populations of the species are known to occur on State-owned land extending over approximately 6 by 1 mi (10 by 3 km) from Kilau Stream to Honohina Gulch and containing approximately 18 known individuals (HHP 1991k1 to 1991k6). This species typically grows in dense koa-, 'ohi'a-, and tree fern-dominated Lowland Wet Forests at elevations between 2,100 and 3,400 ft (650 and 1,040 m) (HHP 1991k3, 1991k4, 1991k6; Wagner *et al.* 1990). Associated species include other kinds of ha'iwale and *Hedyotis* sp. The major threats to *Cyrtandra tintinnabula* are habitat disturbance and plant damage by feral pigs and stochastic extinction and/or reduced reproductive vigor due to the small number of existing populations and individuals.

Based on a specimen collected on Mauna Loa by James Macrae in 1825, Weddell (1856–57) described *Urtica sandwicensis*, choosing the specific epithet to refer to the Sandwich Islands, on older name for the Hawaiian Islands. Later (1869), he transferred the species to another genus, resulting in *Hesperocnide sandwicensis*.

Hesperocnide sandwicensis of the nettle family (Urticaceae) is an erect annual herb 8 to 24 in (20 to 60 cm) tall covered with coarse stinging hairs as well as shorter non-stinging hairs. The opposite, stalked, thin toothed leaves are 0.6 to 3 in (1.5 to 7 cm) long and 0.4 to 1 in (0.9 to 2.5 cm) wide. Most of the small petalless flowers are male, but they are mixed with some female flowers in clusters 0.08 to 0.2 in (2 to 5 mm) long which originate in the leaf axils. Sepals of male flowers are fused into a four-lobed calyx about 0.02 in (0.5 mm) long which encloses four stamens. The calyx of the female flower, about 0.04 in (1 mm) long and enclosing an unstalked stigma, swells slightly in fruit and encloses a flattened achene (dry, one-celled, unopening fruit) about 0.04 in (1.1 mm) long. The only Hawaiian member of the genus, *Hesperocnide sandwicensis* is distinguished from other native Hawaiian genera of its family by its annual herbaceous habit and its stinging hairs. It is distinguished from the alien species *Urtica urens* by the lack of calyx lobes (Wagner *et al.* 1990).

Historically, *Hesperocnide sandwicensis* occurred on the island of Hawaii on the eastern and western slopes of Mauna Kea, the northern to western slopes of Mauna Loa, the Humuula Saddle between Mauna Kea and Mauna Loa, and the southeastern slope of Hualalai. Twelve extant populations are known, extending over a distance of approximately 38 by 15 mi (61 by 24 km) in much of the historic range of the species. It has not been seen on Hualalai for some time and is presumed extinct there. Known populations now occur on or near the following areas: Puu Kanakaleonui, Puu Laau, Ahumoa Cone, Pohakuloa Training Area (PTA), and Sulphur Cone. Because the species is an annual plant, the total number of individuals varies with the time of year and amount of rainfall. Several hundred to a thousand individuals have been found on PTA, a State and Federally owned area of land which is managed by the U.S. Army.

Other, smaller populations totalling approximately 80 to 130 plants are located on privately and State-owned land (HHP 199111 to 199117, HPCC 1991e; Robert Shaw, Colorado State University, pers. comm., 1992). This species typically grows in open mamane- and naio-dominated Subalpine Dry Forests at elevations between 5,840 and 8,600 ft (1,780 and 2,620 m) (Gagne and Cuddihy 1990; HHP 199111 to 199113, 199116; HPCC 1991e; Wagner *et al.* 1990). Associated species include *Asplenium fragile*, *Santalum paniculatum* ('iliahi), and the naturalized *Urtica urens* (dwarf nettle) (HHP 199111, 199116; R. Shaw, pers. comm., 1992). The major threats to *Hesperocnide sandwicensis* are competition from alien grasses such as *Anthoxanthum odoratum* (sweet vernalgrass) and *Holcus lanatus* (common velvet grass); grazing by feral pigs, *Capra hircus* (goats), and *Ovis aries* (sheep); habitat disturbance and damage to plants as a result of military exercises; and fire (HHP 199116; HPCC 1991e; Ken Nagata, U.S. Department of Agriculture, pers. comm., 1992).

Ischaemum byrone was first collected by James Macrae during the expedition of the *Blonde* in 1825 and named *Spodiopogon byronis* by Trinius in 1832. The specific epithet refers to Byron's Bay, now called Hilo Bay, where this specimen was collected. Steudel (1855) transferred the species to the genus *Andropogon*, and in 1889, Hackel redescribed the species, naming it *Ischaemum lutescens*, a superfluous name. In 1922, Hitchcock published *Ischaemum byrone*, the currently accepted name (O'Connor 1990).

Ischaemum byrone of the grass family (Poaceae) is a perennial plant with creeping stems and erect stems 16 to 31 in (40 to 80 cm) tall. The uppermost sheaths (portions of leaves surrounding the stems) are often inflated and sometimes partially enclose the yellow to yellowish-brown racemes (flowering clusters). The hairless leaf blade (the flat extended part of the leaf) is 2.8 to 7.9 in (7 to 20 cm) long and 1.2 to 2 in (3 to 5 cm) wide; the uppermost blades are much smaller in size. Flowers, arranged in two or sometimes three digitate (originating from one point), elongate racemes 1.6 to 3.9 in (4 to 10 cm) long, consist of two types of two-flowered awned (having bristles) spikelets (subclusters of flowers). The fruit is a caryopsis (grain) about 0.1 in (3 mm) long. The only species of the genus found in Hawaii, *Ischaemum byrone* differs from other grasses in the State by its C_4 photosynthetic pathway; its digitate racemes; and its two-flowered, awned spikelets (O'Connor 1990).

Historically, *Ischaemum byrone* was found on Oahu at an unspecified location, on the northeastern coasts of Molokai and East Maui, and along the central portion of the eastern coast of the island of Hawaii. Extant populations still occur on Molokai, Maui, and Hawaii. Two populations on East Molokai are located about 2 mi (3 km) apart at the head of Wailau Valley and on Kikipua Point on privately owned land. Six populations on East Maui are found along approximately 16 mi (26 km) of coast on private, State, and Federally owned land on Pauwalu Point, on Kalahu Point, near Hana, on Kauiki Head, and on the following offshore islets: Keopuka Islet, Mokuhuki Islet, and Puukii Islet. On Hawaii, the species is still found in two populations at Auwae and Kamoamoa on privately and federally owned land. The total distribution of the species includes 10 populations on 3 islands with approximately 1,200 to 2,200 individuals (HHP 1991o1 to 1991o10, 1991o12 to 1991o14). This species typically grows in Coastal Dry Shrublands among rocks or on basalt cliffs at elevations between sea level and 250 ft (0 and 75 m) (Gagne and Cuddihy 1990, O'Connor 1990). Associated species include *Bidens* spp. (ko'oko'olau), *Fimbristylis cymosa*, and *Scaevola sericea* (naupaka kahakai) (HHP 1991o5, 1991o7, 1991o9, 1991o11; HPCC 1991f). The major threats to *Ischaemum byrone* are competition from alien species such as *Digitaria ciliaris* (Henry's crabgrass) and habitat change from volcanic activity (HHP 1991o3; HPCC 1991f; Charles H. Lamoureux, Lyon Arboretum, pers. comm., 1992).

Isodendrion pyrifolium was first collected on Oahu during the United States Exploring Expedition in 1841 and was named by Gray in 1852. The specific epithet refers to the resemblance of the leaves of this species to those of *Pyrus* (pear). In his monograph of the genus, St. John (1952) named the following species, all of which are considered in the current treatment of the genus (Wagner *et al.* 1990) to be synonymous with *I. pyrifolium*: *I. hawaiiense*, *I. hillebrandii*, *I. lanaiense*, *I. molokaiense*, and *I. remyi*.

Isodendrion pyrifolium of the violet family (Violaceae), a shrub about 2.6 to 6.6 ft (0.8 to 2 m) tall, has persistent stipules (leaflike appendages on leaves) and alternate, stalked, elliptic or sometimes lance-shaped, papery leaves which measure 1 to 2.6 in (2.5 to 6.5 cm) long and 0.3 to 1.3 in (0.8 to 3.2 cm) wide. The solitary, bilaterally symmetrical, fragrant flowers have five lance-shaped sepals 0.1 to 0.2 in (3.5 to 5 mm) long with membranous edges fringed with white hairs and three types of clawed (with a narrow petiole-like base) greenish-yellow petals 0.4 to 0.6 in (10 to 15 mm) long with lobes about 0.2 in (4 to 5 mm) long. The three-lobed, 0.5 in (12 mm) long capsule opens to release olive-green seeds about 0.1 in (3 mm) long and about 0.08 in (2 mm) in diameter. This species differs from others in this endemic Hawaiian genus by its slightly smaller, greenish-yellow flowers and by the presence of hairs on the stipule midribs and leaf veins (Wagner *et al.* 1990).

Historically, *Isodendrion pyrifolium* was found at unspecified localities on Niihau, Molokai, and Lanai, as well as on Oahu in the central portion of the Waianae Mountains, on Maui in the northeastern to southwestern regions of the West Maui mountains, and on the island of Hawaii at the western base of Hualalai (HHP 1991p1 to 1991p5, Wagner *et al.* 1990). The species had not been collected since 1870 and was presumed extinct. However, in 1991, four plants were found on Hawaii near Kona in an area being developed as a golf course. A single plant is located about 250 ft (75 m) from a cluster of three other plants on State-owned land (C. Corn, *in litt.* 1991; Francis Blanco, Hawaii Housing and Finance Development Corporation, and K. Nagata, pers. comms., 1992). This species typically grows on dry sites in Lowland Mesic Forests at low elevations (Gagne and Cuddihy 1990, Wagner *et al.* 1990). Associated species include 'iliahi, *Sophora chrysophylla* (mamane), and *Waltheria indica* ('uhaloa) (Paul Weissich, Weissich and Associates, pers. comm., 1992). The major threats to *Isodendrion pyrifolium* are competition from alien species such as fountain grass, fire, and stochastic extinction and/or reduced reproductive vigor due to the single known population and the small number of existing individuals (C. Corn, K. Nagata, and P. Weissich, pers. comms., 1992).

In 1920, Kuekenthal described *Cyperus fauriei* based on a specimen collected by Faurie on Molokai in 1910 (Wagner *et al* 1989). Koyama (1990), in the current treatment of the genus, transferred the species to *Mariscus*, resulting in *M. fauriei*.

Mariscus fauriei of the sedge family (Cyperaceae), a perennial plant with somewhat enlarged underground stems and three-angled, single or grouped aerial stems 4 to 20 in (10 to 50 cm) tall, has leaves shorter than or the same length as the stems and 0.04 to 0.1 in (1 to 3.5 mm) wide. Three to 5 bracts, the lowest one 2.4 to 7.9 in (6 to 20 cm) long, are located under each flower

cluster, which measures 0.8 to 1.6 in (2 to 4 cm) long and 1.2 to 3.9 in (3 to 10 cm) wide and is made up of 3 to 10 spikes (unbranched clusters of unstalked flowers). Each spike measures 0.3 to 1.2 in (0.8 to 3 cm) long and 0.3 to 0.4 in (8 to 10 mm) wide and is made up of compressed spreading spikelets, each comprising seven to nine flowers. Fruits are three-angled achenes about 0.05 in (1.2 mm) long and about 0.03 in (0.7 mm) wide. This species differs from others in the genus in Hawaii by its smaller size and its narrower, flattened, and more spreading spikelets (Koyama 1990).

Historically, *Mariscus fauriei* was found on East Molokai, in the northwestern and southwestern portions of Lanai, and on the island of Hawaii on the northern slope of Hualalai and the northwestern and southernmost slopes of Mauna Loa. A total of 3 extant populations and about 33 to 43 known individuals of the species are found on Molokai and Hawaii, the species is almost certainly extinct on Lanai now. One population of about 20 to 30 plants occurs on Molokai above Kamiloloa on State-owned land. Two populations located about 45 mi (72 km) apart are known on Hawaii on the Hualalai side of Mauna Loa and in the South Point area. The land is privately owned, and there are a total of about 13 known individuals on that island (HHP 1991q1 to 1991q8; HPCC 1991g; Robert Hobdy, Hawaii DLNR, pers. comm., 1992). This species typically grows in lama-dominated Lowland Dry Forests, often on aa substrate, at elevations between 880 and 6,000 ft (300 and 1,830 m) (HHP 1991q8, HPCC 1991g, Koyama 1990). Associated species include alahe'e, *Peperomia* sp. ('ala'ala wai nui), and *Rauvolfia sandwicensis* (hao), (HHP 1991q8, HPCC 1991g). The major threat to *Mariscus fauriei* on Molokai is grazing and trampling by feral goats and *Axis axis* (axis deer), and on Hawaii, competition from alien species such as Christmas berry and *Oplismenus hirtellus* (basketgrass). On both islands, the species is faced with stochastic extinction and/or reduced reproductive vigor due to the small number of existing populations and individuals (HHP 1991q8; HPCC 1991g; R. Hobdy, pers. comm., 1992).

First collected on the island of Hawaii by Charles Pickering during the United States Exploring Expedition of 1840 and 1841, *Nothocestrum breviflorum* was named by Gray in 1862. He chose the specific epithet to refer to the short corolla of the flower of this species. In 1888, Hillebrand name var. *longipes*, but in the current treatment of the genus (Symon 1990), no varieties of the species are recognized.

Nothocestrum breviflorum of the nightshade family (Solanaceae), a stout tree 33 to 39 ft (10 to 12 m) tall with a trunk up to 18 in (45 cm) in diameter, has deciduous, alternate, stalked, oblong or elliptic-oblong, thick and papery-textured, toothless leaves which are 2 to 4.7 in (5 to 12 cm) long and 1.2 to 2.4 in (3 to 6 cm) wide. Numerous bisexual, radially symmetrical flowers are clustered at the ends of short spurs (branches with much shortened internodes) on individual stalks 0.2 to 0.4 in (4 to 10 mm) long. Each flower consists of a 0.2 to 0.4 in (6 to 11 mm) long, four-lobed tubular calyx split on one side and a greenish-yellow four-lobed corolla which barely projects beyond the calyx. The fruit, a somewhat spherical or oblong, orange-red berry about 0.2 to 0.3 in (6 to 8 mm) in diameter, is enclosed by the calyx. Seeds have not been observed. This species can be distinguished from others of this endemic Hawaiian genus by the leaf shape; the clusters of more than three flowers arranged on the ends of short branches; and the broad fruit enclosed by the calyx (Symon 1990).

Historically, *Nothocestrum breviflorum* was found only on the island of Hawaii from the southern portion of the Kohala Mountains; the northern slope of Hualalai; and the eastern, southern, and western slopes of Mauna Loa. Today, extant populations have been found in much of the species' historic range, from near Waimea, near Kiholo, in Puu Waawaa, in HVNP in Kipuka Puaulu and near Holei Pali, and in the South Point area. These 9 populations, which extend over a distance of about 63 by 41 mi (101 by 66 km), are found on privately, State-, and federally owned land and contain an estimated 53 known individuals (HHP 1991r1 to 1991r12; J. Lau and W. Wagner, pers. comms., 1992). This species typically grows in koa- and 'ohi'a- or lama-dominated Lowland Dry Forests and Montane Dry or Mesic Forests, often on a substrate, at elevations between 590 and 6,000 ft (180 and 1,830 m) (Gagne and Cuddihy 1990; HHP 1991r1, 1991r2, 1991r5, 1991r7, 1991r12, HPCC 1991h; Symon 1990). Associated species include 'iliahi, *Caesalpinia kavaiensis* (uhiuhi), and *Erythrina sandwicensis* (wiliwili) (HHP 1991r1, 1991r3, 1991r4, 1991r12; HPCC 1991h; W. Wagner, pers. comm., 1992). The major threats to *Nothocestrum breviflorum* are competition from alien species such as Christmas berry, fountain grass, lantana, and *Leucaena leucocephala* (koa haole); browsing by cattle; fire; and stochastic extinction and/or reduced reproductive vigor due to the small number of existing individuals (HHP 1991r4, 1991r6, 1991r12; Lamb 1981; W. Wagner, pers. comm., 1992).

Ochrosia kilaueaensis was first collected by Forbes in 1915 and was named by St. John in 1978. The specific epithet refers to Kilauea, the type locality of the plant on the island of Hawaii. Based on a specimen collected in 1909 by Rock, St. John (1978) named *O. konaensis*. In the current treatment of the genus (Wagner *et al.* 1990), *O. konaensis* is considered synonymous with *O. kilaueaensis*.

Ochrosia kilaueaensis of the dogbane family (Apocynaceae) is a hairless tree 49 to 59 ft (15 to 18 m) tall with milky sap. The lance- or ellipse-shaped toothless leaves are arranged three or four per node, are 2.4 to 7.5 in (6 to 19 cm) long and 0.9 to 2.6 in (2.2 to 6.5 cm) wide, and have veins arising at nearly right angles to the midrib. Open clusters of numerous flowers have main stalks 1.8 to 2.5 in (4.5 to 6.3 cm) long, secondary branches 0.4 to 1 in (1.1 to 2.5 cm) long, and individual flower stalks 0.2 to 0.3 in (5 to 7 mm) long. Each flower has a five-lobed calyx about 0.4 in (10 to 11 mm) long and a trumpet-shaped greenish-white corolla with a tube 0.3 to 0.4 in (7 to 11 mm) long and lobes 0.5 to 0.6 in (12 to 15 mm) long. The fruit is a drupe (a fruit with a firm outer layer, a fleshy inner layer, and a stony inner layer surrounding a single seed) thought to be yellowish brown at maturity, 1.8 to 1.9 in (4.5 to 4.9 cm) long, and 0.9 to 1.1 in (2.4 to 2.9 cm) wide. This species is distinguished from other Hawaiian species of the genus by the greater height of mature trees, the open flower clusters, the longer flower stalks, and the larger calyx and lobes of the corolla (Wagner *et al.* 1990).

Historically, *Ochrosia kilaueaensis* has been collected on the northern slope of Hualalai and on the eastern slope of Mauna Loa. There is one known extant population located at Puu Waawaa on State-owned land and consisting of an unknown number of individuals (HHP 1991s1, 1991s2). This species typically grows in koa- and 'ohi'a- or lama-dominated Montane Mesic Forests at elevations between 2,200 and 4,000 ft (670 and 1,220 m) (Gagne and Cuddihy 1990; HHP 1991s1, 1991s2; Wagner *et al.* 1990). Associated species include 'aiea, *Colubrina oppositifolia* (kauila), *Gardenia brighamii* (nanu), and *Psychotria hawaiiensis* (kopiko) (HHP 1991s1). The major threats to *Ochrosia kilaueaensis* are competition from alien species such as fountain grass, browsing by feral goats, fire, and stochastic extinction and/or reduced reproductive

vigor due to the single existing known population (Bruegmann 1990, CPC 1990b).

Gray (1862) named *Plantago pachyphylla* var. *hawaiiensis* and *P. pachyphylla* var. *hawaiiensis* subvar. *gracilis* based on specimens collected on the island of Hawaii during the United States Exploring Expedition of 1840 and 1841 and by Remy in the 1850s, respectively. Leveille (1911) published *P. gaudichaudiana* based on another specimen from the island of Hawaii. In 1923, Pilger raised the taxon to specific rank, resulting in *P. hawaiensis*, and also published a new variety, var. *laxa* (Pilger 1937). The specific epithet refers to the island where the plant grows. In the current treatment of the genus, only *P. hawaiensis* is accepted (Wagner *et al.* 1990).

Plantago hawaiensis of the plantain family (Plantaginaceae), a perennial herb which grows from a stout short stem, has thick, leathery, narrowly oval or oblong leaves located at the base of the plant which measure 3 to 8.7 in (7.5 to 22 cm) long and usually 0.6 to 1.3 in (1.5 to 3.2 cm) wide. The flowering stalk is 7.9 to 35 in (20 to 90 cm) long and is topped by a spike usually 5.9 to 9 in (15 to 23 cm) long. Each upward pointing flower, subtended by a single bract 0.08 to 0.1 in (2.1 to 2.6 mm) long, has a four-lobed calyx 0.06 to 0.09 in (1.6 to 2.2 mm) long and a trumpet-shaped corolla about 0.04 in (1 mm) long. The capsule, 0.1 to 0.2 in (2.6 to 4 mm) long and projecting from the calyx, opens to release four to six dull black seeds about 0.04 in (1 mm) long and winged on one end. This species is distinguished from other endemic and naturalized species of the genus in Hawaii by its perennial herbaceous habit; its thick leathery leaves; its upward pointing flowers; and its capsules which project from the calyx (Wagner *et al.* 1990).

Historically, *Plantago hawaiensis* was found only on the island of Hawaii on the southern slopes of Mauna Kea; the northeastern, southeastern, and southern slopes of Mauna Loa; and the western slope of Hualalai. Today, the species is known to occur on the Humuula Saddle, in the Upper Waiakea Forest Reserve, and near the Keapohina Upland on privately and State-owned land. The four extant populations extend over a distance of approximately 14 by 4 mi. (23 by 6 km) and contain an unknown number of individuals (HHP 1991t1 to 1991t6). This species typically grows in boggy conditions in Montane Wet Herblands or in Montane Dry Shrublands dominated by koa or 'ohi'a trees of short stature, or sometimes in lava cracks, at elevations between 5,900 and 6,400 ft (1,800 and 1,950 m) (HHP 1991t1, 1991t2, 1991t4, 1991t6; Wagner *et al.* 1990). The major threat to *Plantago hawaiensis* is stochastic extinction and/or reduced reproductive vigor due to the small number of existing populations.

Portulaca sclerocarpa was first collected during the United States Exploring Expedition of 1840 and 1841 and was named by Gray (1854). The specific epithet refers to the hardened capsule.

Portulaca sclerocarpa of the purslane family (Portulacaceae), a perennial herb with a fleshy tuberous taproot which becomes woody, has stems up to about 7.9 in. (20 cm) long. The stalkless, succulent, grayish-green leaves are almost circular in cross-section, 0.3 to 0.8 in. (8 to 21 mm) long, and about 0.06 to 0.1 in. (1.5 to 2.5 mm) wide. Dense tufts of hairs are located in each leaf axil and underneath the tight clusters of three to six stalkless flowers grouped at the ends of the stems. Sepals are about 0.2 in. (5 mm) long and have membranous edges. Petals are white, pink, or pink with a white base, about 0.4 in. (10 mm) long, and surround about 30 stamens and an 8-branched style. The hardened capsules are about 0.2 in. (4 to 4.5 mm) long, have walls 0.01 to 0.02 in. (0.18 to 0.5 mm) thick, open very late or not at all, and contain glossy, dark reddish-brown seeds about 0.02 in. (0.4 to 0.6 mm) long. This species differs from other native and naturalized species of the genus in Hawaii by its woody taproot, its narrow leaves, and the colors of its petals and seeds. Its closest relative, *Portulaca villosa*, differs mainly in its thinner-walled, opening capsule (Wagner *et al.* 1990).

Historically, *Portulaca sclerocarpa* was found on an islet off the south coast of the island of Lanai and on the island of Hawaii in the Kohala Mountains, on the northern slope of Hualalai, the northwestern slope of Mauna Loa, and near Kilauea Crater. There is 1 extant population on Poopoo Islet off the coast of Lanai which contains about 10 plants (R. Hobdy, pers. comm., 1992). On Hawaii, 11 extant populations extend over a distance of about 54 by 32 mi (87 by 51 km) and are located on 3 cinder cones in the Nohonaohae area; at PTA, including inside the Multi-Purpose Range Complex (MPRC); at Puu Anahulu; and near Puu Keanui and Puu Lehua on private, State, and Federally owned land. The 11 populations on the island of Hawaii contain a total of approximately 72 to 122 individuals (Cuddihy *et al.* 1983; HHP 1991u1 to 1991u12; R. Shaw, pers. comm., 1992). This species typically grows in Montane Dry Shrublands, often on bare cylinder and even near steam vents, at elevations between 3,380 and 5,340 ft (1,030 and 1,630 m) Gagne and Cuddihy 1990, Wagner *et al.* 1990). Associated species include mamane and 'ohi'a (HHP 1991u1, 1991u8 to 1991u10, 1991u12; HPCC 1991i). The major threats to *Portulaca sclerocarpa* are competition from alien grasses such as fountain grass and *Andropogon virginicus* (broomsedge); grazing, browsing, trampling, and habitat disturbance by feral goats, pigs, and sheep; habitat disturbance and damage to plants as a result of military exercises; and fire (HHP 1991u2, 1991u9; HPCC 1991i; R. Shaw, pers. comm., 1992).

Based on collections by Rock on the island of Hawaii, Beccari named *Pritchardia affinis* and three varieties: Var. *halophila* (misspelled as "holaphila"), var. *rhopalocarpa*, and var. *gracilis* (Beccari and Rock 1921). In the current treatment of the genus (Read and Hodel 1990), no subsequent taxa are recognized.

Pritchardia affinis of the palm family (Arecaceae) is a fan-leaved tree 33 to 82 ft (10 to 25 m) tall with pale or pinkish soft wool covering the underside of the petiole and extending onto the leaf blade. The wedge-shaped leaf has a green and smooth upper surface and a pale green lower surface with scattered yellowish scales. The branched, hairless flower clusters are located among the leaves. Each flower comprises a cup-shaped, three-lobed calyx; three petals; six stamens; and a three-lobed stigma. The spherical fruit is about 0.9 in (2.3 cm) in diameter. This species is distinguished from other species of *Pritchardia* by the long, tangled, woolly hairs on the underside of the petiole and the base of the lower leaf blade; the stout hairless flower clusters which do not extend beyond the wedge-shaped leaves; and the smaller spherical fruit (Read and Hodel 1990).

Historically, *Pritchardia affinis* was found only on the island of Hawaii in the Kohala Mountains and along the western and southeastern coasts. Today, scattered individuals of the species can be found throughout much of the historically known coastal range at Kiholo, at Kukio, near Palanai Road, on Alii Drive in Kailua, in Captain Cook, at Hookena, at Milolii, and at Punaluu. Most plants grow within areas of human habitation or development, and the trees may have been cultivated by Hawaiians or others rather than having occurred in these areas naturally. There are an estimated 50 to 65 known individuals at 8 or more localities which extend along about 110 mi (180 km) along the coast on privately and State-owned land (HHP,

1991v1 to 1991v6; Norman Bezona, Hawaii Cooperative Extension Service, Brien Meilleur, Amy Greenwell Ethnobotanical Garden, and P. Weissich, pers. comms., 1992). This species typically grows in Coastal Mesic Forests at coastal sites or in gulches further inland at elevations between sea level and 2,000 ft (0 and 610 m), possibly associated with brackish water (HHP 1991v2; Read and Hodel 1990; C. Corn, pers. comm., 1992). Native associated species of this loulu are unknown, since all trees are found in cultivated zones, which have long been cleared of their native cover (B. Meilleur, pers. comm., 1992). The major threats to *Pritchardia affinis* are predation on seeds by roof rats, development of land where individuals grow, and stochastic extinction and/or reduced reproductive vigor due to the small number of existing individuals. In the past, the species' natural habitat was cleared for agriculture and housing, and feral pigs destroyed seedlings of the species, preventing regeneration (Beccari and Rock 1921; Hull 1980; C. Corn, pers. comm., 1992).

Gray (1854) mentioned an unnamed variety of *Silene struthioloides*, in reference to a specimen collected on the island of Hawaii during the United States Exploring Expedition of 1840 and 1841. Sherff named this taxon *S. struthioloides* var. *gracilis* in 1946 and later elevated it to specific rank, resulting in *S. hawaiiensis* (1949). He chose the specific epithet to refer to the island where the plant is found.

Silene hawaiiensis of the pink family (Caryophyllaceae), a sprawling shrub with slanting or climbing stems 6 to 16 in (15 to 40 cm) long originating from an enlarged root, is covered with short, often sticky hairs. The stalkless narrow leaves are 0.2 to 0.6 in (6 to 15 mm) long and 0.02 to 0.03 in (0.5 to 0.8 mm) wide. Flowers are arranged in elongate clusters. Each flower has a stalk 0.1 to 0.2 in (3 to 6 mm) long; a five-toothed purple or purple-tinged calyx 0.4 to 0.6 in (11 to 14 mm) long; and five petals, greenish white above and maroon below, with a stalk-like base and a flat, two-lobed, expanded portion about 0.2 in (4.5 to 5.5 mm) long. The fruit is a capsule about 0.3 in (6.5 to 8 mm) long which releases pale brown seeds 0.02 to 0.03 in (0.4 to 0.7 mm) long. This species differs from others of *Silene* in Hawaii by its growth habit; its covering of short, often sticky hairs; the shape of its leaves; the arrangement of its flower clusters; and the color of its petals (Wagner *et al.* 1990).

Historically, *Silene hawaiiensis* was found only on the island of Hawaii from the western slope of Mauna Kea; the summit of Hualalai; Humuula Saddle; the northern, western, and northwestern slopes of Mauna Loa; and near Kilauea Crater. Today, populations are found in Hamakua District; on Humuula Saddle; at PTA, including inside MPRC; north of Puu Keanui; and in HVNP on privately, State-, and federally owned land. The 17 populations extend over a distance of approximately 12 by 7 mi (19 by 11 km) and contain a total of between about 2,600 and 2,700 individuals (HHP 1991w1 to 1991w10; HPCC 1991j; R. Shaw, pers. comm., 1992). This species typically grows in Montane or Subalpine Dry Shrublands in decomposed lava and ash at elevations between 3,000 and 4,300 ft (900 and 1,300 m) and sometimes up to 8,353 ft (2,546 m) (Wagner *et al.* 1990). Associated species include *Dodonaea viscosa* ('a'ali'i), *Styphelia tameiameiae* (pukiawe), and *Vaccinium reticulatum* ('ohelo) (HHP 1991w6; HPCC 1991j; R. Shaw, pers. comm., 1992). The major threats to *Silene hawaiiensis* are competition with alien plant species, particularly fountain grass; grazing, browsing, and trampling by feral goats, pigs, and sheep; habitat disturbance and damage to plants as a result of military exercises; fire; and volcanic activity (HPCC 1991j; R. Shaw, pers. comm., 1992).

Gray (1861a) named a plant collected on the island of Hawaii during the United States Exploring Expedition of 1840 and 1841 *Vittadenia arenaria*. Hillebrand (1888) transferred the species to the genus *Tetramolopium* and named a second variety, var. *dentatum*. In the current treatment of the genus (Lowrey 1986, 1990), two subspecies, ssp. *arenarium* and ssp. *laxum*, are recognized. Variety *confertum*, described by Sherff in 1934, is recognized (Lowrey 1986, 1990) as a variety of spp. *arenarium*. Because of a recently recognized typification problem, ssp. *laxum* actually should be referred to as spp. *arenarium*, leaving what was called ssp. *arenarium* without a published name (Lavon *et al.* 1991).

Tetramolopium arenarium of the aster family (Asteraceae), an erect tufted shrub 2.6 to 4.3 ft (0.8 to 1.3 m) tall, is covered with tiny glands and straight hairs. The alternate, toothless or shallowly toothed leaves are more or less lanced-shaped, 0.6 to 1.5 in (15 to 37 mm) long, and 0.1 to 0.4 in (3 to 9 mm) wide. Five to 11 heads (dense flower clusters) are grouped at the end of each stem. Each head comprises a bell-shaped structure of 20 to 34 bracts 0.1 to 0.2 in (2.5 to 5 mm) high and 0.2 to 0.4 in (4 to 9 mm) in diameter beneath the flowers; a single series of 22 to 45 white, male ray florets 0.05 to 0.09 in (1.3 to 2.2 mm) long; and 4 to 9 bisexual disk florets with maroon petals 0.12 to 0.17 in (3.1 to 4.4 mm) long. Fruits are compressed achenes 0.06 to 0.1 in (1.5 to 3 mm) long and 0.02 to 0.03 in (0.5 to 0.8 mm) wide. This species is distinguished from others of the genus by its erect habit; the presence and types of glands and hairs on the plant; the fewer heads per flower cluster; the larger, male ray florets; the fewer, bisexual, maroon-petalled disk florets; and the wider achenes (Lowrey 1990).

Historically, *Tetramolopium arenarium* was found on the island of Maui on the western slope of Halakeala and on the island of Hawaii from the Kohala Mountains, the northwestern slopes of Mauna Kea and Mauna Loa, and the slopes of Hualalai. Only one population is known today, and it occurs on Hawaii in Kipuka Kalawamauna at PTA on federally managed land. At last count, there were 134 plants in a 660 by 200 ft (200 by 60 m) area (HHP 1991x1 to 1991x4, 1991y; HPCC 1990a; Laven *et al.* 1991; R. Shaw, pers. comm., 1992). This species typically grows in open 'a'ali'i-dominated Lowland or Montane Dry Forest at elevations between 2,600 and 4,900 ft (800 and 1,500 m) (Lowrey 1990). Associated species include 'a'ali'i, pukiawe, *Chamaesyce olowaluana* ('akoko), and *Dubautia linearis* (na'ena'e) (HPCC 1990a). The major threats to *Tetramolopium arenarium* are competition from alien plant species, particularly fountain grass; grazing, browsing, trampling, and habitat disturbance by feral goats, pigs, and sheep; habitat disturbance and damage to plants as a result of military exercises; fire; and stochastic extinction and/or reduced reproductive vigor due to the single existing population (Douglas *et al.* 1989, HPCC 1990a, Herbst and Fay 1979).

Hillebrand (1888) described *Zanthoxylum hawaiiense* based on a specimen collected on the island of Hawaii and also indicated an unnamed variety for a specimen collected on Lanai. Other names published for portions of this taxon include: *Z. bluettianum* (Rock 1913), *Z. hawaiiense* var. *citriodora* (Rock 1913), *Z. hawaiiense* var. *velutinosum* (Rock 1913), and *Z. hawaiiense* var. *subacutum* (St. John 1976). Some authors placed Hawaiian species in the genus *Fagara*, resulting in *F. hawaiiensis* (Engler 1896) and *F. bluettiana* (Engler 1931). Sherff (1958) named *F. hawaiiensis* var. *citriodora*, *F. hawaiiensis* var. *subacutata*, and *F. hawaiiensis* var. *velutinosa*, all of which are considered within the range of

variation of *Z. hawaiiense* in the current treatment of the Hawaiian species (Stone *et al.* 1990).

Zanthoxylum hawaiiense of the rue family (Rutaceae), a thornless tree usually 10 to 26 ft (3 to 8 m) tall with a trunk up to 10 in (25 cm) in diameter, has alternate leaves comprising three leathery, triangular-oval or lance-shaped, gland-dotted, lemon-scented, toothed leaflets usually 1.3 to 3.9 in (3.4 to 10 cm) long and 0.6 to 2 in (1.5 to 5 cm) wide. The stalk of each of the two side leaflets has one joint, and the stalk of the terminal leaflet has two joints. Flowers are usually either male or female, and usually only one sex is found on a single tree. Clusters of 15 to 20 flowers 1.6 to 3.1 in (4 to 8 cm) long have a main flower stalk 0.8 to 2 in (20 to 50 mm) long and individual flower stalks 0.08 to 0.2 in (2 to 4 mm) long. Each flower has four narrowly triangular sepals about 0.04 in (1 mm) long and four hairless petals (possibly absent in male flowers) of an unknown color. The fruit is a sickle-shaped follicle (dry fruit that opens along one side) 0.3 to 0.4 in (8 to 10 mm) long, containing one black seed about 0.3 in (7 to 8 mm) in diameter. This species is distinguished from other Hawaiian species of the genus by its leaves, which are always made up of three leaflets of similar size; the presence of only one joint on some of the leaflet stalks; and the shorter follicle with a rounded tip (Stone *et al.* 1990).

Historically, *Zanthoxylum hawaiiense* was known to occur in the central portion of the island of Kauai; on East Molokai; in the central part of the island of Lanai; on East Maui on the southwestern and southern slopes of Haleakala; and on the island of Hawaii in the Kohala Mountains, on the northern slope of Hualalai, and on the northwestern slope of Mauna Loa. There is now one living individual known on Kauai in Kawaiiki Valley on State-owned land. On Molokai, three extant populations of the species occur on privately and State-owned and federally managed land in Kalaupapa National Historical Park (NHP), in Pelekunu Valley, and near Puu Kolekole. The Molokai populations extend over a distance of about 3 by 2 mi (5 by 3 km). Although the number of plants at one of the sites is uncertain, it is estimated that the 3 populations contain 5 plants. On Lanai, one population with an unknown number of individuals has been reported on privately owned property in Kaiholena Gulch. On East Maui, extant populations of *Z. hawaiiense* have been found in Kahikinui, above Lualailua, above Kanaio, and in Auwahi. These 4 populations extend over a distance of approximately 5 by 3 mi (8 by 5 km) and contain a total of fewer than 10 plants. On the island of Hawaii, individuals are found at Puu Waawaa and at PTA on State-owned and federally managed land. These 2 extant populations are located about 13 mi (21 km) apart and contain a total of about 50 plants. In summary, *Zanthoxylum hawaiiense* is currently located on 5 islands and consists of 11 populations and about 66 individuals (HHP 1991z1 to 1991z16; R. Shaw, pers. comm., 1991).

Zanthoxylum hawaiiense typically grows in 'ohi'a-dominated Lowland Dry or Mesic Forests, and Montane Dry Forests, often on aa lava, at elevations between 1,800 and 5,710 ft (550 and 1,740 m) (Gagne and Cuddihy 1990), Stone *et al.* 1990). Associated species include *Antidesma platyphyllum* (hame) on Kauai, *Pleomele auwahiensis* (hala pepe) on Molokai, a'ia'i on Maui, and mamane and naio on the island of Hawaii (HHP 1991z1, 1991z5, 1991z9, 1991z11; HPCC 1990b; R. Shaw, pers. comm., 1992). A threat to *Z. hawaiiense* on Kauai is competition from alien plant species such as lantana and *Melia azedarach* (Chinaberry) (HHP 1991z11). On Molokai, grazing, browsing, trampling, and habitat disturbance by feral goats is a threat (HHP 1991z5). On Maui, competition with Kikuyu grass, which forms a continuous mat in many areas, and grazing, browsing, trampling, and habitat disturbance by cattle and goats are threats (A. Medeiros, pers. comm., 1992). The major threats to the species on the island of Hawaii are competition from alien plant species such as fountain grass; grazing, browsing, trampling, and habitat disturbance by feral goats and sheep; habitat disturbance and damage to plants as a result of military exercises; and fire (CPC 1990b, HHP 1991z10, HPCC 1990b). In addition, the species is threatened by stochastic extinction and/or reduced reproductive vigor due to the small number of existing individuals.

Previous Federal Action

Federal action on these plants began as a result of section 12 of the Act, which directed the Secretary of the Smithsonian Institution to prepare a report on plants considered to be endangered, threatened, or extinct in the United States. This report, designated as House Document No. 94–51, was presented to Congress on January 9, 1975. In that document, *Clermontia lindseyana, Clermontia peleana, Colubrina oppositifolia, Cyanea hamatiflora* ssp. *carlsonii* (as *C. carlsonii*), *Cyanea shipmanii, Hesperocnide sandwicensis, Ischaemum byrone, Nothocestrum breviflorum* (as *N. breviflorum* var. *breviflorum*), *Portulaca sclerocarpa,* and *Zanthoxylum hawaiiense* (as *Z. hawaiiense* var. *citriodora*) were considered to be endangered. *Cyrtandra giffardii, Silene hawaiiensis* (as *S. hawaiiensis* var. *hawaiiensis*), and *Zanthoxylum hawaiiense* (as *Z. hawaiiense* var. *hawaiiense* and *Z. hawaiiense* var. *velutinosum*) were considered to be threatened. *Clermontia pyrularia, Isodendrion pyrifolium, Nothocestrum breviflorum* (as *N. breviflorum* var. *longipes*), and *Tetramolopium arenarium* (as *T. arenarium* var. *arenarium, T. arenarium* var. *confertum*, and *T. arenarium* var. *dentatum*) were considered to be extinct. On July 1975, the Service published a notice in the **Federal Register** (40 FR 27823) of its acceptance of the Smithsonian report as a petition within the context of section 4(c)(2) (now section 4(b)(3)) of the Act, and giving notice of its intention to review the status of the plant taxa named therein. As a result of that review, on June 16, 1976, the Service published a proposed rule in the **Federal Register** (41 FR 24523) to determine endangered status pursuant to section 4 of the Act for approximately 1,700 vascular plant species, including all of the above taxa considered to be endangered or thought to be extinct. The list of 1,700 plant taxa was assembled on the basis of comments and data received by the Smithsonian Institution and the Service in response to House Document No. 94–51 and the July 1, 1975, **Federal Register** publication.

General comments received in response to the 1976 proposal are summarized in an April 26, 1978, **Federal Register** publication (43 FR 17909). In 1978, amendments to the Act required that all proposals over 2 years old be withdrawn. A 1-year grace period was given to proposals already over 2 years old. On December 10, 1979, the Service published a notice in the **Federal Register** (44 FR 70796) withdrawing the portion of the June 16, 1976, proposal that had not been made final, along with four other proposals that had expired. The Service published updated notices of review for plants on December 15, 1980 (45 FR 82479), September 27, 1985 (50 FR 39525), and February 21, 1990) (55 FR 6183). In these notices, 10 of the taxa (including synonymous taxa) that had been proposed as endangered in the June 16, 1976, proposed rule were treated as Category 1 candidates for Federal listing. Category 1 taxa are those for which the Service has on file substantial information on biological vulnerability

and threats to support preparation of listing proposals. *Clermontia lindseyana, Clermontia pyrularia, Colubrina oppositifolia, Cyanea shipmanii, Hesperocnide sandwicensis, Ischaemum byrone, Nothocestrum breviflorum, Portulaca sclerocarpa,* and *Zanthoxylum hawaiiense,* which were proposed as endangered in the June 16, 1976, proposed rule, were considered Category 1 candidates on all three notices of review; *Cyanea hamatiflora* ssp. *carlsonii* was considered a Category 1 taxon as *Cyanea carlsonii* in the 1980 and 1985 notices and as *Cyanea hamatiflora* ssp. *carlsonii* in the 1990 notice. *Cyanea stictophylla* and *Silene hawaiiensis* were considered Category 1 species in all three notices. In the 1980 and 1985 notices, *Isodendrion pyrifolium* and *Tetramolopium arenarium* were considered Category 1* species. In the 1990 notice, these two species were accorded Category 3A status, but because new information regarding their existence has become available, they are proposed herein for listing. Category 1* taxa are those which are possibly extinct, and Category 3A taxa are those for which the Service has persuasive evidence of extinction.

Cyrtandra giffardii appeared as a Category 2 species and *Clermontia peleana* as a Category 3C species in the 1980 and 1985 notices. *Ochrosia Kilaueaensis* first appeared as a Category 2 species in the 1985 notice. Category 2 taxa are those for which there is some evidence of vulnerability, but for which there are not enough data to support listing proposals at the time. Category 3C taxa are those which are more abundant than previously believed. Because new information provided support for listing, the above three species were conferred Category 1 status in the 1990 notice. The 1990 notice recognized *Cyanea copelandii* spp. *copelandii, Cyrtandra tintinnabula, Mariscus fauriei, Plantago hawaiensis,* and *Pritchardia affinis* as Category 1 taxa for the first time.

Section 4(b)(3)(B) of the Act requires the Secretary to make findings on certain pending petitions within 12 months of their receipt. Section 2(b)(1) of the 1982 amendments further requires all petitions pending on October 13, 1982, be treated as having been newly submitted on that date. On October 13, 1983, the Service found that the petitioned listing of these taxa was warranted, but precluded by other pending listing actions, in accordance with section 4(b)(3)(B)(iii) of the Act; notification of this finding was published on January 20, 1984 (49 FR 2485). Such a finding requires the petition to be recycled, pursuant to section 4(b)(3)(C)(i) of the Act. The finding was reviewed in October of 1984, 1985, 1986, 1987, 1988, 1989, 1990, and 1991. Publication of the present proposed rule constitutes the final 1-year finding for these taxa.

Summary of Factors Affecting the Species

Section 4 of the Endangered Species Act (16 U.S.C. 1533) and regulations (50 CFR part 424) promulgated to implement the Act set forth the procedures for adding species to the Federal Lists. A species may be determined to be an endangered species due to one or more of the five factors described in section 4(a)(1). The threats facing these 22 taxa are summarized in Table 1.

TABLE 1.—SUMMARY OF THREATS

Species	Alien mammals						Disease/ insects	Alien plants	Fire	Natural disasters	Human impacts	Military	Limited No.°

KEY
X—Immediate and significant threat.
P—Potential threat.
°—No more than 100 known individuals and/or no more than 5 known populations.

1—No more than 10 known individuals.
2—No more than 5 known populations.
3—No more than 100 known individuals.
4—Extinct in the wild.

These factors and their application to *Clermontia lindseyana* Rock ('oha wai), *Clermontia peleana* Rock ('oha wai), *Clermontia pyrularia* Hillebr. ('oha wai), *Colubrina oppositifolia* Brongn. ex H. Mann (kauila), *Cyanea copelandii* Rock ssp. *copelandii* (haha), *Cyanea hamatiflora* ssp. *carlsonii* (Rock) Lammers (haha), *Cyanea shipmanii* Rock (haha), *Cyanea stictophylla* Rock (haha), *Cyrtandra giffardii* Rock (ha'iwale), *Cyrtandra tintinnabula* Rock (ha'iwale), *Hesperocnide sandwicensis* (Wedd.) Wedd. (no common name (NCN)), *Ischaemum byrone* (Trin.) Hitch. (Hilo ischaemum), *Isodendrion pyrifolium* A. Gray (wahine noho kula), *Mariscus fauriei* (Kukenth.) T. Koyama (NCN), *Nothocestrum breviflorum* A. Gray ('aiea), *Ochrosia kilaueaensis* St. John (holei), *Plantago hawaiensis* (A. Gray) Pilg. (laukahi kuahiwi), *Portulaca sclerocarpa* A Gray (po'e), *Pritchardia affinis* Becc. (loulu), *Silene hawaiiensis* Sherff (NCN), *Tetramolopium arenarium* (A. Gray) Hillebr. (NCN), and *Zanthoxylum hawaiiense* Hillebr. (a'e) are as follows:

A. The Present or Threatened Destruction, Modification, or Curtailment of its Habitat or Range

The habitat of the plants included in this proposed rule has undergone extreme alteration because of past and present land management practices, including deliberate alien animal and plant introductions; agricultural, commercial, and urban development; and military and recreational use. Natural disturbances such as flooding, landslides, and volcanic activity also destroy habitat and can have a significant effect on small populations of plants. Competition with alien plants as well as destruction of plants and modification of habitat by introduced animals are the primary threats facing 19 of the 22 taxa being proposed (See Table 1.).

Beginning with Captain James Cook in 1792, early European explorers introduced livestock, which became feral, increased in number and range, and caused significant changes to the natural environment of Hawaii. The 1848 provision for land sales to individuals allowed large-scale agricultural and ranching ventures to begin. So much land was cleared for these enterprises that climatic conditions began to change, and the amount and distribution of rainfall were altered (Wenkam 1969). Plantation owners supported reforestation programs which resulted in many alien trees being introduced in the hope that the watershed could be conserved.

Past and present activities of introduced alien mammals are the primary factor in altering and degrading vegetation and habitats on the island of Hawaii as well as on Kauai, Oahu, Molokai, and Maui, where some populations of the proposed species occur. Feral ungulates trample and eat native vegetation and disturb and open areas. This cause erosion and allows the entry of alien plant species (Cuddihy and Stone 1990, Wagner *et al.* 1990). Seventeen taxa in this proposal are directly threatened by habitat degradation resulting from introduced ungulates: 5 taxa are threatened by cattle, 1 taxon by deer, 7 taxa by goats, 9 by pigs, and 5 by sheep.

Axis deer (*Axis axis*), native to Sri Lanka and India, were first introduced to the Hawaiian Islands in 1868 as a game animal on Molokai, later to Oahu and Lanai, and finally to East Maui in 1960. Hunting of axis deer is allowed only on Molokai and Lanai during two months of the year (Hawaii DLNR 1985, Tomich 1986). The animal constitutes a threat to *Mariscus fauriei* on Molokai and a potential threat to *Ischaemum byrone* and *Zanthoxylum hawaiiense* on Molokai and Maui (HHP 1991z5; HPCC 1990b; Medeiros *et al.* 1986; R. Hobdy, pers. comm., 1992).

Cattle (*Bos taurus*), the wild progenitor of which was native to Europe, northern Africa, and southwestern Asia, were introduced to the Hawaiian Islands in 1793. Large feral herds developed as a result of restrictions on killing cattle decreed by King Kamehameha I. While small cattle ranches were developed on Kauai, Oahu, and West Maui, very large ranches of tens of thousands of acres were created on East Maui and Hawaii. Much of the land used in these private enterprises was leased from the State or was privately owned and considered Forest Reserve and/or Conservation District land. On Kauai, both sides of Waimea Canyon were supporting large cattle ranching operations by the 1870s (Ryan and Chang 1985). Feral cattle roamed Oahu, but most were removed by the early 1960s; today only a few can be found in the northwestern part of the island (J. Lau, pers. comm., 1990). Feral cattle were formerly found on Molokai and Maui and damaged the forests there. Feral cattle can presently be found on the island of Hawaii, and ranching is still a major commercial activity there. Hunting of feral cattle is no longer allowed in Hawaii (Hawaii DLNR 1985). Cattle eat native vegetation, trample roots and seedlings, cause erosion, create disturbed areas into which alien plants invade, and spread seeds of alien plants in their feces and on their bodies. The forest in areas grazed by cattle becomes degraded to grassland pasture, and plant cover is reduced for many years following removal of cattle from an area. Several alien grasses and legumes purposely introduced for cattle forage have become noxious weeds (Cuddihy and Stone 1990, Tomich 1986).

The habitats of many of the plants being proposed were degraded in the past by feral cattle, and this has had effects which still persist. Some taxa in this proposed rule are still being directly affected by cattle. These include: *Clermontia lindseyana, Cyanea hamatiflora* ssp. *carlsonii, Cyanea stictophylla, Nothocestrum breviflorum,* and *Zanthoxylum hawaiiense* (HHP 1991a1, 1991m, 1991n1, 1991r4, 1991r5; HPCC 1990b, 1991a, 1991h; F. Duvall, A. Medeiros, and S. Montgomery, pers. comms., 1992).

Goats (*Capra hircus*), a species originally native to the Middle East and India, were successfully introduced to the Hawaiian Islands in 1792, and currently there are populations on Kauai, Oahu, Molokai, Maui, and Hawaii. On Kauai, feral goats have been present in drier, more rugged areas since 1820; they still occur in Waimea Canyon. Goats have been on Oahu since about 1820, and they currently occur in the northern Waianae Mountains. On Molokai, goats degrade dry forests at low elevations. On Maui, goats have been widespread for 100 to 150 years and are common throughout the south slope of Haleakala (Medeiros *et al.* 1986). On Hawaii, goats damage low-elevation dry forest, montane parkland, subalpine woodlands, and alpine grasslands. Goats are managed in Hawaii as a game animal, but many herds populate inaccessible areas where hunting has little effect on their numbers. Goat hunting is allowed year-round or during certain months, depending on the area (Hawaii DLNR n.d., 1985). Goats browse on introduced grasses and native plants, especially in drier and more open ecosystems. They also trample roots and seedlings, cause erosion, and promote the invasion of alien plants. They are able to forage in extremely rugged terrain and have a high reproductive capacity (Cuddihy and Stone 1990, Culliney 1988, Tomich 1986). *Hesperocnide sandwicensis, Mariscus fauriei, Ochrosia kilaueaensis,*

Portulaca sclerocarpa, Silene hawaiiensis, Tetramolopium arenarium, and *Zanthoxylum hawaiiense* are currently threatened by goats (Bruegmann 1990; CPC 1990b; HHP 1991u5, 1991z5; HPCC 1990b; R. Hobdy, A. Medeiros, and R. Shaw, pers. comms., 1992), and *Ischaemum byrone* is potentially threatened by the animal (HHP 1991o11; R. Hobdy, pers. comm., 1992).

Sheep (*Ovis aries*) have become firmly established on the island of Hawaii (Tomich 1986) since their introduction almost 200 years ago (Cuddihy and Stone 1990). Like feral goats, sheep roam the upper elevation dry forests of Mauna Kea (above 3,300 ft (1,000 m)), including PTA, causing damage similar to that of goats (Stone 1985). Sheep have decimated vast areas of native forest and shrubland on Mauna Kea and continue to do so as a managed game species. Sheep threaten the habitat of at least two previously listed endangered species as well as the following proposed plant species: *Hesperocnide sandwicensis, Portulaca sclerocarpa, Silene hawaiiensis, Tetramolopium arenarium,* and *Zanthoxylum hawaiiense* (Cuddihy and Stone 1990; HHP 1991u4, HPCC 1990a, 1990b; Shaw *et al.* 1990; Stone 1985; K. Nagata and R. Shaw, pers. comms., 1992).

Pigs (*Sus scrofa*) are originally native to Europe, northern Africa, Asia Minor, and Asia. European pigs, introduced to Hawaii by Captain James Cook in 1778, became feral and invaded forested areas, especially wet and mesic forests and dry areas at high elevations. They are currently present on Kauai, Oahu, Molokai, Maui, and Hawaii and inhabit rain forests and grasslands. Pig hunting is allowed on all islands either year-round or during certain months, depending on the area (Hawaii DLNR n.d., 1985). While rooting in the ground in search of the invertebrates and plant material they eat, feral pigs disturb and destroy vegetative cover, trample plants and seedlings, and threaten forest regeneration by damaging seeds and seedlings. They disturb soil substrates and cause erosion, especially on slopes. Alien plant seeds are dispersed in their hooves and coats as well as through their digestive tracts, and the disturbed soil is fertilized by their feces, helping these plants to establish (Cuddihy and Stone 1990, Medeiros *et al.* 1986, Smith 1985, Stone 1985, Tomich 1986, Wagner *et al.* 1990). Feral pigs pose an immediate threat to one or more population of the following proposed taxa: *Clermontia lindseyana, Clermontia peleana, Colubrina oppositifolia, Cyrtandra giffardii, Cyrtandra tintinnabula, Hesperocnide sandwicensis, Portulaca sclerocarpa, Silene hawaiiensis,* and *Tetramolopium arenarium* (Bruegmann 1990; CPC 1990b; HPCC 1990a, 1991a, 1991d1, 1991d2; J. Lau, A. Medeiros, John Obata, Hawaii Plant Conservation Center, and W. Wagner, pers. comms., 1992).

One or more species of 12 introduced plants threaten 13 of the proposed taxa. The original native flora of Hawaii consisted of about 1,000 species, 89 percent of which were endemic. Of the total native and naturalized Hawaiian flora of 1,817 species, 47 percent were introduced from other parts of the world and nearly 100 species have become pests (Smith 1985, Wagner *et al.* 1990). Naturalized, introduced species degrade the Hawaiian landscape and compete with native plants for space, light, water, and nutrients (Cuddihy and Stone 1990). Some of these species were brought to Hawaii by various groups of people, including the Polynesian immigrants, for food or cultural reasons. Plantation owners, alarmed at the reduction of water resources for their crops caused by the destruction of native forest cover by grazing feral animals, supported the introduction of alien tree species for reforestation. Ranchers intentionally introduced pasture grasses and other species for agriculture, and sometimes they inadvertently introduced weed seeds as well. Other plants were brought to Hawaii for their potential horticultural value (Cuddihy and Stone 1990, Wenkam 1969).

Lantana camara (lantana), brought to Hawaii as an ornamental plant, is an aggressive, thicket-forming shrub which can now be found on all of the main islands in mesic forests, dry shrublands, and other dry, disturbed habitats (Wagner *et al.* 1990). One or more populations of each of the following taxa are threatened by lantana: *Colubrina oppositifolia, Nothocestrum breviflorum,* and *Zanthoxylum hawaiiense* (HHP 1991e4, 1991e8, 1991e15, 1991e16, 1991r4, 1991r12, 1991z11; HPCC 1991b, 1991h). *Leucaena leucocephala* (koa haole), a naturalized shrub which is sometimes the dominant species in low elevation, dry, disturbed areas on all of the main Hawaiian Islands, threatens *Nothocestrum breviflorum* (Geesnick *et al.* 1990, HHP 1991r12, HPCC 1991h). *Melia azedarach* (Chinaberry), a small tree widely cultivated and naturalized on most of the main Hawaiian Islands, threatens *Zanthoxylum hawaiiense* on Kauai (HHP 1991z11, Wagner *et al.* 1990). *Passiflora mollissima* (banana poka), a woody vine, poses a serious problem to mesic forests on Kauai and Hawaii by covering trees, reducing the amount of light which reaches trees as well as understory, and causing damage and death to trees by the weight of the vines. Animals, especially feral pigs, eat the fruit and distribute the seeds (Cuddihy and Stone 1990, Escobar 1990). Banana poka threatens *Clermontia lindseyana, Clermontia pyrularia,* and *Cyanea hamatiflora* ssp. *carlsonii* (HHP 1991a3, 1991aa; HPCC 1991c1 to 1991c3). After escaping from cultivation, *Schinus terebinthifolius* (Christmas berry) became naturalized on most of the main Hawaiian Islands (Wagner *et al.* 1990). It threatens *Colubrina oppositifolia, Mariscus fauriei,* and *Nothocestrum breviflorum* (HHP 1991e8, 1991e15, 1991e16, 1991q8, 1991r12; HPCC 1991b, 1991g).

Several hundred species of grasses have been introduced to the Hawaiian Islands, many for animal forage. Of the approximately 100 grass species which have become naturalized, 7 species threaten 12 of the 22 proposed plants. *Andropogon virginicus* (broomsedge) is a perennial, tufted grass which is naturalized on Oahu and Hawaii along roadsides and in disturbed dry to mesic forest and shrubland. This is a fire-adapted grass which threatens *Portulaca sclerocarpa* (Cuddihy and Stone 1990, HPCC 1991i, O'Connor 1990). *Anthoxanthum odoratum* (sweet vernalgrass) is a perennial, tufted grass which has naturalized in pastures, disturbed areas in wet forest, and sometimes in subalpine shrubland on Molokai, Maui, and Hawaii and is a threat to *Hesperocnide sandwicensis* (HPCC 1991e, O'Connor 1990). *Digitaria ciliaris* (Henry's crabgrass) is an annual grass which forms thick mats. It has naturalized on all the main Hawaiian Islands in lawns and pastures and threatens *Ischaemum byrone* (HPCC 1991f, O'Connor 1990). *Holcus lanatus* (common velvet grass), a perennial grass naturalized on most of the main Hawaiian Islands in wet, disturbed sites, threatens *Hesperocnide sandwicensis* (HPCC 1991e, O'Connor 1990). *Oplismenus hirtellus* (basketgrass) is a perennial grass which is naturalized in shaded mesic valleys and forests and sometimes in wet forests on most of the main Hawaiian Islands. *Mariscus fauriei* is threatened by basketgrass (HPCC 1991g, O'Connor 1990). *Pennisetum clandestinum* (Kikuyu grass), an aggressive, perennial grass introduced to Hawaii as a pasture grass, withstands trampling and grazing and has naturalized on four Hawaiian Islands in dry to mesic forest. It produces thick mats which choke out other plants and prevent their seedlings from establishing and has been declared a

noxious weed by the U.S. Department of Agriculture (7 CFR 360) (Medeiros *et al.* 1986, O'Connor 1990, Smith 1985). Kikuyu grass is a threat to *Clermontia lindseyana*, and *Zanthoxylum hawaiiense* (HPCC 1991a; A. Medeiros and S. Montgomery, pers. comms., 1992). *Pennisetum setaceum* (fountain grass) is a fire-adapted bunch grass that has spread rapidly over bare lava flows and open areas on the island of Hawaii since its introduction in the early 1900s. Fountain grass is particularly detrimental to Hawaii's dry forests because it is able to invade areas once dominated by native plants, where it interferes with plant regeneration, carries fires into areas not usually prone to fires, and increases the likelihood of fires (Cuddihy and Stone 1990, O'Connor 1990, Smith 1985). Fountain grass threatens one or more populations of the following proposed taxa: *Colubrina oppositifolia, Isodendrion pyrifolium, Nothocestrum breviflorum, Ochrosia kilaueaensis, Portulaca sclerocarpa, Silene hawaiiensis, Tetramolopium arenarium*, and *Zanthoxylum hawaiiense* (HHP 1991n3, 1991r5; HPCC 1990a, 1991h; J. Lau, S. Montgomery, and P. Weissich, pers. comms., 1992).

Because Hawaiian plants were subjected to fire during their evolution only in areas of volcanic activity and from occasional lightning strikes, they are not adapted to recurring fire regimes and are unable to recover well following a fire. Alien plants are often better adapted to fire than native plant species, and some fire-adapted grasses have become widespread in Hawaii; native shrubland can thus be converted to land dominated by alien grasses. The presence of such species in Hawaiian ecosystems greatly increases the intensity, extent, and frequency of fire, especially during drier months or drought. Fire-adapted alien species can reestablish in a burned area, resulting in a reduction in the amount of native vegetation after each fire. Fire can destroy dormant seeds as well as plants, even in steep or inaccessible areas. Fires may result from natural causes, or they may be accidentally or purposely set by hunters, other people, or military ordnance or personnel. Vegetation within PTA on the northwestern slope of Mauna Loa is particularly vulnerable to fire, as this is an area managed for recreational hunting and used for military training. The only known population of *Tetramolopium arenarium* occurs in Kipuka Kalawamauna, and to protect this area from fires, the U.S. Army has installed firebreaks and now redirects ordnance firing away from that kipuka. Planned military maneuvers are now being reevaluated in light of several Category 1 and listed endangered species within the boundaries of PTA and an Environmental Impact Statement is being prepared for the area in response to a court decision (Cuddihy and Stone 1990; Herbst and Fay 1979; R. Shaw, pers. comm., 1992). Fire is a threat to one or more populations of the following proposed taxa: *Colubrina oppositifolia, Hesperocnide sandwicensis, Isodendrion pyrifolium, Nothocestrum breviflorum, Ochrosia kilaueaensis, Portulaca sclerocarpa, Silene hawaiiensis, Tetramolopium arenarium, and Zanthoxylum hawaiiense* (HHP 1991e15, 1991r5; HPCC 1990a, 1990b, 1991b, 1991h; J. Lau and K. Nagata, pers. comms., 1992).

Land development for housing and commercial activities threatens *Pritchardia affinis* and potentially threatens the continued existence of *Isodendrion pyrifolium* since it grows in an area being converted to a golf course (C. Corn, K. Nagata, and P. Weissich, pers. comms., 1992).

Illicit cultivation of *Cannabis sativa* (marijuana) occurs in isolated portions of public and private lands in the Hawaiian Islands. This agricultural practice opens areas in native forest into which alien plants invade after the patches are abandoned (Medeiros *et al.* 1988). Marijuana cultivation is considered a threat to the integrity of the habitat of *Clermontia peleana* (Bruegmann 1990, CPC 1990b).

B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

Unrestricted collecting for scientific or horticultural purposes and excessive visits by individuals interested in seeing rare plants could result from increased publicity. This is a potential threat to all of the proposed taxa, but especially to *Cyanea copelandii* ssp. *copelandii, Isodendrion pyrifolium*, and *Ochrosia kilaueaensis*, each of which has only 1 or 2 populations and a total of 10 or fewer known individuals or exist only as cultivated individuals. Any collection of whole plants or reproductive parts of any of these five species would cause an adverse impact on the gene pool and threaten the survival of the species.

People are more likely to come into contact with taxa which have populations near trails or roads or in recreational areas. Alien plants may be introduced into such areas as seeds on footwear, or people may cause erosion, trample plants, or start fires (Cuddihy and Stone 1990). The following proposed taxa have populations in recreational areas or close to roads or trails and are potentially threatened by human disturbance: *Clermontia peleana, Clermontia pyrularia, Colubrina oppositifolia, Cyrtandra giffardii, Hesperocnide sandwicensis, Ischaemum byrone, Nothocestrum breviflorum, Portulaca sclerocarpa, Silene hawaiiensis, Tetramolopium arenarium*, and *Zanthoxylum hawaiiense*.

C. Disease or Predation

Axis deer, cattle, goats, or sheep have been reported in areas where populations of most of the proposed taxa occur. As the taxa are not known to be unpalatable to these ungulates, predation is a probable threat where those animals have been reported, potentially affecting the following taxa: *Clermontia lindseyana, Cyanea hamatiflora* ssp. *carlsonii, Cyanea stictophylla, Hesperocnide sandwicensis, Hibiscadelphus hualalaiensis, Ischaemum byrone, Mariscus fauriei, Nothocestrum breviflorum, Ochrosia kilaueaensis, Portulaca sclerocarpa, Silene hawaiiensis, Tetramolopium arenarium*, and *Zanthoxylum hawaiiense*. The lack of seedlings of several of the taxa and the occurrence of some populations or taxa only in areas inaccessible to ungulates seem to indicate the effect that browsing mammals, especially cattle and goats, have had in restricting the distribution of these plants.

Of the four species of rodents which have been introduced to the Hawaiian Islands, the species with the greatest impact on the native flora and fauna is probably *Rattus rattus* (roof or black rat), which now occurs on all the main Hawaiian Islands around human habitations, in cultivated fields, and in dry to wet forests. Roof rats, and to a lesser extent *Mus musculus* (house mouse), *R. exulans* (Polynesian rat), and *R. norvegicus* (Norway rat) eat the fruits of some native plants, especially those with large, fleshy fruits. Many native Hawaiian plants produce their fruit over an extended period of time, and this produces a prolonged food supply which supports rodent populations. They also damage fruit of *Pritchardia affinis* (Beccari and Rock 1921). It is probable that rats damage the fruit of *Ochrosia kilaueaensis*, which has fleshy fruits and occurs in areas where rats are found. There is direct evidence that rats feed on *Clermontia peleana*, and, since rats are found in remote areas of most islands in Hawaii, it is likely that predation occurs on the other proposed taxa of *Clermontia* and *Cyanea*, potentially affecting *Clermontia*

lindseyana, Clermontia pyrularia, Cyanea copelandii ssp. *copelandii, Cyanea hamatiflora* ssp. *carlsonii, Cyanea shipmanii* and *Cyanea stictophylla* (HPCC 1990a; J. Lau, pers. comm., 1990).

Xylosandrus compactus (black twig borer) is a small beetle about 0.06 in (1.6 mm) in length which burrows into branches, introduces a pathogenic fungus as food for its larvae, and lays its eggs. Twigs, branches, and even the entire plant can be killed from such an infestation. Black twig borer is known to attach *Colubrina oppositifolia* and is a threat to this species (Cuddihy and Stone 1990; HHP 1991e9, 1991e16).

Pritchardia affinis is known to be susceptible to lethal yellows, which is a bacteria-like organism producing disease in many palms. This disease is not yet in Hawaii, but if it ever is accidentally introduced on plant material brought into the State, it is a potential threat to this species. In addition, cultivated loulu specimens in areas outside Hawaii may be affected by the disease (Hull 1980).

D. The Inadequacy of Existing Regulatory Mechanisms

Hawaii's Endangered Species Act states, "Any species of aquatic life, wildlife, or land plant that has been determined to be an endangered species pursuant to the (Federal) Endangered Species Act shall be deemed to be an endangered species under the provisions of this chapter * * *" (HRS, sect. 195D–4(a)). Federal listing would automatically invoke listing under Hawaii State law, which prohibits taking of endangered plants in the State and encourages conservation by State agencies (HRS, sect. 195D–4).

None of the 22 proposed taxa is presently listed as an endangered species by the State of Hawaii. Fifteen of the 22 proposed taxa have populations located on privately owned land. Two taxa, *Cyanea shipmanii* and *Cyanea stictophylla*, are found exclusively on private land. At least one population of each taxon except *Cyanea shipmanii, Cyanea stictophylla, Silene hawaiiensis*, and *Zanthoxylum hawaiiense* occurs on State land. *Colubrina oppositifolia, Cyanea copelandii* ssp. *copelandii, Cyrtandra giffardii, Cyrtandra tintinnabula*, and *Ischaemum byrone* each has one or more population located in State parks, Natural Area Reserves, or the State seabird sanctuary, which have rules and regulations for the protection of resources (Hawaii DLNR 1981; HRS, sects. 183D–4, 184–5, 195–5, and 195–8). However, the regulations are difficult to enforce because of limited personnel. One or more populations of at least 18 of the 22 proposed taxa located on land classified within conservation districts and owned by the State of Hawaii or private companies or individuals. Regardless of the owner, lands in these districts, among other purposes, are regarded as necessary for the protection of endemic biological resources and the maintenance or enhancement of the conservation of natural resources. Activities permitted in conservation districts are chosen by considering how best to make a multiple use of the land (HRS, sect. 205–2). Some uses, such as maintaining animals for hunting, are based on policy decisions, while others, such as preservation of endangered species, are mandated by both Federal and State laws. Requests for amendments to district boundaries or variances within existing classifications can be made by government agencies and private landowners (HRS, sect. 205–4). Before decisions about these requests are made, the impact of the proposed reclassification on "preservation or maintenance of important natural systems or habitat" (HRS, sects. 205–4, 205–17) as well as the maintenance of natural resources is required to be taken into account (HRS, sects. 205–2, 205–4). For any proposed land use change which will occur on county or State land, will be funded in part or whole by county or State funds, or will occur within land classified as conservation district, an environmental assessment is required to determine whether or not the environment will be significantly affected (HRS, chapt. 343). If it is found that an action will have a significant effect, preparation of a full Environmental Impact Statement is required. Hawaii environmental policy, and thus approval of land use, is required by law to safeguard "* * * the State's unique natural environmental characteristics * * *" (HRS, sect. 344–3(1)) and includes guidelines to "Protect endangered species of individual plants and animals * * *" (HRS, sect. 344–4(3)(A)). Federal listing, because it automatically invokes State listing, would also trigger these other State regulations protecting the plants.

State laws relating to the conservation of biological resources allow for the acquisition of land as well as the development and implementation of programs concerning the conservation of biological resources (HRS, sect. 195D–5(a)). The State also may enter into agreements with Federal agencies to administer and manage any area required for the conservation, management, enhancement, or protection of endangered species (HRS, sect. 195D–5(c)). If listing were to occur, funds for these activities could be made available under section 6 of the Federal Act (State Cooperative Agreements). The Hawaii DLNR is mandated to initiate changes in conservation district boundaries to include "the habitat of rare native species of flora and fauna within the conservation district" (HRS, sect. 195D–5.1). State and Federal agencies have programs to locate, eradicate, and deter marijuana cultivation, which is a threat to one of the proposed taxa (CPC 1990b). Despite the existence of various State laws and regulations which give protection to Hawaii's native plants, their enforcement is difficult due to limited funding and personnel. Listing of these 22 plant taxa would reinforce and supplement the protection available under the State Act and other laws. The Federal Act would offer additional protection to these 22 taxa because, if they were to be listed as endangered, it would be a violation of the Act for any person to remove, cut, dig up, damage, or destroy any such plant in an area not under Federal jurisdiction in knowing violation of State law or regulation or in the course of any violation of a State criminal trespass law.

E. Other Natural or Manmade Factors Affecting Its Continued Existence

The small numbers of populations and individuals of most of these taxa increase the potential for extinction from stochastic events. The limited gene pool may depress reproductive vigor, or a single human-caused or natural environmental disturbance could destroy a significant percentage of the individuals or the only known extant population. This constitutes a major threat to 16 of the 22 taxa being proposed (See Table 1.). Five of the proposed taxa, *Cyanea copelandii* ssp. *copelandii, Cyanea shipmanii, Isodendrion pyrifolium, Ochrosia kilaueaensis*, and *Tetramolopium arenarium*, are known from a single population. Seven other proposed taxa are known from only two to five populations. Seventeen of the proposed taxa are estimated to number no more than 100 known individuals. Six of these taxa, *Clermontia peleana, Clermontia pyrularia, Cyanea copelandii* ssp. *copelandii, Isodendrion pyrifolium, Ochrosia kilaueaensis*, and *Plantago hawaiensis*, number no more than 10 known individuals.

Natural changes to habitat and substrate can result in the death of individual plants as well as the destruction of their habitat. This especially affects the continued existence of taxa or populations with

limited numbers and/or narrow ranges and is often exacerbated by human disturbance and land use practices (See Factor A.). Landslides produced by burrowing seabirds in an offshore islet population of *Ischaemum byrone* are a potential threat to that species (HHP 1991o10; R. Hobdy, pers. comm., 1992). Flooding is a threat to *Clermontia peleana*, which often grows in a riparian habitat (Bruegmann 1990, CPC 1990b). A population of *Ischaemum byrone* is presumed to have been destroyed by volcanic activity, and another population is affected by drifting black sand (HHP 1991o3; C. Lamoureux, pers. comm., 1992). *Silene hawaiiensis* is also considered to be immediately threatened by volcanic activity (HPCC 1991j).

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by these taxa in determining to propose this rule. Based on this evaluation, the preferred action is to list these 22 plant taxa as endangered. Sixteen of the taxa proposed for listing number no more than about 100 individuals and/or are known from 5 or fewer populations. The 22 taxa are threatened by one or more of the following: habitat degradation and/or predation by axis deer, cattle, goats, insects, pigs, rats, and sheep; competition from alien plants; fire and natural disasters; human and military impacts; and lack of legal protection or difficulty in enforcing laws which are already in effect. Small population size and limited distribution make these taxa particularly vulnerable to extinction and/or reduced reproductive vigor from stochastic events. Because these 22 taxa are in danger of extinction throughout all or a significant portion of their ranges, they fit the definition of endangered as defined in the Act.

Critical habitat is not being proposed for the 22 taxa included in this rule, for reasons discussed in the "Critical Habitat" section of this proposal.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that, to the maximum extent prudent and determinable, the Secretary designate critical habitat at the time the species is determined to be endangered. The Service finds that designation of critical habitat is not presently prudent for these taxa. Such a determination would result in no known benefit to the taxa. As discussed under Factor B in the "Summary of Factors Affecting the Species," the taxa face numerous anthropogenic threats. The publication of precise maps and descriptions of critical habitat in the **Federal Register** and local newspapers as required in a proposal for critical habitat would increase the degree of threat to these plants from take or vandalism and, therefore, could contribute to their decline and increase enforcement problems. The listing of these taxa as endangered publicizes the rarity of the plants and, thus, can make these plants attractive tc researchers, curiosity seekers, or collectors of rare plants. All involved parties and the major landowners have been notified of the location and importance of protecting the habitat of these taxa. Protection of the habitat of the taxa will be addressed through the recovery process and through the section 7 consultation process. There are several Federal activities within the currently known habitats of these plants. One or more populations of 10 of the proposed taxa are located on federally owned and/or managed land. Four taxa are located in Hawaii Volcanoes National Park on the island of Hawaii and one taxon in Kalaupapa NHP on Molokai. Six taxa are located on military lands, including one species on Makua Military Reservation on Oahu and five taxa on PTA on the island of Hawaii. Two taxa are found in Hakalau Forest National Wildlife Refuge on the island of Hawaii. A population of one taxon occurs at a U.S. Coast Guard lighthouse on Maui. Federal laws already protect all plants on federally owned and/or managed land from damage or removal. The Service finds that designation of critical habitat for these taxa is not prudent at this time. Such a designation would increase the degree of threat from vandalism, collecting, or other human activities and is unlikely to aid in the conservation of these taxa.

Available Conservation Measures

Conservation measures provided to taxa listed as endangered under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain activities. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the State and requires that recovery actions be carried out for all listed species. The protection required of Federal agencies and the prohibitions against certain activities involving listed plants are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any taxon that is proposed or listed as endangered and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) of the Act requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) requires Federal agencies to insure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. Federal agencies that would become involved if any of their activities may affect these 22 species include the National Park Service, Department of Defense, Fish and Wildlife Service, and the U.S. Coast Guard. There are no other known Federal activities that occur within the present known habitat of these 22 plant taxa.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62, and 17.63 for endangered plants set forth a series of general prohibitions and exceptions that apply to all endangered plant species. With respect to the 22 plant taxa proposed to be listed as endangered, all of the prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61, would apply. These prohibitions, in part, make it illegal with respect to any endangered plant for any person subject to the jurisdiction of the United States to import or export; transport in interstate or foreign commerce in the course of a commercial activity; sell or offer for sale in interstate or foreign commerce; remove and reduce to possession any such species from areas under Federal jurisdiction; maliciously damage or destroy any such species on any area under Federal jurisdiction; or remove, cut, dig up, damage, or destroy any such species on any other area in knowing violation of any State law or regulation or in the course of any violation of a State criminal trespass law. Certain exceptions apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered plant species under certain circumstances. It

is anticipated that few trade permits would ever be sought or issued. The taxa are not common in cultivation nor in the wild, and only one taxa, *Pritchardia affinis*, is known to be in an active program of cultivation.

Requests for copies of the regulations concerning listed plants and inquiries regarding prohibitions and permits may be addressed to the Office of Management Authority, U.S. Fish and Wildlife Service, 4401 North Fairfax Drive, Room 432, Arlington, Virginia 22203–3507 (703/358–2104; FAX 703/358–2281).

Public Comments Solicited

The Service intends that any final action resulting from this proposal will be as accurate and as effective as possible. Therefore, comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning this proposed rule are hereby solicited. Comments particularly are sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to these taxa;

(2) The location of any additional populations of these taxa and the reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(3) Additional information concerning the range, distribution, and population size of these taxa; and

(4) Current or planned activities in the subject area and their possible impacts on these taxa.

The final decision on this proposal will take into consideration the comments and any additional information received by the Service, and such communications may lead to a final regulation that differs from this proposal.

The Endangered Species Act provides for one or more public hearings on this proposal, if requested. Requests must be received within 45 days of the date of publication of the proposal. Such requests must be made in writing and addressed to the Field Supervisor (see **ADDRESSES** section).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment or Environmental Impact Statement, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Endangered and threatened species, Exports, Imports, Reporting and recordkeeping requirements, and Transportation.

Proposed Regulations Promulgation

PART 17—[AMENDED]

Accordingly, it is hereby proposed to amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500; unless otherwise noted.

2. It is proposed to amend § 17.12(h) by adding the following, in alphabetical order under the families indicated, and by adding two new families, "Plantaginaceae—Plantain family" and "Portulacaceae—Purslane family," in alphabetical order, to the List of Endangered and Threatened Plants:

§ 17.12 Endangered and threatened plants.

Endangered and Threatened Wildlife and Plants; Proposed Endangered Status for the Plant "Pritchardia aylmer-robinsonii" (Wahane)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The U.S. Fish and Wildlife Service (Service) proposes endangered status pursuant to the Endangered Species Act of 1973, as amended (Act), for the plant *Pritchardia aylmer-robinsonii* (wahane). The species grows only on the island of Niihau, Hawaiian Islands. The species and its habitat have been affected and are currently threatened by cattle, pigs, and sheep. Due to the small number of existing individuals and their very narrow distribution, this species is subject to reduced reproductive vigor and/or an increased likelihood of extinction from stochastic events. This proposal, if made final, would implement the Federal protection and recovery provisions provided by the Act. If made final, it would also implement State regulations protecting these plants as endangered species. Comments and materials related to this proposal are solicited.

DATES: Comments from all interested parties must be received by February 16, 1993. Public hearing requests must be received by February 1, 1993.

ADDRESSES: Comments and materials concerning this proposal should be sent to Robert P. Smith, Field Supervisor, Pacific Islands Office, U.S. Fish and Wildlife Service, 300 Ala Moana Boulevard, room 6307, P.O. Box 50167, Honolulu, Hawaii 96850. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Derral R. Herbst, at the above address (808/541–2749).

SUPPLEMENTARY INFORMATION:

Background

In 1947, on one of his botanical collecting trips to Niihau, Harold St. John discovered a new species of the only genus of palms native to the Hawaiian Islands. He named it *Pritchardia aylmer-robinsonii* in honor of Aylmer F. Robinson, a member of the family which owns the island and a person who provided St. John with much information regarding the island's plants (St. John 1959).

Historically, *Pritchardia aylmer-robinsonii* was found at three sites in the eastern and central portions of the island of Niihau. Trees were found on Kaali Cliff and in Mokouia and Haao Valleys at elevations between 70 and 270 meters (m) (230 and 890 feet (ft)) (Hawaii Heritage Program (HHP) 1991a to 1991d). The most recent observations indicate that the only extant natural population consists of two plants still remaining on Kaali Cliff (Read and Hodel 1990). Originally a component of the Coastal Dry Forest, this species now occurs only in a rugged and steep area where it is somewhat protected from grazing animals. The substrate in the area is rocky talus, and *Prosopis pallida* (kiawe), an introduced tree, is one of the palm's few associated plant species. Other native plants which have been found in the area included *Brighamia insignis* ('olulu), *Cyperus trachysanthos* (pu'uka'a), *Lipochaeta lobata* var. *lobata* (nehe), and *Lobelia niihauensis* (no common name) HHP 1991e; St. John 1959; Keith Woolliams, Waimea Arboretum and Botanical Garden, pers. comm., 1980).

Pritchardia aylmer-robinsonii of the palm family (Arecaceae) is a fan-leaved tree about 7 to 15 m (23 to 50 ft) tall with a trunk approximately 20 to 30 centimeters (cm) (8 to 12 inches (in)) in diameter. The upper and lower leaf surfaces are green and hairless, and leaf segments are rather thin and drooping. The lower surfaces of the petiole and the leaf ribs are covered with dense, tan wool. The branched, hairless flower clusters are located among the leaves and are no longer than the petioles. Each flower comprises a cup-shaped, three-lobed calyx; three petals; six stamens; and a three-lobed stigma. The spherical, hard, black fruit is 1.8 to 2 cm (0.7 to 0.8 in) in diameter. This species is distinguished from others of the genus by the thin leaf texture and drooping leaf segments; the tan woolly hairs on the underside of the petiole and the leaf blade base; the stout hairless flower clusters which do not extend beyond the fan-shaped leaves; and the smaller spherical fruit (Read and Hodel 1990).

Hawaiian land practices prior to European contact probably destroyed most of the forest on Niihau. Grazing animals were introduced to the island beginning in the 1700s and have further decreased available habitat for *Pritchardia aylmer-robinsonii* as well as directly damaging trees, seedlings, and/or seeds. The entire island is now classified an Agricultural District, and it is managed as a cattle and sheep ranch. In addition to the two naturally occuring plants, there are approximately 200 immature cultivated individuals in existence. Reduced reproductive vigor and/or stochastic extinction due to the small number of reproductive plants are major threats. Rodents are known to eat the seeds of some palms of this genus, and they are a potential threat to this species as well, since they are found on Niihau (Beccari and Rock 1921; Cuddihy and Stone 1990; Department of Geography 1983; St. John 1959; Tomich 1986; Wagner et al. 1985; John Fay, U.S. Fish and Wildlife Service, pers. comm., 1992).

Federal action on this plant began as a result of section 12 of the Act, which directed the Secretary of the Smithsonian Institution to prepare a report on plants considered to be endangered, threatened, or extinct in the United States. This report, designated as House Document No. 94–51, was presented to Congress on January 9, 1975. In that document, *Pritchardia aylmer-robinsonii* was considered to be endangered. On July 1, 1975, the Service published a notice in the **Federal Register** (40 FR 27823) of its acceptance of the Smithsonian report as a petition within the context of section 4(c)(2) (now section 4(b)(3)) of the Act, and giving notice of its intention to review the status of the plant taxa named

therein. As a result of that review, on June 16, 1976, the Service published a proposed rule in the **Federal Register** (41 FR 24523) to determine endangered status pursuant to section 4 of the Act for approximately 1,700 vascular plant species, including *Pritchardia aylmer-robinsonii*. The list of 1,700 plant taxa was assembled on the basis of comments and data received by the Smithsonian Institution and the Service in response to House Document No. 94–51 and the July 1, 1975, **Federal Register** publication. General comments received in response to the 1976 proposal are summarized in an April 26, 1978, **Federal Register** publication (43 FR 17909). In 1978, amendments to the Act required that all proposals over 2 years old be withdrawn. A 1-year grace period was given to proposals already over 2 years old. On December 10, 1979, the Service published a notice in the **Federal Register** (44 FR 70796) withdrawing the portion of the June 16, 1976, proposal that had not been made final, along with four other proposals that had expired. The Service published updated notices of review for plants on December 15, 1980 (45 FR 82479), September 27, 1985 (50 FR 39525), and February 21, 1990 (55 FR 6183). In these notices, *Pritchardia aylmer-robinsonii* was treated as a Category 1 candidate for Federal listing. Category 1 taxa are those for which the Service has on file substantial information on biological vulnerability and threats to support preparation of listing proposals.

Section 4(b)(3)(B) of the Act requires the Secretary to make findings on certain pending petitions within 12 months of their receipt. Section 2(b)(1) of the 1982 amendments further requires all petitions pending on October 13, 1982, be treated as having been newly submitted on that date. On October 13, 1983, the Service found that the petitioned listing of *Pritchardia aylmer-robinsonii* was warranted, but precluded by other pending listing actions, in accordance with section 4(b)(3)(B)(iii) of the Act; notification of this finding was published on January 20, 1984 (49 FR 2485). Such a finding requires the petition to be recycled, pursuant to section 4(b)(3)(C)(i) of the Act. The finding was reviewed in October of 1984, 1985, 1986, 1987, 1988, 1989, 1990, and 1991. Publication of the present proposed rule constitutes the final 1-year finding for this species.

Summary of Factors Affecting the Species

Section 4 of the Endangered Species Act (16 U.S.C. 1533) and regulations (50 CFR part 424) promulgated to implement the Act set forth the procedures for adding species to the Federal Lists. A species may be determined to be an endangered species due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Pritchardia aylmer-robinsonii* St. John (wahane) are as follows:

A. The Present or Threatened Destruction, Modification, or Curtailment of its Habitat or Range

The habitat of *Pritchardia aylmer-robinsonii* has undergone extreme alteration because of past and present land management practices, including agricultural use and deliberate introductions of alien animals. The Hawaiians made extensive agricultural use of Niihau before European contact. Modification of habitat by introduced animals, currently cattle (*Bos taurus*), pigs (*Sus scrofa*), sheep (*Ovis aries*) and formerly also goats (*Capra hircus*), is now one of the major threats facing *Pritchardia aylmer-robinsonii*.

Cattle, the wild progenitor of which was native to Europe, northern Africa, and southwestern Asia, was introduced to the Hawaiian Islands in 1793. Feral cattle formerly occurred on Niihau and caused much damage on the island. Originally native to the Middle East and India, goats were introduced to the Hawaiian Islands in 1792. All feral goats were removed from Niihau about 1910, but by that time they had caused considerable damage to the dry and mesic forests there. Sheep, the wild progenitor of which was native to western Eurasia, was also introduced to Niihau, is still raised there, and has done much damage to the native vegetation and substrate. Pig, originally native to Europe, northern Africa, Asia Minor, and Asia, was introduced to the Hawaiian Islands by the Polynesian immigrants and later from European ships. Pigs are currently present on Niihau, and, besides causing damage to substrate and plants, they are fond of the seeds of *Pritchardia aylmer-robinsonii* (Cuddihy and Stone 1990; Stone 1985; Tomich 1986; Wagner et al. 1985; J. Fay, pers. comm., 1992).

B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

Because the natural population is on a privately owned island with limited public access, activities such as unrestricted collecting for scientific or horticultural purposes and excessive visits by individuals interested in seeing rare plants are unlikely to occur.

C. Disease or predation

Niihau is used as a cattle and sheep ranch with animals ranging in many areas of the island. Since *Pritchardia aylmer-robinsonii* is not known to be unpalatable to these ungulates, predation is a probable threat. In fact, St. John noted damage to one tree, which he believed had been caused by an animal (1959). The current occurrence of plants only in a rocky area inaccessible to ungulates seems to indicate the effect that browsing mammals have had in restricting the distribution of the species.

Roof or black rats (*Rattus rattus*), which occur on Niihau, have been reported to damage the fruit of other species of *Pritchardia* and thus pose a potential threat to *Pritchardia aylmer-robinsonii* (Beccari and Rock 1921). In addition, pigs eat the seeds of this plant.

D. The Inadequacy of Existing Regulatory Mechanisms

Pritchardia aylmer-robinsonii is not presently listed as an endangered species by the State of Hawaii. There are no State laws or existing regulatory mechanisms at the present time to protect this species. The known natural habitat of this species is located exclusively on privately owned land. Hawaii's Endangered Species Act states, "Any species of aquatic life, wildlife, or land plant that has been determined to be an endangered species pursuant to the [Federal] Endangered Species Act shall be deemed to be an endangered species under the provisions of this chapter * * *" (HRS, section 195D–4(a)). Federal listing would automatically invoke listing under Hawaii State law, which prohibits taking of endangered plants in the State and encourages conservation by State agencies (HRS, section 195D–4).

State laws relating to the conservation of biological resources allow for the acquisition of land as well as the development and implementation of programs concerning the conservation of biological resources (HRS, section 195D–5(a)). The State also may enter into agreements with Federal agencies to administer and manage any area required for the conservation, management, enhancement, or protection of endangered species (HRS, section 195D–5(c)). If listing were to occur, funds for these activities could be made available under section 6 of the Federal Act (State Cooperative Agreements). The Hawaii Department of Land and Natural Resources is mandated to initiate changes in conservation district boundaries to include "the habitat of rare native

species of flora and fauna within the conservation district" (HRS, section 195D–5.1). Currently, the entire island of Niihau is within the Agricultural District. Listing of this species would reinforce and supplement the protection available under the State Act and other laws. The Federal Act would offer additional protection to this species because, if it were to be listed as endangered, it would be a violation of the Act for any person to remove, cut, dig up, damage, or destroy any such plant in an area not under Federal jurisdiction in knowing violation of State law or regulation or in the course of any violation of a State criminal trespass law.

E. Other Natural or Manmade Factors Affecting Its Continued Existence

The small number of individuals of *Pritchardia aylmer-robinsonii* increases the potential for extinction from stochastic events. A single human-caused or natural environmental disturbance could destroy a significant percentage of the individuals or the only known natural population of the species. In addition, the limited gene pool may depress reproductive vigor.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to propose this rule. Based on this evaluation, the preferred action is to list *Pritchardia aylmer-robinsonii* as endangered. This species is threatened by habitat degradation and/or predation by cattle, pigs, and sheep and lack of legal protection. Small population size and limited distribution make this species particularly vulnerable to reduced reproductive vigor and/or extinction from stochastic events. Because this species is in danger of extinction throughout all or a significant portion of its range, it fits the definition of endangered as defined in the Act. Critical habitat is not being proposed for *Pritchardia aylmer-robinsonii* for reasons discussed in the "Critical Habitat" section of this proposal.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that, to the maximum extent prudent and determinable, the Secretary designate critical habitat at the time the species is determined to be endangered. The Service finds that designation of critical habitat is not presently prudent for *Pritchardia aylmer-robinsonii*. Such a determination would result in no known benefit to the species. The publication of a precise map and description of critical habitat in the **Federal Register** and local newspapers as required in a proposal for critical habitat would increase the degree of threat to this species from take or vandalism and, therefore, could contribute to its decline and increase enforcement problems. The listing of this species as endangered publicizes the rarity of the plants and, thus, can make the species attractive to researchers, curiosity seekers, or collectors of rare plants. All involved parties and the landowner have been notified of the location and importance of protecting the habitat of this species, which will be addressed through the recovery process. There are no known Federal activities within the currently known habitat of this species. Therefore, the Service finds that designation of critical habitat for this species is not prudent at this time, because such designation would increase the degree of threat from vandalism, collecting, or other human activities and because it is unlikely to aid in the conservation of this species.

Available Conservation Measures

Conservation measures provided to species listed as endangered under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain activities. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the State and requires that recovery actions be carried out for all listed species. The protection required of Federal agencies and the prohibitions against certain activities involving listed plants are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any taxon that is proposed or listed as endangered and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) of the Act requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) requires Federal agencies to insure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. There are no known Federal activities that occur within the habitat of *Pritchardia aylmer-robinsonii*.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62, and 17.63 for endangered plants set forth a series of general prohibitions and exceptions that apply to all endangered plant species. With respect to *Pritchardia aylmer-robinsonii*, all trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61, would apply. These prohibitions, in part, make it illegal with respect to any endangered plant for any person subject to the jurisdiction of the United States to import or export; transport in interstate or foreign commerce in the course of a commercial activity; sell or offer for sale in interstate or foreign commerce; remove and reduce to possession any such species from areas under Federal jurisdiction; maliciously damage or destroy any such species on any area under Federal jurisdiction; or remove, cut, dig up, damage, or destroy any such species on any other area in knowing violation of any State law or regulation or in the course of any violation of a State criminal trespass law. Certain exceptions apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered plant species under certain circumstances. It is anticipated that few trade permits would ever be sought or issued for *Pritchardia aylmer-robinsonii*. The species is not common in the wild and is only rarely cultivated.

Requests for copies of the regulations concerning listed plants and inquiries regarding prohibitions and permits may be addressed to the Office of Management Authority, U.S. Fish and Wildlife Service, 4401 North Fairfax Drive, room 432, Arlington, Virginia 22203–3507 (703/358–2104; FAX 703/358–2281).

Public Comments Solicited

The Service intends that any final action resulting from this proposal will be as accurate and as effective as possible. Therefore, comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning this proposed rule are hereby solicited. Comments particularly are sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to *Pritchardia aylmer-robinsonii;*

(2) The location of any additional populations of *Pritchardia aylmer-robinsonii* and the reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(3) Additional information concerning the range, distribution, and population size of *Pritchardia aylmer-robinsonii;* and

(4) Current or planned activities in the subject area and their possible impacts on *Pritchardia aylmer-robinsonii.*

The final decision on this proposal will take into consideration the comments and any additional information received by the Service, and such communications may lead to a final regulation that differs from this proposal.

The Endangered Species Act provides for one or more public hearings on this proposal, if requested. Requests must be received within 45 days of the date of publication of the proposal. Such requests must be made in writing and addressed to the Field Supervisor. (See **ADDRESSES** section.)

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment or Environmental Impact Statement, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Proposed Regulation Promulgation

PART 17—[AMENDED]

Accordingly, it is hereby proposed to amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500; unless otherwise noted.

2. It is proposed to amend § 17.12(h) by adding the following, in alphabetical order under the family indicated, to the List of Endangered and Threatened Plants:

§ 17.12 Endangered and threatened plants.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

December 11, 1992.

The Department of Agriculture has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extension, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, Room 404–W Admin. Bldg., Washington, DC 20250, (202) 690–2118.

Farmers Home Administration

Submission of Information Collection to OMB (Under Paperwork Reduction Act and 5 CFR Part 1320)

AGENCY: Farmers Home Administration, USDA.

ACTION: Notice.

SUMMARY: The information collection requirement described below has been submitted to OMB for expedited clearance under 5 CFR 1320.18. The agency solicits comments on subject submission. This action is necessary in order for the Agency to implement across-the-board verification requirements for eligible farm work and income status for labor housing occupancy.

ADDRESSES: Interested persons are invited to submit comments regarding this submission. Comments should refer to the proposal by name and should be sent to: Lisa Grove, USDA Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Tom Sanders, Senior Loan Officer, FmHA Housing Programs, Multi-family Housing Processing Division, Special Authorities Branch, USDA, Washington, DC 20250, Telephone (202) 720–1606 (This is not a toll-free number).

SUPPLEMENTARY INFORMATION: The agency has submitted the proposal for collection of information as described below, to OMB for clearance as required by the Paperwork Reduction Act (44 U.S.C. chapter 35). It is requested that OMB approve this submission within twenty-one days.

The supporting statement below explains the addition of Exhibit K–1, and the need and justification for Exhibit K–1, Verification of Domestic Farm Labor and Occupancy in Rent Free Housing.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507.

Supporting Statement

7 CFR 1944–D, Farm Labor Housing Loans and Grants

1. Explanation of the Circumstances that Make the Collection of Information Necessary

The Farmers Home Administration is adding Exhibit K–1, Verification of Domestic Farm Labor and Occupancy in Rent Free Housing, to this regulation in order to conduct program oversight consistent with the administrative powers provided to the Secretary of Agriculture for program regulation. Previously, there was no requirement or methodology for the farm owner to verify to the Agency the housing is being occupied by eligible farmworkers on a nonrental basis.

Under the authority of sections 514 and 516 of title V of the Housing Act of 1949 (Pub. L. 87–70 and Pub. L. 88–560 respectively), the Secretary is authorized to make loans to farm owners, family farm corporations and partnerships and association of farmers. Also, the Secretary of Agriculture is authorized to make loans and/or grants to nonprofit public, private, and farmworker organizations for developing farm labor housing. Developing farm labor housing includes the range of activities required to provide housing units, including acquisition and development of the site, construction of the housing units and related necessary facilities, provision of necessary equipment for tenants and managers, and all related legal, technical and administrative costs connected to this process.

The objective of the section 514 loan program is to provide decent, safe, and sanitary housing for farmworkers through the farm owner. This loan is made with the expectation that housing occupancy is the result of an employment contract and the housing is provided on a nonrental basis.

Public Law 93–375 provides administrative powers to the Secretary to carry out the provisions of title V of the Housing Act of 1949. This provides for making rules and regulations necessary to carry out the purposes of title V. FmHA has been charged with responsibility for protecting the interest of the taxpayer's funds and to assure that the objectives of the loan are carried out as intended. With the use of this verification exhibit in conjunction with

onsite inspections, FmHA will be able to determine that tenant occupancy requirements are in compliance with the loan purpose. It will provide the Agency with documentation of compliance.

Loan recipients are required to provide and maintain certain information to assure loan approval officials that they will not directly (or through contractual or other arrangements) subject any person, or cause any person to be subjected, to discrimination with respect to any program facility.

2. Indicate How, and by Whom, and for What Purpose the Information Is To Be Used and the Consequence to Federal Program if the Collection of Information Was Not Conducted

The exhibit, available through any FmHA State or District Office, is an exhibit to this Subpart and is provided to the borrower to inform the farmworker occupant that housing is rent free. This exhibit must be completed by every farmworker on occupancy of the housing. This document would be retained by the farmer for FmHA's inspection only as long as the farmworker occupies the unit. This document is in lieu of Form FmHA 1944–8, "Tenant Certification."

3. Describe any Consideration of the Use of Improved Information Technology To Reduce Burden and Any Technical or Legal Obstacles To Reducing Burden

The Agency is not aware of any available technology that could be substituted for this recordkeeping, except in the format proposed.

4. Describe Efforts To Identify Duplication

The recordkeeping for occupancy compliance requested of the farm owner is site specific and is not duplicated by any other known database activity within or outside of FmHA. Special effort has been made to minimize the burden on the farm owner by designing and using this exhibit rather than the more lengthy Form FmHA 1944–8, "Tenant Certification."

5. Show Specifically Why any Similar Information Already Available Cannot Be Used or Modified for Use for the Purposes Described in the Preceding Item 2

The recordkeeping information requested in the preceding item 2 is unique to the site and is not available through any other source.

6. Methods Used in the Collection of Information to Minimize the Burden on Farmers

The farmer's collection and presentation of information is in accordance with the FmHA compliance review process, occurring at least once every 3 years.

7. Describe the Consequence to Federal Program if the Collection Were Conducted Less Frequently

The verification of conditions of occupancy is a joint one-time effort of each occupant and farm owner and any less frequent recordkeeping would be inconsistent application of FmHA regulations for tenant occupancy.

8. Explain any Special Circumstances That Require the Collection To Be Conducted in a Manner Inconsistent With the Guidelines in 5 CFR 1320.6

There are no special circumstances which require information to be recorded in a manner inconsistent with the guidelines in 5 CFR 1320.6.

9. Describe Efforts To Consult With Persons Outside the Agency To Obtain Their Views on the Information To Be Recorded

There has been no contact with farm owners on the specific use of this exhibit. The need for this exhibit is the result of proposed rulemaking and resulting public comments. The exhibit was not contained in the proposed rule, but is the result of public comments concerning equitable treatment of farmworkers, regardless of whether they live on- or off-farm. The Agency agreed to implement a verification process for the occupants of on-farm labor housing.

10. Describe any Assurance of Confidentiality Provided to Respondents and the Basis for the Assurance in Statute, Regulation, or Agency Policy

The information recorded is to be kept in the borrower's files and be made available for review at FmHA's request. The information recorded complies with the Privacy Act of 1974 and OMB Circular A–180, "Responsibilities for the Maintenance of Records about Individuals by Federal Agencies." The Agency has no intent to further collect and tabulate the information collected by the farmer.

11. Provide Additional Justification for Any Questions of a Sensitive Nature That Are Commonly Considered Private

The information recorded contains no sensitive questions.

12. Provide Estimates of Annualized Cost to the Federal Government and to the Respondents

We estimate the annualized cost to the Federal Government for the reporting and recordkeeping requirements contained in this program to be approximately $190,000.00, including $900 for Exhibit K–1. Federal costs include staff salaries and expenses (primarily at the District Office level), printing and reproduction, and administrative overhead allocated to the labor housing program.

The Agency's annualized estimate of costs to the public is $850,000 for the Domestic Farm Labor Housing Program, including approximately $8,000 for Exhibit K–1. This is a sum of all direct and indirect costs that may be imposed upon program participants applying for a FmHA labor housing loan and or grant. Such costs include all one-time and recurring costs that may be incurred by a program applicant. In determining public cost, the Agency considered expenses which would typically be expected by a program applicant in the development of a project proposal for loan approval. The individual and organization applicants' estimated cost times the total number of applicants that are expected to be approved. It is further expressed in terms of expenses necessary to conduct business which directly concerns a specific project proposal under consideration by the Agency. Additionally, it is recognized that costs vary in relationship to the participant's degree of participation, type and size of entity, degree of sophistication, and the size, complexity and scope of project proposal. Therefore, the Agency has considered in its estimation of public cost the range of such costs in reaching an average project-by-project cost. These costs include information collection, compilation, printing, processing, designing, analyzing, and general administrative overhead associated with a typical loan application.

13. Provide Estimates of the Burden of the Collection of Information

The Agency estimates there will be at least one verification action per loan for an average of at least 60 loans per year. However, with the implementation of this rule, the existing borrowers will be asked to conform with and be provided with the necessary exhibit(s) for compliance with the new occupancy verification and recordkeeping rule. The first year usage of the Exhibit K–1 may be as high as 4,000. The level of usage for this Exhibit K–1 will be based on occupancy turnover in the housing units

and could exceed 40 exhibits per year for borrowers providing housing for migrant farmworkers.

14. Explain Reasons for Changes in Burden Including the Need for Any Increase

The Agency's estimate of burden differs from its last estimate of information collection burden submittal because of the addition of Exhibit K–1, "Verification of Domestic Farm Labor and Occupancy in Rent Free Housing." This exhibit is now required for all labor housing tenants of farm borrower housing.

15. For Collections of Information Whose Results Are Planned To Be Published

The recording of this information is not intended to be collected or published for use.

Forest Service

Withdrawal of "Management Guidelines and Inventory and Monitoring Protocols for the Mexican Spotted Owl in the Southwestern Region", Published in the "Federal Register," December 11, 1992 [57FR58785]

AGENCY: Forest Service, USDA.

ACTION: Notice: Withdrawal of "adoption of interim policy".

SUMMARY: Notice is hereby given that the Forest Service withdraws the interim policy, "Management Guidelines and Inventory and Monitoring Protocols for the Mexican Spotted Owl [MSO] in the Southwestern Region," published in the Federal Register of December 11, 1992 [57FR58785].

These Guidelines were not intended to provide management guidance for the Rocky Mountain Region and the Intermountain Region, which contain MSO habitat. In order to apply appropriate management to all MSO habitat, the Southwestern Region Management Guidelines are withdrawn to allow further consideration and coordination with other Forest Service Regions.

DATES: This withdrawal is effective on December 17, 1992.

ADDRESSES: Direct comments to: Larry Henson, Regional Forester, 2670, Southwestern Region, USDA Forest Service, 517 Gold Avenue SW., Albuquerque, New Mexico 87102.

FOR FURTHER INFORMATION CONTACT: James Lloyd, Director, Wildlife and Fisheries or Keith W. Fletcher, Mexican Spotted Owl Program Manager (505) 842–3261 or 842–3267.

Dated: December 14, 1992.

Larry Henson,

Regional Forester.

[FR Doc. 92–30709 Filed 12–16–92; 8:45 am]

BILLING CODE 3410–11–M

Delegation of Authority to Forest Supervisor, Chequamegon NF, Eastern Region

AGENCY: Forest Service, USDA.

ACTION: Notice of adoption of final policy.

SUMMARY: The Eastern Region of the Forest Service hereby gives notice of the delegation of authority by the Regional Forester to the Forest Supervisor of the Chequamegon NF to perform certain transactions related to the granting and terminating of easements on National Forest System lands.

EFFECTIVE DATE: This policy is effective upon issuance of an Eastern Region Supplement to Forest Service Manual 2730 delegating the above referenced authority. The effective date of this delegation of authority (and supplement) is December 8, 1992.

FOR FURTHER INFORMATION CONTACT: Questions about this policy should be addressed to Timothy G. Curtis, Natural Resources Staff, Forest Service, USDA, 310 West Wisconsin Ave., Milwaukee, WI 53203, (414–297–1902).

SUPPLEMENTARY INFORMATION: Pursuant to (36 CFR 251.52) and the delegation of authority from the Chief of the Forest Service as set forth in Forest Service Manual 2731.04, 2732.04, and 2733.04, the Regional Forester for the Eastern Region has determined that the Forest Supervisor of the Chequamegon NF has lands staff personnel sufficiently trained and experienced to permit the delegation of authority for the following:

1. To prepare and execute the Letter of Consent to the Regional Federal Highway Administrator for Department of Transportation Easements under authority of the Highway Act of August 27, 1958 (72 Stat. 23; U.S.C. 317). Additional responsibilities are identified in Forest Service Manual 2731.04.

2. Grant easements to public road agencies under the authority of the Forest Roads and Trail Act of October 13, 1964 (78 Stat. 1089; 16 U.S.C. 533). These easements may also be terminated by the Forest Supervisor with the consent of the grantee. Additional responsibilities are identified in Forest Service Manual 2732.04.

3. Issue easements and reservations for construction and use of roads, execute stipulations, and terminate such easements on the occurrence of a fixed or agreed upon condition, event, or time when the easement, by its terms provides for such termination, pursuant to the Federal Land Policy and Management Act of October 21, 1976, (90 Stat. 2743; 43 U.S.C. 1715). Additional responsibilities are identified in Forest Service Manual 2733.04.

This final policy will be distributed to Forest Service employees as an amendment to Chapter 2730 of the Forest Service Manual.

Dated: December 4, 1992.

Larry Payne,

Deputy Regional Forester for Administration.

DEPARTMENT OF COMMERCE

Agency Information Collection Under Review by the Office of Management and Budget

The Department of Commerce (DOC) has submitted to the Office of Management and Budget (OMB) the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35). The collection is for the Technology Administration of DOC.

Title: Application for Manufacturing Technology Fellowship.

Form Number: Agency—None; OMB—None.

Type of Request: New Collection.

Burden: 5,000 burden hours; 200 respondents; Average Hours Per Respondent—25 hours.

Needs and Uses: The U.S.-Japan Manufacturing Technology Fellowship Program is a new program that provides manufacturing engineers the opportunity to spend a year in Japan learning Japanese manufacturing techniques, culture and language. The information collected is needed to evaluate applicants for the program and to make selections.

Affected Public: Individuals, businesses or other for-profit institutions, small businesses or organizations.

Frequency: Annually.

Respondent's Obligation: Required for benefit.

OMB Desk Officer: Maya A. Bernstein, (202) 395–3785.

Copies of the above information collection proposal can be obtained by calling or writing Edward Michals, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, room 5327, 14th and Constitution Avenue NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to the OMB Desk Officer, Maya A. Bernstein, (202) 395–3785, room 3235, New Executive Office Building, Washington, DC 20503.

Dated: December 11, 1992.

Edward Michals

Departmental Clearance Officer; Office of Management and Organization.

[FR Doc. 92–30644 Filed 12–16–92; 8:45 am]

BILLING CODE 3510–CW–F

National Oceanic and Atmospheric Administration

[Docket No. 921190–2299]

Taking and Importing of Marine Mammals Incidental to Commercial Fishing Operations

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice to importers; removal of intermediary nation embargoes.

SUMMARY: NMFS issues a notice to importers that the intermediary nation embargoes on yellowfin tuna and yellowfin tuna products from the nations of Canada, Colombia, France, Malaysia, the Netherlands Antilles, Singapore, and the United Kingdom that were imposed on January 31, 1992, have been lifted.

FOR FURTHER INFORMATION CONTACT: Gary Matlock, Acting Director, Southwest Region, NMFS, 501 West Ocean Boulevard, Long Beach, CA 90802–4213 (310/980–4001); or, Wanda L. Cain, Office of Protected Resources, NMFS, 1335 East-West Highway, Silver Spring, MD 20910 (301/713–2055).

SUPPLEMENTARY INFORMATION: On October 26, 1992, the President signed the International Dolphin Conservation Act of 1992. Among other things, that Act redefines intermediary nation to mean "* * * a nation that exports yellowfin tuna or yellowfin tuna products to the United States and that imports yellowfin tuna or yellowfin tuna products that are subject to a direct ban on importation into the United States pursuant to section 101(a)(2)(B)" of the Marine Mammal Protection Act.

NMFS has determined that the intermediary nation embargoes should be removed from those nations not identified as having imported yellowfin tuna from a nation under a primary embargo. On October 30, 1992, NMFS notified the Office of Trade Operations, U.S. Customs Service, that the prohibition on importation of yellowfin tuna and yellowfin tuna products from the following countries should be lifted: Canada, Colombia, Malaysia, the Netherlands Antilles, Singapore, and the United Kingdom.

On December 2, 1992, NMFS notified the U.S. Customs Service that France had submitted documentation required by the International Dolphin Conservation Act (Pub.L. 102–523) and the rules for importation of yellowfin tuna (50 CFR 216.24(e)(5)(vii)), which establish the requirements for intermediary nations, and that the intermediary nation yellowfin tuna embargo on France should be lifted. NMFS determined that the documentation provided by the Government of France constituted acceptable certification and reasonable proof that it did not import, between April and October 1992, yellowfin tuna or yellowfin tuna products banned from direct export to the United States.

Intermediary nation embargoes on all yellowfin tuna and yellowfin tuna products from the countries of Costa Rica, Italy, Japan and Spain will remain in place until NMFS obtains additional information on whether these countries have imported yellowfin tuna prohibited from direct export to the United States. Yellowfin tuna and products derived from yellowfin tuna harvested in the eastern tropical Pacific Ocean by purse seine vessels of Mexico, Venezuela and Colombia remain under primary embargoes because harvesting vessels from those nations do not meet the standards for the protection of marine mammals comparable to those in effect for vessels of the United States.

Dated: December 10, 1992.

Nancy Foster,

Acting Assistant Administrator for Fisheries, National Marine Fisheries Service.

[FR Doc. 92–30629 Filed 12–16–92; 8:45 am]

BILLING CODE 3510–22–M

South Atlantic Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The South Atlantic Fishery Management Council will hold a Snapper-Grouper Assessment Group meeting on January 11–12, 1993, at the Town and Country Inn, 2008 Savannah Highway, Charleston, SC; telephone: (803) 571–1000. The meeting will begin on January 11 at 1:30 p.m. and will end on January 12 by 12:30 p.m. The agenda is as follows:

The Assessment Group will review available wreckfish information and make a recommendation on total allowable catch (TAC) for the 1993–94 fishing year.

The Assessment Group will review stock assessment reports and a report on quota/share transactions that have occurred this year. The group will make its recommendation at the Council's January 25–29 meeting in Indialantic, FL.

The meeting will be open to the public; however, no public comments will be taken at this time. Public input will be accepted at the January Council meeting.

Wreckfish are managed under an Individual Transferable Quota program, where only those who hold percentage

shares are allowed to participate in the fishery. This year's fishery operated under a two-million-pound TAC.

For more information contact Carrie Knight, Public Information Officer: South Atlantic Fishery Management Council: One Southpark Circle, suite 306; Charleston, SC 29407–4699; telephone: (803) 571–4366.

Dated: December 11, 1992.

David S. Crestin,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510–22–M

South Atlantic Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The South Atlantic Fishery Management Council will hold Personnel and Finance Committee meetings on January 14, 1993, at the Town and Country Inn, 2008 Savannah Highway, Charleston, SC; telephone: (803) 571–4366. The meetings will begin on January 14 at 8:30 a.m. until 10 a.m. and from 10 a.m. until 12 p.m. respectively. The Personnel Committee's meeting will be held in closed session (not open to the public).

The Personnel Committee will discuss Council staffing changes. The Finance Committee will review changes to the staff's pension plan.

For more information contact Carrie Knight, Public Information Officer; South Atlantic Fishery Management Council; One Southpark Circle, suite 306; Charleston, SC 29407–4699; telephone: (803) 571–4366.

Dated: December 14, 1992.

David S. Crestin,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510–22–M

Marine Mammals

AGENCY: National Marine Fisheries Service, NMFS, NOAA, Commerce.

ACTION: Receipt of Application for Permit (P321B).

SUMMARY: Notice is hereby given that Sherman C. Jones, III, 4001 Santa Maria Drive, Chesapeake, VA 23321, has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407) and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216).

The Applicant seeks authorization to unintentionally harass up to 700 Atlantic bottlenose dolphin (*Tursiops truncatus*) annually during aerial and boat surveys. Aerial surveys are expected to be flown 21 times per year and individual dolphin are expected to be sighted at each occurrence. Boat cruises are expected to be conducted up to 100 days per year (April–October). The Applicant indicates that the most frequently resighted dolphin in the proposed study would be "taken" 66 times per year, and the average resighted dolphin would be seen about 30 times per year. Data thus acquired should provide adequate information to accurately describe movement, micro-habitat utilization, social affiliation and migratory patterns for many individuals in this population. The activities will occur in waters off Virginia and North Carolina. The permit is requested for a duration of five years and the Applicant proposes to initiate the work April 1993.

ADDRESSES: Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, NOAA, U.S. Department of Commerce, 1335 East-West Hwy., Room 7324, Silver Spring, MD 20910, within 30 days of the publication of this notice.

Documents submitted in connection with the above application are available for review, by appointment, in the Permits Division, Office of Protected Resources, National Marine Fisheries Service, NOAA, 1335 East-West Hwy., Suite 7324, Silver Spring, MD 20910 (301/713–2289);

Director, Northeast Region, National Marine Fisheries Service, NOAA, One Blackburn Drive, Gloucester, MA 01930 (508/281–9200); and

Director, Southeast Region, National Marine Fisheries Service, NOAA, 9450 Koger Blvd., St. Petersburg, FL 33702 (813/893–3141).

Dated: December 10, 1992.

Michael F. Tillman,

Acting Director, Office of Protected Resources, National Marine Fisheries Service.

[FR Doc. 92–30632 Filed 12–16–92; 8:45 am]

BILLING CODE 3510–22–M

Marine Mammals

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Modification No. 4 to Permit No. 621.

Notice is hereby given that pursuant to the provisions of Sections 216.33 (d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), Public Display Permit No. 621 (P35F) issued to Miami Seaquarium, 4400 Rickenbacker Causeway, Miami, Florida 33149 on December 18, 1987 (52 FR 48746), modified on March 25, 1988 (53 FR 10553), December 22, 1989 (55 FR 52), and October 30, 1991 (56 FR 56505), is further modified as follows:

Section B.3, first sentence is changed to read:

3. The authority to import these marine mammals shall extend from the date of issuance through June 30, 1993.

This modification becomes effective upon publication in the **Federal Register.**

Documents submitted in connection with the above modification are available for review by appointment in the following offices:

Office of Protected Resources, National Marine Fisheries Service, NOAA, 1335 East West Highway, Room 7324, Silver Spring, Maryland, 20910 (301/713–2289); and

Director, Southeast Region, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, Florida 33702 (813/893–3141).

Dated: December 10, 1992.

Michael F. Tillman,

Acting Director, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–M

DEPARTMENT OF DEFENSE

Department of the Army

[PPTMR DOD 4500.34–R]

Change to the Tender Service

AGENCY: Military Traffic Management Command, DOD.

ACTION: Notice of change.

SUMMARY: Appendix A, Tender of Service, paragraph 40h, of DOD 4500.34–R, requires firearms to be placed in the number one external shipping container and readily accessible for examination by customs. Paragraph 9005d, of DOD 4500.34–R, reiterates the same requirement. DOD 4500.34–R does not provide instruction on when containers will be marked. In several instances, weapons packed in the number one container while the shipment was at residence, were incorrectly marked when taken back to the agent's warehouse. Upon arrival at the port, the entire shipment had to be unpacked to locate the weapons before

the shipment could clear customs. To resolve the issue, paragraphs 3002b and 40d, of DOD 4500.34–R will be changed to require the container number and the member's name to be stenciled on the number one container while the shipment is at residence. If the surface of the container will not accommodate stenciling, a military shipment label, DD Form 1387, shall be affixed while the shipment is at residence.

ADDRESSES: Headquarters, Military Traffic Management Command, ATTN: MTPP–QO, 5611 Columbia Pike, Falls Church, VA 22041–5050.

DATES: Comments must be received on or before February 16, 1993.

FOR FURTHER INFORMATION CONTACT: Mr. Donald Dette, Military Traffic Management Command, Attn: MTPP–QO, 5611 Columbia Pike, Falls Church, VA 22041–5050, telephone (703) 757–1710.

Kenneth L. Denton,

Army Federal Register Liaison Officer.

[FR Doc. 92–30602 Filed 12–16–92; 8:45 am]

BILLING CODE 3710–08–M

Corps of Engineers

Department of the Army Construction Productivity Advancement Research (CPAR) Program

AGENCY: Corps of Engineers, Department of the Army, DOD.

ACTION: Notice of availability.

SUMMARY: The purpose of this notice is to inform potential applicants of a program of cost-shared research, development and commercialization/technology transfer (R&D) projects between the U.S. Army Corps of Engineers (Corps) and the U.S. construction industry. The purpose of the Construction Productivity Advancement Research (DPAR) Program is to assist the U.S. construction industry in enhancing its productivity and domestic and international competitive position through the development and commercialization of advanced technologies, materials and construction management systems.

DATES: Effective date is December 21, 1992. Proposals will be accepted until March 19, 1993.

ADDRESSES: Proposals for the Fiscal Year 1993 CPAR Program should be submitted to the Corps laboratories identified in the CPAR Guidelines for Participation, dated December 1992. Copies of the Guidelines may be obtained by writing to: HQUSACE, Attn: CERD–C, 20 Massachusetts Avenue, NW. Washington, DC 20314–1000, or by calling (202) 272–0257.

FOR FURTHER INFORMATION CONTACT: Mr. Jesse A. Pfeiffer, Jr., P.E.; HQUSACE, CERD–D; 20 Massachusetts Avenue, NW.; Washington, DC 20314–1000, or call (202) 272–1846 or 272–0257.

SUPPLEMENTARY INFORMATION: CPAR is a program consisting of cost-shared projects executed by partnerships between the Corps, the U.S. construction industry (contractors, equipment and material manufacturers and suppliers, architects, engineers, financial organizations), public and private foundations, trade and professional organizations, State and local governments, academic institutions and other entities who are interested in enhancing construction productivity and competitiveness. CPAR was created to help the domestic construction industry improve productivity and regain its competitive edge nationally and internationally by building on the foundation of the existing Corps Construction R&D Program and laboratory resources through an expansion and leveraging effect that cost-shared partnerships provide. The objective of CPAR is to facilitate research, development and application of advanced technologies through cooperative R&D, field demonstration, licensing agreements and other means of commercialization, technology transfer and reduction-to-practice. Advancing the productivity and competitiveness of the U.S. construction industry will provide savings in construction costs for the Government and U.S. industries, and result in a boost to the U.S. economy in general. R&D efforts conducted under CPAR will be based on proposals received from U.S. construction industry entities and others, as noted above, which can be addressed effectively by a partnership and which will benefit both the construction industry and the Corps.

Participation in CPAR is open to any U.S. private firm, including corporations, partnerships, limited partnerships and industrial development organizations; public and private foundations; non-profit organizations; units of State and local governments; academic institutions; and others who have an interest in and the capability to address CPAR objectives. As provided by law, special consideration will be given to small business firms and consortia involving small business firms. Preference will be given to business units located in the United States that agree to substantially manufacture and apply the products in the United States. Consideration will be given to a potential partner that is subject to the control of a foreign company or government if that foreign government permits U.S. agencies, organizations, or other persons to enter into cooperative research and development agreements and licensing agreements.

The cost of each CPAR project will be shared by the Corps and the construction industry partner(s). Specific cost-sharing terms will be defined for each proposed project prior to submission of the proposal to Corps Headquarters (HQUSACE) for approval. "In-kind" services and/or use of facilities may be considered in arriving at a cost-sharing agreement. As required by law, not more than fifty (50) percent of the total cost of a CPAR project will be provided by the Corps and not less than five (5) percent of the construction industry partner's share of the cost must be contributed in cash. The Corps and the construction industry partner(s) may each contribute personnel, services, facilities, property, patent licenses (or assignment or options to the patent license) and money. No costs previously incurred by the Corps or the construction industry partner(s) on the subject matter of the CPAR project may be recovered in the cost-sharing agreement.

A CPAR Cooperative Research and Development Agreement (CPAR–CRDA) specific to each project will be negotiated between the Corps and the U.S. construction industry partner(s). The CPAR–CRDA is defined by law as neither a procurement contract nor an assistance agreement (grant or cooperative agreement). The CPAR–CRDA will contain, in addition to the cost-sharing terms, all other conditions and responsibilities necessary to complete the project and commercialize/transfer the technology, including rights to inventions. It is anticipated that one of the most effective ways of assuring the new technology is disseminated to the public is to provide the construction industry partner(s) with a proprietary "ownership" interest in the new technology. Therefore, to the extent permitted by law, the Corps will generally grant to the industry partner(s) an option to licenses or assignments for any intellectual property made in whole or in part by a Federal employee under the CPAR–CRDA, retaining a non-exclusive, non-transferable, irrevocable, paid-up license to practice the invention or have the invention practiced throughout the world on behalf of the Government. The Corps may, without

further notice to others, agree to negotiate an exclusive license or waive title to intellectual property if such actions would facilitate commercialization and use of the technology. To the greatest extent possible and appropriate, licensing and assignments will be on a non-exclusive basis. In some cases, where appropriate, royalties will be negotiated and collected by the Government in exchange for such licenses or assignments.

CPAR is designed to promote and assist in the advancement of ideas and technology which will have a direct, positive impact on construction productivity and Corps mission accomplishment. CPAR is focused on four major areas: Planning and design improvement, improved construction site productivity, advanced materials, and innovative methods to commercialize and transfer R&D products to the construction industry. However, any idea for improving construction productivity will be considered. Ideas that cannot define a direct and demonstrable link to the advancement of construction productivity will not be accepted into the CPAR Program. Areas of interest include, but are not limited to:

Planning and Design Improvement

- Computer-Aided Planning and Engineering Tools.
- Advanced Site Investigation Technology.
- Knowledge-Based Cost Estimating Systems.
- Computer-Aided Design Systems.
- Total Integrated Design Systems.
- Expert Systems/Artificial Intelligence.
- Materials Selection Systems.
- Advanced Technology Selection Systems.

Improved Construction Site Productivity

- Construction Management Methods.
- Materials Handling.
- Automated Construction/Robotics.
- Expert Systems.
- Marine Construction.
- Automated Inspection and Quality Control.
- Advanced Excavating and Tunneling.
- Cold Weather Construction.
- Computer-Aided Construction Management Systems.

Advanced Materials

- High-Performance Cementitious Materials.
- Structural Polymers.
- Advanced Ceramics.
- Metal Matrix Composites.
- Advanced Fabrication Systems.
- Adhesives/Fasteners.
- Geomodifiers/Geotextiles.

Commercialization/Technology Transfer Innovation

- User-Based Technology Utilization Processes.
- Technical Support Services for Users.
- Skills Upgrading Methods.
- Cost and Performance Information Exchange Systems.
- Technology Risk Analysis.

Proposal Review Process

Proposals received by the Corps laboratories which meet CPAR criteria may be discussed and further developed, as necessary, by the laboratory and construction industry partner(s). The following criteria will be used to evaluate the proposals. The first two evaluation factors are of equal importance and are more significant than the remaining factors, which are listed in descending order of importance:

1. Potential Impact on U.S. Construction Industry Productivity

High—Technological advancement which would have major beneficial impact on current construction industry processes, materials and/or equipment and will have a demonstrable major beneficial impact on construction industry productivity and effectiveness.

Medium—Technological advancement which would improve on and/or demonstrate currently available processes, materials and/or equipment not in widespread construction industry use and which would have a demonstrable beneficial impact on construction industry productivity and effectiveness.

Low—Technological advancement which would upgrade construction industry processes, materials and/or equipment in current use and which would have a limited but beneficial impact on construction industry productivity and effectiveness.

2. Potential Impact on the Corps of Engineers

High—Technological advancement which would be a major improvement in technology and procedures currently used by the Corps and which would have a demonstrable major beneficial impact on the Corps.

Medium—Technological advancement which would significantly improve currently used Corps technology and procedures and which would result in demonstrable benefits for the Corps.

Low—Technological innovation which would upgrade current Corps standard technology and procedures and which would have a limited but beneficial impact on the Corps.

3. Commercialization/Technology Transfer

High—Plan/concepts stated for broad-scale use/adoption of the product by non-Federal and Federal organizations and the production/marketing/dissemination of the product by the non-Federal partner(s).

Medium—Plans/concepts stated for some beneficial use/adoption of the product by non-Federal and Federal organizations.

Low—Plans/concepts stated for limited but beneficial use/adoption of the product by non-Federal and Federal organizations.

4. Ease of Adoption

High—Technology provides construction industry productivity and effectiveness improvement with minimal equipment, training, materials and operating costs beyond the cost of current practice.

Medium—Technology provides construction industry productivity and effectiveness improvements, but requires moderate additional equipment, training, materials, and operating costs beyond the cost of current practice.

5. Probability of Achieving Projected Productivity and Effectiveness Enhancement

High—Some risk, requires innovative application of current knowledge, high probability of success.

Medium—Moderate risk, concepts exist but are unproven, good probability of success.

Low—High risk, basic concepts must be developed and proven, uncertain probability of success.

6. Project Duration

High—Project, including demonstration of benefits, can be completed in 3 years or less.

Medium—Project, including demonstration of benefits, can be completed in 4 years or less.

Low—Project, including demonstration of benefits, will require more than 4 years to complete.

7. R&D Investment

High—Project will obligate the Corps to invest less than $300,000 per year.

Medium—Project will obligate the Corps to invest between $300,000 and $500,000 per year.

Low—Project will obligate the Corps to invest more than $500,000 per year.

After discussions between the laboratory and the construction industry partner(s), a CPAR Executive Summary of the proposal will be prepared by the laboratory. The Executive Summary will contain the project objective and approach to be followed in developing the specific end product(s), all expected costs and cost-sharing arrangements, time needed to complete, expected benefits to the U.S. construction industry and the Corps, and a proposed commercialization/technology transfer plan.

Corps laboratories will submit their recommended Executive Summaries to HQUSACE for consideration under the CPAR Program. The CPAR Executive Summaries will be reviewed and recommendations made by the CPAR Executive Committee in HQUSACE. The CPAR Executive Committee is composed of senior-level HQUSACE managers. The Director of Civil Works, HQUSACE, will act on the recommendations of the CPAR Executive Committee in approving the annual CPAR program.

All information and data furnished by the potential construction industry partner(s) will be used for evaluation purposes only and will be safeguarded from unauthorized disclosure in accordance with applicable laws. Protection of information during and after completion of a CPAR project will be defined and agreed to in the CPAR–CRDA. Classified information and data will be handled in accordance with Army regulations.

Additional Requirements

Applicants are reminded that a false statement may be grounds for denial or termination of funds and grounds for possible punishment by a fine or imprisonment. Except where declared by law or approved by the head of agency, no award of Federal funds shall be made to an applicant who is delinquent on a Federal debt until the delinquent account is made current or satisfactory arrangements are made between affected agencies and the debtor. No award will be made to a debarred or suspended firm or organization.

Classification

This document is not a major rule requiring a regulatory analysis under Executive Order 12291 because it will not have an annual impact on the economy of $100 million or more, nor will it result in a major increase in costs or prices for any group, nor have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets. It is not a major Federal action requiring an environmental assessment under the National Environment Policy Act. The CPAR Program does not involve the mandatory payment of any matching funds from a State or local government, and does not affect directly any State or local government. Accordingly, the Corps determined that Executive Order 12372 is not applicable to CPAR. This notice does not contain policies with Federalism implications sufficient to warrant preparation of a Federalism assessment under Executive Order 12612. CPAR is being carried out under the authority of section 7, Water Resources Development Act of 1988 (Pub. L. 100–676) (33 U.S.C. 2313).

Dated: December 4, 1992.

W.L. Mayhew,

Colonel, General Staff; Executive, OASA(CW).

BILLING CODE 3710-08-M

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[OMB Control No. 9000–0035]

Clearance Request for Claims and Appeals

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000–0035).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning Claims and Appeals.

FOR FURTHER INFORMATION CONTACT: Ms. Linda Klein, Office of Federal Acquisition Policy, GSA (202) 501–3775.

SUPPLEMENTARY INFORMATION:

A. Purpose

It is the Government's policy to try to resolve all contractual issues by mutual agreement at the contracting officer's level without litigation. Contractor's claims must be submitted in writing to the contracting officer for a decision. Claims exceeding $50,000 must be accompanied by a certification that (1) the claim is made in good faith; (2) supporting data are accurate and complete; and (3) the amount requested accurately reflects the contract adjustment for which the contractor believes the Government is liable. Contractors may appeal the contracting officer's decision by submitting written appeals to the appropriate officials.

B. Annual Reporting Burden

The annual reporting burden is estimated as follows: Respondents, 7,500; responses per respondent, 20; total annual responses, 150,000; preparation hours per response, 1; and total response burden hours, 150,000.

OBTAINING COPIES OF PROPOSALS: Requester may obtain copies of OMB applications or justifications from the General Services Administration, FAR Secretariat (VRS), room 4037, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0035, Claims and Appeals, in all correspondence.

Dated: December 9, 1992.

Beverly Fayson,

FAR Secretariat.

[FR Doc. 92–30537 Filed 12–16–92; 8:45 am]

BILLING CODE 6820-34-M

[OMB Control No. 9000–0031]

Clearance Request for Contractor Use of Government Supply Sources

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000–0031).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning Contractor Use of Government Supply Sources.

FOR FURTHER INFORMATION CONTACT: Ms. Linda Klein, Office of Federal Acquisition Policy, GSA (202) 501–3775.

SUPPLEMENTARY INFORMATION:

A. Purpose

When it is in the best interest of the Government and when supplies and services are required by a Government contract, contracting officers may authorize contractors to use Government supply sources in performing certain contracts. Contractors placing orders under Federal Supply Schedules or Personal Property Rehabilitation Price Schedules must follow the terms of the applicable schedule. To place orders, firms will submit the initial FEDSTRIP or MILSTRIP requisitions or the Optional Form 347, a copy of the authorization to order, and a statement regarding authorization to the firm holding the schedule contract.

The information informs the schedule contractor that the ordering contractor is authorized to use this Government supply source and fills the ordering contractor's order under the terms of the Government contract.

B. Annual Reporting Burden

The annual reporting burden is estimated as follows: Respondents, 300; responses per respondent, 7; total annual responses, 2,100; preparation hours per response, .25; and total response burden hours, 525.

OBTAINING COPIES OF PROPOSALS: Requester may obtain copies of OMB applications or justifications from the General Services Administration, FAR Secretariat (VRS), room 4037, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0031, Contractor Use of Government Supply Sources, in all correspondence.

Dated: December 9, 1992.

Beverly Fayson,

FAR Secretariat.

[FR Doc. 92–30535 Filed 12–16–92; 8:45 am]

BILLING CODE 6820–34–M

[OMB Control No. 9000–0032]

Clearance Request for Contractor Use of Interagency Motor Pool Vehicles

AGENCY: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000–0032).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning Contractor Use of Interagency Motor Pool Vehicles.

FOR FURTHER INFORMATION CONTACT: Ms. Linda Klein, Office of Federal Acquisition Policy, GSA (202) 501–3775.

SUPPLEMENTARY INFORMATION:

A. Purpose

If it is in the best interest of the Government, the contracting officer may authorize cost-reimbursement contractors to obtain, for official purposes only, interagency motor pool vehicles and related services. Contractors' requests for vehicles must contain two copies of the agency authorization, the number of vehicles and related services required and period of use, a list of employees who are authorized to request the vehicles, a listing of equipment authorized to be serviced, and billing instructions and address.

A written statement that the contractor will assume, without the right of reimbursement from the Government, the cost or expense of any use of the motor pool vehicles and services not related to the performance of the contract is necessary before the contracting officer may authorize cost-reimbursement contractors to obtain interagency motor pool vehicles and related services.

The information is used by the Government to determine that it is in the Government's best interest to authorize a cost-reimbursement contractor to obtain, for official purposes only, interagency motor pool vehicles and related services, and to provide those vehicles.

B. Annual Reporting Burden

The annual reporting burden is estimated as follows: Respondents, 70; responses per respondent, 2; total annual responses, 140; preparation hours per response, .5; and total response burden hours, 70.

OBTAINING COPIES OF PROPOSALS: Requester may obtain copies of OMB applications or justifications from the General Services Administration, FAR Secretariat (VRS), room 4037, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0032, Contractor Use of Interagency Motor Pool Vehicles, in all correspondence.

Dated: December 9, 1992.

BILLING CODE 6820–34–M

[OMB Control No. 9000–0053]

Clearance Request for Permits, Authorities, or Franchises Certification

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000–0053).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning Permits, Authorities, or Franchises Certification.

FOR FURTHER INFORMATION CONTACT: Beverly Fayson, Office of Federal Acquisition Policy, GSA (202) 501–4755.

SUPPLEMENTARY INFORMATION:

A. Purpose

This certification and copies of authorizations are needed to determine that the offeror has obtained all authorizations, permits, etc., required in connection with transporting the material involved. The contracting officer reviews the certification and any documents requested to ensure that the offeror has complied with all regulatory requirements and has obtained any permits, licenses, etc., that are needed.

B. Annual Reporting Burden

The annual reporting burden is estimated as follows: Respondents, 1,106; responses per respondent, 3; total annual responses, 3,318; preparation hours per response, .094; and total response burden hours, 312.

OBTAINING COPIES OF PROPOSALS: Requester may obtain copies of OMB applications or justifications from the General Services Administration, FAR Secretariat (VRS), room 4037, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0053, Permits, Authorities, or Franchises Certification, in all correspondence.

Dated: December 4, 1992.

BILLING CODE 6820–34–M

[OMB Control No. 9000–0055]

Clearance Request for Freight Classification Description

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000–0055).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning Freight Classification Description.

FOR FURTHER INFORMATION CONTACT: Beverly Fayson, Office of Federal Acquisition Policy, GSA (202) 501–4755.

SUPPLEMENTARY INFORMATION:

A. Purpose

When the Government purchases supplies that are new to the supply system, nonstandard, or modifications of previously shipped items, and different freight classifications may apply, offerors are requested to indicate the full Uniform Freight Classification or National Motor Freight Classification. The information is used to determine the proper freight rate for the supplies.

B. Annual Reporting Burden

The annual reporting burden is estimated as follows: Respondents, 2,640; responses per respondent, 3; total annual responses, 7,920; preparation hours per response, .167; and total response burden hours, 1,323.

OBTAINING COPIES OF PROPOSALS: Requester may obtain copies of OMB applications or justifications from the General Services Administration, FAR Secretariat (VRS), room 4037, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0055, Freight Classification Description, in all correspondence.

Dated: December 4, 1992.

BILLING CODE 6820–34–M

[OMB Control No. 9000–0057]

Clearance Request for Evaluation of Export Offers

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000–0057).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning Evaluation of Export Offers.

FOR FURTHER INFORMATION CONTACT: Beverly Fayson, Office of Federal Acquisition Policy, GSA (202) 501–4755.

SUPPLEMENTARY INFORMATION:

A. Purpose

Offers submitted in response to Government solicitations must be evaluated and awards made on the basis of the lowest laid down cost to the Government at the overseas port of discharge, via methods and ports compatible with required delivery dates and conditions affecting transportation known at the time of evaluation. Offers are evaluated on the basis of shipment through the port resulting in the lowest cost to the Government. This provision collects information regarding the vendor's preference for delivery ports. The information is used to evaluate offers and award a contract based on the lowest cost to the Government.

B. Annual Reporting Burden

The annual reporting burden is estimated as follows: Respondents, 100; responses per respondent, 4; total annual responses, 400; preparation hours per response, 25; and total response burden hours, 100.

OBTAINING COPIES OF PROPOSALS: Requester may obtain copies of OMB applications or justifications from the General Services Administration, FAR Secretariat (VRS), room 4037, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0057, Evaluation of Export Offers, in all correspondence.

Dated: December 4, 1992.

Beverly Fayson,

Far Secretariat.

BILLING CODE 6820–34–M

[OMB Control No. 9000–0056]

Clearance Request for Report of Shipment

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000–0056).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning Report of Shipment.

FOR FURTHER INFORMATION CONTACT: Beverly Fayson, Office of Federal Acquisition Policy, GSA (202) 501–4755.

SUPPLEMENTARY INFORMATION:

A. Purpose

Military (and, as required, civilian agency) storage and distribution points, depots, and other receiving activities require advance notice of large shipments enroute from contractors' plants. Timely receipt of notices by the consignee transportation office precludes the incurring of demurrage and vehicle detention charges. The information is used to alert the receiving activity of the arrival of a large shipment.

B. Annual Reporting Burden

The annual reporting burden is estimated as follows: Respondents, 250; responses per respondent, 4; total annual responses, 1,000; preparation hours per response, .167; and total response burden hours, 167.

OBTAINING COPIES OF PROPOSALS: Requester may obtain copies of OMB applications or justifications from the General Services Administration, FAR Secretariat (VRS), room 4037, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0056, Report of Shipment, in all correspondence.

Dated: December 4, 1992.

Beverly Fayson,

FAR Secretariat.

BILLING CODE 6820-34-M

[OMB Control No. 9000-0107]

Clearance Request for Notice of Radioactive Materials

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000-0107).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning Notice of Radioactive Materials.

FOR FURTHER INFORMATION CONTACT: Beverly Fayson, Office of Federal Acquisition Policy, GSA (202) 501-4755.

SUPPLEMENTARY INFORMATION:

A. Purpose

The clause at FAR 52.223-7, Notice of Radioactive Materials, requires contractors to notify the Government prior to delivery of items containing radioactive materials. The purpose of the notification is to alert receiving activities that appropriate safeguards may need to be instituted. The notice shall specify the part or parts of the items which contain radioactive materials, a description of the materials, the name and activity of the isotope, the manufacturer of the materials, and any other information known to the Contractor which will put users of the items on notice as to the hazards involved.

B. Annual Reporting Burden

The annual reporting burden is estimated as follows: Respondents, 500; responses per respondent, 5; total annual responses, 2,500; preparation hours per response, 1; and total response burden hours, 2,500.

OBTAINING COPIES OF PROPOSALS: Requester may obtain copies of OMB applications or justifications from the General Services Administration, FAR Secretariat (VRS), room 4037, Washington, DC 20405, telephone (202) 501-4755. Please cite OMB Control No. 9000-0107, Notice of Radioactive Materials, in all correspondence.

Dated: December 4, 1992.

Beverly Fayson,

FAR Secretariat.

BILLING CODE 6820-34-M

DEPARTMENT OF ENERGY

Financial Assistance Award Intent To Award Noncompetitive Grant to Tulane University

AGENCY: U.S. Department of Energy.

ACTION: Notice of intent to make a noncompetitive financial assistance award.

SUMMARY: The Department of Energy announces that pursuant to 10 CFR 600.6(a)(5), it is making a discretionary financial assistance award based on the criterion set forth at 10 CFR 600.7(b)(2)(i)(G) to Tulane University under Grant Number DE-FG01-93EW53023 to initiate a comprehensive aquatic environmental hazards research program. The proposed grant will provide funding in the estimated amount of $25 million to conduct research and education activities to address the ecological and health oriented aspects of environmental restoration and waste management in aquatic environments.

SCOPE: The Department of Energy has determined in accordance with 10 CFR 600.7(b)(2)(i)(G) that a noncompetitive award based on the application submitted by Tulane University is in the public interest. This program, to be carried out jointly by Tulane University and Xavier University, will bring together national and international resources of other colleges and universities and professional societies in a national center to increase the public awareness of the risks associated with radioactive and mixed wastes in aquatic environments. The team of experts will conduct research, provide information, data, and human resources to analyze environmental risks in aquatic ecosystems in an objective manner; and identify needs and develop programs to address the critical shortage of well educated, highly skilled technical and scientific personnel in the area of energy related environmental restoration and waste management, particularly as related to aquatic ecosystems. The Department of Energy has determined it to be in the public interest to award a noncompetitive grant to Tulane University to work towards development of a more objective approach to issues concerning the ecological and health impacts of environmental restoration and waste management activities in aquatic ecosystems; to promote the development of low-risk, cost-effective environmental remediation technologies; and to elevate the public's awareness of the health and other risks associated with radioactive and mixed waste management and control in aquatic ecosystems. The anticipated project period of the proposed grant is 60 months from the effective date of award.

FOR FURTHER INFORMATION CONTACT: U.S. Department of Energy, Office of Placement and Administration, ATTN: John L. Wengle, PR-322.2, 1000 Independence Avenue, SW., Washington, DC 20585.

Scott Sheffield,

Acting Director, Division "B", Office of Placement and Administration.

BILLING CODE 6450-01-M

ENERGY INFORMATION ADMINISTRATION

Agency Information Collections Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration, Energy.

ACTION: Notice of request to discontinue submitted to the Office of Management and Budget.

SUMMARY: The Energy Information Administration (EIA) has submitted the energy information collection(s) listed at the end of this notice to the Office of Management and Budget (OMB) for discontinuance as a result of final rule RM92-10. This rule was issued by the Federal Energy Regulatory Commission on November 5, 1992 to streamline and eliminate, where possible, electric power regulations and reporting requirements.

Each entry contains the following information: (1) The sponsor of the collection (a DOE component which term includes the Federal Energy Regulatory Commission (FERC)); (2) Collection number(s); (3) Current OMB docket number (if applicable); (4) Collection title; (5) Type of request, e.g., new, revision, extension, or reinstatement; (6) Frequency of collection; (7) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (8) Affected public; (9) An estimate of the number of respondents per report period; (10) An estimate of the number of responses per

respondent annually; (11) A response; (12) The estimated total annual respondent burden; and (13) A brief abstract describing the proposed collection and the respondents.

DATES: Comments must be filed by January 19, 1993. If you anticipate that you will be submitting comments but find it difficult to do so within the time allowed by this notice, you should advise the OMB DOE Desk Officer listed below of your intention to do so, as soon as possible. The Desk Officer may be telephoned at (202) 395–3084. (Also, please notify the EIA contact listed below.)

ADDRESSES: Address comments to the Department of Energy Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place NW., Washington, DC 20503. (Comments should also be addressed to the Office of Statistical Standards at the address below.)

FOR FURTHER INFORMATION AND COPIES OF RELEVANT MATERIALS CONTACT: Jay Casselberry, Office of Statistical Standards, (EI–73), Forrestal Building, U.S. Department of Energy, Washington, DC 20585. Mr. Casselberry may be telephoned at (202) 254–5348.

SUPPLEMENTARY INFORMATION: The energy information collection submitted to OMB for discontinuance was:

1. Federal Energy Regulatory Commission
2. FERC–557
3. 1902–0042
4. Public Utilities Regulatory Policy Act, Section 133 Cost of Service Data
5. Not Applicable
6. Not Applicable
7. Not Applicable
8. Not Applicable
9. Not Applicable
10. Not Applicable
11. Not Applicable
12. Not Applicable
13. On November 5, 1992, the Commission issued RM92–10, a final rule, to streamline and eliminate, where possible, electric power regulations and reporting requirements. In particular, the Commission is eliminating in part 290 of its regulations the requirements for collection of "cost-of-service" information under section 133 of the Public Utility Regulatory Policies Act of 1978 (PURPA).

Statutory Authority: Sec. 5(a), 5(b), 13(b), and 52, Pub. L. No. 93–275, Federal Energy Administration Act of 1974, 15 U.S.C. 764(a), 764(b), 772(b), and 790a.

Issued in Washington, DC, December 9, 1992.

Douglas R. Hale,

Acting Director, Statistical Standards, Energy Information Administration.

BILLING CODE 6450–01–M

Inventory of Current DOE Reporting and Record-Keeping Requirements

AGENCY: Energy Information Administration, Energy.

ACTION: Department of Energy's inventory of energy information collections, including reporting and record-keeping requirements.

SUMMARY: The Energy Information Administration (EIA) of the Department of Energy (DOE) herein publishes an inventory of energy information collections (including reporting and recordkeeping requirements) which had Office of Management and Budget (OMB) approval on October 1, 1992, the first day of Fiscal Year (FY) 1993. The inventory is published for the use of respondents and other interested parties. DOE's management and procurement collections are the responsibility of DOE's Office of Administration and Human Resource Management and are not included in these notices.

The listing that follows includes DOE energy information collections that had OMB approval as of October 1, 1992. For each information collection utilizing a structured form, Part I lists the current DOE control or form number, the title of the requirement, the OMB control number, and the OMB approval expiration date. Part II lists those information collections which do not utilize structured forms and the corresponding citations from the Code of Federal Regulations.

FOR FURTHER INFORMATION CONTACT: Jay Casselberry, Energy Information Administration (EI–73), 1000 Independence Avenue, SW., Washington, DC 20585, (202) 254–5348. Information on the availability of single, blank copies of those information collections utilizing structured forms can be obtained by contacting the National Energy Information Center (EI–231), 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–8800.

SUPPLEMENTARY INFORMATION: As DOE's energy information collections are submitted for review and approval to OMB during FY 1993 (October 1, 1992 through September 30, 1993), **Federal Register** notices will be published informing the public to that effect. Such notices not only provide an opportunity for the public to review and comment on the collections but also notify the public of proposed changes to the inventory. Questions concerning the inventory or the changes that take place during FY 1993 may be directed to Mr. Casselberry at the address above.

Statutory Authority: Sec. 5(a), 5(b), 13(b), and 52, Pub. L. 93–275, Federal Energy Administration Act of 1974, as amended, 15 U.S.C. 764(a), 764(b), 772(b), and 790a.

Issued in Washington, DC, December 10, 1992.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

PART I—DOE ACTIVE INFORMATION COLLECTIONS

[October 1, 1992 Inventory]

DOE No.	Title	OMB control No.	Expiration date
Civilian Radioactive Waste Management:			
NWPA-830R-A-G	Standard Contract for Disposal of Spent Nuclear Fuel and/or High Level Waste (R Contract is on standby; A-F—Annual report is on standby; G—Quarterly Report—Standard Remittance Advice is active).	19010260	11/30/93
RW-859	Nuclear Fuel Data	19010287	12/31/94
Conservation and Renewable Energy:

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. ER93-234-000, et al.]

New England Power Co., et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

Take notice that the following filings have been made with the Commission:

1. New England Power Co.

[Docket No. ER93-234-000]

December 9, 1992.

Take notice that on November 25, 1992, New England Power Company (NEP) tendered for filing a Notice of Termination of Rate Schedule 335 between NEP and Green Mountain Power Corporation.

Comment date: December 23, 1992, in accordance with Standard Paragraph E at the end of this notice.

2. Cincinnati Gas & Electric Co.

[Docket No. ER92-33-002]

December 9, 1992.

Take notice that on November 23, 1992, Cincinnati Gas & Electric Company (CG&E) tendered for filing its compliance refund report in the above-referenced docket.

Comment date: December 23, 1992, in accordance with Standard Paragraph E at the end of this notice.

3. New England Power Co.

[Docket No. ER92-600-001]

December 9, 1992.

Take notice that on November 30, 1992, New England Power Company (NEP) tendered for filing an amendment to NEP's refund compliance report submitted to the Commission on September 24, 1992 in the above-referenced docket.

Comment date: December 23, 1992, in accordance with Standard Paragraph E at the end of this notice.

4. Washington Water Power Co.

[Docket No. ER93-245-000]

December 9, 1992.

Take notice that on November 30, 1992, Washington Water Power Company (Washington) tendered for filing a Notice of Cancellation of the filing rate schedules:

Washington Water Power Company
Supplement No. 6 to Rate Schedule FERC No. 97
PacifiCorp
Supplement No. 6 to Rate Schedule FERC No. 160
Portland General Electric Company
Supplement No. 6 to Rate Schedule FERC No. 31
Puget Sound Power & Light Company
Supplement No. 7 to Rate Schedule FERC No. 65
(Supersedes Supplement No. 6)

Comment date: December 23, 1992, in accordance with Standard Paragraph E at the end of this notice.

5. Montaup Electric Co.

[Docket No. ER92-81-000]

December 9, 1992.

Take notice that on November 30, 1992, Montaup Electric Company (Montaup) in compliance with the Commission's order of September 30, 1992 filed (1) a Notice of Cancellation of a Letter Agreement between Montaup and New England Power (NEP) which expired on its own terms on October 31, 1988; (2) a Refund Report enumerating all amounts billed and refunded to the companies of the original filings in this proceeding; and (3) Amendments to 6 System-Exchange Agreements under which Montaup makes short-term daily energy sales to various utilities incorporating revised contract language to provide for current hourly and daily energy reservation charge ceiling rates for prospective transactions and also to provide that the Exchange Unit must be out-of-service or uneconomic.

Comment date: December 23, 1992, in accordance with Standard Paragraph E at the end of this notice.

6. New England Power Co.

[Docket No. ER93-14-000]

December 9, 1992.

Take notice that on November 25, 1992, New England Power Company (NEP) tendered for filing an amendment concerning the interconnection agreement with the Littleton (Mass.) Electric Light and Water Department. According to NEP, the purpose of the amendment is to ensure additional notice to the Commission should the formula rate charged Littleton change in the future.

Comment date: December 23, 1992, in accordance with Standard Paragraph E at the end of this notice.

7. Indiana Michigan Power Co.

[Docket No. ER93-195-000]

December 9, 1992.

Take notice that on November 17, 1992, Indiana Michigan Power Company (I&M) tendered for filing a Letter Agreement between I&M and Northern Indiana Public Service Company (NIPSCO), dated December 26, 1985.

Comment date: December 23, 1992, in accordance with Standard Paragraph E at the end of this notice.

8. New England Power Co.

[Docket No. ER93-1-000]

December 9, 1992.

Take notice that on November 25, 1992, New England Power Company (NEP) tendered for filing a revised tariff sheet in response to certain inquiries of Commission staff.

Comment date: December 23, 1992, in accordance with Standard Paragraph E at the end of this notice.

9. PacifiCorp

[Docket No. ER91-494-003]

December 9, 1992.

Take notice that PacifiCorp on December 1, 1992, tendered for filing, in compliance with the Commission's letter dated October 26, 1992, a compliance report showing the refunds forwarded to Western Area Power Administration (Western) for service under PacifiCorp's Rate Schedule FERC No. 262 pursuant to FERC Docket No. ER91-494-000.

Copies of this filing were furnished to Western, the Utah Public Service Commission and the Public Utility Commission of Oregon.

Comment date: December 23, 1992, in accordance with Standard Paragraph E at the end of this notice.

10. Puget Sound Power & Light Co.

[Docket No. ER93-161-000]

December 10, 1992.

Take notice that on November 30, 1992, tendered for filing an amendment to its November 17, 1992 filing in the above-referenced docket.

Comment date: December 24, 1992, in accordance with Standard Paragraph E at the end of this notice.

11. PacifiCorp

[Docket No. ER92-862-000]

December 10, 1992.

Take notice that on November 16, 1992, PacifiCorp tendered for filing an amendment to its September 28, 1992 filing in the above-referenced docket.

Comment date: December 21, 1992, in accordance with Standard Paragraph E at the end of this notice.

12. Auburndale Power Partners, Limited Partnership

[Docket No. QF93-29-000]

December 10, 1992.

On December 1, 1992, Auburndale Power Partners, Limited Partnership of 12500 Fair Lakes Circle, suite 420, Fairfax, Virginia 22033, submitted for filing an application for certification of

a facility as a qualifying cogeneration facility pursuant to § 292.207(b) of the Commission's Regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in Polk County, near Auburndale, Florida, and will consist of a combustion turbine generator, an unfired heat recovery boiler and an extraction/condensing steam turbine generator (STG). Steam recovered from the STG will be used by Coca-Cola Foods, a division of the Coca-Cola for production and packaging of orange juice and Todhunter International, Inc. for production of alcoholic beverages. The maximum net electric power production capacity of the facility will be approximately 159 MW. The primary energy source will be natural gas. Construction of the facility is expected to commence in January of 1993.

Comment date: January 19, 1993, in accordance with Standard Paragraph E at the end of this notice.

13. Florida Power & Light Co.

[Docket No. ER93–153–000]

December 10, 1992.

Take notice that on November 16, 1992, Florida Power & Light Company (FPL) tendered for filing Revision No. 3 to Sheet No. 23 of FPL's FERC's Electric Tariff Second Revised Volume No. 1.

Comment date: December 24, 1992, in accordance with Standard Paragraph E at the end of this notice.

14. Fitchburg Gas & Electric Co.

[Docket No. ER92–88–001]

December 10, 1992.

Take notice that on November 10, 1992, Fitchburg Gas & Electric Company tendered for filing copies of its revised refund report.

Comment date: December 21, 1992, in accordance with Standard Paragraph E at the end of this notice.

15. Idaho Power Co.

[Docket No. ER92–408–001]

December 10, 1992.

Take notice that on November 9, 1992, Idaho Power Company tendered for filing its Amended Compliance Filing in the above-referenced docket.

Comment date: December 22, 1992, in accordance with Standard Paragraph E at the end of this notice.

16. Southern Company Services, Inc.

[Docket No. ER93–235–000]

December 10, 1992.

Take notice that on November 25, 1992, Southern Company Services, Inc., acting as agent for Alabama Power Company, Georgia Power Company, Gulf Power Company, Mississippi Power Company, and Savannah Electric and Power Company (Operating Companies) tendered for filing notices of cancellation for certain duplicative rate schedule designations of the Operating Companies.

Comment date: December 28, 1992, in accordance with Standard Paragraph E at the end of this notice.

17. Nevada Sun Peak Limited Partnership

[Docket No. EG93–5–000]

December 10, 1992.

Take notice that on December 7, 1992, Nevada Sun-Peak Limited Partnership ("Nevada Sun-Peak") filed an Application under section 32(a)(1) of the Public Utility Holding Company Act of 1935 ("PUHCA"), as amended by section 711 of the Energy Policy Act of 1992, seeking determination by the Commission that Nevada Sun-Peak is an exempt wholesale generator. Nevada Sun-Peak owns a 210 MW peaking facility located at the Sunrise Generating Station in Clark County, Nevada.

Comment date: December 24, 1992, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP92–74–005]

South Georgia Natural Gas Co.; Proposed Changes to FERC Gas Tariff

December 11, 1992.

Take notice that on December 1, 1992, South Georgia Natural Gas Company (South Georgia) tendered for filing the following tariff sheets to its FERC Gas Tariff, First Revised Volume No. 1, with a proposed effective date of December 1, 1992:

Original Sheet No. 4E
Twelfth Revised Sheet No. 30
Tenth Revised Sheet No. 31

South Georgia states that the proposed tariff sheets are being filed in order to implement a proposal for the allocation by customer of any remaining balance in South Georgia's Account No. 191 attributable to any overcollections or undercollections of gas costs. South Georgia asserts that all of South Georgia's jurisdictional sales customers have elected to convert their remaining firm sales entitlements to firm transportation on South Georgia's system. South Georgia states that as a result of the foregoing and as requested by the customers, Southern Natural Gas Company (Southern) submitted applications in Docket Nos. CP92–6–000 and CP92–311–000 requesting, among other things, orders approving abandonment of the Contract Demand Southern sells South Georgia under Southern's Rate Schedule OCD–2 and certificates of public convenience and necessity authorizing Southern to render new firm natural gas sales service to these customers. As a result of the foregoing, South Georgia asserts that it no longer has a firm sales obligation to these jurisdictional customers. Further, South Georgia submits that a method which returns or recovers any overcollections or undercollections from the customers for the periods as proposed is necessary in order to properly allocate any refunds or costs to current or departing sales customers. Specifically, South Georgia proposes to direct bill or refund, as appropriate, any remaining balance in any subaccount of South Georgia's Account No. 191.

South Georgia states that copies of the filing will be served upon all of South Georgia's customers, interested state commissions and interested parties as well as parties of record in Docket No. RP92–74–000.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's

Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before December 18, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-30557 Filed 12-16-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP90-1391-003]

Southern Natural Gas Co.; Proposed Changes to FERC Gas Tariff

December 11, 1992.

Take notice that on December 3, 1992, Southern Natural Gas Company ("Southern") tendered for filing the following tariff sheets to its FERC Gas Tariff, Sixth Revised Volume No. 1, to be effective January 2, 1993:

Second Revised Sheet No. 30L
First Revised Sheet No. 30Z.06
Original Sheet No. 45.05
Original Sheet No. 45.06
Original Sheet No. 45.07
Original Sheet No. 45.08

Southern states that the revised tariff sheets governing future direct delivery connections are filed, under protest, to comply with the Federal Energy Regulatory Commission's ("Commission") November 3, 1992, order granting rehearing in *Arcadian Corporation* v. *Southern Natural Gas Company*, 61 FERC ¶ 61,183 (1992). The revised tariff sheets provide for the construction of direct delivery connections upon request when such connections are operationally and economically feasible, as set forth in the revised tariff sheets.

Southern states that copies of the filing will be served upon all of its shippers and all parties in Docket No. CP90-1391.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before December 18, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-30554 Filed 12-16-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP90-687-007]

Transcontinental Gas Pipe Line Corp.; Tariff Filing

December 11, 1992.

Take notice that Transcontinental Gas Pipe Line Corporation (TGPL) tendered for filing on December 7, 1992, Third Revised Fourth Revised Sheet No. 50 to its FERC Gas Tariff, Third Revised Volume No. 1. The proposed effective date of the revised tariff sheet is November 1, 1992.

As background to the instant filing, TGPL states that in orders issued January 17, 1991 (January 17 order) and June 11, 1991 in Docket No. CP90-687, the Commission authorized TGPL to provide bundled firm transportation service under Rate Schedule FT-NT in two phases. Phase I commenced November 1, 1991 and Phase II, which provided for an increase in the level of service, commenced November 1, 1992. Ordering Paragraph 9(b) of the January 17 order authorized initial rates for TGPL's component of the bundled Phase II rates subject to TGPL adjusting such rates to reflect the final outcome of TGPL's rate proceeding in Docket No. RP90-8.

TGPL states that the purpose of the filing is to comply with the Commission's November 30, 1992 order in Docket No. CP90-687-006, which directed TGPL to make a compliance filing to place into effect on November 1, 1992 the Phase II rates authorized by the January 17 order.

TGPL states that copies of the filing were mailed to each of its FT-NT customers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before December 18, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-30556 Filed 12-16-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP92-477-001]

Transwestern Pipeline Co.; Compliance Filing

December 11, 1992.

Take notice that on December 9, 1992, Transwestern Pipeline Company (Transwestern), tendered for filing Second Revised Sheet No. 100 of Rate Schedule X-10, and Fourth Revised Sheet No. 2 to become a part of its FERC Gas Tariff, Original Volume No. 2.

Northwest states that the tariff sheets reflect cancellation of the Gas Exchange Agreement between Transwestern and GPM Gas Corporation, (successor in interest to Phillips 66 Natural Gas Company), dated September 18, 1972. Northwest notes that the above-referenced tariff sheets are being filed in compliance with Ordering Paragraph (G) of the Commission Order at Docket No. CP92-477-000 issued October 20, 1992. The proposed effective date of the tariff sheets is November 20, 1992, which is the effective date of abandonment of the exchange service between Transwestern GPM pursuant to the Stipulation and Agreement filed in CP92-477-000 and the Commission Order issued October 20, 1992.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulation Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before December 18, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

[FR Doc. 92-30552 Filed 12-16-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP93-95-000]

United Gas Pipe Line Co., Amoco Production Co.; Application

December 10, 1992.

Take notice that on December 7, 1992, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478, and Amoco Production Company (Amoco), P.O. Box 3092, Houston, Texas 77253 (Applicants), filed in Docket No. CP93-95-000, a joint application pursuant to section 7(b) of the National Gas Act and Rule 207(a)(2) of the Commission's Rules of Practice and Procedure, (18 CFR 385.207(a)(2)), seeking authorization for United to abandon certain facilities which will be transferred to Amoco after the abandonment and petitioning the Commission to determine that the facilities are gathering facilities and will not be subject to Commission jurisdiction after the abandonment and transfer of the facilities to Amoco, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

United states that it would abandon and transfer to Amoco, pursuant to a Sales Agreement, certain of its facilities in the Blocker Field, Harrison County, Texas. The facilities consist of 6.73 miles of 8-inch pipeline (Field Pipeline (FPL) Nos. 11, 15 and 24) and 2.13 miles of 16-inch Transmission Pipeline (TPL) 65-2, it is stated. United indicates that the FPLs presently connect Amoco's Martin, Watson and Blankenship Central Facilities to United's TPL 65-2. Amoco would utilize the facilities to gather gas from the Watson and Blankenship Central Facility and deliver the gas to the Martin Central Facility for processing, it is stated. Amoco would construct a new pipeline to transport the processed gas from the Martin Central Facility to United's TPL 65-2, it is stated. It is indicated that United would own and operate this pipeline.

It is further indicated that Amoco would gather gas for United from the Tatum field near the Watson Central Facility.

Applicants also request an order declaring that the facilities are gathering facilities and as such are exempt from Commission jurisdiction under section 1(b) of the Natural Gas Act.

Any person desiring to be heard or to make any protest with reference to said application should on or before December 31, 1992, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Linwood A. Watson, Jr.,

Acting Secretary.

[FR Doc. 92-30553 Filed 12-16-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP93-45-000]

Williams Natural Gas Co.; Proposed Changes in FERC Gas Tariff

December 11, 1992.

Take notice that Williams Natural Gas Company (WNG) on December 8, 1992 tendered for filing the following tariff sheets to its FERC Gas Tariff, First Revised Volume No. 1, to be effective January 7, 1993:

Fourth Revised Sheet No. 119
Second Revised Sheet No. 126

WNG states that the purpose of this filing is to make effective tariff sheets which unbundle gathering rates from transportation rates. That is, under these revised tariff sheets, it will be clear that a shipper taking only gathering service will pay a gathering rate and not also pay a transportation rate for its service.

WNG states that a copy of its filing was served on all jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before December 18, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

Office of Fossil Energy

[Docket No. EA-58-E]

Application to Amend Electricity Export Authorization

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of application by Detroit Edison to amend electricity export authorization.

SUMMARY: The Detroit Edison Company has filed, on behalf of itself and Consumers Power Company, an application with the Office of Fuels Programs to amend its existing authorization to export electricity to Ontario Hydro.

DATES: Comments, protests or requests to intervene must be submitted on or before January 19, 1993.

ADDRESSES: Comments, protests or requests to intervene should be addressed as follows: Office of Coal & Electricity (FE-52), Office of Fuels Programs, Office of Fossil Energy, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

Docket Number EA-58-E should appear clearly on the envelope and the document contained therein.

FOR FURTHER INFORMATION CONTACT: Ellen Russell (Program Office) at (202) 586-9624 or Lise Courtney M. Howe (Program Attorney) at (202) 586-2900.

SUPPLEMENTARY INFORMATION: On December 4, 1992, the Detroit Edison Company (Detroit Edison) applied on

behalf of itself and Consumers Power Company (Consumers) for an amendment to their existing electricity export authorization. The existing authorization, issued by the Federal Power Commission on October 10, 1972, allows Detroit Edison and Consumers (the Michigan Companies) to export to Ontario Hydro up to 4,000,000,000 KWH of electric energy annually at a maximum rate of 2,200,000,000 volt-amperes (2,200 MVA). The application requests that DOE amend the existing authorization by waiving, for calendar year 1993, the annual energy limit while leaving the 2,200 MVA capacity limitation unchanged. A similar request for calendar year 1992 was granted by DOE on June 4, 1992.

In their application filed pursuant to section 202(e) of the Federal Power Act, 16 U.S.C. 824(e), and 18 CFR § 205.300, *et seq.*, the Michigan Companies assert that if the waiver is granted, economic energy transactions with Ontario Hydro will be scheduled to flow over the existing Detroit Edison-Ontario Hydro interconnections in such a manner so as to minimize loop flows and to avoid detriment to the other regional interconnected utilities.

The electrical systems of the Michigan Companies and Ontario Hydro presently are interconnected at four points on the U.S.-Canadian border. Each interconnection has been authorized by a Presidential permit issued under Executive Order 10485.

The Michigan Companies assert that removal of the annual energy limit is warranted because such a condition is not necessary to maintain the reliability of the U.S. electric power supply system. Instead, the Michigan Companies argue, the reliability of their transmission system depends on keeping maximum flows on the transmission facilities within their capabilities for the system conditions encountered on a continuous basis.

Procedural Matters

Any person desiring to be heard or to protest this application should file a petition to intervene or protest at the address provided above in accordance with §§ 385.211 or 385.214 of the Rules of Practice and Procedure (18 CFR 385.211, 385.214).

Any such petitions and protests should also be filed directly with: Raymond N. Shibley/Bruce W. Neely, LeBoeuf, Lamb, Leiby & MacRae, suite 1100, 1333 New Hampshire Ave., NW., Washington, DC 20036; Raymond O. Sturdy, Jr., Senior Attorney, The Detroit Edison Company, 2000 Second Avenue–688 WCB, Detroit, MI 48226; and William M. Lange, Assistant General Counsel, Consumers Power Company, Fifth Floor, 1016 16th Street, NW., Washington, DC 20036.

Pursuant to 18 CFR 385.211, protests and comments will be considered by the DOE in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene under 18 CFR 385.214. Section 385.214 requires that a petition to intervene must state, to the extent known, the position taken by the petitioner and the petitioner's interest in sufficient factual detail to demonstrate either that the petitioner has a right to participate because it is a State Commission; that it has or represents an interest which may be directly affected by the outcome of the proceeding, including any interest as a consumer, customer, competitor, or security holder of a party to the proceeding; or that the petitioner's participation is in the public interest.

A final determination will be made on this application after considering all available information, including information which demonstrates whether or not the proposed action will impair the sufficiency of electric supply within the United States or impede or tend to impede the coordination in the public interest of facilities subject to the jurisdiction of the DOE.

Before an export authorization may be issued, the environmental impacts of the proposed DOE action must be evaluated pursuant to the National Environmental Policy Act of 1969 (NEPA). The NEPA compliance process is a cooperative, nonadversarial process involving members of the public, State governments, and the Federal Government. The process affords all persons interested in or potentially affected by the environmental consequences of a proposed action an opportunity to present their views, which will be considered in the preparation of the environmental documentation for the proposed action. Intervening and becoming a party to this proceeding will not create any special status for the petitioner with regard to the NEPA process. Should a public proceeding be necessary in order to comply with NEPA, notice of such activities and information on how the public can participate in those activities will be published in the **Federal Register**, local newspapers, and public libraries and/or reading rooms.

Copies of this application will be made available, upon request, for public inspection and copying at the address above from 9 a.m. to 4 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, on December 7, 1992.

Charles F. Vacek,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

[FR Doc. 92–30522 Filed 12–16–92; 8:45 am]

BILLING CODE 6450–01–M

Office of Hearings and Appeals

Notice of Issuance of Decisions and Orders During the Week of November 16 Through November 20, 1992

During the week of November 16 through November 20, 1992, the decisions and orders summarized below were issued with respect to appeals and applications for other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Appeals

KOAT, 11/17/92, LFA–0246

KOAT, a television station, filed an Appeal from a determination issued by the Albuquerque Field Office (AFO) of the Department of Energy (DOE). The determination denied, in part, a Request for Information which KOAT submitted under the Freedom of Information Act (FOIA). KOAT requested two documents, entitled "Fiscal Year 91 Construction Plan Through Fiscal Year 97" (Plan) and "Site Development Plan Annual Summary." The AFO released redacted copies of the Plan and Summary which withheld information concerning proposed construction projects for fiscal years 1993 through 1997. Citing FOIA Exemption 5, the AFO determined that disclosure of the redacted information would disclose deliberative, predecisional material and that release of this material would not be in the public interest. In considering the Appeal, the DOE determined that most of the material was predecisional and deliberative. Consequently, the DOE found that this material was properly withheld by the AFO. However, the DOE determined that some segregable factual material was withheld along with some previously released information. This material should not have been withheld and was provided to KOAT. Consequently, the DOE granted in part the Appeal.

Westat, Inc., 11/17/92, LFA–0243

Westant, Inc. (Westat) filed an Appeal from a determination issued to it by the Office of Placement and Administration (OPA) within the Office of Headquarters Procurement Operations of the Department of Energy (DOE). In that

determination, OPA denied in part Westat's request for information under the Freedom of Information Act (FOIA). The Authorizing Official had withheld the entire winning proposal submitted by the Science Applications International Corporation (SAIC) in response to a Request for Proposal for Survey Design and Analysis Support Services for the Energy Information Administration, RFP No. DE–RP01–90E121944. Relying upon Exemption b(4) of the FOIA, the Authorizing Official stated that the winning proposal was withheld in its entirety because of its "proprietary nature." In considering the Appeal, the DOE found that the Authorizing Official had not adequately justified its application of Exemption 4 to the winning proposal. Specifically, the Authorizing Official did not adequately explain why release of any portion of the winning proposal would likely cause substantial competitive harm to SAIC. Therefore, the DOE remanded the matter so that the Authorizing Official could issue a new determination focusing on the likelihood of substantial competitive harm to SAIC.

Refund Applications

Apex Oil Co., Clark Oil & Refining Corp./Isenberg Enterprises, Al Isenberg's Super 100, Larry's Clark Super 100, 11/17/92, RF342–168, RF342–169, RF342–179

The DOE issued a Decision and Order denying, in part, an Application for Refund and granting two other Applications for Refund filed by purchasers of Clark refined petroleum products in the Apex/Clark special refund proceeding. In January 1979, Al Isenberg, owner of Isenberg Enterprises, entered into an informal sublease agreement with another dealer, Larry Rupert, owner of Larry's Clark Super 100. Both Mr. and Mrs. Isenberg and Mr. Rupert's widow applied for a refund for purchases made at the station from 1979 to January 1981. The DOE determined that because Mr. Rupert did not actually purchase Clark petroleum products during the period of Mr. Isenberg's sublease, he could not have been injured by Clark's alleged overcharges. Therefore, the DOE denied Mr. Rupert's request for a refund for the period after January 1979. The DOE granted Mr. and Mrs. Isenberg's claim as well as another claim the couple filed on behalf of another station which they leased directly from Clark. The total amount of the refund authorized in this Decision and Order is $15,755 (comprised of $11,954 in principal and $3,801 in interest).

Atlantic Richfield Company/Phillips Petroleum Company, 11/19/92, RF304–4403

The DOE issued a Decision and Order granting a refund to Phillips Petroleum Company (Phillips) in the Atlantic Richfield (ARCO) Subpart V special refund proceeding. Phillips, a reseller of ARCO products requested a refund based upon its purchases of 48,465,514 gallons of ARCO products during the consent order period. The DOE considered a showing of injury provided by Phillips and applied the three step competitive disadvantage analysis using *Platt's* average wholesale prices for the Mt. Belvieu, Texas, region. Based upon this analysis, the DOE concluded that it is appropriate for Phillips to receive a refund based on its above-market volumetric share for its purchases of propane and natural gas, and a refund equal to its full allocable share for its purchases of butane. The refund granted to Phillips equals $32,187, representing $19,696 in principal and $12,491 in accrued interest.

Murphy Oil Corp./Mason's Spur Station, 11/16/92, RF309–1425

The DOE issued a Decision and Order granting an Application for Refund filed in the Murphy Oil Corporation special refund proceeding on behalf of Mason's Spur Station, a reseller of covered Murphy petroleum products during the consent order period. The applicant supplied the required information and substantiated a claim for a refund of less than $5,000. Accordingly, its refund was granted. In pursuit of a conclusion to the nearly completed Murphy refund proceeding, the Decision and Order also established a final filing deadline for Applications for Refund from the Murphy consent order fund. The OHA will not accept applications in the Murphy refund proceeding that are postmarked after December 31, 1992.

Texaco, Inc./Gervais Brothers, Inc. Et Al., 11/19/92, RF321–10591 Et Al.

The DOE issued a Decision and Order concerning eight Applications for Refund filed in the Texaco Inc. special refund proceeding. Each of the applicants purchased indirectly from Texaco and was a reseller whose allocable share is less than $10,000. One applicant, Gervais Brothers, Inc., included in its claim gallons of motor oil purchased after the effective date of decontrol, September 1, 1976. The DOE determined that this applicant was not eligible for a refund based on these gallons because no overcharges could have occurred in sales of motor oil after that date. The DOE determined that each applicant was eligible to receive a refund equal to its full allocable share. The sum of the refunds granted in this Decision is $8,844 ($6,618 principal plus $2,226 interest).

Texaco Inc., Kautz Texaco, Emmett's Texaco, 11/20/92, RR321–89, RR321–98

The DOE issued a Decision and Order denying two Motions for Reconsideration in the Texaco Inc. special refund proceeding. The motions were based on purchases of Texaco products allegedly made by Kautz and Emmett's Texaco service stations. However, each of the applicants failed to provide sufficient documentation to support his claimed purchase volume. Accordingly, both Motions for Reconsideration were denied.

Texaco Inc./Southside Texaco, 11/18/92, RF321–13291

The DOE issued a Decision and Order regarding an Application for Refund filed by Southside Texaco in the Texaco Inc. special refund proceeding. Southside Texaco purchased products from Chieftain Oil Co., a Texaco consignee and petroleum jobber. Both Southside Texaco and Chieftain Oil Co. were owned by Russell M. Osborne. Mr. Osborne had previously received a refund in the Texaco proceeding based on the Texaco purchases of Chieftain Oil Co. Because Texaco products purchased by (or consigned to) one firm may be included only once in determining an applicant's refund amount, the application for Southside Texaco was denied.

Texaco, Inc./Todd's Texaco Todd's Texaco, 11/16/92, RF321–4643, RF321–19331

The DOE issued a Decision and Order concerning two Applications for Refund filed on behalf of Todd's Texaco in the Texaco Inc. special refund proceeding. On May 2, 1990, the owner of Todd's Texaco, Mrs. W.O. Todd, filed an Application for Refund on behalf of Todd's Texaco using a form provided by Energy Refunds, Inc. Subsequently, on October 19, 1992, Todd filed another Application for Refund on behalf of Todd's Texaco using a form provided by Wilson, Keller & Associates (WKA). The DOE held that since Todd had falsely certified on her WKA application that she had not previously signed and authorized the filing of another Texaco refund application, it was appropriate to deny both of the applications. Consequently, the DOE denied both of Todd's applications.

Time Oil Company/Nevada, 11/17/92, RQ334–583

The DOE issued a Decision and Order concerning the second-stage application

filed by the State of Nevada (Nevada) requesting approval of its percentage of Time Oil Company second-stage monies to fund five programs: an energy emergency awareness and gasoline price monitoring program; an alternative vehicle fuel demonstration; a state energy policy implementation plan; gasoline, aviation, and diesel fuel quality assurance testing, and the promotion of its used motor oil collection program. The DOE has previously approved similar programs. Thus, Nevada's proposal was approved. The total refund granted in this Decision and Order was $54,485 (comprised of $26,441 in principal and $28,044 in interest).

Refund Applications

The Office of Hearings and Appeals issued the following Decisions and Orders concerning refund applications, which are not summarized. Copies of the full texts of the Decisions and Orders are available in the Public Reference Room of the Office of Hearings and Appeals.

BILLING CODE 6450–01–M

ENVIRONMENTAL PROTECTION AGENCY

[FRL–4546–5]

Proposed Settlement; Asbestos NESHAP

AGENCY: Environmental Protection Agency.

ACTION: Notice of Proposed Settlement; Request for Public Comment.

SUMMARY: In accordance with section 113(g) of the Clean Air Act, notice is hereby given of a proposed Settlement Agreement conditionally entered into by the United States Environmental Protection Agency ("EPA") on November 30, 1992, in litigation concerning the National Emission Standards for Hazardous Air Pollutants for Asbestos ("Asbestos NESHAP") (40 CFR 61.141–61.159). For a period of thirty days following the date of publication of this notice, the Agency will receive written comments relating to the settlement from persons who were not named as parties to the litigation in question. EPA or the Department of Justice is authorized under section 113(g) to withdraw its consent to the Settlement Agreement if appropriate in light of the public comments.

DATES: Written comments on the Settlement Agreement must be received by January 19, 1993.

ADDRESSES: Written comments should be sent, preferably in triplicate, to Michael Horowitz, Air and Radiation Division (LE–132A), Office of General Counsel, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 260–8883. Copies of the Settlement Agreement are available from Michael Horowitz at the same address. A copy of the settlement has been lodged with the Clerk of the United States Court of Appeals for the District of Columbia Circuit.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas Ripp (703) 308–8727 at the United States Environmental Protection Agency, Office of Air Quality Planning and Standards, Stationary Source Compliance Division.

SUPPLEMENTARY INFORMATION:

In *Safe Buildings Alliance* v. *U.S. Environmental Protection Agency,* No. 91–1034 (D.C. Cir.), the petitioner seeks review of EPA's November 20, 1990 Final Rule amending the national emission standard for asbestos under section 112 of the Clean Air Act, 55 FR 48406 (Nov. 20, 1990), codified at 40 CFR Part 61. EPA and the petitioner have entered into a conditional Settlement Agreement that includes a Notice of Clarification that will be published in the Federal Register if this Settlement Agreement is made final.

Section 113(g) of the Clean Air Act (42 U.S.C. 7413(g)) requires, with exceptions not pertinent here, that EPA publish notice of settlement agreements in the **Federal Register** and provide a reasonable opportunity for public comment. EPA or the Department of Justice may withhold consent to the proposed settlement if the comments disclose facts or circumstances that indicate that such consent is inappropriate, improper, inadequate or inconsistent with the requirements of the Clean Air Act.

Dated: December 3, 1992.

Raymond B. Ludwiszewski,

Acting General Counsel.

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirement Submitted to Office of Management and Budget for Review

December 9, 1992.

The Federal Communications Commission has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Copies of this submission may be purchased from the Commission's copy contractor, Downtown Copy Center, 1990 M Street, NW., suite 640, Washington, DC 20036, (202) 452–1422. For further information on this submission contact Judy Boley, Federal Communications Commission (202) 632–7513. Persons wishing to comment on this information collection should contact Jones Neihardt, Office of Management and Budget, room 3235 NEOB, Washington, DC 20503, (202) 395–4814.

OMB Number: 3060–0180

Title: Section 73.1610, Equipment Tests

Action: Extension of a currently approved collection

Respondents: Businesses or other for-profit (including small businesses)

Frequency of Response: On occasion reporting.

Estimated Annual Burden: 797 responses; 0.5 hours average burden per response; 399 hours total annual burden.

Needs and Uses: Section 73.1610 requires the permittee of a new broadcast station to notify the FCC of its plans to conduct equipment tests for the purpose of making adjustments and measurements as may be necessary to assure compliance with the terms of the construction permit and applicable engineering standards. The data are used by FCC staff to assure compliance with the terms of the construction permit and applicable engineering standards.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

BILLING CODE 6712–01–M

FEDERAL DEPOSIT INSURANCE CORPORATION

Coastal Barrier Improvement Act; Property Availability: Approximately 280 acres of Vacant Land near Turpin Reservoir in the Medicine Bow National Forest, approximately 18 miles south of Elk Mountain, WY

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Notice.

SUMMARY: Notice is hereby given that approximately 280 acres of Vacant Land located near Turpin Reservoir in the Medicine Bow National Forest in Wyoming, is affected by section 10 of the Coastal Barrier Improvement Act of 1990, as specified below.

DATES: Written Notices of Serious Interest to purchase or effect other transfer of the property may be mailed or faxed to the Federal Deposit Insurance Corporation until March 17, 1993.

ADDRESSES: All written Notices of Serious Interest must be submitted to Marcia L. Rodgers, Legal Division, Federal Deposit Insurance Corporation, 707 17th Street, suite 3000, Denver, Colorado 80202, (303) 296–4703, ext. 3766, Fax (303) 292–3959.

SUPPLEMENTARY INFORMATION: The property is more fully described as three tracts of vacant land comprising 280 acres near Turpin Reservoir within the Medicine Bow National Forest, approximately 18 miles south of Elk Mountain, Wyoming. Two of the tracts are on the west side of Turpin Reservoir; these tracts consist of one rectangular 120-acre tract running east and west, and a contiguous 40-acre square tract which touches the larger parcel at its northwest corner. The third tract is on the east side of the reservoir and consists of a 120-acre rectangular tract running north and south. This tract borders the reservoir when the reservoir is full. The property has no structural improvements or utilities and consists primarily of lodgepole pine forest. Elevations range from approximately 9450 to 9700 feet above sea level; the eastern parcel rises steeply from the reservoir. County Road FR100 runs north and south through the eastern portion of the larger western parcel; the eastern parcel is accessed from a two-track road off County Road FR100. Access to the property is limited during the winter months due to elevation and contour. The property is zoned for ranching, agricultural and mining use and is subject to Carbon County Zoning Regulations which restrict permitted uses in such zoned areas.

Written notice of serious interest to purchase the property must be received on or before March 17, 1993 by Marcia Rodgers at the above address and in substantially the following form:

NOTICE OF SERIOUS INTEREST

RE: Vacant Land (280 Acres), near Turpin Reservoir in the Medicine Bow National Forest, approximately 18 miles south of Elk Mountain, Wyoming.

This Notice of Serious Interest is tendered in accordance with section 10 of the Coastal Barrier Improvement Act and publication in the **Federal Register** of a Notice of Availability on December 17, 1992 with respect to that property south of Elk Mountain, Wyoming in the Medicine Bow National Forest

consisting of three tracts of vacant land comprising 280 acres.

The (*Name and Address of the Agency of Other Qualified Organization*) is eligible to submit this notice under criteria set forth in Public Law 101–591, section 10(b)(2).

The (*Name of the Agency of Other Qualified Organization*) intends to use this property primarily for wildlife refuge, sanctuary, open space, recreational, historical, cultural or natural resource conservation purposes.

The proposed terms of purchase or transfer are as follows:

[INSERT TERMS OF PURCHASE]

Dated: December 11, 1992.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary

BILLING CODE 6714–01–M

FEDERAL MARITIME COMMISSION

Notice of Agreement(s) Filed; The Board of Trustees of the Galveston Wharves; et al.

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 800 North Capitol Street, NW., 9th Floor. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–004177–008.

Title: Port of Seattle/Stevedoring Services of America Terminal Agreement.

Parties:

Port of Seattle ("Port"), Stevedoring Services of America dba, Seattle International Terminal, Inc.

Synopsis: This modification adjusts the port's rental hour billing breakpoints for container cranes.

Agreement No.: 224–200707.

Title: Port of Galveston/Galvco Bridge Terminal Agreement.

Parties:

The Board of Trustees of the Galveston Wharves ("Port"), Galvco Bridge, Ltd. ("Galvco").

Synopsis: The Agreement permits the Port to lease to Galvco certain facilities for the development and operation of a railbridge operation and sufficient water area for the operation of the railbridge as well as dolphins and winches. The Agreement has an initial term of three years.

Dated: December 14, 1992.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730–01–M

[Docket No. 90–23]

Notice of Inquiry on Ocean Freight Tariffs in Foreign and Domestic Offshore Commerce; Automated Tariff Filing and Information System ["ATFI"], Supplemental Report No. 3 and Notice

By its previous Supplemental Report and Notice ("Supplemental Report No. 2"), issued on August 12, 1992, the Federal Maritime Commission ("Commission") established a phase-in (by trade area) schedule for the filing of tariff data into the Automated Tariff Filing and Information System ("ATFI"). However, given the need for upgrades to computer hardware and software, including those enhancements suggested by industry comments, the Commission's Contractor indicates that the earliest possible date that the electronic system can accept final tariff data is February 22, 1992. Accordingly the phase-in schedule is revised to read as set forth below (all dates are in 1993). [All tariffs not converted by the "complete" date are subject to cancellation by order of the Commission in a show-cause proceeding, unless temporarily exempted.]

Trade area	Begin	Complete
[Voluntary (early) filing of ANY tariff after February 21]		
A. Worldwide/Asian & South Pacific	February 22	June 4.
B. European	June 14	August 27.
C. Africa/Mid East	September 13	September 24.
D. North American/Caribbean	September 29	October 8.
E. Central/South America	October 11	November 12.
F. Terminals/Domestic Trades	November 22	December 31.
G. New Essential Terms		November 22

Filers must notify the ATFI Hot Line at 703–883–8350 ten (10) days before beginning to convert a full tariff under the above schedule. Also, contact the Hot Line with any questions.

Explanation of Conversion Schedule

- *Voluntary (early) filing of tariffs.* Filers may convert any tariffs earlier than required in the mandatory schedules, and maintain them from that time forward.

A. *Worldwide, Asian, and/or South Pacific:* Tariffs applicable to/from worldwide points; tariffs applicable to/from countries and islands bordering the Pacific or Indian Oceans, which are wholly or partially north of the Equator, and wholly east of 90 degrees East longitude, including all of the People's Republic of China, Mongolia, and that portion of the former Russian Soviet Federated Socialist Republic east of 90 degrees East longitude; and/or tariffs applicable to/from countries and islands bordering the pacific or Indian Oceans and which are wholly south of the Equator.

B. *European:* Tariffs applicable to/from the European continent, including the islands adjacent thereto, the countries bordering the Atlantic Ocean, the northern coast of the Mediterranean Sea, Turkey, and that portion of the former Russian Soviet Federated Socialist Republic west of 90 degrees East longitude.

C. *Africa and/or Mid East:* Tariffs applicable to/from the African continent, including the islands adjacent thereto; and/or those countries not included in the "European Area"

which: border the Mediterranean Sea, and/or are wholly or partially west of 90 degrees East longitude.

D. *North America and/or Caribbean:* Tariffs applicable to/from the North American continent, not described in the "Domestic" trade areas herein; and/or points and places bordering the Caribbean Sea including Mexico but excluding Central and South America.

E. *Central and/or South America:* Tariffs applicable to/from countries and islands adjacent thereto, in Central and/or South America not included in other trade areas herein.

F. *Terminals and/or Domestic:* All marine terminal operator tariffs; and/or all tariffs for any part of the Domestic Offshore Trade under the Commission's jurisdiction.

G. *New Essential Terms:* The essential terms of all service contracts executed on or after the "Begin" date must be properly filed in the electronic ATFI system, or be subject to rejection or cancellation.

By the Commission.

Joseph C. Polking,

Secretary.

[FR Doc. 92-30607 Filed 12-16-92; 8:45 am]

BILLING CODE 6730-01-M

Automated Tariff Filing and Information System (ATFI); Revised Phase-In Schedule

On November 2, 1992, Public Law 102-582 ("P.L. 102-582") was signed by the President. Section 502(b)(1) of P.L. 102-582 provides in pertinent part:

(b) Tariff Form and Availability.—
(1) Requirement to File.—Notwithstanding any other law, each common carrier and conference shall, in accordance with subsection (c), file electronically with the Commission all tariffs, and all essential terms of service contracts, required to be filed by that common carrier or conference under the Shipping Act of 1984 (46 App. U.S.C. 1701 *et seq.*), the Shipping Act, 1916 (46 App. U.S.C. 801 *et seq.*), and the Intercoastal Shipping Act, 1933 (46 App. U.S.C. 843 *et seq.*).

* * * * *

(c) Filing Schedule.—New tariffs and new essential terms of service contracts shall be filed electronically not later than July 1, 1992. All other tariffs, amendments to tariffs, and essential terms of service contracts shall be filed not later than September 1, 1992.

Notwithstanding the language of the statute, February 22, 1993, is the earliest possible date the Federal Maritime Commission ("Commission") will be prepared to accept electronically filed tariff data. In Supplemental Report No. 3 and Notice ("Supplemental Report No. 3") in Docket No. 90-23, Automated Tariff Filing and Information System (ATFI), the Commission today has published a revised phase-in schedule for the mandatory electronic filing/conversion of tariff data into ATFI. That schedule establishes, according to specified trade areas, the dates during 1993 by which carriers and conferences must convert and file their tariffs electronically. As indicated in that Report, paper tariffs covering the described trade areas which are not converted by the prescribed "complete" date, will be subject to cancellation by order of the Commission in a show cause proceeding. As additionally indicated in that Report, filers must notify the ATFI Hot Line at (703) 883-8350 ten (10) days before beginning to convert a full tariff.

Other matters involving the implementation of Public Law 102-582 will be addressed separately.

By the Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

GENERAL SERVICES ADMINISTRATION

Office of Business, Industry, and Governmental Affairs; Business Advisory Board

Meeting Notice: Notice is hereby given that the General Services Administration (GSA) Business Advisory Board will meet January 12, 1993, from 10 a.m. to 4 p.m. at GSA's Central Office, 18th and F Streets, NW., Room 5141A, Washington, DC. Notice is required by the Federal Advisory Committee Act, 5 U.S.C. App. 2, and the implementing regulation, 41 CFR part 101-6.

The purpose of the meeting is to provide a forum for discussion on key business and industry trends, emerging technologies and products, and other issues that may affect GSA's future policy and program formulation. The agenda for this meeting will include discussion on: quality vendor award program, service to the citizens, consortium on office technology, quality systems registration, and customer satisfaction measurement.

The meeting will be open to the public.

For further information, contact Patricia Jones (202/501-0838) of the Office of Business, Industry, and Governmental Affairs, GSA/AL, Washington, DC 20405.

Dated: December 3, 1992.

Donald C.J. Gray,

Associate Administrator for Business, Industry, and Governmental Affairs, GSA.

BILLING CODE 6820-34-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Statement of Organization, Functions, and Delegations of Authority

Part H, Chapter HF (Food and Drug Administration) of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health and Human Services (35 FR 3685, February 25, 1970, and 56 FR 29484, June 27, 1991, as amended most recently in pertinent part at 54 FR 9252, March 6, 1989) is amended to reflect an organization change in the Food and Drug Administration (FDA).

FDA proposes to transfer the congressional and public affairs functions from the Office of Compliance within the Center for Biologics Evaluation and Research (CBER) to the Office of the Center Director, CBER to increase the accessibility of these support activities to all Center employees. The congressional and public affairs functions which include FOI requests, legislative correspondence, and professional and consumer affairs will therefore be deleted from the Office of Compliance.

Under Section HF-B, Organization:

1. Delete subparagraph (p-2) Office of Compliance (HFBC) in its entirety and insert a new subparagraph (p-2) reading as follows:

Office of Compliance (HFBC). Monitors the quality of marketed biological products through surveillance, inspections, report evaluation and compliance programs, and coordinates testing of marketed products with other components of FDA.

Advises the Center Director and other Agency officials on FDA's regulatory compliance responsibilities for biological products.

Directs and coordinates Center regulation writing activities.

Directs the Headquarters biologics inspection program and assists in training of Headquarters and field inspectors of biological products based on guidance from the curriculum committee.

Develops compliance standards for biological product industry practices,

including Current Good Manufacturing Practice (CGMP) regulations, and ensures their uniform interpretation.

Directs the Center's bioresearch monitoring program, enforcement, and recall programs for biological products.

Identifies problems in biological product regulation, manufacturing, and quality assurance and proposes solutions to these problems.

Develops biological product quality assurance compliance and surveillance programs, coordinates and directs field implementation, and advises other Center components on these programs.

Provides guidance to Headquarters and field personnel in the development of evidence to support enforcement actions for deviation from the applicable standards.

Serves as the focal point within the Center for surveillance and enforcement policy development.

Evaluates, in coordination with appropriate Agency officials, a firm's conformance with CGMP in producing biological products for procurement by Federal and State agencies.

Coordinates all Center-field compliance activities, including planning activities and field assignments, with the exception of consumer affairs activities.

Coordinates the Center's export program and serves as the Center's focal point for import issues.

Dated: December 8, 1992.

David A. Kessler,

Commissioner of Food and Drugs.

BILLING CODE 4160-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[UT-060-03-4120-01]

Moab District Advisory Council; Call for Nominations

December 10, 1992.

AGENCY: Bureau of Land Management, Moab District, Utah.

ACTION: Moab District Advisory Council, call for nominations.

SUMMARY: BLM's district advisory councils (DACs) are mandated by section 309(a) of the Federal Land Policy and Management Act of 1976, as amended by section 13 of the Public Rangelands Improvement Act of 1978, 43 U.S.C. 1739. Under our governing regulations, 43 CFR 1784.6-4(a), an advisory council must be established for each BLM district.

The purpose of this notice is to solicit public nominations to fill 1 position on the Bureau of Land Management's (BLM) Moab District Advisory Council.

Nominations are needed for the elected official position to fill an unexpired term through December 31, 1993. To qualify, nominees must be an incumbent elected official of general purpose government serving the people of the Moab District.

The purpose of the Council is to provide informed advice to the BLM Moab District Manager on the management of the public lands in the Moab District. Members will serve without salary, but will be reimbursed for travel and per diem expenses at current rates for Government employees.

The council normally will meet at least twice annually. Additional meetings may be called by the District Manager or his designee in connection with special needs for advice.

Persons wishing to nominate individuals or to be nominated to serve on the Council should contact the District Manager at the address below. They should then provide the District Manager with the names, addresses, occupations, and other relevant biographical information of qualified nominees.

DATES: All nominations should be received on or before January 19, 1993.

FOR FURTHER INFORMATION CONTACT: Mr. Roger Zortman, District Manager, P.O. Box 970, Moab, Utah 84532 (801) 259-6111.

Roger Zortman,

District Manager.

BILLING CODE 4310-DQ-M

[ES-940-5700-10-241A]

General Land Office Automated Records Project

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: Notice is given that the public availability of the Bureau of Land Management (BLM) General Land Office (GLO) Automated Records Project will be delayed until February 1, 1993, due to technical difficulties. This Project has optically scanned images of the original GLO patents and deeds and contains a data base of key information derived from the patents.

DATES: February 1, 1993.

ADDRESSES: The GLO Automated Records Project system is available and supported from 8 a.m. to 5 p.m., Monday through Friday (excluding holidays) at the following location: Bureau of Land Management, Eastern States, Public Service Section, 7450 Boston Boulevard, Springfield, Virginia 22153.

SUPPLEMENTARY INFORMATION: The BLM Eastern States maintains the original GLO tract books that show how, when, and to whom title to public domain lands passed from the United States—in the States of Alabama, Arkansas, Florida, Illinois, Indiana, Iowa, Louisiana, Michigan, Minnesota, Missouri, Mississippi, Ohio, and Wisconsin. The tract books record land transactions that date back to the late 1700's. Eastern States also maintains a complete set of field notes and township plats for the 13 States listed above.

The BLM initiated the GLO Automated Records Project because it recognized the need to protect and preserve these records, and make them more accessible. The Project provides the capability to scan, index, store, update, and retrieve images and attribute data for the images of the GLO documents. To protect them from further deterioration, the original documents are retired from daily public use after entry into the GLO Automated Records System.

Retrieval of the data base and document images from optical disk is now available for the States of Florida, Arkansas, Wisconsin, Louisiana, Minnesota, and Michigan, for patents issued for cash entries and homesteads before July 1, 1908. Document images can be retrieved by querying the data base in six areas: legal land description, patent authority, patentee name, land office, certificate number, and county. As they are completed, the rest of the states and the field notes and township plats will come "on-line."

Paper copies of the document images are available in several sizes. Also available are reports with information specific to the document (land description, patent authority, patentee name, land office, certificate number, and county).

Until April 1, 1993, there will be no charge for using the GLO Automated Records System, although there will be the standard charge for paper copies of documents and reports. After April 1, 1993, rates will be charged for querying the System. The rates will follow established BLM cost recovery guidelines.

The GLO Automated Records System will be available for remote use (via modem) 24 hours daily and supported during the hours of 8 a.m. and 5 p.m., Monday through Friday (excluding holidays), in the Eastern States Public Service Section as of April 1, 1993.

FOR FURTHER INFORMATION CONTACT: The Public Service Section at 703–440–1600.

Dated: December 9, 1992.

Larry E. Hamilton,

Acting State Director.

BILLING CODE 4310–GJ–M

[CO–620–93–4110–03; COC41333]

Colorado; Proposed Reinstatement of Terminated Oil and Gas Lease

Under the provisions of Public Law 97–451, a petition for reinstatement of oil and gas lease COC41333, Rio Blanco County, Colorado, was timely filed and was accompanied by all required rentals and royalties accruing from September 1, 1992, the date of termination.

No valid lease has been issued affecting the lands. The lessee has agreed to new lease terms for rentals and royalties at rates of $5 per acre and 16⅔ percent, respectively. The lessee has paid the required $500 administrative fee for the lease and has reimbursed the Bureau of Land Management for the cost of this **Federal Register** notice.

Having met all the requirements for reinstatement of the lease as set out in section 31 (d) and (e) of the Mineral Leasing Act of 1920, as amended, (30 U.S.C. 1888 (d) and (e), the Bureau of Land Management is proposing to reinstate the lease effective September 1, 1992, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Questions concerning this notice may be directed to Joan Gilbert of the Colorado State Office at (303) 239–3783.

Dated: November 11, 1992.

[MT–0210–4210–04; MTM 80345]

Realty Action; Exchange of Public Lands and Minerals in Musselshell and Yellowstone Counties, MT

AGENCY: Bureau of Land Management, Miles City District Office, Montana, Interior.

ACTION: Designation of pubic surface estate lands and federal coal mineral estate in Musselshell County, Montana for transfer out of federal ownership in exchange for lands owned by the Meridian Minerals Company (Meridian) in Yellowstone County, Montana.

SUMMARY: A proposal has been received from Meridian to acquire public surface estate and coal estate from the BLM to complete its planned surface construction activities related to the Bull Mountains mine support infrastructure. Meridian agrees not to surface mine the federal coal it proposes to acquire and underground mining of the coal is not feasible. The surface estate and the entire underlying mineral estate to be acquired by the BLM is located in an area known as the South Hills located approximately three miles south of Billings, Montana. The acquired lands will connect two larger parcels of public land aggregating approximately 1,200 acres. Acquisition of this parcel would aid the management and recreational use of the area including uses such as for motocross, horseback riding, hiking, bicycling, jogging and wildlife viewing. The following surface and coal estate is being considered for disposal and acquisition by land and mineral exchange pursuant to Section 206 of the Federal Land Policy and Management Act of October 21, 1976, 43 U.S.C. 1716.

Principal Meridian, Montana

Selected Public Surface to be Acquired by Meridian in Musselshell County

T. 6 N., R. 26 E.,
Section 12, lot 4, W1/2SW, SESW
Consisting of 153.96 acres.

Selected Federal Coal to be Acquired by Meridian in Musselshell County

T. 6 N., R. 26 E.,
Section 4, all
Section 12, all
Consisting of 1257.55 acres of coal.

Offered Surface and Mineral Estate to be Acquired by BLM in Yellowstone County

T. 1 S., R. 26 E.,
Section 23, NESW, N1/2SE, SESE
Consisting of 160.00 acres.

The surface and mineral estates described above and designated for disposal are segregated from entry under the mining laws but not the mineral leasing laws and not from exchange pursuant to section 206 of the Federal Policy and Management Act of 1976, effective upon publication of this notice in the **Federal Register**. The segregative effect on the selected public lands and minerals designated for disposal will terminate upon issuance of a patent to Meridian or two years from this publication, whichever occurs first.

Comments and information related to this proposed exchange will be accepted at an open house scheduled at 5 p.m. on Wednesday, January 27, 1993 at the Montana Power Company offices, 202 Main, Roundup, Montana.

Final determination on disposal will await completion of an environmental assessment. Upon completion of an environmental assessment and land use decision, a Notice of Realty Action will be published specifying the lands to be exchanged.

DATES: Comments will be accepted until February 1, 1993.

ADDRESSES: Interested parties may submit comments related to the public interest of this exchange to the Billings Resource Area office, 810 East Main, Billings, Montana 59105.

FOR FURTHER INFORMATION CONTACT: Jim Hetzer, Bureau of Land Management, Miles City District Office, P.O. Box 940, Miles City, MT, 59301, 406–232–4331.

SUPPLEMENTARY INFORMATION: Detailed information concerning the exchange is available at the Billings Resource Area office, 810 East Main, Billings, MT 59105.

Sandra E. Sacher,

Associate District Manager.

[FR Doc. 92–30609 Filed 12–16–92; 8:45 am]

BILLING CODE 4310–DN–M

[CO–070–03–7122–02–7410; C–50693]

Intent To Consider Amendment of the Grand Junction Resource Area Resource Management Plan, 1987

AGENCY: Bureau of Land Management, Department of the Interior.

ACTION: Notice of Intent to consider Amendment of the Grand Junction Resource Area Resource Management Plan, 1987, to address a proposed Withdrawal of public lands from mineral location and entry, and Notice of Public Comment Period to identify issues to be addressed in an Environmental Assessment on the proposed Amendment.

SUMMARY: Pursuant to section 102 of the National Environmental Policy Act of 1969, and sections 202 and 204 of the Federal Land Policy and Management Act of 1976, the Bureau of Land Management, Grand Junction Resource Area, will consider an amendment of the Grand Junction Resource Area Resource Management Plan, 1987, and will prepare an Environmental Assessment on the proposed Amendment.

SUPPLEMENTARY INFORMATION: The Plan Amendment and Environmental Assessment are being developed to consider a proposal by the U.S. Department of Transportation, Federal Aviation Administration, to withdraw from mineral location and entry the

following public lands comprising approximately 2,163.46 acres for 20 years.

Ute Principal Meridian, Colorado

T. 1 N., R. 1 E.
- Sec. 19, Lots 1 thru 4, E½W½, SE¼;
- Sec. 20, S½SW¼;
- Sec. 29, N½, N½SE¼, SE¼SE¼;
- Sec. 30, Lot 1, NE¼, NE¼NW¼;
- Sec. 32, NE¼NE¼.

T. 1 N., R. 1 W.
- Sec. 13, N½SW¼, SW¼SW¼, S½SE¼;
- Sec. 14, SE¼;
- Sec. 23, NE¼, N½NW¼;
- Sec. 24, NE¼, N½SE¼, SE¼SE¼.

This withdrawal would protect land adjacent to Walker Field Airport in Grand Junction, Colorado, in the interest of future airport development. The land would continue to be managed by the Bureau of Land Management. Written comments on the proposal will be accepted until January 19, 1993, at the address listed below. The purpose of the public comment period is to identify issues and accept comments, suggestions or objections on the proposed mineral withdrawal. An Environmental Assessment will be prepared to evaluate the issues raised during the amendment process. A Decision Record will be issued with the Environmental Assessment to document the proposed decision concerning the proposed Plan Amendment and Withdrawal following the public comment period.

FOR FURTHER INFORMATION: Additional information concerning this proposed Mineral Withdrawal and Amendment of the Grand Junction Resource Area Resource Management Plan, 1987, is available for review in the Bureau of Land Management, Grand Junction Resource Area Office, 2815 H Road, Grand Junction, Colorado 81506, or by contacting Robin Buchanan, Realty Specialist, at (303) 244–3028.

Richard Arcand,

Acting District Manager.

Idaho: Filing of Plats of Survey; ID

The plat of survey of the following described land was officially filed in the Idaho States Office, Bureau of Land Management, Boise, Idaho, effective 9 a.m., December 10, 1992.

The plat representing the dependent resurvey of portions of the subdivisional lines and the 1961–1968 adjustment of the 1878 meander lines of the right and left banks of the Snake River, subdivision of section 14, and the survey of portions of the 1991 meander lines of the right and left banks of the Snake River, Township 4 North, Range 37 East, Boise Meridian, Idaho, Group No. 816, was accepted December 8, 1992.

This survey was executed to meet certain administrative needs of this Bureau.

All inquiries concerning the survey of the above-described land must be sent to the Chief, Branch of Cadastral Survey, Idaho State Office, Bureau of Land Management, 3380 Americana Terrace, Boise, Idaho, 83706.

Dated: December 10, 1992.

Duane E. Olsen,

Chief Cadastral Surveyor for Idaho.

BILLING CODE 4310–GG–M

[UT–942–4210–06; U–0113225]

Proposed Continuation of Withdrawal; UT

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The U.S. Army Corps of Engineers proposes that a 1619.24-acre withdrawal for the White Sands Missile Range, Green River Launch Site continue for 20 years. The land would remain closed to surface entry and mining, but would be opened to mineral leasing.

DATES: Comments should be received by March 17, 1993.

ADDRESS: Comments should be sent to State Director, Utah State Office, P.O. Box 45155, Salt Lake City, Utah 84145–0155.

FOR FURTHER INFORMATION CONTACT: Randy Massey, BLM Utah State Office, (801) 539–4119.

SUPPLEMENTARY INFORMATION: The Corps of Engineers proposes that the existing land withdrawal made by Public Land Order 3279, dated December 7, 1963 be continued for 20 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714. The land is described as follows:

Salt Lake Meridian

T. 21 S., R. 16 E.,
- Sec. 13, S½SW¼;
- Sec. 14, SE¼SE¼;
- Sec. 22, S½NE¼;
- Sec. 23, NW¼NW¼, S½NW¼, NE¼ NE¼;
- Sec. 24, NE¼;

T. 21 S., R. 17 E.,
- Sec. 19, lots 2–4 incl., E½SW¼;
- Sec. 29, S½NW¼, SW¼, W½SE¼;
- Sec. 30, lot 3, N½NE¼, E½SW¼, S½ SE¼;
- Sec. 31, NE¼, NE¼NW¼, N½SW¼, SE¼ SE¼.

The areas described aggregate 1619.24 acres in Grand County.

The purpose of the withdrawal is to protect the Green River Launch Site, White Sands Missile Range, near Green River, Utah. The withdrawal presently segregates the land from settlement, sale, location, and entry, including location and entry under the mining laws, and also the mineral leasing laws. The site is proposed to be opened to mineral leasing.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawal continuation may present their views in writing to the Chief, Branch of Lands and Minerals Operations, Utah State Office.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will be prepared for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be continued, and, if so, for how long. The final determination on the continuation of the withdrawal will be published in the **Federal Register**. The existing withdrawal will continue until such final determination is made.

Ted Stephenson,

Chief, Branch of Lands and Minerals Operations.

INTERSTATE COMMERCE COMMISSION

Release of Waybill Data

The Commission has received a requests from the Association of American Railroads (AAR), Economics and Finance Department for permission to use certain data from the 1991 ICC Waybill Sample.

A copy of the request (WB027—12/2/92) may be obtained from the ICC Office of Economics.

The waybill sample contains confidential railroad and shipper data; therefore, if any parties object to this request, they should file their objections (an original and 2 copies) with the Director of the Commission's Office of Economics within 14 calendar days of the date of this notice. The rules for release of waybill data [Ex Parte 385 (Sub-No. 2)] are codified at 49 CFR 1244.8.

CSX Corp., Control, Chessie System, Inc. and Seaboard Coast Line Industries, Inc.; Norfolk Southern Corp. Control, Norfolk and Western Railway Co. and Southern Railway Co. (Arbitration Review)

AGENCY: Interstate Commerce Commission.

ACTION: Notice of reopening and request for comments; extension of comment due date.

SUMMARY: By decision served November 13, 1992 (57 FR 54104, November 16, 1992), the Commission sought public comment with regard to any issues in these cases that remain open for reconsideration in light of the Supreme Court's decision in *Norfolk & Western* v. *American Train Dispatchers*, ____U.S. ____111 S.Ct. 1156 (1991). By motion filed December 7, 1992, the Brotherhood of Railway Carmen (Carmen) requests a

60-day extension of the comment due date. Carmen states additional time is needed for new counsel to survey the record, relevant case law and statutes to prepare and present meaningful comments. Carmen states it has contacted interested parties and the American Train Dispatchers Association agrees to the 60-day request, but Norfolk and Western Railway Company, Southern Railway Company, and CSX Transportation, Inc., agree only to a 30-day extension. The full 60-day request is reasonable and will be granted.

DATES: Comments are due on March 1, 1993. Replies are due on April 2, 1993.

ADDRESSES: Send pleadings referring to Finance Docket Nos. 28905 (Sub-No. 22) and 29430 (Sub-No. 20) to: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 927–5660 [TDD for the hearing impaired: (202) 927–5721].

Decided: December 14, 1992.

By the Commission, Sidney L. Strickland, Jr., Secretary.

[Finance Docket No. 32201]

Southern Pacific Transportation Co.—Trackage Rights—Los Angeles County Transportation Commission; Notice of Exemption

Los Angeles County Transportation Commission (LACTC) has agreed to grant bridge and local trackage rights to Southern Pacific Transportation Company (SP) between: (1) LACTC milepost 482.05 at Alhambra Junction and LACTC milepost 414.42 at Palmdale Junction and (2) LACTC milepost 482.05 at Alhambra Junction (across the LAUPT Bridge) and LACTC milepost 482.30, a total distance of about 68.03 miles [1] in Los Angeles County, California. The exemption became effective on December 14, 1992. The parties state their intent to consummate the transaction on or after consummation of the transaction involved in Finance Docket No. 32199, Los Angeles County Transportation Commission—Acquisition Exemption—Southern Pacific Transportation Company.[2]

This notice is filed under 49 CFR 1180.2(d)(7). Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: Karl Morell, Taylor, Morell & Gitomer, Suite 210, 919 18th Street, NW., Washington, DC 20006.

As a condition to the use of this exemption, any employees adversely affected by the trackage rights will be protected pursuant to Norfolk and Western R. Co.—Trackage Rights—BN, 354 I.C.C. 605 (1978), as modified in Mendocino Coast Ry., Inc.—Lease and Operate, 360, I.C.C. 653 (1980).

Date: December 11, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

DEPARTMENT OF JUSTICE

Antitrust Division

Notice Pursuant to the National Cooperative Research Act of 1984—Network Management Forum

Notice is hereby given that, on October 27, 1992, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), the Network Management Forum, formerly known as OSI/Network Management Forum, ("the Forum") filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing additions to its membership. The additional notifications were filed for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, the identities of the additional parties to the venture are as follows: Network Managers (UK) Limited, Guilford, Surrey, England is a Corporate Member; GTE Federal Systems Division (formerly Contel), Chantilly, VA; Linx, N.M.S., Ltd., Crownhill, Milton Keynes, England; Netcomm Limited, Basildon, Essex, England; and Opening Technologies, McLean, VA are Associate Members; and Midland Bank, Sheffield, England, and U.S. Department of State (DTS–PO), Springfield, VA are Affiliate Members.

No other changes have been made, in either the membership or planned activity of the group research project. Membership in this group research project remains open, and the Forum intends to file additional written notifications disclosing all changes in membership.

On October 21, 1988, the Forum filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on December 8, 1988 (53 FR 49615).

The last notification was filed with the Department on August 10, 1992. A notice was published in the **Federal Register** pursuant to section 6(b) of the Act on October 8, 1992 (57 FR 46409).

Joseph H. Widmar,

Director of Operations, Antitrust Division.

National Cooperative Research; Smart House project

Notice is hereby given that, on October 5, 1992, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), Smart House, L.P., has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in membership of the Smart House Project ("the Project"). The notifications were filed for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

The following parties are now participating in the Project: The American Institute of Architecture Students, Washington, DC; Ameritech Services, Inc., Cleveland, OH; Bose Corporation, Framingham, MA; H–P Products, Louisville, OH; Westinghouse Electric Corporation, Linthicum, MD. The following change has been made in the membership of the Project: The Southern Company has replaced its subsidiary Georgia Power Company as a participant in the venture and will be representing itself and its subsidiaries (including Georgia Power Company, Alabama Power Company, Gulf Power

---

[1] The milepost do not total because of a change of milepost in the middle of the LAUPT bridge.

[2] By decision served December 15, 1992 in Finance Docket No. 32199, LACTC became a common carrier subject to the jurisdiction of the Interstate Commerce Commission (replacing SP as a common carrier) as to the trackage involved in this Finance Docket No. 32201. However, LACTC and SP dispute our jurisdiction over the transaction involved in Finance Docket No. 32199 and may subsequently petition to reopen that proceeding and dismiss it for lack of jurisdiction. If this is done, SP will no longer need a grant of trackage rights to be able to operate over the property involved in this Finance Docket No. 32201, and the parties will petition to reopen and dismiss the trackage rights involved herein.

Company, Savannah Electric & Power Company, and Mississippi Power Company). The following party is no longer involved in the Project: Polk Audio.

No other changes have been made in either the membership or planned activity of the Project. Participants of the Project are developing a coordinated home control and energy distribution system containing integral telecommunications and advanced safety features.

On June 14, 1985, the predecessor in interest to Smart House, L.P., filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on October 10, 1985 (50 FR 41428).

The last notifications was filed with the Department on July 1, 1992. A notice was published in the **Federal Register** pursuant to section 6(b) of the Act on July 29, 1992 (57 FR 33524).

Joseph H. Widmar,

Director of Operations, Antitrust Division.

Employment and Training Administration

[TA-W-27,575, TA-W-27,575A Louisiana, TA-W-27,575B Mississippi, TA-W-27,575C Texas]

Dailey Petroleum Services, Inc., Conroe, TX and Dailey Directional Drilling, Revised Determinations on Reconsideration

On November 2, 1992, the Department issued an Affirmative Determination Regarding Application for Reconsideration for workers and former workers of Dailey Directional Drilling operating in Louisiana, Mississippi and Texas and Dailey Petroleum Services, Inc., in Conroe, Texas. This notice will soon be published in the **Federal Register**.

One of the petitioners states that the Department did not investigate Dailey Directional Drilling which was mentioned on the initial petition dated July 13, 1992. Dailey Directional Drilling operates offshore in the Gulf and in Texas, Louisiana and Mississippi.

Findings on reconsideration show that the preponderant activity for workers at Dailey Directional Drilling is on new wells and that drilling revenue decreased in the first six months of fiscal year (FY) 1992 compared to the same period in FY 1991. Other findings on reconsideration show substantial worker separations at Dailey Directional Drilling in 1991 and 1992.

U.S. imports of crude oil and natural gas increased absolutely and relative to domestic shipments and consumption in the period September 1991 through August 1992 compared to the year earlier.

Exploration and drilling activity in the crude oil and natural gas industry is particularly sensitive to the level of imports and changes in the price level of crude oil. The impact of crude oil imports and reduced price levels has resulted in sharply declining U.S. exploration and drilling activity.

With respect to the workers at Dailey Petroleum Service, the Department's denial was based on the fact that the workers do not produce an article within the meaning of Section 223(3) of the Act. This was fully addressed in the Department's negative determination.

Other findings on reconsideration show that Dailey Petroleum Service (DPS) does not rent drilling rig tools to Dailey Directional Drilling but rents instead to third parties or unaffiliated firms. Accordingly, there is no basis for certifying workers at DPS since their reduced revenues did not come from a reduced demand for their services from Dailey Directional Drilling.

Conclusion

After careful review of the additional facts obtained on reconsideration, it is concluded that increased imports of articles like or directly competitive with crude oil produced at Dailey Directional Drilling in Texas, Louisiana and Mississippi contributed importantly to the decline in sales or production and to the total or partial separation of workers at Dailey Directional Drilling. In accordance with the provisions of the Trade Act of 1974, I make the following revised determination:

All workers of Dailey Directional Drilling in Texas, Louisiana and Mississippi and operating offshore in the Gulf of Mexico who became totally or partially separated from employment on or after July 13, 1991 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

It is further determined that the Department's negative determination for workers at Dailey Petroleum Services in Conroe, Texas be affirmed.

Signed at Washington, DC, this 9th day of December 1992.

Stephen A. Wandner,

Deputy Director, Office of Legislation & Actuarial Services, Unemployment Insurance Service.

BILLING CODE 4510-30-M

[TA-W-27,919, et al.]

Hercules Offshore Corp., Houston, TX, et al.; Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

Operating at various other places in TA-W-27,919A Texas and Offshore Texas, TA-W-27,919B Louisiana and Offshore Louisiana

In accordance with section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on November 17, 1992, applicable to all workers of Hercules Offshore Corporation, Houston, Texas. The notice was published in the **Federal Register** on December 3, 1992 (57 FR 57242).

At the request of one of the petitioners, the Department reviewed the certification for workers of Hercules Offshore Corporation. New information received from the company shows that Hercules worked in various other places in Texas and Louisiana and offshore Texas and Louisiana.

The intent of the Department's certification is to include all workers of Hercules Offshore Corporation who were affected by increased imports of crude oil and natural gas.

The amended notice applicable to TA-W-27,919 is hereby issued as follows:

All workers of Hercules Offshore Corporation, Houston, Texas and in various other places in Texas and Louisiana and offshore in the Gulf of Mexico who became totally or partially separated from employment on or after October 14, 1991 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, DC, this 9th day of December 1992.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance

BILLING CODE 4510-30-M

Pension and Welfare Benefits Administration

[Application No. D-8958, et al.]

Proposed Exemptions; California Association of Hospitals and Health Systems Retirement and Tax Savings Investment Plan, et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Notice of Proposed Exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restriction of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1986 (the Code).

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or request for a hearing on the pending exemptions, unless otherwise stated in the Notice of Proposed Exemption, within 45 days from the date of publication of this **Federal Register** Notice. Comments and request for a hearing should state: (1) The name, address, and telephone number of the person making the comment or request, and (2) the nature of the person's interest in the exemption and the manner in which the person would be adversely affected by the exemption. A request for a hearing must also state the issues to be addressed and include a general description of the evidence to be presented at the hearing. A request for a hearing must also state the issues to be addressed and include a general description of the evidence to be presented at the hearing.

ADDRESSES: All written comments and request for a hearing (at least three copies) should be sent to the Pension and Welfare Benefits Administration, Office of Exemption Determinations, room N-5649, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210. Attention: Application No. stated in each Notice of Proposed Exemption. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefits Administration, U.S. Department of Labor, room N-5507, 200 Constitution Avenue, NW., Washington, DC 20210.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the **Federal Register**. Such notice shall include a copy of the notice of proposed exemption as published in the **Federal Register** and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of proposed exemption are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

California Association of Hospitals and Health Systems, Retirement and Tax Savings Investment Plan (the Plan), Located in Sacramento, CA

[Application No. D-8958]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR Part 2570, Subpart B (55 FR 32836, August 10, 1990). If the exemption is granted, the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) shall not apply to the proposed sale by the Plan to the California Association of Hospitals and Health Systems (CAHHS), the Plan sponsor, of its residual investment in a trust rate account pool (the Trust Rate Account Pool) comprised of a portfolio of student loans that had been established by the Plan's former trustee, provided: (1) The sale is a one-time transaction for cash; (2) the Plan is not required to pay any fees or commissions in connection therewith; (3) the Plan receives an amount which is not less than the balance of its residual interest in the Trust Rate Account Pool; (4) the Plan receives interest on its total investment in the Trust Rate Account Pool from May 19, 1989 to the date the exempted transaction is consummated; and (5) any additional amounts that CAHHS receives from the Superintendent of Banks of the State of California (the Superintendent) which are above the Plan's investment of $76,988 in the Trust Rate Account Pool, will be rebated to the Plan.

Summary of Facts and Representations

1. The Plan is a defined contribution plan with 108 participants and assets having a total fair market value of $1,541,601 as of August 31, 1991.[1] The trustee of the Plan is Merrill Lynch Trust Company (MLTC) of Somerset, New Jersey. MLTC has served as a directed trustee for the Plan since May 1989. Investment decisions for the Plan are made by five individuals, each of whom is a member of the Pension Advisory Committee established pursuant to the terms of the Plan. The Pension Advisory Committee is responsible for directing all investments of the Plan's assets.

2. CAHHS, formerly California Hospital Association, is a domestic, non-profit California corporation which is tax exempt under section 501(c)(6) of the Code. CAHHS was organized in 1935 as a trade association representing the interests of the hospital industry in California.

3. First Independent Trust Company (FITCO) of Sacramento, California, which is not affiliated with MLTC, is the former trustee of the Plan. FITCO served in this capacity from January 1, 1989 until May 1, 1989 when it was replaced by MLTC. On May 19, 1989, FITCO became insolvent and its assets were seized by the Superintendent.

4. Among the assets of the Plan is its residual investment in a trust rate account pool established by FITCO and consisting of a portfolio of student loans. The loans comprising the portfolio were either originated by FITCO or purchased by FITCO from other lenders. It is represented that the borrowers were unrelated persons. The amount of the Plan's investment in the

[1] It is represented that the Plan is not a governmental plan within the meaning of section 3(32) of Act.

Trust Rate Account Pool totaled $76,988. Of this amount, $43,044 represented employer contributions and $33,944 represented employee contributions.[2]

5. The Plan's investment in the Trust Rate Account Pool was made at the direction of the Pension Advisory Committee, on or about January 1989 upon FITCO's advice.[3] FITCO invested Plan funds, which it held in Trust, in the Trust Rate Account Pool and it established an account in the Plan's name. The Trust Rate Account Pool earned interest at the rate of 1 percent to 1¼ percent over the 91 day United States Treasury Bill rate.[4] Loans in the Trust Rate Account Pool were also purportedly guaranteed by the Government of the United States or by state or private nonprofit guarantee agencies which were, in turn, reinsured by the United States Government. The guarantee was to apply as long as Federal regulations governing the administration of the loans were followed by FITCO.

6. It was anticipated the Plan could terminate its investment in the Trust Rate Account Pool at any time or at least within one or two banking days as required by the Trust Rate Report. On May 3, 1989, CAHHS requested a withdrawal of all assets in the Plan's account and a transfer of the funds to MLTC. However, on May 19, 1989, the Superintendent seized the assets of FITCO including those held in the Trust Rate Account Pool which had a total balance of $29,589,000. FITCO was also closed and liquidation proceedings were begun.

7. The Superintendent has recovered approximately 83 percent of the outstanding principal balance of the Trust Rate Account Pool. However, it has been unable to return the full amount of the investment or sell the student loans on the secondary market because some of the student loans were either defaulted upon by their borrowers or they were not properly guaranteed due to their mishandling by FITCO. In addition, there is a dispute between the Superintendent and the Federal Government as to which of the student loans were properly guaranteed so full payment has not been made to investors. Further, by letter dated April 20, 1992, the Superintendent indicates that losses have resulted and will continue to occur because some loans are "uninsured and uncollectible," "undocumented" or "not guaranteed." Although the Superintendent has been selling or attempting to sell the assets of FITCO since its liquidation, the Superintendent represents that the sales price of the student loans that are sold may have to be discounted in order to attract a buyer.

8. To date, the Superintendent has transferred $65,612 (excluding interest) to the Plan as a partial return of the Plan's original investment of $76,988 in FITCO. The Superintendent has not charged investors any costs relating to the liquidation or the servicing of assets in the Trust Rate Account Pool. It is the intent of the Superintendent not to pass on any of these costs in the future, even in the event that more than 100 percent of the original principal is recovered.

The Plan's distributions have been placed in a separate account with MLTC and they have earned $3,922 in interest through February 29, 1992.[5] The Superintendent expects to collect and distribute additional assets to FITCO investors but it does not expect that these investors will receive the full value of their investments for the reasons cited above.

9. To assist the Plan in recovering the balance of funds that are outstanding from its FITCO investment, CAHHS proposes to purchase the Plan's remaining investment in the Trust Rate Account Pool from the Plan for $11,376 [representing the total contributions to FITCO of $76,988 minus the $65,612 (excluding interest) which MLTC has recovered from the Superintendent]. The consideration will be paid by CAHHS in cash and the Plan will not be required to pay any fees or commissions. In addition, CAHHS proposes to pay the Plan interest calculated on the original contribution amount of $76,988 from May 19, 1989 to the date the exempted transaction is consummated. CAHHS will base its interest payments to the Plan on the Trust Rate Income Formula as described above in paragraph number 5 and the accompanying footnote. If CAHHS receives any additional payments from the Superintendent which are above the Plan's investment of $76,988 in the Trust Rate Account Pool, such amounts will be rebated to the Plan. All proceeds from the sale will be allocated among the accounts of the participants and beneficiaries of the Plan.

10. In summary, it is represented that the proposed transaction will satisfy the statutory criteria for an exemption under section 408(a) of the Act because: (a) Sale will be a one-time transaction for cash; (b) the Plan will not be required to pay any fees or commissions in connection therewith; (c) the Plan will receive an amount which will not be less than the balance of the residual interest; (d) the Plan will receive interest on its total investment in the Trust Rate Account Pool from May 19, 1989 to the date the exempted transaction is consummated; and (e) any additional amounts that CAHHS receives from the Superintendent which are above the Plan's investment of $76,988 in the Trust Rate Account Pool, will be rebated to the Plan.

Massachusetts Mutual Life Insurance Company (MassMutual) Located in Boston, MA

[Application No. D–9057]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990). If the exemption is granted the restrictions of sections 406(a) and 406(b) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) of the Code, shall not apply to the proposed arrangement, over a five year period, whereby MassMutual's general account (the General Account) will extend credit to unrelated third parties who purchase one or more parcels of real property (the Properties) from the MassMutual Real Estate Pooled Separate Account, SIA–R (the Separate Account), a separate account maintained by MassMutual on behalf of employee benefit plans (the

[2] The applicants represent that the Plan's original investment in FITCO's Trust Rate Account Pool is covered by the statutory exemptive relief that is available under section 408(b)(8) of the Act. The Department expresses no opinion herein on whether the investment satisfies the terms and conditions of section 408(b)(8) of the Act.

[3] The Department notes that the decision, by the Pension Advisory Committee, to invest Plan assets in FITCO's Trust Rate Account Pool is governed by the fiduciary responsibility requirements of Part 4 of Title I of the Act. In this proposed exemption, the Department is not proposing relief for any violations of Part 4 which may have arisen as a result of the Plan's investment in the Trust Rate Account Pool.

[4] According to the applicants, the rate of return promised by FITCO is specified in the Trust Rate Report. Page 3 of the report states that Trust Rate income will be computed quarterly and will be calculated as the average of the 91 day Treasury Bill auctions during the calendar quarter, rounded up to the next highest one-quarter percent, plus one percent. The applicants note that if the average Treasury Bill rate for a given quarter is 6.06 percent, the Trust Rate income for that quarter will be 7.25 percent (6.06 percent rounded up to 6.25 percent plus 1 percent).

[5] Other than interest generated from the distributions, the Plan has received no interest income from FITCO in connection with its investment in the Trust Rate Account Pool.

Plans); provided that the following conditions are satisfied:

(A) All conditions of the transactions are no less favorable to the Separate Account than those which the Separate Account could obtain in arm's-length transactions not involving the General Account;

(B) The Separate Account receives a purchase price for each Property which is not less than the fair market value of that Property on the date of sale;

(C) The transactions do not involve sales of any of the Properties to any parties in interest with respect to the Plans participating in the Separate Account;

(D) No commissions, fees, or expenses in connection with the transaction are paid to MassMutual or any of its affiliates, other than loan origination fees of no more than .25 percent per transaction;

(E) The General Account does not charge or receive interest in excess of the fair market rate of interest;

(F) The interests of the Separate Account in the transactions are represented by one of the following fiduciaries (the Fiduciaries): Joseph J. Blake Separate Account Associates of Los Angeles, California; Realty Advisory Group of Virginia Beach, Virginia; Realty Consultants, Ltd. of Chicago, Illinois; Trahan Separate Account Partners of Houston, Texas; or American Appraisal Associates of Boston, Massachusetts;

(G) No transaction involving General Account financing of a Property sale shall occur until the appropriate Fiduciary has approved the transaction and completed a written report relating its findings with respect to the transaction (the Report); and

(H) The Report is made available for inspection by any duly authorized representative of the Department, the Internal Revenue Service (the Service) and any fiduciary of a Plan participating in the Separate Account, for a period of no less than six years from the date of the transaction.

Temporary Nature of the Exemption

This exemption, if granted, will expire five years from the date on which the final grant of the exemption is published in the **Federal Register**.

Summary of Facts and Representations

1. MassMutual is a mutual life insurance company organized under the laws of the Commonwealth of Massachusetts, with total assets of over $39.3 billion as of December 31, 1991. Among the investment activities of MassMutual are real estate mortgage investments and equity real estate investments. MassMutual represents that it holds more than $5 billion in real estate investments under management for its own General Account and for others, including employee benefit plans covered by the Act (the Plans). In the ordinary course of its business, MassMutual performs a wide variety of services for Plans, including administration and investment services.

2. MassMutual represents that the Separate Account is a pooled fund, as described in regulations of the Department, at 29 CFR 2570.31(g). MassMutual established the Separate Account on October 1, 1981 as a vehicle for Plan fiduciaries to invest Plan assets in real property. The Separate Account invests primarily in equity ownership of income-producing properties. Participation in the Separate Account is available only to qualified pension, profit-sharing, and annuity Plans. The assets held by MassMutual on behalf of the Separate Account consist of equity interests in a geographically diverse portfolio of nine commercial properties (the Properties) ranging in size from 32,000 to 131,000 square feet. As of March 31, 1992, the Separate Account had total assets valued at $39,943,638, consisting of the Properties, valued at $39,515,688, and $427,950 in cash.

3. Every Plan which invests in the Separate Account (the Invested Plans) enters into a group annuity contract (the Contract) with MassMutual, under which the Invested Plans deposit monies for investment in the Separate Account. MassMutual acts as a fiduciary with respect to the Invested Plans' assets invested in the Separate Account. Each Invested Plan has the right under the Contract to withdraw all or any portion of its investments in the Separate Account. As of April 16, 1992, all Invested Plans had requested withdrawal of all investments in the Separate Account. MassMutual represents that at the time of the establishment of the Separate Account it was anticipated that any withdrawal requests could be satisfied from ongoing cash investments by Plans, income streams from properties held by the Separate Account, or sales of the Properties by the Separate Account to unrelated parties. In recent years, however, as regional and national real estate markets have deteriorated, the Separate Account has not received sufficient cash to provide the necessary liquidity to honor withdrawal requests.

4. MassMutual is proceeding with efforts to sell the Properties in order to provide the cash needed to honor the withdrawal requests of the Invested Plans. MassMutual maintains, however, that a major impediment to the sales of the Properties is the lack of available financing to prospective buyers. MassMutual represents that the limited availability of financing and the magnitude of the outstanding requests for withdrawals from the Separate Account are factors in MassMutual's conclusion that it should provide more active assistance to prospective buyers of the Properties. Accordingly, MassMutual proposes to utilize its General Account to finance the purchases of the Properties by unrelated buyers, and is requesting an exemption for such transactions under the terms and conditions described herein.

5. It is proposed that the General Account will provide the financing to enable the purchase by unrelated third parties of one or more of the Properties from the Separate Account, with the purchase price paid for each Property negotiated at arm's length between the Separate Account and the purchaser. As part of the marketing of the Properties, prospective buyers will be notified that market-rate financing is available to qualified buyers through MassMutual's General Account. The purchase price for each Property, in any sale financed by the General Account, will be no less than the fair market value of the subject Property at the time of the sale, and the interest to be charged by the General Account for the financing will not be in excess of the prevailing market rate of interest. The proposed exemption will apply only to transactions in which the purchasers of the Properties are third parties who are not parties in interest with respect to any of the Plans. All terms of the transaction will be reviewed in advance by an independent fiduciary (discussed below) to ensure compliance with these requirements.

6. In each Property sale transaction, in which financing is to be provided by the General Account, an independent fiduciary (the Fiduciary) will act in a fiduciary capacity on behalf of the Separate Account pursuant to a written agreement in which the Fiduciary acknowledges its status as a fiduciary under the Act, and its responsibilities and liabilities as such. As a condition of each such transaction, prior to the transaction, the Fiduciary must approve the proposed transaction and complete a written report (the Report) relating the Fiduciary's findings with respect to certain required determinations, described below, which the Fiduciary must make concerning the subject transaction. The Fiduciary in each transaction will be the independent professional real property appraiser which historically has represented the interests of the Separate Account for appraisal and management purposes

with respect to each Property. The Fiduciaries, and the Separate Account's Property for which each has acted as appraiser and will act as Fiduciary, are described as follows:

(a) Joseph J. Blake Separate Account Associates in Los Angeles, CA: Hycor Biomedical, Powdermill Plaza, and Cobblestone Village in Los Angeles;

(b) Realty Advisory Group in Virginia Beach, Virginia: Comptek Office Building in Virginia Beach;

(c) Realty Consultants, Ltd. in Chicago, Illinois: Finley Business Center and Kennicott Industrial in Chicago;

(d) Trahan Separate Account Partners in Houston, Texas: Perimeter Center and Century Center in Houston;

(e) American Appraisal Associates in Boston, Massachusetts: Union Hill Residence Inn in Boston.

MassMutual represents that the Fiduciaries are highly qualified as appraisers, with broad experience in regional and national markets involving a variety of clients. MassMutual represents that the Fiduciaries are independent of MassMutual, with no ownership interests in MassMutual, and that MassMutual has no ownership interests in any of the Fiduciaries. MassMutual represents that each Fiduciary's business with MassMutual has represented less than one percent of each Fiduciary's total billings for 1989, 1990 and 1991, except for Realty Consultants, Ltd., whose business with MassMutual represented approximately 1.5 percent of that firm's total billings for those years. MassMutual maintains that these firms are highly qualified, and the best available, to evaluate the Properties and the proposed terms of any sales and financing thereof, due to their familiarity with the Properties.

7. With respect to the Property under its authority, each Fiduciary will be responsible for evaluating the proposed sales price negotiated between the Separate Account and the buyer of the Property, including valuations made with respect thereto, the terms of the financing offered by the General Account, and the fees or other costs associated with the transaction. The Fiduciary is required specifically to evaluate the interest rate provisions of the General Account's proposed financing of the Property sale, to ensure that the General Account will not charge interest in excess of the market interest rate, and to determine that the interest rate proposed by the General Account does not adversely affect the sale price for the Property. No Property sale involving General Account financing will occur until the Fiduciary has approved of the proposed transaction and completed the Report relating its findings with respect to each of the aforementioned determinations, and the Report will remain available for inspection by any duly authorized representative of the Department, the Service, and any fiduciary of an Invested Plan, for a period of no less than six years from the date of the transaction. More specifically, each proposed Property sale involving General Account financing will require the following determinations with respect to the proposed transaction, to be included in the Report:

(a) *Sales price:* The Fiduciary will review the valuation of the Property and the proposed sales price negotiated between the Separate Account and the prospective unrelated buyer. No sale will be made until the Fiduciary has concluded that the valuation of the Property is consistent with current market values, that the sale price is in the best interests of the participants and beneficiaries of the Invested Plans, that such price is no less than the fair market value of the Property, and that the price has not been adversely affected by the financing of the transaction by the General Account.

(b) *Financing terms:* The Fiduciary will evaluate the terms of the financing offered by the General Account and must determine that the interest rate is no greater than the prevailing market rate of interest, taking into account the particular loan amount, loan term, likely holding period, and the type of Property. In analyzing the interest rate, the Fiduciary will refer to commercial mortgages for comparable properties with comparable holding periods. The Fiduciary is also required to find that the terms of the financing do not unduly favor the General Account.

(c) *Evaluation of fees:* The Fiduciary will evaluate all fees, charges, and expenses paid to or by the Separate Account in connection with the proposed transaction. No fees, commissions, or expenses (other than a loan origination fee, or "points", discussed below) related to any Property sale financed by the General Account will be paid to MassMutual or any of its affiliates. Any fees, commissions and other expenses arising from the transaction will be payable only to parties unrelated to MassMutual and the Fiduciary. The Fiduciary will also determine that the "points" charged, if any, by the General Account to the borrower, as discussed below, do not exceed amounts charged by commercial lenders in comparable transactions. The Fiduciary will evaluate all fees payable by the Separate Account, including broker's fees, legal fees, recording taxes, title fees, and miscellaneous fees required to be paid by state or municipal law. The Fiduciary's findings regarding these fees and charges will be included in the Report. With respect to such fees and charges, the Fiduciary must find that the proposed sale transaction involving General Account financing is as favorable to the Separate Account as the Separate Account could obtain in an arm's-length transaction with an unrelated party.

8. The General Account may charge the borrower a loan origination fee (the Points) of no more than one quarter of one percent of the loan amount, payable by the borrower to the General Account at the time of closing. MassMutual represents that the amount of Points proposed to be charged does not exceed the points charged by commercial lenders in comparable transactions. The Fiduciary is required in each transaction to determine that the Points charged, if any, by the General Account do not exceed the points charged by commercial lenders in comparable transactions.

9. MassMutual represents that all terms and conditions of the General Account's financing of any Property sale will be in accordance with MassMutual's standard real estate lending practices, including the following details: A market rate of interest, a loan-to-value ratio of 75 percent, a loan duration of three to ten years, a duly-filed security interest in the collateral property, provisions making the loan non-recourse as to the borrower, a first-lien position, cash equity of at least 25 percent, mortgage insurance, and restrictions on assignments of leases.

10. In summary, the applicant represents that the proposed transactions satisfy the criteria of section 408(a) of the Act for the following reasons: (1) The requested exemption will involve one-time transactions for cash, which will be utilized by the Separate Account to satisfy the outstanding withdrawal requests of Invested Plans; (2) The Separate Account will be represented in each transaction by one of the Fiduciaries, professional real property appraisal firms experienced with the Properties, which will review and evaluate all terms and conditions of the transactions to ensure compliance with the terms of the requested exemption; (3) Each transaction will require the respective Fiduciary's approval, based on written findings in the Report, prior to consummation; (4) The Separate Account will sell the Properties for their fair market values at the time of sale; (5) No fees, commissions or other charges will be payable to MassMutual or any of

its affiliates in connection with any transaction, except the Points limited to .25 percent per transaction, and (6) The General Account will receive no more than the prevailing market interest rate for providing the financing for any sale of the Properties.

Plan of Wachovia Corporation Diversified Funds for Retirement Trusts (the Wachovia Diversified Funds) and the South Carolina National Bank Collective Investment Fund for Corporate Employee Benefit Trusts Declaration of Trusts (the SCNB Collective Investment Fund) Located in Winston-Salem, NC and Columbia, SC, Respectively

[Application Nos. D–9143 and D–9144, respectively]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990). If the exemption is granted, the restrictions of section 406(b)(2) of the Act shall not apply to: (1) The merger of the SCNB Short Maturity Bond Fund (the SCNB Bond Fund) into the Wachovia Short-Term Bond Fund (the Wachovia Bond Fund) (2) the merger of the SCNB Managed Guaranteed Investment Contract Fund (the Managed GIC Fund) into the Wachovia Guaranteed Investment Contract Fund (the Wachovia GIC Fund), or (3) the merger of the SCNB Growth Stock Fund (the Growth Stock Fund) into the SCNB Stock Fund (the Stock Fund).[6]

The proposed exemption is conditioned on the following requirements:

(1) Upon completion of the merger of the SCNB Bond Fund into the Wachovia Bond Fund, the Managed GIC Fund into the Wachovia GIC Fund and SCNB's Growth Stock Fund into its Stock Fund, the aggregate fair market value of the interest of an employee benefit plan (the Plan) participating in the transferee Fund immediately following the merger, together with any cash received in lieu of fractional units in the transferee Fund, equals the aggregate fair market value of such Plan's interest in the transferor Fund immediately before the merger.

[6] For purposes of this proposed exemption, the Funds described herein are collectively referred to as the Funds.

(2) Neither Wachovia Bank of North Carolina, N.A. (Wachovia), South Carolina National Bank (SCNB) nor any of their affiliates receives a fee or commission in connection with the mergers.

(3) The assets of each participating Plan are invested in the same type of investments both before and after the proposed merger.

Summary of Facts and Representations

1. Wachovia and SCNB are national banking associations and members of an "affiliated group" as defined in section 1504 of the Code. Wachovia is the principal subsidiary of Wachovia Corporation of North Carolina, a bank holding company incorporated under the laws of North Carolina. SCNB is the principal subsidiary of South Carolina National Corporation, a bank holding company incorporated under the laws of South Carolina. The Wachovia Corporation of North Carolina and South Carolina National Corporation are the principal subsidiaries of the Wachovia Corporation. The Wachovia Corporation of North Carolina and South Carolina National Corporation are the principal subsidiaries of the Wachovia Corporation. These entities are also bank holding companies registered with the Board of Governors of the Federal Reserve System.

2. The Wachovia Diversified Funds and the SCNB Collective Investment Fund, which are trusteed by Wachovia and SCNB, respectively, are common funds maintained for the collective investment of monies contributed thereto by pension, profit sharing or stock bonus plans which are exempt from Federal income taxation under section 501(a) of the Code by reason of qualifying under section 401(a) of the Code.

3. Both the Wachovia Diversified Funds and the SCNB Collective Investment Fund have short-term bond funds (the Bond Funds) organized thereunder with each having substantially identical investment objectives and investments. In the case of the Wachovia Diversified Funds, the Bond Fund is called the "Wachovia Short-Term Bond Fund." In the case of the SCNB Collective Investment Fund, the Bond Fund is known as the "SCNB Short Maturity Bond Fund." The aggregate fair market value of the Bond Funds as of February 28, 1992 and the number of Plans participating therein as of December 31, 1991 are as follows:

Bond funds	Plans	Total assets
Wachovia Bond Fund	179	$119,739,400
SCNB Bond Fund	64	26,220,930

4. Both the Wachovia Diversified Funds and SCNB Collective Investment Fund also have guaranteed investment contract funds (the GIC Funds) organized thereunder. In the case of the Wachovia Diversified Funds, the GIC Fund is referred to as the "Wachovia GIC Fund." With respect to the SCNB Collective Investment Fund, the GIC Fund is called the "Managed GIC Fund." Both GIC Funds have substantially identical investment objectives and the assets of each are invested in similar types of guaranteed investment contracts. The approximate fair market value of the assets of the GIC Funds as of February 28, 1992 and the number of Plans participating therein as of December 31, 1991 are as follows:

GIC funds	Plans	Total assets
Wachovia GIC Fund	127	$119,244,968
Managed GIC Fund	39	19,339,655

5. In addition to its Bond and GIC Funds, the SCNB Collective Investment Fund has two equity funds. These Funds are referred to herein as the "Growth Stock Fund" and the "Stock Fund." The Growth Stock Fund and the Stock Fund (collectively, the SCNB Stock Funds) have substantially the same investment objectives and investments. The aggregate fair market value of assets in the SCNB's Stock Funds as of February 28, 1992 and the number of Plans participating therein as of December 31, 1991 are as follows:

SCNB stock funds	Plans	Total assets
Growth Stock Fund	109	$8,403,842
Stock Fund	152	73,945,470

6. To improve administration of the Bond and GIC Funds and thereby improve service to Plans participating therein, Wachovia and SCNB propose to merge the Bond Funds and the GIC Funds such that the two surviving Funds will be the Wachovia Bond Fund and the Wachovia GIC Fund. Similarly, to improve the administration of its Stock Funds, SCNB proposes to merge the Growth Stock Fund and the Stock Fund such that the Stock Fund will be the surviving Fund. Accordingly, an administrative exemption is also requested from the Department.

7. The proposed mergers will be accomplished as follows:

a. The assets of the Funds (including all accrued interest and, in the case of the Stock Fund, all accrued income)

will be valued as of the merger date (the Merger Date) which will be the date declared by Wachovia and SCNB following receipt of the exemptive relief requested herein.

b. As of the Merger Date, SCNB will transfer the assets of the SCNB Bond Fund and the assets of the Managed GIC Fund to Wachovia, as trustee. In addition, SCNB will transfer assets from its Growth Stock Fund to its Stock Fund.

c. The transferred assets will be commingled for investment purposes following the Merger Date with the assets of the Wachovia Short-Term Bond Fund and the Wachovia GIC Fund. As such, all income earned in the transferor Bond, GIC and Growth Stock Funds will be deemed to have been earned in the transferee Bond, GIC or Stock Funds.

d. The participating Plans in the SCNB Bond Fund will become participating Plans in the Wachovia Bond Fund. Similarly, the participating Plans in the Managed GIC Fund will become participating Plans in the Wachovia GIC Fund. Also, as of the Merger Date, the participating Plans in the Growth Stock Fund of SCNB will become participating Plans in the Stock Fund.

e. The SCNB Bond Fund, Managed GIC Fund or Growth Stock Fund will have allocated to it as of the Merger Date, units in the Wachovia Bond Fund, Wachovia GIC Fund or Stock Fund. Such units will represent the fair market value of the assets transferred from the applicable Fund. In addition, each participating Plan involved in the applicable transferor Fund, immediately preceding the merger Date, will have allocated to it as of the Merger Date, the same proportion of units in the transferee Fund equal to the proportion of the units it had in the transferor Fund immediately preceding the merger. However, no fractional units of participation in the Wachovia Bond Fund, the Wachovia GIC Fund or the Stock Fund will be issued in the merger.

f. The Wachovia Bond Fund, the Wachovia GIC Fund and the Stock Fund will pay cash equal to the fair market value of any such fractional unit to which a participating Plan in the SCNB Bond Fund, the Managed GIC Fund or the Growth Stock Fund would otherwise have been entitled. However, neither Wachovia, SCNB nor their affiliates will receive a fee or commission in connection with the mergers.

8. In summary, it is represented that the proposed transactions will satisfy the statutory criteria for an exemption under section 408(a) of the Act because: (a) The fair market value of the interest of the Plans participating in the affected Funds will remain unchanged as a result of the proposed mergers, (b) neither Wachovia, SCNB or any of their affiliates will receive a fee or commission in connection with the proposed mergers, (c) the assets of each participating Plan will be invested in the same type of investment both before and after the proposed merger, and (d) the proposed mergers will result in greater operational efficiencies and economies of scale as well as greater opportunities for investment diversification.

FOR FURTHER INFORMATION CONTACT: Ms. Jan D. Broady of the Department (202) 219–8881. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest of disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(b) of the act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan;

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 11th day of December, 1992.

Ivan Strasfeld,

Director of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Grant of individual exemptions.

SUMMARY: This document contains exemptions issued by the Department of Labor (the Department) from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1986 (the Code).

Notices were published in the **Federal Register** of the pendency before the Department of proposals to grant such exemptions. The notices set forth a summary of facts and representations contained in each application for exemption and referred interested persons to the respective applications for a complete statement of the facts and representations. The applications have been available for public inspection at the Department in Washington, DC. The notices also invited interested persons to submit comments on the requested exemptions to the Department. In addition the notices stated that any interested person might submit a written request that a public hearing be held (where appropriate). The applicants have represented that they have complied with the requirements of the notification to interested persons. No public comments and no requests for a hearing, unless otherwise stated, were received by the Department.

The notices of proposed exemption were issued and the exemptions are being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

Statutory Findings

In accordance with section 408(a) of the Act and/or section 4975(c)(2) of the Code and the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990) and based upon the entire record, the Department makes the following findings:

(a) The exemptions are administratively feasible;

(b) They are in the interests of the plans and their participants and beneficiaries; and

(c) They are protective of the rights of the participants and beneficiaries of the plans.

J.J. Johnson & Associates Employees Profit Sharing Trust (the Plan), Located in Rochester, New York

[Prohibited Transaction Exemption 92–93; Exemption Application No. D–9067]

Exemption

The restrictions of sections 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the proposed payment by The Sear-Brown Group, Inc. (SB) of certain legal expenses incurred by the Plan, and the repayment of those expenses by the Plan to SB, provided the following conditions are met: (a) The Plan pays no interest or other expenses in connection with the transaction; (b) the Plan will reimburse SB for the expenses solely from the proceeds of any recovery awarded to the Plan in connection with the litigation (the Litigation); (c) to the extent the amount of the recovery, if any, is less than the amount of the legal expenses paid by SB, the Plan shall not be liable to SB for the difference.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption, refer to the notice of proposed exemption published on August 27, 1992 at 57 FR 38858.

WRITTEN COMMENTS AND HEARING REQUESTS: The Department received 16 comments and no hearing requests with respect to the proposed exemption. All of the commentators opposed the granting of the exemption. Among the reasons given for their opposition to the exemption were: (1) The Plan has nothing to gain from pursuing the Litigation; (2) the Litigation had been brought as a result of a personal vendetta against the Plan's original trustee, not because it has any merit; (3) the commentators do not want the payment of legal expenses to come out of Plan assets; and (4) the Litigation should never have been commenced, and the money the Plan already has expended on the Litigation has been wasted.

The applicant has responded to the comments submitted. The current trustees of the Plan represent that they brought the Litigation not out of personal animus against the defendant, but because they believe the Plan had been harmed, and they should seek to obtain a recovery for the Plan. With respect to the other comments, the applicant represents that the Plan and its participants and beneficiaries can only benefit from the granting of the proposed exemption. By permitting SB to pay the Litigation costs and be reimbursed by the Plan out of any recovery, the proposed exemption will enable the Plan to pursue an action that may result in the recovery of additional amounts for the Plan. However, if there is no recovery for the Plan, the Plan will have no obligation to reimburse SB. Thus, the proposed exemption gives the Plan the "upside" potential of obtaining a recovery, without exposure to the "downside" risk of having paid expenses without a recovery of additional amounts. The Plan, therefore, can only gain and cannot lose. Thus, the applicant represents that the proposed exemption will not adversely affect the Plan and should be granted.

The Department has considered the entire record, including the 16 comments submitted with respect to the proposed exemption and the response to the comments submitted by the applicant, and has determined to grant the exemption as proposed. The Department wishes to note, as it did in the proposed exemption, that it is expressing no opinion regarding the merits of the Litigation. In addition, the Department notes that the decision to expend Plan assets to commence the Litigation was a decision that is governed by the fiduciary responsibility requirements of part 4, subtitle B, title I of the Act. In this regard, the Department is granting no relief herein for any violations of part 4 of the Act which may have arisen as a result of the expenditure of $20,000 of the Plan's assets to commence the Litigation.

Norwood Clinic, Inc. Defined Benefit Plan (the Plan), Located in Birmingham, AL

[Prohibited Transaction Exemption 92–94; Exemption Application No. D–9181]

Exemption

The restrictions of sections 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the cash sale by the Plan of a group annuity contract (the GAC) to Norwood Clinic, Inc., a party in interest with respect to the Plan; provided that the following conditions are satisfied:

(1) The sale is a one-time transaction for cash;

(2) The Plan receives a purchase price for the GAC of no less than its fair market value as of the Distribution Date (described in the Notice of Proposed Exemption); and

(3) The Plan does not incur any costs or expenses related to the sale.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption, refer to the notice of proposed exemption published on October 22, 1992 at 57 FR 48247.

FOR FURTHER INFORMATION CONTACT: Ronald Willett of the Department, telephone (202) 219–8881. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401 (a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) These exemptions are supplemental to and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transactional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(3) The availability of these exemptions is subject to the express condition that the material facts and representations contained in each application accurately describes all

material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 11th day of December, 1992.

Ivan Strasfeld,

Director of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

NATIONAL INSTITUTE FOR LITERACY

Notice of Meeting

AGENCY: National Institute for Literacy Advisory Board Meeting.

ACTION: Notice of meeting.

SUMMARY: This Notice sets forth the schedule and proposed agenda of a forthcoming meeting of the National Institute for Literacy Advisory Board (Board). This notice also describes the function of the Board. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend the open portions of the meeting.

DATES: January 11, 1993 from 9 A.M. to 4 P.M., January 12, 1993 from 9 A.M. to 12 P.M.

ADDRESSES: National Institute for Literacy, 800 Connecticut Avenue, NW., suite 200, Washington, DC 20006.

FOR FURTHER INFORMATION CONTACT: Thomas R. Hill, Executive Officer, National Institute for Literacy, 800 Connecticut Avenue, NW., suite 200, Washington, DC 20006. Telephone (202) 632–1500.

SUPPLEMENTARY INFORMATION: The Board is established under Section 384 of the Adult Education Act, as amended by Title I of Public Law 102–73, the National Literacy Act of 1991. The Board consists of ten individuals appointed by the President with the advice and consent of the Senate. The Board is established to advise and make recommendations to the Interagency Group, composed of the Secretaries of Education, Labor, and Health and Human Services, which administers the National Institute for Literacy (Institute). The Interagency Group considers the Board's recommendations in planning the goals of the Institute and in the implementation of any programs to achieve the goals of the Institute. Specifically, the Board performs the following functions: (a) Makes recommendations concerning the appointment of the Director and the staff of the Institute; (b) provides independent advice on operation of the Institute; and (c) receives reports from the Interagency Group and the Director of the Institute.

In addition, the Institute consults with the Board on the award of fellowships.

The Board meeting is open to the public. The proposed agenda includes: Discussion of program priorities, recruitment process for the selection of the Institute Director, vision and mission of the Institute and organization structure of the Institute.

Records are kept of all Board proceedings and are available for public inspection at the National Institute for Literacy, 800 Connecticut Avenue, NW., suite 200, Washington, DC 20006 from 8:30 a.m. to 5 p.m.

Franmarie Kennedy-Keel,

Interim Director, National Institute for Literacy.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 35–25702]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

December 11, 1992.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by January 4, 1993, to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Mississippi Power & Light Co.

[70–7914]

Mississippi Power & Light Company ("MP&L"), P.O. Box 1640, Jackson, Mississippi 39215–1640, an electric public-utility subsidiary company of Entergy Corporation, a registered holding company, has filed a post-effective amendment under sections 6(a) and 7 of the Act and rule 50(a)(5) thereunder to its application-declaration filed under sections 6(a), 7, 9(a), 10, 12(c) and 12(e) of the Act and rules 42, 50, 50(a)(5), 62 and 65 thereunder.

By order dated December 19, 1991 (HCAR No. 25432) ("December 1991 Order"), MP&L was authorized, from January 1, 1992 through December 31, 1993, to acquire, in whole or in part, one or more series of MP&L's outstanding first mortgage bonds, general and refunding mortgage bonds, preferred stock, and/or pollution control

revenue bonds. The December 1991 Order reserved jurisdiction over MP&L's proposal, from January 1, 1992 through December 31, 1993, to: (1) Issue and sell up to $150 million aggregate principal amount of one or more new series of general and refunding mortgage bonds ("Bonds"); (2) issue and sell up to $37.5 million aggregate par value of preferred stock, cumulative, $100 par value, in one or more new series ("New Preferred"); (3) enter into transactions relating to the issuance and sale of up to $25 million of tax-exempt bonds, in one or more series; and (4) amend its Restated Articles of Incorporation, as amended, to establish a new class of preferred stock having no par value or a nominal par value.

By order dated October 20, 1992 (HCAR No. 25656) ("October 1992 Order"), MP&L was authorized to issue and sell $37.5 million aggregate par value of New Preferred by means of competitive bidding. The October 1992 Order reserved jurisdiction over MP&L's proposal ("Reversed Transactions") to, from January 1, 1992 through December 31, 1993: (1) Issue and sell up to $150 million aggregate principal amount of one or more new series of Bonds; (2) issue and sell up to $37.5 million aggregate par value of New Preferred by negotiated public offering or private placement and the granting of an exception from the competitive bidding requirements of rule 50; (3) enter into transactions relating to the issuance and sale of up to $25 million of tax-exempt bonds, in one or more series; and (4) amend its Restated Articles of Incorporation, as amended, to establish a new class of preferred stock having no par value or a nominal par value.

By order dated November 13, 1992 (HCAR No. 25675) ("November 1992 Order"), MP&L was authorized to issue and sell $65 million aggregate principal amount of two new series of Bonds ("New Bonds"), in each case by means of direct private placement. The New Bonds were issued and sold by MP&L on November 20, 1992. The November 1992 Order continued the reservation of jurisdiction over the Reversed Transactions.

NP&L now proposes to increase the principal amount of the Bonds remaining to be issued and sold by $150 million, to not more than $235 million ("Additional Bonds"), under the same terms and conditions as are currently applicable to the Bonds. In addition, MP&L requests that it be able to conduct preliminary negotiations with respect to the terms of any series of the Additional Bonds to be issued and sold by negotiated public offering or private placement pursuant to the exception under rule 50(a)(5) from the competitive bidding requirements of rule 50. It may do so.

Pennsylvania Electric Co.

[70–7923]

Pennsylvania Electric Company ("Penelec"), 1001 Broad Street, Johnstown, Pennsylvania 15907, an electric public-utility subsidiary company of General Public Utilities Corp., a registered holding company, has filed a post-effective amendment to its declaration under section 12(d) of the Act and Rule 44 thereunder.

By order dated February 5, 1992 (HCAR No. 25466) ("February 1992 Order"), Penelec was authorized to sell ("Sale") certain utility assets to Advanced Cast Products, Inc. ("Advanced"), a nonassociate company, for $140,000 in cash. Penelec has not yet completed the Sale, and the authorization under the February 1992 Order has expired. Penelec now proposes to consummate the Sale on or before June 30, 1993.

Penelec expects to apply the proceeds of the proposed sale to general corporate purposes. The assets consist of certain electric substation facilities and equipment located in Vernon Township, Crawford County, Pennsylvania ("Meadville Substation"). The Meadville Substation is situated on lands owned by Advanced and is operated solely to serve the electric service needs of Advanced. It is stated that the sale will enable Advanced to qualify for a more favorable electric service rate.

Penelec will sell the Meadville Substation pursuant to an October 1989 agreement ("Agreement") between Penelec and Advanced's predecessor in interest, Amcast Industrial Corporation ("Amcast"), also a nonassociate company. Amcast assigned the Agreement to Advanced on July 3, 1990.

Massachusetts Electric Co.

[70–8101]

Massachusetts Electric Company ("Mass Electric"), 25 Research Drive, Westborough, Massachusetts 01582, an electric public-utility subsidiary company of New England Electric System, a registered holding company, has filed a declaration under section 12(c) of the Act and Rule 42 thereunder.

Mass Electric proposes to redeem up to 350,000 shares ($35 million par value) of its preferred stock ("Cumulative Preferred Stock"), 7.84% Series at the then applicable redemption price, currently $103.25 per share, together with dividends accrued to the date of redemption.

By order dated October 30, 1992 (HCAR No. 25664) ("October Order"), Mass Electric was authorized to solicit proxies and obtain a vote of its shareholders in connection with a proposed amendment to its Articles of Organization and By-laws to allow for the issuance of additional shares of preferred stock at various par values. The 7.84% Series and 7.80% Series of Mass Electric's Cumulative Preferred Stock are now callable under the established terms of the preferred stock. At dividend rates below approximately 7%, it may become economical for Mass Electric to refinance this series with new preferred stock. It is estimated that if Mass Electric were to issue perpetual preferred stock in the current market, the rate would approximate 7¾%.

The Narragansett Electric Co.

[70–8103]

The Narragansett Electric Company ("Narragansett"), 280 Melrose Street, Providence, Rhode Island 02901, an electric public-utility subsidiary company of New England Electric System, a registered holding company, has filed a declaration under section 12(c) of the Act and rule 42 thereunder.

Narragansett proposes to redeem up to 200,000 shares ($10 million par value) of its preferred stock ("Cumulative Preferred Stock"), 8% Series at the currently applicable redemption price of $51.96 per share, together with dividends accrued to the date of redemption.

By order dated October 30, 1992 (HCAR No. 25664) ("October Order"), Narragansett was authorized to solicit proxies and obtain a vote of its shareholders in connection with a proposed amendment to its preferred stock preference provisions to allow for the issuance of additional shares of preferred stock at various par values. The 8% Series of Narragansett's Cumulative Preferred Stock is now callable under the established terms of the preferred stock. At dividend rates below approximately 7.25%, it may become economical for Narragansett to refinance this series with new preferred stock. It is estimated that if Narragansett were to issue perpetual preferred stock in the current market, the rate would approximate 7¾%.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 92–30648 Filed 12–16–92; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 34-31583; File No. SR-NASD-92-50]

Self-Regulatory Organizations; Notice of Proposed Rule Change by National Association of Securities Dealers, Inc. Relating to Excess Spread Parameters

December 9, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on November 24, 1992, the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the NASD. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The following is the full text of the proposed rule change to Part VI, Section 2 of Schedule D to the NASD By-Laws. Additions are in italics; deletions are in brackets.

Schedule D

* * *

Part VI

* * *

Sec. 2. Character of Quotations

* * *

(d) Excess Spreads. A market maker shall not enter quotations in [to the Nasdaq System] *Nasdaq or Consolidated Quotation Service (CQS) securities* that exceed the parameters for maximum allowable spread as *approved by the NASD Board of Governors and that* may be published from time to time by the Association. [*] *The maximum allowable spreads shall be 125 percent of the average of the three (3) narrowest market maker spreads in each security (if there are fewer than three (3) market makers in a security, the maximum allowable spread will be 125% of the average spread); provided however, that the maximum allowable spread shall never be less than 1/4 point.*

[*The following are the current maximum allowable spreads approved by the NASD Board of Governors.

MAXIMUM ALLOWABLE SPREADS

Average spread	Maximum allowable spread
⅛ or less	⅛
¼	⅜
⅜	⅝
½	¾
⅝	⅞
¾	1

II. Self-Regulatory Organization's Statement of the Purpose of and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in Sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The Association is proposing an amendment to Part VI, Section 2 of Schedule D to the By-Laws regarding excess spread parameters for securities quoted in the NASDAQ system. The proposed rule applies to both NASDAQ and Consolidated Quotation Service ("CQS") securities[1] and establishes spread parameters no greater than 125% of the average of the narrowest three dealer spreads in each security. The NASD and its members are concerned that the current excess spread parameters in the NASDAQ market are excessively wide, in some instances permitting spreads of 150 percent of the "average dealer spread."

[1] The NASD is also modifying Section 2 to clarify that excess spread parameters apply to both NASDAQ and CQS securities.

The proposals modify the current rules in two ways—the excess spread parameters will be simplified with a uniform standard applied across the board, regardless of the average dealer spread in the security; the new parameters are based on the narrowest three dealer spreads rather than on all dealer spreads. As the chart in the current rules illustrates, the process to determine permissible spread parameters is cumbersome and unwieldy. Also, the current process uses all market maker quotes in the calculation of average dealer spread, which may give undue weight to spreads that may reflect one-sided buying or selling interest put in by a few market makers. On the other hand, the proposed rule is based on calculation of the three best dealer spreads (or the average spread if there are fewer than three dealers in the security), resulting in a more narrow permissible spread parameter for all market makers in the stock. After study of the impact on members of reducing spread parameters as described above, the NASD determined that the average of three dealers was an appropriate benchmark to utilize, with the caveat that a market maker would not be required to quote less than ¼ point spread in any security, regardless of the three narrowest spreads.

The NASD believes that an important beneficial effect of reducing the excess spread parameters may be to reduce dealer spreads overall, which would redound to the benefit of investors. NASDAQ market makers are required to maintain firm, continuous, two-sided quotations that are reasonably related to the transactions they are effecting. During rapidly moving markets, dealers may be paying more attention to the side of the market where their buy or sell interest lies, resulting in less than careful monitoring of the other side of their dealer quotes. In this fashion, spreads may widen and distort the true competitive nature of the NASDAQ market. Accordingly, the NASD is proposing a reduction in the excess spread parameters for NASDAQ and CQS securities to require market makers to input quotes no greater than 125% of the average of the three narrowest dealer spreads in the security, with the proviso that market makers will not be required to quote securities less than ¼ point spread.

The NASD believes the proposed rule change is consistent with section 15A(b)(6) of the Act. Section 15A(b)(6) requires that the rules of a national securities association be designed to prevent fraudulent and manipulative acts and practices, to promote just and

equitable principals of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and in general to protect investors and the public interest. The NASD believes that the proposed amendments reducing the excess spread parameters may reduce dealer spreads overall and may thereby result in narrower inside spreads, enhancing the quality of the NASDAQ market to the ultimate benefit of investors.

B. Self-Regulatory Organization's Statement on Burden on Competition

The NASD believes that the proposed rule change will not result in any burden on competition that is not necessary or appropriate in furtherance of purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the NASD consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by January 7, 1993.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3(a)(12).

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Release No. 34–31579; File No. SR–NSCC–92–13]

Self-Regulatory Organizations; National Securities Clearing Corporation; Order Approving on an Accelerated Basis a Proposed Rule Change To Provide for the Automation of Payments of Commissions Associated With Mutual Fund Transactions

December 9, 1992.

On October 22, 1992, the National Securities Clearing Corporation ("NSCC") filed a proposed rule change (File No. SR–NSCC–92–13) with the Securities and Exchange Commission ("Commission") pursuant to section 19(b) of the Securities Exchange Act of 1934 ("Act").[1] Notice of the proposal was published in the **Federal Register** on November 27, 1992, to solicit comments from interested persons.[2] On November 17, 19, and 20, 1992, NSCC filed amendments to the proposed rule change.[3] No comments were received. As discussed below, this order approves the proposal on an accelerated basis.

I. Description

The proposed rule change changes the name Mutual Fund Settlement, Entry, and Registration Verification ("Fund/SERV") Service in Rule 52[4] to Mutual Fund Services and augments this program[5] by adding a new mutual fund service, the Mutual Fund Commissions Settlement ("Commissions") service, that will provide for the automation of payments of commissions owed in respect of mutual fund transactions.[6] The mechanism for the payment of commissions will be the same as that used for the payment of dividends through NSCC's Networking service.[7] The Commissions service also will permit Settling Members[8] to advise mutual funds of changes that the funds need to know about relative to commission payments. The proposed rule change also makes several technical modifications to change the organizational structure of Rule 52 and to codify existing practices.

Under the Commissions service, Fund Members (*e.g.*, broker-dealers acting as the principal underwriters for mutual funds)[9] will be able to transmit commission debit data to NSCC on a daily basis. The Fund Member must specify the commission amounts to be debited to its account the next day. If the next day is a New York bank holiday, the payment will be debited on the next day banks in New York are open for business. Commission payments, like dividend payments, will be made by Fund Members to NSCC in federal funds.[10] Settling Members (*e.g.*, retail broker-dealers) also will be able to transmit to Fund Members information relative to commission payouts.

NSCC's role in the Commissions service will be to transmit data between

[1] 15 U.S.C. 78s(b) (1988).

[2] Securities Exchange Act Release No. 31473 (November 17, 1992), 57 FR 56393 [File No. SR–NSCC–92–13].

[3] The amendments to File No. SR–NSCC–92–13 were technical, non-substantive modifications to NSCC's Rule 52. See letter from Karen Saperstein, Associate General Counsel, NSCC, to Jerry Carpenter, Branch Chief, Division of Market Regulation ("Division"), Commission (November 17, 1992) and letters from Karen Saperstein to Jeffrey T. Brown, Staff Attorney, Division, Commission (November 19 and 20, 1992).

[4] NSCC Rule 52, Mutual Fund Services, is comprised of subsection A., Fund/SERV, subsection B., Networking, and subsection C., Commissions.

[5] NSCC has operated Fund/SERV since 1986. For a description of Fund/SERV, refer to Securities Exchange Act Release No. 26377 (December 28, 1988), 53 FR 52546 [File No. SR–NSCC–87–12] (order approving rule changes concerning Fund/SERV).

[6] Commissions is an optional service, so Participants may make commission settlements by other methods.

[7] Networking is a service which provides a centralized and automated facility for the exchange of customer account information between broker-dealers and mutual fund processors. For a description of Networking, refer to Securities Exchange Act Release No. 26376 (December 20, 1988), 53 FR 52544 [File No. SR–NSCC–88–06], (order approving Networking).

[8] The term Settling Member means a Rule 2 Member or a Rule 3 Non-Clearing Member. NSCC Rule 1.

[9] The term Fund Member is defined as any partnership, corporation or other organization, entity, or person, who is not a Member pursuant to Rule 2, but who is specified and has qualified pursuant to the provisions of Rule 51. NSCC Rule 1.

[10] Fund Members will pay commission and dividend amounts to NSCC through Fed wire transfers. NSCC will pay out the commission and dividend amounts to Settling Members by use of clearing house funds according to Rule 12 of NSCC's rules. There will be no netting of Fund Members' commission and dividend settlement debits with their purchase or redemption credits.

the two parties. Data will be transmitted in the same way that customer account data is transmitted under Networking. Each party that submits data through the Commissions service will be responsible for the accuracy of the information. NSCC, however, will provide Participants with technical assistance, including detailed programming information, to enable them to transmit data through the Commissions service and will have staff available to answer questions and handle problems that might arise.[11]

The proposed rule change also includes language to codify into the Networking subsection of NSCC's Rule 52 a currently utilized correction process. A similar correction process has been incorporated into the Commissions service subsection. Pursuant to the correction process, a Fund Member that submits incorrect dividend or commission data may submit correction information. If the Fund Member's correction with respect to dividend or commission payments results in a Settling Member being in a debit position, NSCC gives such Settling Member the ability to delete such correction. Such amounts are then settled outside the Commissions service. If the correction results in the Fund Member being in a debit position or in a credit position which is not deleted by a Settling Member, such corrected amounts are included with the Fund Member's and Settling Member's other settlement obligations, and payment is made in accordance with normal settlement practices.

NSCC has developed an identification code security system to ensure that only authorized users with valid identification codes may gain access to the Commissions service. In addition, all Commissions Participants may access the Commissions service on a dial-up basis or use dedicated telephone lines in order to transmit data to and receive data from the Commissions service. This is also true for Networking Participants.[12]

The proposed rule change also makes a number of technical changes. The name of Rule 52 has been changed to reflect the myriad of mutual fund services offered. A Settling Member may take advantage of Fund/SERV, Networking, or the Commissions service independently or in conjunction with one another. Accordingly, under the Rule 52 heading, each mutual fund service that can be accessed by Participants is under a different subheading. Should NSCC offer additional mutual fund services in the future, they also will be set forth under a new subheading in Rule 52.

The proposed rule change also redefines Fund/SERV Broker-Dealer as Mutual Fund/SERV Broker-Dealer to reflect that such entity may use any Rule 52 service. It also includes within the definition of Fund Member a notation that a Fund Member was previously referred to as a Fund/SERV Member. The notation is intended to ease cross-referencing the term Fund/SERV Member, which is used in the Fund Member's Agreement signed by mutual funds, with the term Fund Member, which is now used in NSCC's rules. Furthermore, most references throughout NSCC's rules to the Fund/SERV Service are being replaced with reference to the Mutual Fund Services to accommodate the Rule 52 name change referred to above. The exception to this is limited to subsection A where the continued reference to Fund/SERV is correct.[13]

The rule change also sets forth the fees to be charged for Commissions. NSCC will implement these fees effective January 1, 1993, for billing in February 1993.

NSCC believes the proposed rule change is consistent with the requirements of the Act in that it will promote the prompt and accurate clearance and settlement of mutual fund transactions. NSCC believes that it will better serve its Participants and enable them to better serve mutual fund purchasers by implementing the Commissions service.

II. Discussion

The Commission believes the proposal is consistent with the Act and specifically with section 17A of the Act.[14] Sections 17A(b)(3) (A) and (F) require that a clearing agency be organized and that its rules be designed to facilitate the prompt and accurate clearance and settlement of securities transactions.[15]

By providing Participants with a means of transacting mutual fund commission payments and communicating information relative to those commission payments through a centralized and automated system, the Commission service should enhance the efficiency of mutual fund commission transactions. Use of an automated system, as opposed to the exchange of hard-copy information, should increase the accuracy of the commission data transmitted between Fund Members, Settling Members, and mutual funds.

By codifying the correction mechanism currently in use in Networking into the Networking and Commission subsections of Rule 52, NSCC is providing its Participants with the ability to submit correction information through an automated system. This should reduce the likelihood of error in the payment of dividends and commissions.

The proposal provides certain safeguards, similar to those provided in Networking, to ensure the integrity of information sent through the Commissions system. NSCC has developed an identification code security system to ensure that only authorized users with valid identification codes may gain access to Commissions.

NSCC also has requested that the Commission find good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of the notice of filing thereof. The Commission finds good cause for so approving because inclusion of the Commissions service, the Networking rule amendments, and the other portions of this filing enhance the prompt and accurate clearance and settlement of mutual fund transactions. Furthermore, because a similar service under Networking has been in operation for several years without problems or negative comment, the Commission does not expect to receive adverse comments on Commissions.

III. Conclusion

For the reasons stated above, the Commission finds that NSCC's proposal is consistent with section 17A of the Act.[16] The Commission also finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[17] that the proposed rule change (File No. SR–NSCC–92–13) be, and hereby is, approved on an accelerated basis.

BILLING CODE 8010-01-M

[Investment Company Act Release No. 19150; 812-8114]

The Salem Funds, et al.; Notice of Application

December 9, 1992.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 (the "Act").

APPLICANTS: The Salem Funds ("Salem") and Federated Securities Corporation ("Federated").

RELEVANT ACT SECTIONS: Conditional order requested under section 6(c) for an exemption from the provisions of sections 2(a)(32), 2(a)(35), 22(c), and 22(d), and rule 22c-1.

SUMMARY OF APPLICATION: Applicants seek an order to permit them to assess a contingent deferred sales charge ("CDSC") on certain redemptions of shares, and to waive the CDSC under certain circumstances.

FILING DATE: The Application was filed on October 9, 1992. By supplemental letter dated December 8, 1992, Salem agreed to file an amendment during the notice period to make certain changes to its application. This notice reflects the changes to be made to the application by such further amendment.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving Applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on December 30, 1992, and should be accompanied by proof of service on the Applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549. Applicants, Federated Investors Tower, Pittsburgh, Pennsylvania 15222-3779, Attention: C. Grant Anderson, Secretary.

FOR FURTHER INFORMATION CONTACT: James J. Dwyer, Law Clerk, at (202) 504-2920, or Elizabeth G. Osterman, Branch Chief, at (202) 272-3016 (Office of Investment Company Regulation, Division of Investment Management).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicants' Representations:

1. Salem is an open-end management investment company organized as a Massachusetts business trust. Salem currently consists of eight investment portfolios, five of which are equity and income portfolios, and three of which are money market portfolios. First Union National Bank of North Carolina serves as investment adviser for each of the portfolios. Federated is a registered broker dealer which serves as distributor to the portfolios. Certain of Salem's portfolios currently are offering multiple classes of shares pursuant to an existing order.[1]

2. Applicants request relief from the provisions of sections 2(a)(32), 2(a)(35), 22(c), and 22(d), and rule 22c-1 on behalf of themselves and any additional Salem portfolios and any future registered open-end management investment company advised by First Union National Bank of North Carolina or any of its affiliates for which Federated serves now or in the future as distributor (collectively, the "Funds") to permit the Funds to impose a contingent deferred sales charge ("CDSC") on certain shares that are redeemed within a specified period after the end of the calendar month in which the purchase order was accepted.[2] Applicants currently intend that the CDSC will be imposed for a period of six years. The CDSC will be imposed on the lesser of (i) the original cost of the redeemed shares, or (ii) the net asset value of the redeemed shares at the time of redemption. Applicants currently intend that the CDSC will be 4% if such shares are redeemed within the first year of purchase. The percentage will decrease each year until the end of the CDSC period.

3. No CDSC will be imposed on an amount which represents capital appreciation of shares, or reinvestment of dividends or capital gain distributions. In addition, in determining whether a CDSC is applicable, it will be assumed that a redemption is made first of shares not subject to the CDSC, and then other shares in the order of purchase.

4. No CDSC will be imposed on any shares purchased prior to the effective date of the requested order. In addition, any change to the specified terms of the CDSC will be disclosed in the prospectus of the applicable Fund. Any such change will not affect shares already issued unless such change results in terms more favorable to the shareholders, such as by reducing the amount of the CDSC or reducing the CDSC period.

5. All exchange privileges will be offered in compliance with section 11(a) of the Act and rule 11a-3 thereunder, or with the terms and conditions of any no-action letter or exemptive relief to which such privileges may be subject.

6. Applicants propose to waive the CDSC in the case of redemptions of shares: (a) Following the death or disability (as defined in the Internal Revenue Code of 1986, as amended) of a shareholder; (b) to the extent that the redemption represents a minimum required distribution from an IRA or other retirement plan to a shareholder who has reached age 70½; (c) owned by current employees of the investment adviser to the Funds or by current or former trustees of such Funds or other Funds advised by such investment adviser; (d) effected pursuant to a Fund's right to liquidate a shareholder's account if the aggregate net asset value of shares held in the account is less than the minimum account size; or (e) in connection with the combination of a Fund with any other investment company registered under the Act by merger, acquisition of assets, or by any other transaction.

Applicants' Condition

If the requested order is granted, Applicants expressly agree to comply with the provisions of proposed rule 6c-10 under the Act, Investment Company Act Release No. 16619 (Nov. 2, 1988), as such rule is currently proposed and as it may be reproposed, adopted, or amended.

---

[18] 17 CFR 200.30-3(a)(12) (1992).

[1] Investment Company Act Release Nos. 17845 (August 2, 1990) (notice) and 17715 (August 30, 1990) (order).

[2] Salem proposes that the shares subject to a CDSC will include a new class of shares ("Investment C") which Salem will offer through its equity and investment portfolios. The Investment C shares will be sold at net asset value without the imposition of a front-end sales load. Pursuant to Salem's existing 12b-1 distribution plan, Investment C shares will be subject to an annual charge of up to 0.75% per annum of the class's average daily net assets.

BILLING CODE 8010–01–M

[Release No. IC–19152; 812–7746]

UST Master Funds, Inc., et al.; Notice of Application

December 10, 1992.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application under the Investment Company Act of 1940 (the "1940 Act").

APPLICANTS: UST Master Funds, Inc., UST Master Tax-Exempt Funds, Inc., United States Trust Company of New York, and UST Distributors, Inc.

RELEVANT 1940 ACT SECTIONS: Order requested under section 6(c) for an exemption from sections 18(f), 18(g), and 18(i).

SUMMARY OF APPLICATION: Applicants seek an exemptive order amending a prior order to permit the issuance and sale of three separate classes of shares in the current and future investment portfolios (the "Funds") of UST Master Funds, Inc. and UST Master Tax-Exempt Funds, Inc. (the "Companies"). One class of each Fund will bear an administrative service fee (the "Plan Shares"); one class of each Fund will bear a distribution fee (the "Distribution Shares"); and one class of each fund will not bear either a service or distribution fee (the "Non-Plan Shares").

FILING DATES: The application was filed on July 1, 1991, and amendments to the application were filed on February 14, September 14, and November 25, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving Applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on January 5, 1993 and should be accompanied by proof of service on Applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of the date of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street NW., Washington, DC 20549; the Companies, One Boston Place, Boston, Massachusetts 02108; United States Trust Company of New York, 114 West 47th Street, 10th Floor, New York, New York 10036; and UST Distributors, Inc., 156 West 56th Street, suite 1902, New York, New York 10019.

FOR FURTHER INFORMATION CONTACT: H.R. Hallock, Jr., Special Counsel, at (202) 272–3030, or Barry D. Miller, Senior Special Counsel, at (202) 272–3018 (Office of Investment Company Regulation, Division of Investment Management).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicants' Representations

1. Each Company is registered as a management investment company under the 1940 Act. UST Master Funds, Inc. ("Master Funds") offers shares in seven investment portfolios: The Money, Government Money, Treasury Money, Equity, Managed Income, Income and Growth, and International Funds. UST Master Tax-Exempt Funds, Inc. ("Master Tax-Exempt Funds") offers five investment portfolios: The Short-Term, Intermediate-Term, Long-Term, California Intermediate-Term, and New York Intermediate-Term Tax-Exempt Funds.

2. United States Trust Company of New York ("U.S. Trust"), a New York bank and trust company, is the Companies' investment adviser, and UST Distributors, Inc. ("UST") is the Companies' distributor. Shares are sold to customers maintaining qualified accounts at U.S. Trust, and its affiliates and correspondent banks, as well as to other institutional and individual investors.

3. The Money, Government Money, Treasury Money, and Managed Income Funds of Master Funds and all five portfolios of Master Tax-Exempt Funds declare their net investment income on a daily basis (the "Daily Dividend Funds"). The Equity, Income and Growth, and International Funds declare their net investment income quarterly. The Money, Government Money, Treasury Money and Short-Term Tax-Exempt Funds use the amortized cost method of valuation, and their shares are sold without a sales charge. Shares in the remaining Funds are sold with a front-end sales load.

4. An exemptive order issued on April 24, 1990 (the "Prior Order") authorized each Company to issue and sell separate classes of Plan Shares within each Daily Dividend Fund. Investment Company Act Release No. 17460. The Prior Order permitted Plan Shares to be sold under the Companies' non-12b–1 Shareholder Services Plans ("Shareholder Services Plans") to various institutional investors ("Service Organizations") that agreed to provide certain administrative shareholder support services to their customers who beneficially own Plan Shares in consideration of a fee currently not exceeding .40% (annualized) of the average daily net assets of each Fund's outstanding Plan Shares.

5. The Companies intend to adopt Distribution Plans (collectively with the Shareholder Services Plans, the "Plans") to enable them to reach customers of various financial intermediaries, particularly broker-dealers, that can provide various distribution services in connection with the sale of Distribution Shares. Accordingly, Applicants seek to amend the Prior Order to permit the issuance and sale of three separate classes of shares in each Fund, each of which will bear transfer agency expenses attributable to that class, one of which (the Plan Shares) will also bear a shareholder administrative support service fee, one of which (the Distribution Shares) will also bear a distribution fee, and one of which (the Non-Plan Shares) will not bear either a shareholder administrative support service fee or distribution fee.

6. The Distribution Plans would provide for the payment of expenses incurred with the distribution of Distributions Shares, including, without limitation, advertising and marketing expenses, printing costs for new prospectuses and sales literature, and payments to broker-dealers and others for distribution assistance. Payments by a Fund under the proposed Distribution Plans currently are not expected to exceed .75% (annualized) of the average daily net asset value of the Fund's outstanding Distribution Shares. The Distribution Plans and all related agreements will be subject to all the provisions of rule 12b–1 under the 1940 Act. In addition, the Companies shall comply with Sections (b) and (d) of Article III, Section 26 of the National Association of Securities Dealers, Inc.'s Rules of Fair Practice as they relate to the maximum amount of asset-based sales charges that may be imposed by an investment company, when and in the form (as amended from time to time) the provisions of such Rules relating to such charges become effective, and for as long as they remain in effect.

7. The Companies believe that by offering Plan, Non-Plan, and Distribution Shares, they will be able to

achieve added flexibility in meeting the service and investment needs of shareholders and future investors. The Companies also believe that the expenses incurred by a class of Plan Shares or Distribution Shares should be appropriately borne by the shareholders of such class because the benefits of the Plans will accrue to them. UST believes, however, that it would be inefficient, and in some cases economically or operationally unfeasible, to organize a separate investment portfolio for each class of Plan Shares and Distribution Shares. Not only would the Companies incur unnecessary accounting and bookkeeping costs in organizing and operating such additional investment portfolios, but management of the additional investment portfolios might be hampered. For example, unless the new investment portfolios grew at a sufficient rate and to a sufficient size, they could face liquidity and diversification problems that would prevent them from producing a favorable yield.

8. Each share in a Fund, regardless of class, will have identical voting, dividend, liquidation and other rights, powers, restrictions, limitations, qualifications, designations, and terms and conditions, except that: (1) Each will have different class designations; (2) the classes of Plan Shares and Distribution Shares each will bear individually the expenses incurred pursuant to the terms of the Plan applicable to that class ("Plan Payments"); (3) each class of Plan, Non-Plan, and Distribution Shares will bear transfer agency expenses directly attributable to it; and (4) only the holders of Distribution Shares or Plan Shares of the class involved would be entitled to vote on matters pertaining to the Distribution Plan or Shareholder Services Plan, respectively, and any related agreements, relating to such class.

9. Because of Plan Payments and transfer agency expenses, the net income of (and dividends payable to) each class would be somewhat different than the net income of (and dividends payable to) the other classes in the same Fund. Similarly, because of such Plan Payments and transfer agency expenses, to the extent a Fund that uses market valuation had undistributed net income the net asset value of its classes would differ. Dividends paid to each class in a Fund will, however, be declared and paid on the same days and at the same times and, except as noted with respect to the Plan Payments and transfer agency expenses, will be determined in the same manner and paid in the same amounts.

10. The Plan, Non-Plan, and Distribution Shares in each Fund may also differ with respect to exchange privileges. It is expected that shares of a class of one Fund would only be exchangeable for shares of the similar class of another Fund.

Applicants' Legal Analysis

1. Applicants request an order, pursuant to section 6(c) of the 1940 Act, amending the Prior Order to permit the proposed issuance and sale of Plan, Non-Plan and Distribution Shares in each Fund as described above (the "Multi-Class System") to the extent that such issuance and sale might be deemed: (i) To result in a "senior security" within the meaning of section 18(g) of the 1940 Act that would be prohibited by section 18(f)(1) of the 1940 Act; and (ii) to violate the equal voting provisions of section 18(i) of the 1940 Act.

2. The issuance and sale of the Plan and Distribution Shares in each Fund may result in stock of a class having "priority over [another] class as to distribution of assets or payment of dividends" within the meaning of section 18(g) of the 1940 Act and having unequal voting rights because holders of the Distribution Shares and Plan Shares would enjoy exclusive voting rights with respect to matters concerning the pertinent Distribution Plan or Shareholder Services Plan, respectively.

3. In support of the requested order, Applicants assert that the proposed allocation of expenses and voting rights in the manner described in equitable and will not discriminate against any group of shareholders. Investors purchasing Plan and Distribution Shares and receiving the services provided under the respective Plans and the transfer agency services associated with the particular class of shares would bear the costs associated with such services, but would also enjoy exclusive shareholder voting rights with respect to matters affecting the respective Plans. Investors purchasing Non-Plan Shares would not receive services provided under the respective Plans nor bear Plan Expenses or exercise voting rights with respect to such Plans or their related agreements. However, they would bear transfer agency expenses directly attributable to the particular class of Non-Plan Shares.

4. Applicants also assert that the proposed arrangement does not involve borrowings and does not affect the Companies' existing assets or reserves. Nor, it is asserted, will the proposed arrangement increase the speculative character of the shares in a Fund, because each class will participate *pro rata*, in proportion to the net asset value of the class, in all of the Fund's income and all of the Fund's expenses (with the exception of Plan Payments and transfer agency expenses). Accordingly, Applicants submit that the exemptive standards established by section 6(c) have been met in that the requested exemption is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

Conditions to the Requested Relief

Applicants agree that the following conditions may be imposed in the requested amended order in substitution for the conditions in the Prior Order:

1. Each class of shares of each Fund of the Companies will represent interests in the same portfolio of investments of the Fund and be identical in all respects, except as set forth below. The only differences between the classes of shares of a Fund will relate solely to: (a) The Plan Payments, transfer agency expenses, and any other incremental expenses subsequently identified that should be properly allocated to a class of shares and which are approved by the SEC pursuant to an amended order; (b) the designation of the class of shares; (c) the different exchange privileges of the class of shares; and (d) the voting rights on matters which pertain to the Distribution and Shareholder Services Plans and related agreements.

2. The directors of each Company, including a majority of the independent directors, will approve the Multi-Class System for the pertinent Company. The minutes of the meetings of the directors of each Company regarding the deliberations of the directors with respect to the approvals necessary to implement the Multi-Class System for the pertinent Company will reflect in detail the reasons for the directors' determination that the proposed Multi-Class System is in the best interests of both the Company and its shareholders.

3. On an ongoing basis, the directors of each Company, pursuant to their fiduciary responsibilities under the 1940 Act and otherwise, will monitor the pertinent Company for the existence of any material conflicts between the interests of the classes of shares of a Fund. The directors, including a majority of the independent directors, shall take such action as is reasonably necessary to eliminate any such conflicts that may develop. Each Company's adviser and distributor will be responsible for reporting any potential or existing conflicts to the directors. If a conflict arises, the

particular Company's adviser and distributor at their own cost will remedy such conflict up to and including establishing a new registered management investment company.

4. The directors of each Company will receive quarterly and annual statements concerning distribution and shareholder servicing expenditures for Plan and Distribution Shares complying with paragraph (b)(3)(ii) of rule 12b–1, as it may be amended from time to time. In the statements, only expenditures properly attributable to the sale or servicing of a particular class of shares will be used to justify any distribution or servicing fee charged to that class. Expenditures not related to the sale or servicing of a particular class will not be presented to the directors to justify any fee attributable to that class. The statements, including the allocations upon which they are based, will be subject to the review and approval of the independent directors in the exercise of their fiduciary duties.

5. Dividends paid by the Company with respect to each class of a Fund, to the extent any dividends are paid, will be calculated in the same manner, at the same time, on the same day, and will be in the same amount as dividends paid by the Company with respect to the other class in the same Fund, except that any Plan Payments and transfer agency expenses relating to a class will be borne exclusively by that class.

6. The methodology and procedures for calculating the net asset value and dividends and distributions of each class of a Fund with a Multi-Class System and the proper allocation of expenses among those classes has been reviewed by an expert (the "Expert") who has rendered a report to each Company, which has been provided to the staff of the SEC, that such methodology and procedures are adequate to ensure that such calculations and allocations will be made in an appropriate manner. On an ongoing basis, the Expert, or an appropriate substitute Expert, will monitor the manner in which the calculations and allocations are being made and, based on such review, will render at least annually a report to each Company that the calculations and allocations for the particular Company are being made properly. The reports of the Expert shall be filed as part of the periodic reports filed with the SEC pursuant to sections 30(a) and 30(b)(1) of the 1940 Act. The work papers of the Expert with respect to such reports, following request by the particular Company (which the Company agrees to provide), will be available for inspection by the SEC staff upon the written request to the particular Company for such work papers by a senior member of the Division of Investment Management or a regional office of the SEC. Authorized staff members would be limited to the Director, an Associate Director, the Chief Accountant, the Chief Financial Analyst, an Assistant Director and any Regional Administrators or Associate and Assistant Administrators. The initial report of the Expert is a "Special Purpose" report on the "Design of a System" and the ongoing reports will be "Special Purpose" reports on the "Design of a System and Certain Compliance Tests" as defined and described in SAS No. 44 of the AICPA, as it may be amended from time to time, or in similar auditing standards as may be adopted by the AICPA from time to time.

7. The Companies have adequate facilities in place to ensure implementation of the methodology and procedures for calculating the net asset value and dividends and distributions of each class of shares of a Fund with a Multi-Class System and the proper allocation of expenses among such class of shares and this representation has been concurred with by the Expert in the initial report referred to in condition 6 above and will be concurred with by the Expert, or an appropriate substitute Expert, on an ongoing basis at least annually in the ongoing reports referred to in condition 6 above. The particular Company will take immediate corrective measures if this representation is not concurred in by the Expert or appropriate substitute Expert.

8. The prospectus for each Fund with a Multi-Class System will contain a statement to the effect that a salesperson and any other person entitled to receive compensation for selling or servicing Company shares may receive different compensation with respect to one particular class of shares over another class in the same Fund.

9. The Companies' distributor will adopt compliance standards as to when each class of Plan, Non-Plan, and Distribution Shares may appropriately be sold to particular investors. Applicants will require all persons selling the Plan, Non-Plan, and Distribution Shares to agree to conform to such standards.

10. The conditions pursuant to which the exemptive order is granted and the duties and responsibilities of the directors of each Company with respect to the Multi-Class System will be set forth in guidelines which will be furnished to the directors.

11. Each Fund will disclose the respective expenses, performance data, distribution arrangements, services, fees, sales loads, deferred sales loads, and exchange privileges applicable to Plan, Non-Plan and Distribution Shares of the same Fund in every prospectus for any such Fund, regardless of whether such shares are offered through each prospectus. Each Fund will disclose the respective expenses and performance data applicable to all such shares of the same Fund in every shareholder report for any such Fund. To the extent any advertisement or sales literature describes the expenses or performance data applicable to any such shares, it will also disclose the respective expenses and/or performance data applicable to all such shares in the same Fund. The information provided by Applicants for publication in any newspaper or similar listing of a Fund's net asset value and public offering price will present each class of such shares in the same Fund separately.

12. Each agreement under a Shareholder Services Plan will contain a representation by the Service Organization that any compensation payable to the Service Organization in connection with the investment of its customers' assets in the pertinent Company (a) will be disclosed by it to its customers, (b) will be authorized by its customers, and (c) will not result in an excessive fee to the Service Organization.

13. Each Shareholder Services Plan will be adopted and operated in accordance with the procedures set forth in rule 12b–1 (b) through (f) as if the expenditures made thereunder were subject to rule 12b–1, except that shareholders will not enjoy the voting rights specified in rule 12b–1. In evaluating a Shareholder Services Plan, the directors will specifically consider whether (a) the Shareholder Services Plan is in the best interest of the applicable classes and their respective shareholders, (b) the services to be performed by the Service Organizations pursuant to the Shareholder Services Plan are required for the operation of the applicable classes, (c) the Service Organizations can provide services at least equal, in nature and quality, to those provided by others, including the pertinent Company, providing similar services, and (d) the service fees for such services are fair and reasonable in light of the usual and customary charges made by other entities, especially non-affiliated entities, for services of the same nature and quality.

14. Each agreement that is entered into pursuant to a Shareholder Services Plan will provide that, in the event an issue pertaining to the Shareholder Services Plan is submitted for

shareholder approval, the Service Organization will vote any shares held for its own account in the same proportion as the vote of those shares held for its customers' accounts.

15. Applicants acknowledge that the grant of the exemptive order requested by the application will not imply SEC approval, authorization, or acquiescence in any particular level of payments that the Funds may make pursuant to a Plan in reliance on the exemptive order.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement: City of Lafayette, Lafayette Parish, LA

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Withdrawal of Draft Environmental Impact Statement.

SUMMARY: The FHWA is issuing this notice to advise the public that the Draft Environmental Impact Statement (DEIS) prepared for the proposed highway project in Lafayette, Louisiana has been withdrawn.

FOR FURTHER INFORMATION CONTACT: Mr. Robert E. Hollis, Technical Operations Manager, Federal Highway Administration, P.O. Box 3929, 750 Florida Street, Baton Rouge, Louisiana 70821 or Public Hearing and Environmental Engineer, Louisiana Department of Transportation and Development, P.O. Box 94245, Baton Rouge, Louisiana 70804-9245.

SUPPLEMENTARY INFORMATION: A DEIS was prepared on a proposal to improve U.S. Routes 90 and 167 (Evangeline Thruway) in Lafayette, Louisiana. The proposed improvement, called the I-49 Connector, would involve an upgrade of the existing transportation corridor between the Lafayette Regional Airport and just north of the existing I-10/I-49 interchange, a distance of about 5½ miles. A final environmental impact statement will not be prepared because a decision has been made not to advance the project at this time.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program)

Issued on: December 11, 1992

Paul W. Pool,

FHWA Assistant Division Administrator.

BILLING CODE 4910-22-M

Maritime Administration

[Docket No. S-894]

Puerto Rico Maritime Shipping Authority; Application for Permission Under Section 506 of the Merchant Marine Act, 1936, as Amended, to Operate in the Domestic Trade

Notice is hereby given that Puerto Rico Maritime Shipping Authority (PRMSA) by application dated December 10, 1992, as amended by letter dated December 11, 1992, has applied for written permission under section 506 of the Merchant Marine Act, 1936, as amended (Act), for the temporary transfer of one Lancer-class vessel, the MAYAGUEZ or a substitute vessel, which PRMSA owns, to a purely domestic service during calendar year 1993 between Puerto Rico and ports along the U.S. Atlantic and Gulf Coasts. Section 506 permits the temporary transfer for up to six months of construction-differential subsidy (CDS) built vessels "whenever the Secretary determines that such transfer is necessary or appropriate to carry out the purposes of the Act." Consent by MARAD is to be conditioned upon payment to MARAD, upon such terms as MARAD may prescribe, of "an amount which bears the same proportion to the CDS paid by the Secretary as such temporary period bears to the entire economic life of the vessel."

PRMSA states that when operating its five Lancer fleet, it cannot keep the vessels in schedule if it includes Charleston as a port of call unless one vessel is exclusively dedicated to domestic trade. Otherwise, deployment requirements, regularity of service, speed and loading limitations would require PRMSA to delete Charleston as a regular port of call. It was for similar reasons that PRMSA requested a waiver which was granted by the Maritime Administration in April 1992. That waiver has been utilized in providing a service to Charleston.

PRMSA points out that under prior MARAD rulings, namely Docket S-830, while the applicant has the burden of showing that its application furthers the purposes and policies of the Act, opponents to a section 506 waiver application have the burden of showing that a proposed domestic service with a waiver "would have a substantial detrimental effect on existing domestic service. . " *Ibid*, p. 13. PRMSA contends that even such a competitive impact "alone does not preclude grant of section 506 permission" *Ibid*, p. 15, since the overall impact on purposes and policies must be measured.

PRMSA emphasizes these points because considerations relating to port service result in the absence of any competitive effect whatsoever from the grant of this waiver application. PRMSA states that, at the present time, there is no U.S.-flag service to San Juan from the port of Charleston other than that presently provided by PRMSA. PRMSA believes that thus grant of the waiver serves the important purpose of promoting commerce from and to that port, with all the ramifications well known to the administration in respect of this nation's policies of port promotion, see section 8 of the Merchant Marine Act, 1920, 46 U.S.C. 867. Because no other carrier serves Charleston, there is no competitive effect whatsoever upon other carriers by virtue of granting the waiver in respect of service at that port. PRMSA indicates that, granting of this waiver will not result in any increased service at any other port, will not increase the frequency of vessels calls, will not increase their cargo carrying capacity from any port but will allow the continuation of their existing service to the port of Charleston. PRMSA believes that thus no competitor of PRMSA in the domestic trades can claim any harm whatsoever resulting from the grant of this application.

PRMSA requests that, in view of these considerations, and pursuant to MARAD guidelines enunciated in the above-cited case, that its application be granted.

Although publication of a Notice with respect to PRMSA's request for permission under section 506 is not required by statute, the Maritime Administration believes that it is appropriate to provide an opportunity for interested parties to comment on PRMSA's application.

Any person, firm, or corporation having any interest in the application for section 506 permission and desiring to submit comments concerning the application must file written comments in triplicate with the Secretary, Maritime Administration, room 7300, Nassif Building, 400 Seventh Street SW., Washington, DC 20590, by the close of business on December 24, 1992. The Maritime Administration, as a matter of discretion, will consider any

comments submitted and take such action with respect thereto as may be deemed appropriate.

(Catalog of Federal Domestic Assistance Program No. 20.800 Construction-Differential Subsidies (CDS)).

Dated: December 15, 1992.

By Order of the Maritime Administrator.

James E. Saari,

Secretary.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

December 11, 1992.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, room 3171 Treasury Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

Office of Thrift Supervision

OMB Number: 1550-0007
Form Number: OTS Forms 159-E and 159-F
Type of Review: Extension
Title: Application for Conversion from State Chartered Institution to Federally Chartered Institution
Description: Section 5(i) of the Home Owners' Loan Act and 12 CFR 543.8 and 552.2 require the OTS to act on requests by state chartered institutions to convert to a Federal charter. OTS forms 159-E and 159-F are used to evaluate whether or not conversion applicants satisfy appropriate eligibility requirements for a Federal charter and whether the institution will operate in accordance with OTS regulations and policies subsequent to the conversion.
Respondents: Businesses or other for-profit
Estimated Number of Respondents: 40
Estimated Burden Hours Per Respondent: 4 hours
Frequency of Response: Other (when application is submitted)
Estimated Total Reporting Burden: 160 hours

OMB Number: 1550-0016
Form Number: OTS Form 710
Type of Review: Revision
Title: Merger Application
Description: Information on OTS Form 710 is evaluated by the OTS to determine whether the proposed transaction complies with applicable state and Federal laws, OTS regulations and policy, and will not have an adverse effect on the risk exposure of the Savings Association Insurance Fund (SAIF). These applications include merger transactions with thrifts and commercial banks and transfers of assets/liabilities from banks to thrifts.
Respondents: Businesses or other for-profit
Estimated Number of Respondents: 90
Estimated Burden Hours Per Respondent: 36 hours.
Frequency of Response: Other (when application is filed)
Estimated Total Reporting Burden: 3,240 hours

OMB Number: 1550-0025
Form Number: OTS Form 1314
Type of Review: Revision
Title: Purchase of Branch Office(s)/ Transfer of Assets and/or Liabilities
Description: Information provided by OTS Form 1314 is evaluated to determine whether the proposed assumption of liabilities and/or transfer of assets transaction complies with applicable laws, regulations and policy, and will not have an adverse effect on the risk exposure to the insurance fund.
Respondents: Businesses or other for-profit
Estimated Number of Respondents: 180
Estimated Burden Hours Per Respondent: 4 hours, 52 minutes
Frequency of Response: Other (information submitted each time a transfer of assets and/or liabilities is proposed)
Estimated Total Reporting Burden: 876 hours

OMB Number: 1550-0059
Form Number: None
Type of Review: Extension
Title: Capital Distributions
Description: Provides uniform treatment for capital distributions made by thrift institutions. Ensures adequate supervision of savings associations' distributions of capital, fostering safety and soundness of the thrift industry.
Respondents: Businesses or other for-profit
Estimated Number of Respondents: 1,050
Estimated Burden Hours Per Respondent: 4 hours
Frequency of Response: Other (when required transactually)
Estimated Total Reporting Burden 4,200 hours

OMB Number: 1550-0061
Form Number: None
Type of Review: Extension
Title: Outside Borrowings
Description: Information is collected from savings associations that do not meet capital requirements. These institutions must give 10 days prior notification before making long term borrowings. Information is used to monitor safety and soundness of institutions not meeting their applicable capital requirements.
Respondents: Businesses or other for-profit
Estimated Number of Respondents: 20
Estimated Burden Hours Per Respondent: 4 hours
Frequency of Response: Other (upon application)
Estimated Total Reporting Burden: 80 hours

List of Countries Requiring Cooperation With an International Boycott

In order to comply with the mandate of section 999(a)(3) of the Internal Revenue Code of 1986, the Department of the Treasury is publishing a current list of countries which may require participation in, or cooperation with, an international boycott (within the meaning of section 999(b)(3) of the Internal Revenue Code of 1986).

On the basis of the best information currently available to the Department of the Treasury, the following countries may require participation in, or cooperation with, an international boycott (within the meaning of section 999(b)(3) of the Internal Revenue Code of 1986):

Bahrain
Iraq
Jordan
Kuwait
Lebanon

Libya
Oman
Qatar
Saudi Arabia
Syria
United Arab Emirates
Yemen, Republic of.

Customs Service

Petitioner's Desire To Contest Decision Denying Domestic Interested Party Petition Concerning the Classification of Certain Turbines and Generators Entered Together

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of petitioner's desire to contest decision on domestic interested party petition.

SUMMARY: This document advises the public of the desire of an interested party to contest Customs decision denying its petition requesting reclassification of certain turbines and generators entered together.

DATES: December 17, 1992.

FOR FURTHER INFORMATION CONTACT: Chris M. Schmitt, Metals and Machinery Classification Branch, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, DC 20229 (202-566-2938).

SUPPLEMENTARY INFORMATION:

Background

On May 26, 1992, a notice was published in the **Federal Register** (57 FR 21914), stating that Customs had received a petition on behalf of a domestic interested party, filed under section 516, Tariff Act of 1930, as amended (19 U.S.C. 1516), and part 175, Customs Regulations (19 CFR part 175). The petition challenged Customs HQ Rulings 087074 (November 21, 1991) and HQ 088013 (November 21, 1991), which held that certain turbines and generators entered together were classified in Heading 8502, Harmonized Tariff Schedule of the United States (HTSUS).

In HQ 087074 (November 21, 1991), Customs held that gas turbines and electric generators, entered together, were classified as generating sets in subheading 8502.30.00, HTSUS, subject to a Column 1 rate of duty of 3 per cent, *ad valorem*. The turbines and generators, subsequent to entry, were connected by means of couplings on their respective shafts which were bolted together to form a single shaft. The turbine-generator machines were described as single shaft (3,600 rpm), single casing machines consisting of one 17-stage compressor and one 4-stage turbine.

In HQ 088013 (November 21, 1991), Customs held that steam turbines and electric generators, entered together, were classified as generating sets in subheading 8502.30.00, HTSUS, subject to a Column 1 rate of duty of 3 per cent, *ad valorem*. Subsequent to entry, the rotors or shafts of the turbines and generators were connected by means of a gear reduction unit or box. The turbine rotor of one model rotated between 5,500 and 11,000 rpm, and the rotor of the generator rotated at 3,600 rpm. The turbine rotor of the second model rotated at 6,045 rpm, and the rotor of the generator rotated at 3,600 rpm.

In HQ 087074 and HQ 088013, Customs found that the design features of the machines insured that the connected shafts rotated at identical speeds, and that the vibrational behavior, bearing loads and other features of the machines must be matched. Because the units were commonly bought and sold together, were commercially regarded as generating sets, and possessed design features that indicated they would be permanently attached to one another, we concluded that they were designed to be mounted together as one unit for the purposes of Heading 8502.

The petitioner contended that the turbines and generators were not classified as generator sets in Heading 8502, and that the turbines and generators should be classified separately in Headings 8411, 8406 or 8501, HTSUS. The petitioner's arguments included that the products did not have sufficient structural integration, were stand alone machines that were not mounted as one unit or fitted together to form a whole, and were incomplete and unassembled machines that were not classifiable in Heading 8502 pursuant to the HTSUS General Rules of Interpretation.

The petitioner contended that even when entered together, the turbines and generators should be classified separately, with large scale gas turbines classified in subheading 8411.82.80, HTSUS, subject to a Column 1 rate of duty of 5 per cent *ad valorem*, large scale steam turbines classified in subheading 8406.19.10, HTSUS, subject to a Column 1 rate of duty of 7.5 per cent *ad valorem*, and large scale generators classified in subheading 8501.64.00, HTSUS, subject to a Column 1 rate of duty of 3 per cent *ad valorem*.

Six of the seven comments received in response to the **Federal Register** notice of May 26, 1992, supported the correctness of the current classification and supported denial of the petition, while the remaining comment supported the petition and the requested reclassification.

Decision on Petition and Notice of Petitioner's Desire To Contest

After careful analysis of the comments received in response to the notice and further review of the matter, the petitioner was informed, by letter dated September 10, 1992, that the classification determinations in HQ 087074 and 088013 were correct, and that the petition was denied.

In response to Customs decision to deny the petition, the petitioner filed notice on October 9, 1992, of its desire to contest Customs decision in accordance with section 516(c), Tariff Act of 1930, as amended (19 U.S.C. 1516(c)), and § 175.23, Customs Regulations (19 CFR 175.23). The petitioner's notice states the desire to contest the classification of merchandise which is similar to the merchandise (finished or unfinished), at issue in HQ 087074 and HQ 088013. However, the petitioner's notice states that there is no desire to contest the classification of merchandise which is similar to the "ATPS" product at issue in HQ 088013.

Customs has reconsidered the matter in light of the petitioner's letter, but remains of the opinion that its September 10, 1992, decision affirming the classification determinations in HQ 087074 and HQ 088013, is correct. That decision will stand in the absence of a contrary judgment rendered by the United States Court of International Trade, the United States Court of Appeals for the Federal Circuit or the United States Supreme Court.

Authority

This notice is published under the authority of section 516(c), Tariff Act of 1930, as amended (19 U.S.C. 1516(c)), and § 175.24, Customs Regulations (19 CFR 175.24).

Vol. 57, No. 243
Thursday, December 17, 1992

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

TIME AND DATE: 10:00 a.m., Wednesday, December 16, 1992.

PLACE: Room 600, 1730 K Street, NW., Washington, DC.

STATUS: Open.

MATTERS TO BE CONSIDERED: The Commission will consider and act on the following:

1. *Clifford Meek* v. *Essroc Corporation*, Docket No. LAKE 90–132–DM. (Issues include whether the judge erred in concluding that Essroc discriminated against Meek in violation of 30 U.S.C. 815(c).)

Any person attending this meeting who requires special accessibility features and/or auxiliary aids, such as sign language interpreters, must inform the Commission in advance of those needs.

It was determined by a unanimous vote of Commissioners that this meeting be held at this time, and no earlier announcement of the meeting was possible.

CONTACT PERSON FOR MORE INFORMATION: Jean Ellen, (202) 653–5629/(202) 708–9300 for TDD Relay 1–800–877–8339 for toll free.

Dated: December 10, 1992.

Jean H. Ellen,
Agenda Clerk.

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

TIME AND DATE: 10:00 a.m., Thursday, December 17, 1992.

PLACE: Room 600, 1730 K Street, N.W., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED: The Commission will consider and act upon the following:

1. *Peabody Coal Company*, Docket No. KENT 91 179–R, etc. (Issues include whether the judge erred in holding that Peabody violated 30 C.F.R. § 75.316 for operating mines without an approved ventilation plan.)

Any persons attending this meeting who requires special accessibility features and/or auxiliary aids, such as sign language interpreters, must inform the Commission in advance of those needs. Subject to 29 CFR 2706.150(a)(3) and 2706.160(e).

CONTACT PERSON FOR MORE INFO: Jean Ellen (202) 653–5629/(202) 708–9300 for TDD Relay/1–800–877–8339 for toll free.

Dated: December 10, 1992.

Jean H. Ellen,
Agenda Clerk.

SECURITIES AND EXCHANGE COMMISSION

Agency Meeting

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Public Law 94–409, that the Securities and Exchange Commission will hold the following meeting during the week of December 14, 1992.

A closed meeting will be held on Wednesday, December 16, 1992, at 2:30 p.m.

Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who have an interest in the matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A) and (10) and 17 CFR 200.402(a) (4), (8), (9)(i) and (10), permit consideration of the scheduled matters at a closed meeting.

Commissioner Schapiro, as duty officer, voted to consider the items listed for the closed meeting in a closed session.

The subject matter of the closed meeting scheduled for Wednesday, December 16, 1992, at 2:30 pm., will be:

Institution of injunctive actions.
Institution of administrative proceedings of an enforcement nature.
Settlement of administrative proceeding of an enforcement nature.
Opinions.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Holly Smith at (202) 272–2100.

Dated: December 14, 1992.

Jonathan G. Katz,
Secretary.

Corrections

Federal Register
Vol. 57, No. 243
Thursday, December 17, 1992

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF COMMERCE

General Asset Accounts Under the Accelerated Cost Recovery System

Correction

In proposed rule document 92-20910 beginning on page 39374 in the issue of Monday, August 31, 1992, make the following corrections:

1. On page 39375, in the 3rd column, in the 11th line "in" should read "is".

§ 1.168(i)-1 [Corrected]

2. On page 39376, in the third column, in § 1.168(i)-1(c)(1)(iv), in the first line "give" should read "gives".

3. On the same page, in the third column, in § 1.168(i)-1(c)(iv)(2), in the heading, "*assets*" should read "*asset*", in the fourth line "of this rule" should read "of this section", and in the ninth line "one general assets" should read "one general asset".

4. On page 39378, in the first column, in § 1.168(i)-1(e)(3)(i), in the Example, paragraph (iii), in the third line from the bottom "$0 $10,000" should read "$0-$10,000".

5. On the same page, in the same column, in § 1.168(i)-1(e)(3)(ii)(A), in the sixth line "of this section a" should read "of this section), a".

6. On the same page, in the second column, in § 1.168(i)-1(e)(3)(ii)(D), in the Example, paragraph (i), in the fourth line "$150,000 alone and" should read "$150,000 and".

7. On the same page, in the 3rd column, in § 1.168(i)-1(e)(3)(ii)(D), in the Example, paragraph (iv), in the 1st line "less" should read "loss", in the 7th line, "in" should read "is", and in the 14th line, "$2200" should read "$2,200".

8. On the same page, in the 3rd column, in § 1.168(i)-1(e)(3)(iii), in the 17th line, "in" should read "is".

BILLING CODE 1505-01-D

PENSION BENEFIT GUARANTY CORPORATION

Request for OMB Extension of Approval of Collection of Information in Single-Employer Plan Terminations

Correction

In notice document 92-30059 beginning on page 59129 in the issue of Monday, December 14, 1992, on page 59139, page 8 of Standard Form 500 was omitted. It should be inserted as follows:

(2) the participant elects the alternative form in writing, with the written consent of his or her spouse. **Note:** *For an election to be valid under (2), the participant must be given the opportunity to elect an immediate annuity (see 26 CFR §1.417 (e)-1).*

If the conditions described above are not satisfied, benefit liabilities must be distributed by the purchase from an insurer of an annuity contract that is an irrevocable commitment. Unless the participant is already in pay status, or has both elected to retire and elected a particular benefit form, the irrevocable commitment must preserve all benefit options under the plan.

Note: *Spousal consent is required for married participants for all options (other than a qualified joint-and-survivor annuity) if the present value of the participant's plan benefit is more than $3,500.*

The contract that is purchased must be a single premium, non-participating (except as discussed below), non-surrenderable annuity contract that constitutes an irrevocable commitment by the insurer to provide the benefits purchased.

A participating annuity contract may be purchased to provide the benefits if: (1) all benefit liabilities will be guaranteed under the annuity contract as the unconditional, irrevocable, and non-cancellable obligation of the insurer; (2) in no event, including unfavorable investment or actuarial experience, can the amounts payable to participants under the annuity contract decrease except to correct mistakes; and (3) no amount of residual assets to which participants are entitled will be used to pay for the participation feature. Specifically, if all or a portion of the residual assets will be distributed to participants, the additional premium for the participation feature must be paid from the contributing sponsor's share, if any, of the residual assets or from assets of the contributing sponsor. If the plan provided for mandatory employee contributions, the amount of residual assets must be determined using the price of the annuities for all benefit liabilities without the participation feature.

If these requirements are not satisfied, a nonparticipating annuity contract must be purchased to close out the plan.

16b If (1) you do not yet know the insurer or insurers from whom (or from among whom) you intend to purchase irrevocable commitments; or (2) if you identify an insurer or insurers, either in the standard termination notice or in a supplemental notice to the PBGC, and subsequently decide to select a different insurer, you must file a supplemental notice with the PBGC no later than 45 days before the date of distribution (*i.e.*, the date on which the obligation to provide the benefit passes from the plan to the insurer). Any supplemental notice must include: the name and address of the insurer or insurers from whom, or (if not then known) from among whom, you intend to purchase the irrevocable commitments, and identify the contributing sponsor and plan by name, address, employer identification and plan numbers, and PBGC case number (if applicable). The supplemental notice should include a statement indicating whether the insurer(s) is licensed in a state or the District of Columbia.

Part IV. Residual Asset Plans

17 Section 4044(d) of ERISA permits a distribution of residual assets to the employer if (1) all liabilities of the plan to participants and their beneficiaries have been satisfied, (2) the distribution does not contravene any provision of law, and (3) the plan provides for such a distribution in these circumstances. In addition, in a plan that provided for mandatory employee contributions, the portion of the residual

Part II

Department of Education

34 CFR Part 668
Student Assistance General Provisions; Final Regulations

DEPARTMENT OF EDUCATION

34 CFR Part 668

RIN 1840–AB47

Student Assistance General Provisions

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary amends subparts G and H of the Student Assistance General Provisions regulations. These subparts contain the procedures for administrative hearings regarding fines and the limitation, suspension, or termination of institutional participation in the student financial assistance programs under the Higher Education Act of 1965, as amended, and appeals by institutions of audit and program review determinations under these programs. These amendments permit interlocutory appeals of interim rulings in administrative proceedings and make minor changes to expedite conduct of these proceedings.

EFFECTIVE DATE: These regulations take effect either 45 days after publication in the **Federal Register** or later if Congress takes certain adjournments, with the exception of §§ 668.90, 668.98, and 668.124. Sections 668.90, 668.98, and 668.124 will become effective after the information collection requirements contained in those sections have been submitted by the Department of Education and approved by the Office of Management and Budget under the Paperwork Reduction Act of 1980. If you want to know the effective date of these provisions of the regulations, call or write the Department of Education contact person. A document announcing the effective date will be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Fred J. Marinucci, Office of the General Counsel, U.S. Department of Education, 400 Maryland Avenue, SW., room 4083, Washington, DC 20202–2244. Telephone (202) 401–2732. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

SUPPLEMENTARY INFORMATION: The Student Assistance General Provisions regulations implement requirements that are common to the participation of postsecondary institutions in the student financial assistance programs under title IV of the Higher Education Act of 1965, as amended (title IV, HEA programs). The title IV, HEA programs include the Federal Pell Grant Program; the Federal Family Education Loan Program, including the Federal Stafford Loan, Federal PLUS, Federal Supplemental Loans for Students, and Federal Consolidation Loan Programs; State Student Incentive Grant, Federal Perkins Loan, Federal Work-Study, and Federal Supplemental Educational Opportunity Grant programs. The last three programs are known collectively as the "campus-based programs." Procedures for actions to fine institutions, or limit, suspend or terminate the eligibility of institutions under these programs, are found in subpart G. Procedures for appeals of final audit or program review determination under these programs are contained in subpart H. The Secretary here adopts, for these proceedings, a provision for interlocutory appeals similar to that proposed on January 6, 1992 (57 FR 506), for proceedings under 34 CFR part 81, and makes other minor procedural changes.

Summary of Changes

Section 668.85(c)

The regulations for fines in § 668.84 and the regulations for terminations in § 668.86 contain a reference to expedited hearings. However, the regulations for suspensions in § 668.85 do not contain a similar provision. This omission was an oversight and therefore the Secretary includes a similar provision for suspension proceedings.

Section 668.88

This section is revised to use the more common term "stipulation" to refer to the statement by the parties of the legal issues and factual allegations presented in the case which neither party disputes.

Section 668.90

The Secretary amends this section chiefly to provide additional time within which the hearing official is to issue the initial decision in a proceeding under or subject to subpart G, and to adopt the same timetable for an appeal of that initial decision as now applies to appeals under subpart H in § 668.119.

Experience has shown that current regulations that require the hearing official to issue a decision within 30 days of the close of the proceedings are not realistic, and that more time is needed. Under the first change, the hearing official is to issue the initial decision within 50 days of the last day of any evidentiary hearing in a case in which no posthearing briefs were scheduled, or, as under the current regulations, within 30 days after the last submission or the close of the proceedings. These final regulations also provide that the Secretary may extend this 30-day period to 60 days upon a showing by the hearing official that added time was needed because of the unusual complexity of the case.

Current regulations require a party who appeals the decision to the Secretary to do so within 20 days after receiving the initial decision by submitting a brief to the Secretary stating the reasons why the initial decision should be modified or reversed. The opposing party then has 15 days to respond. The appellate process benefits from adequately prepared and articulated presentations by the parties. Experience has shown that these two deadlines in current regulations are unrealistically short, both because the regulations require the appellant to file a brief by that deadline, rather than a simple notice of appeal, and because the appellee deserves a comparable period to address properly the issues raised by the appellant. Comparable Federal rules, for example, allow the appellant 40 days to file a brief, from the filing of the record with the appellate court, and allow the appellee 30 days to reply. Fed. R. App. P. 31(a). These final regulations allow an appellant 30 days within which to file, and the opposing party 30 days to respond.

This section is also amended to make it clear that, as in judicial proceedings, an appellate tribunal that affirms the ruling of a lower court need provide no statement of its reasons for doing so. The regulations will therefore clarify that no statement of reasons is required of the Secretary in the event the Secretary affirms a hearing official's decision. Similarly, to provide guidance to the lower courts, appellate courts typically provide a statement of reasons in a decision that reverses or modifies the ruling of a lower court, and the regulations will continue to provide for such a statement from the Secretary where he reverses or modifies the decision of a hearing official. This section is further amended to reflect the authority of the Secretary to remand an initial decision to the hearing official for further proceedings consistent with the Secretary's decision.

Section 668.119

The need for additional time within which to prepare and file briefs by appellant and appelee was explained above, and the appellate filing deadlines for audit and program review appeals are modified for the same reasons. The Secretary here expands from 15 to 30 days the time within which a party may appeal to the Secretary a decision of a

hearing official in an audit or program review determination or appeal. The opposing party should have an equal opportunity to reply to the appellant's brief, and the opposing party is given a corresponding enlargement of time from 15 to 30 days within which to reply.

Sections 668.90, 668.120

These sections are revised to clarify that the Secretary may delegate to another Department official the authority to issue a decision in an appeal from a decision of a hearing official in a proceeding under subpart G or subpart H. The language of § 668.120 is revised to make clear that the Secretary's authority with regard to review of the decision of a hearing official is the same under subpart H as under subpart G. The latter revision is merely a technical clarification and reflects consistent practice under the current regulations.

Sections 668.98, 668.124

Two identical new sections are created to govern the process for interlocutory appeal to the Secretary of an interim ruling by a hearing official. This procedure is virtually identical to that proposed in the NPRM published on January 6, 1992 (57 FR 506) for interlocutory appeals in proceedings under part 81. Interlocutory appeal is a traditional procedural device allowing litigants an opportunity to secure prompt review by an appellate tribunal of those trial court rulings of immediate consequence to a party that would normally be reviewable only after final judgment by the trial court. The procedure benefits the litigants and the trial judge by clarifying the proper legal standard to be applied in the case on the issue in question, and permits the appellate tribunal to supervise the conduct of lower courts more effectively. These regulations will provide these same benefits for the affected institutions, the Department, the hearing official, and the Secretary.

These final regulations permit a party to seek an interlocutory appeal of the ruling if the ruling involves a controlling question of substantive or procedural law, and if resolution of that question would materially advance disposition of the appeal. The regulations also permit a hearing official to certify a ruling to the Secretary for immediate review. The discretion to review an interim ruling resides exclusively with the Secretary (or, as provided in these final regulations, an official to whom the Secretary delegates appellate decisionmaking authority), and the Secretary regards an interlocutory appeal as an extraordinary measure for which requests will not routinely be granted. If the Secretary does not act on a request from a party or the hearing official within 15 days of receipt, the request will be deemed to have been denied by that inaction. These regulations also make clear that any action requesting or granting interlocutory review does not automatically stay the proceedings. The decision to stay the proceedings remains at the discretion of the hearing official and the Secretary. These petitions are to be filed with the Department's Office of Hearings and Appeals.

These regulations require the proponent of an interlocutory appeal to provide a succinct explanation of the need for interim review, and provide the hearing official an opportunity to state his or her views on the desirability of the appeal. The regulations do not specify the particular procedures that will be used if the Secretary agrees to accept the request for review, beyond recognizing that the parties will be given an opportunity to address the merits of the petition in written submissions filed within a reasonable period established by the Secretary. This briefing procedure, and any other procedures to be used in disposing of the petition, will be established on a case-by-case basis by the Secretary as may be appropriate for resolution of particular issues.

Waiver of Rulemaking

In accordance with section 431(b)(2)(A) of the General Education Provisions Act, 20 U.S.C. 1232(b)(2)(A), and the Administrative Procedure Act, 5 U.S.C. 553, it is the practice of the Secretary to offer interested parties the opportunity to comment on proposed regulations. However, as set forth below, the Secretary has determined that these regulations are rules of agency procedure. Accordingly, the Secretary is waiving rulemaking procedures with respect to these regulations under 5 U.S.C. 553(b)(A).

These regulations expand the procedural rights of institutions that appeal adverse administrative actions by permitting them to secure a prompt secretarial review of otherwise unappealable rulings by a Department hearing official and by allowing additional time for perfecting an appeal to the Secretary of a final decision of a hearing official in a proceeding to limit, suspend, or terminate the eligibility of the institution, or to fine it. These changes reflect a similar interlocutory appeal proposal proposed for Part 81 proceedings. These changes will provide immediate benefit to the participants in these proceedings. The simplicity of the changes reduces or eliminates the need for public comment on possible alternative regulatory options, and the attendant delay in making these benefits available to parties to these proceedings. The Secretary therefore concludes that public comment is not required for these procedural changes.

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in that order.

Regulatory Flexibility Act Certification

The Secretary certifies that these regulations will not have a significant economic impact on a substantial number of small entities. The small entities affected by these regulations are small institutions of postsecondary education. These regulations make only technical and procedural modifications to existing regulations. These changes will not increase institutions' workload or costs associated with administering the title IV, HEA programs and therefore will not have a significant economic impact on a substantial number of small entities.

Assessment of Educational Impact

The Secretary requests comments on whether the regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

Byrd Honors Scholarship Program, 84.185)

Dated: December 10, 1992.

Lamar Alexander,

Secretary of Education.

The Secretary amends part 668 of title 34 of the Code of Federal Regulations as follows:

PART 668—STUDENT ASSISTANCE GENERAL PROVISIONS

1. The authority citation for part 668 continues to read as follows:

Authority: 20 U.S.C. 1085, 1088, 1091, 1092, 1094, and 1141, unless otherwise noted.

2. Section 668.85 is amended by adding a new paragraph (c) to read as follows:

§ 668.85 Suspension proceedings

* * * * *

(c) *Expedited hearings.* With the approval of the hearing officer and the consent of the designated department official and the institution, any time period specified in this section may be shortened.

(Authority: 20 U.S.C. 1094)

3. Section 668.88 is amended by revising paragraph (b)(3) and (b)(4) to read as follows:

§ 668.88 Hearing.

* * * * *

(b) * * *

(3) A stipulation by the parties to facts and legal authorities not in dispute; or

(4) A review limited to the written record.

* * * * *

4. Section 668.90 is amended by revising paragraphs (a)(1) and (c)(2) adding paragraph (c)(3), removing paragraphs (d)(1), (d)(3) and (d)(5), redesignating paragraphs (d)(2) and (d)(4) as paragraphs (d)(1) and (d)(2), respectively, and revising paragraphs (f)(1) and (f)(3) to read as follows:

§ 668.90 Initial and final decisions—Appeals.

(a)(1) The hearing official shall issue a written initial decision to the institution and the designated department officer by certified mail, return receipt requested, by the latest of the following dates:

(i) The 30th day after the last submission is filed.

(ii) The 60th day after the last submission is filed if the Secretary, upon request of the hearing official, determines that the unusual complexity of the case requires additional time for preparation of the decision.

(iii) The 50th day after the last day of the hearing, if the hearing official does not request the parties to make any posthearing submission.

* * * * *

(c) * * *

(2)(i) A party appeals to the Secretary by submitting to the Secretary, within 30 days after the party receives the initial decision, a brief or other written statement that explains why the party believes that the Secretary should reverse or modify the decision of the hearing official.

(ii) At the time the party files its appeal submission, the party shall provide a copy of that submission to the opposing party.

(3) The opposing party shall submit its brief or other responsive statement to the Secretary, with a copy to the appellant, within 30 days after it receives the appellant's brief or written statement.

* * * * *

(f)(1) The Secretary renders a final decision. The Secretary may delegate to a designated department official the functions described in paragraph (f) of this section.

* * * * *

(3) If the hearing official finds that the termination is warranted pursuant to § 668.90(a)(3)(i), the Secretary affirms that decision. In any other case, the Secretary may affirm, modify, or reverse the initial decision, or may remand the case to the hearing official for further proceedings consistent with the Secretary's decision. If the Secretary affirms the initial decision without issuing a statement of reasons, the Secretary adopts the opinion of the hearing official as the decision of the Secretary. If the Secretary modifies, remands, or reverses the initial decision, in whole or in part, the Secretary's decision states the reasons for the action taken.

* * * * *

5. A new § 668.98 is added to Subpart G to read as follows:

§ 668.98 Interlocutory appeals to the Secretary from rulings of a hearing official.

(a) A ruling by a hearing official may not be appealed to the Secretary until the issuance of an initial decision, except that the Secretary may, at any time prior to the issuance of the initial decision, grant a review of a ruling upon either a certification by a hearing official of the ruling to the Secretary for review or the filing of a petition for review of a ruling by one or both of the parties, if—

(1) That ruling involves a controlling question of substantive or procedural law; and

(2) The immediate resolution of the question will materially advance the final disposition of the proceeding or subsequent review will be an inadequate remedy.

(b)(1) A petition for interlocutory review of an interim ruling must include the following:

(i) A brief statement of the facts necessary to an understanding of the issue on which review is sought.

(ii) A statement of the issue.

(iii) A statement of the reasons showing that the ruling complained of involves a controlling question of substantive or procedural law and why immediate review of the ruling will materially advance the disposition of the case, or why subsequent review will be an inadequate remedy.

(2) A petition may not exceed ten pages, double-spaced, and must be filed with a copy of the ruling and any findings and opinions relating to the ruling.

(c) A copy of the petition must be provided to the hearing official at the time of filing with the secretary, and a copy of a petition or any certification must be served upon the parties by certified mail, return receipt requested. The petition or certification must reflect this service.

(d) If a party files a petition under this section, the hearing official may state to the Secretary a view as to whether review is appropriate or inappropriate by submitting a brief statement addressing the party's petition within 10 days of the receipt of that petition by the hearing official. A copy of the statement must be served on all parties by certified mail, return receipt requested.

(e) A party's response to a petition or certification for interlocutory review must be filed within seven days after service of the petition or statement, as applicable, and may not exceed ten pages, double-spaced, in length. A copy of the response must be served on the parties and the hearing official by hand delivery or regular mail.

(f) The filing of a petition for interlocutory review does not automatically stay the proceedings. A stay during consideration of a petition for review may be granted by the hearing official if that official has certified or stated to the Secretary that review of the ruling is appropriate. The Secretary may order a stay of proceedings at any time after the filing of a request for interlocutory review.

(g) The Secretary notifies the parties if a petition or certification for interlocutory review is accepted, and may provide the parties a reasonable time within which to submit written argument with regard to the merit of the petition or certification.

(h) If the Secretary takes no action on a petition or certification for review within 15 days of receipt of it, the request is deemed to be denied.

(i) The Secretary may affirm, modify, set aside, or remand the interim ruling of the hearing official.

(j) The Secretary may delegate to a designated department official the functions described in paragraphs (f) through (i) of this section.

(Authority: 20 U.S.C. 1094)

§ 668.119 [Amended]

6. In § 668.119, paragraphs (a) and (d) are amended by removing "15 days" and adding, in its place, "30 days".

7. Section 668.120 is amended by revising paragraph (a) to read as follows:

§ 668.120 Decision of the Secretary.

(a)(1) The Secretary issues a final decision. The Secretary may affirm, modify, or reverse the decision of the hearing official, or may remand the case to the hearing official for further proceedings consistent with the Secretary's decision.

(2) The Secretary may delegate the performance of functions under this section to a designated department official.

* * * * *

8. A new § 668.124 is added to subpart H to read as follows:

§ 668.124 Interlocutory appeals to the Secretary from rulings of a hearing official.

(a) A ruling by a hearing official may not be appealed to the Secretary until the issuance of an initial decision, except that the Secretary may, at any time prior to the issuance of the initial decision, grant a review of a ruling upon either a certification by a hearing official of the ruling to the Secretary for review or the filing of a petition for review of a ruling by one or both of the parties, if—

(1) That ruling involves a controlling question of substantive or procedural law; and

(2) The immediate resolution of the question will materially advance the final disposition of the proceeding or subsequent review will be an inadequate remedy.

(b)(1) A petition for interlocutory review of an interim ruling must include the following:

(i) A brief statement of the facts necessary to an understanding of the issue on which review is sought.

(ii) A statement of the issue.

(iii) A statement of the reasons showing that the ruling complained of involves a controlling question of substantive or procedural law and why immediate review of the ruling will materially advance the disposition of the case, or why subsequent review will be an inadequate remedy.

(2) A petition may not exceed ten pages, double-spaced, and must be filed with a copy of the ruling and any findings and opinions relating to the ruling.

(c) A copy of the petition must be provided to the hearing official at the time of filing with the Secretary, and a copy of a petition or any certification must be served upon the parties by certified mail, return receipt requested. The petition or certification must reflect this service.

(d) If a party files a petition under this section, the hearing official may state to the Secretary a view as to whether review is appropriate or inappropriate by submitting a brief statement addressing the party's petition within 10 days of the receipt of that petition by the hearing official. A copy of the statement must be served on all parties by certified mail, return receipt requested.

(e) A party's response to a petition or certification for interlocutory review must be filed within seven days after service of the petition or statement, as applicable, and may not exceed ten pages, double-spaced, in length. A copy of the response must be served on the parties and the hearing official by hand delivery or regular mail.

(f) The filing of a petition for interlocutory review does not automatically stay the proceedings. A stay during consideration of a petition for review may be granted by the hearing official if that official has certified or stated to the Secretary that review of the ruling is appropriate. The Secretary may order a stay of proceedings at any time after the filing of a request for interlocutory review.

(g) The Secretary notifies the parties if a petition or certification for interlocutory review is accepted, and may provide the parties a reasonable time within which to submit written argument with regard to the merit of the petition or certification.

(h) If the Secretary takes no action on a petition or certification for review within 15 days of receipt of it, the request is deemed to be denied.

(i) The Secretary may affirm, modify, set aside, or remand the interim ruling of the hearing official.

(j) The Secretary may delegate to a designated department official the functions described in paragraphs (f) through (i) of this section.

Environmental Protection Agency

40 CFR Part 88
Credit Program for California Pilot Test Program; Final Rule

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 88

[FRL–4541–4]

RIN 2060–AD30

Credit Program for California Pilot Test Program

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: Provisions of the Clean Air Act enacted in 1990 require EPA to promulgate a clean-fuel vehicle program in the State of California. The program calls for the establishment of clean-fuel vehicle sales requirements, fuel availability requirements, state opt-in provisions, and, at the discretion of the Administrator, a credit program. This final rule addresses only the credit program portion of the California Pilot Test Program. The credit program is designed to assist vehicle manufacturers in meeting their clean-fuel vehicle sales requirement. Participation of the vehicle manufacturers in the credit program is optional. This credit program was proposed by EPA on September 25, 1991.

EFFECTIVE DATE: This final rule is effective December 17, 1992.

ADDRESSES: Materials relevant to this final rule are contained in EPA Air Docket LE–131, Attention: Docket No. A–91–23, located at the Air Docket Section, U.S. Environmental Protection Agency, room M–1500, 401 M Street SW., Washington, DC 20460 telephone (202) 382–7548. The docket may be inspected between the hours of 8:30 a.m. to 12 noon and from 1:30 to 3:30 p.m. on weekdays. A reasonable fee may be charged by EPA for copying docket materials.

FOR FURTHER INFORMATION CONTACT: Mr. Peter Caffrey, U.S. EPA (SDSB–12), Regulation Development and Support Division, 2565 Plymouth Road, Ann Arbor, MI 48105, Telephone: (313) 741–7829.

SUPPLEMENTARY INFORMATION:

I. Introduction

A. California Pilot Test Program

Section 249 of the Clean Air Act (CAA), added to the Act by the 1990 Clean Air Act Amendments (Pub. L. 100–549), requires EPA to establish a clean-fuel vehicle pilot program in the State of California (the California Pilot Program, hereinafter referred to as the Pilot Program). As stated in section 249(a), the purpose of the Pilot Program is "to demonstrate the effectiveness of clean-fuel vehicles in controlling air pollution in ozone nonattainment areas." The Pilot Program will include requirements concerning the number of clean-fuel vehicles to be produced and sold, fuel availability requirements, vehicle certification and enforcement procedures, and a credit program for clean-fuel vehicle sales. Additional information on the Pilot Program is available in the NPRM for this credit program (56 FR 48614, September 25, 1991).

This final rule concerns only the credit program authorized by CAA section 249(d). Regulations concerning other aspects of the Pilot Program, including sales requirements, clean-fuel vehicle exhaust emission standards for non-methane organic gas (NMOG), carbon monoxide (CO), nitrogen oxides (NO_x), particulate matter (PM), and formaldehyde (HCHO), and other requirements applicable to clean-fuel vehicles, are not required to be promulgated until two years after the enactment of the Clean Air Act Amendments of 1990, i.e., November 15, 1992 (see sections 242(a), 249(c), 249(f) of the CAA). Consequently, these aspects of the Pilot Program will be addressed in a separate rulemaking.

B. CARB's Low-Emission Vehicle and Clean-Fuels Program

As discussed in the NPRM, the California Air Resources Board (CARB) has established a Low-Emission Vehicle program that establishes a fleet-average, non-methane organic gas (NMOG) exhaust emission standard that manufacturers must meet with their new model year sales, as well as certain percent of sales requirements for some vehicle types and weight classes. These requirements will result in the sale of a large number of clean-fuel vehicles annually. CARB's program also establishes four levels of clean-fuel vehicle emission standards, clean fuel availability requirements and a credit program. Further information is available in the NPRM for this credits program (56 FR 48614) and in the following documents available in the docket: "Proposed Regulations for Low-Emission Vehicles and Clean Fuels: Staff Report", "Proposed Regulations for Low-Emission Vehicles and Clean Fuels: Technical report", and "Regulations for Clean Fuels", all published by CARB.

C. Content of the Federal Rule

The language of the CAA indicates that the Pilot Program has been modeled in large part after the provisions of CARB's Low-Emission Vehicle program. The clean-fuel vehicle standards, fuel availability language, and credit program are all examples of this. As a result of the many similarities between the Pilot Program and CARB's Low-Emission Vehicle Program, and the likelihood that CARB's program will result in more clean-fuel vehicles being sold than are required under the Pilot Program, the Pilot Program is unlikely to have a significant environmental impact in California. Thus, EPA is fulfilling its obligations for the Pilot Program in a manner that will minimize any additional economic burden on vehicle manufacturers or adverse impacts on other entities, while at the same time ensuring that the program's environmental objectives are met. EPA believes this approach is consistent with the intent of the CAA's Pilot Program.

To accomplish this goal a Federal credit program is essential. A failure by EPA to promulgate a credit program could eliminate the sales flexibility afforded by CARB's credit program (as described in the NPRM). This could result in a manufacturer satisfying CARB's sales requirements through the use of credits but failing to meet the Pilot Program requirements because of the absence of a credit program that would allow the averaging, banking, and trading of credits. This could lead to extra costs to the manufacturer, which could be forced to meet the Pilot Program sales requirements through additional production and sales of clean-fuel vehicles.

EPA believes it is important to provide manufacturers with flexibility in meeting their clean-fuel vehicle sales requirements under the Pilot Program in order to allow them to optimize their development of clean-fuel vehicles required by both CARB's program and the Pilot Program and to avoid extra costs that may provide no additional environmental benefit.

The following sections of this preamble will discuss only the provisions of the Pilot Program that relate to the promulgation of the credit program. Areas where the credit program for the Pilot Program differ from that of CARB's are then examined and comments received concerning the NPRM are addressed. Following a description of the final rule, its environmental, economic, and energy impacts are discussed. The remaining sections cover EPA's statutory authority for the rule, administrative designation of the rule, compliance with the Regulatory Flexibility Act, and reporting and recordkeeping requirements.

II. Description of the Federal Credit Program

A. Statutory Requirements

Section 249(d) of the CAA gives EPA the discretion to issue credits to vehicle manufacturers for the sale of more clean-fuel vehicles than required and for the sale of clean-fuel vehicles that meet more stringent emission standards than those otherwise applicable to clean-fuel vehicles. Once EPA chooses to implement a Federal credit program, section 249(d) of the CAA places a number of constraints on the design of that program. The more stringent standards for the issuance of such credits and the requirements relating to the weighting of such credits on the basis of emission reductions must be those which are established by EPA under the provisions of the clean-fuel fleets program (see CAA section 246). Credits issued by EPA to manufacturers may be transferred to other manufacturers, i.e., they may be traded. Furthermore, any credits issued are to be granted notwithstanding any State law requirements or credits granted with respect to the same vehicles under State law. Despite these statutory requirements, section 249(d)(1)(B) provides EPA with some discretion regarding the credit program for the Pilot Program by stating that the "Administrator may make the credits available for use after consideration of enforceability, environmental, and economic factors and upon such terms and conditions as he finds appropriate."

B. Differences Between Federal Requirements and CARB's Credit Program

EPA's credit program is designed to be consistent with CARB's credit program wherever it is reasonable and legally justifiable in order to grant vehicle manufacturers the same flexibility in meeting the sales requirements of both programs. However, as discussed in the NPRM, statutory provisions of the CAA preclude EPA from promulgating a credit program for the Pilot Program that exactly matches that of CARB's. There are two principal differences between CARB's credit program and the Federal program, the method of weighting credits and the issue of negative banking, both of which are discussed below.

The Pilot Program's credit weightings, which must conform to the clean-fueled fleets credit weighting method (section 249(d)(3) of the CAA), are different from CARB's in two ways. First, the fleet average NMOG values used in CARB's program for vehicles under 6000 lbs gross vehicle weight rating (GVWR) are not used. Instead, following the credit-weighting system of the fleets program, credit values are based on individual vehicle NMOG emission rates. This method is similar to CARB's credit program for trucks over 6000 lbs GVWR. Second, in keeping with the flexibility allowed in the CAA, averaging and trading across all subclasses of light duty trucks (LDVs) and light duty vehicles (LDTs) is allowed (up to 8500 lbs GVWR). This provides vehicle manufacturers significantly greater flexibility in meeting the Pilot Program sales requirements than CARB's credit program which does not allow the transfer of credits between vehicles less than and greater than 6000 lbs GVWR. Because of this increased flexibility the use of credit weightings different from those used by CARB is not expected to have a negative impact on vehicle manufacturers.

The other major difference between the two credit programs is that CARB's program permits negative banking while the Pilot Program does not. If negative banking is allowed and used extensively in the early years of the Pilot Program, there is a possibility that the statutorily-prescribed clean-fuel vehicle sales requirement would not be met. This would effectively delay the implementation of the program, which the CAA does not give EPA the authority to do. Even if the statutory minimum number of vehicles were sold each year as a result of CARB's program, negative banking would not allow EPA to properly enforce the minimum sales requirement should the manufacturers fail to reach it. EPA, therefore, believes that manufacturers must meet the minimum sales requirements of paragraph 249(c)(1) of the CAA. However, as will be discussed in the rulemaking establishing the vehicle standards and sales requirements EPA intends to use its enforcement discretion so as to provide manufacturers some flexibility should they fall slightly below their minimum sales requirements.

Even without negative banking, one might argue that a banking program could create the possibility that the minimum sales requirement may not be met since credits earned from earlier years could potentially be used in high enough quantities in a later model-year to satisfy the sales requirement without actually selling the minimum number of vehicles. However, since the vehicles that earned credits in earlier years are already in service, the total number of clean-fuel vehicles in use is not reduced by the presence of a banking program and the environmental benefits are enhanced rather than diminished. Therefore, EPA believes that banking credits for future use could accelerate implementation of the program, not delay it. Thus, the Agency considers banking to be environmentally beneficial even though a negative banking program is not. For additional information and discussion of the differences between CARB's program and the statutory requirements for the Pilot Program the reader is referred to the NPRM for the credit program as well as CARB's publications that were cited previously and EPA's proposal concerning credits and exemptions from transportation control measures for clean-fueled fleets (56 FR 50196), which are contained in the docket.

C. Credit Program for the Pilot Program

EPA's credit program provides vehicle manufacturers flexibility in meeting the Pilot Program sales requirements similar to the flexibility they have in CARB's program. Vehicle manufacturer participation in the Pilot Program's credit program would be voluntary. As long as a manufacturer fulfills its sales requirement through its own clean-fuel vehicle sales, there would be no need for the manufacturer to participate in the credit program, unless it chooses to accumulate credits for future use or for trading with other manufacturers.

The following sections discuss various issues associated with the credit program. Comments received on the NPRM are discussed and considered in the appropriate section.

1. Averaging

Pursuant to the provisions of the CAA, EPA is promulgating averaging provisions as part of the credit program, which allow a manufacturer to earn credits from the sale of clean-fuel vehicles that meet NMOG exhaust emission standards that are more stringent than required. These credits may be applied toward the manufacturer's sales requirement in order to reduce the total number of clean-fuel vehicles it must sell. This should encourage the introduction of clean-fuel vehicles that meet more stringent standards.

The CAA does not specify any weight class restrictions on the use of credits for vehicles subject to the Pilot Program. In order to provide the maximum flexibility to vehicle manufacturers in complying with their sales requirements, EPA is promulgating only one averaging category covering all clean-fuel LDVs and LDTs. This is consistent with the CAA provisions for the clean-fueled fleets credit program, which provide in section 246(f)(2)(B)

only for a barrier to trading credits between vehicles of up to 8,500 lbs. gross vehicle weight rating (GVWR) and vehicles of more than 8,500 lbs. GVWR. Averaging across the vehicle classes subject to the Pilot Program achieves the same environmental benefit at potentially lower cost and allows manufacturers greater flexibility than under CARB's program.

2. Trading

As described above, the trading of credits between manufacturers is explicitly permitted by section 249(d)(1) of the CAA. Trading gives manufacturers increased flexibility in meeting their sales requirements. Trading also allows small volume manufacturers the ability to avoid the disproportionately high cost of clean-fuel vehicle development, while still contributing to the overall clean-fuel sales requirements. By purchasing credits through trading, small volume manufacturers could help defray the cost of developing the clean-fuel vehicle technology in proportion to their California sales volumes.

3. Banking

Although the CAA does not require banking in the Pilot Program, EPA is promulgating the banking program as proposed. EPA believes that banking will encourage both the early development of clean-fuel vehicles and the development of vehicles meeting more stringent emission standards than required. It will also facilitate the transition to tighter standards in the 2001 model year. In addition, banking provides manufacturers with the same flexibility that they have under CARB's program. Each model year, a manufacturer is given the option of either trading or banking credits earned that were not used in averaging to meet the current model year sales requirement.

Comments were received from CARB expressing its support for a banking provision, but suggesting that credits be discounted in order to promote the active use of credits. They stated that failure to discount banked credits could lead to a stagnant accumulation of credits thereby delaying the implementation of new technologies.

EPA, however, does not believe that the failure to discount Pilot Program credits will result in a delay in the implementation of new technologies. EPA believes that CARB's program will be the controlling force in initiating the development and implementation of new technologies with or without a Federal program. As a result, whether EPA discounts banked credits under the Pilot Program or not should have little impact on vehicle development and environmental impact of the program. Therefore, since discounting would add one more complexity to the credit program for no tangible benefit, credits in the Pilot Program will not be discounted over time. This is also consistent with the CAA provisions regarding credits for the fleet program, which provide in section 246(f)(2)(A) that credits are not to be discounted.

4. Negative Banking

In the NPRM (56 FR 48614) EPA expressed its concern that negative banking could result in clean fuel vehicle sales below the statutory minimum sales volume. Nevertheless, EPA acknowledged the merits of negative banking due to the additional flexibility it would provide manufacturers, and solicited comments on how negative banking could be allowed without compromising the minimum sales requirement.

The Motor Vehicle Manufacturers Association (MVMA) and Electric Transportation Coalition (ETC) both commented on the concept of negative banking. They stated that the flexibility of negative banking would provide a buffer for automobile manufacturers should they encounter production shortfalls due to unforeseen economic downturns. Both organizations supported the idea of limiting negative banking to a certain portion of the total allotted sales volume. MVMA suggested that, if negative banking were utilized in a particular year, then that deficit must be made up in the following year. Thus, a negative credit balance could not be carried over for more than one year.

EPA appreciates the concerns of manufacturers and the difficulty encountered in meeting a fixed sales quota regardless of the economic climate. EPA also believes that the limited volume, one year reconciliation concept put forth by MVMA has much merit. However, it is EPA's position that providing for negative banking explicitly as a part of the credit program would not be consistent with the sales requirements of the CAA, which require that minimum numbers of clean-fuel vehicles be sold each year.

5. Credit Standards

Section 243 of the CAA clearly defines the minimum clean-fuel vehicle NMOG, carbon monoxide (CO), nitrogen oxide (NOx), particulate (PM), and formaldehyde exhaust emission requirements that serve as the baseline from which credits are to be calculated. Section 246(f)(4) of the CAA requires EPA to promulgate more stringent exhaust emission standards, conforming as closely as possible to CARB's standards, solely for the purposes of issuing credits. The clean-fuel vehicle standards established in section 243 of the CAA and the more stringent vehicle standards to be used for credit purposes are shown in table 1.

The exhaust standards in table 1 are used for illustrative purposes only since EPA has not yet promulgated standards containing the clean-fuel vehicle exhaust standards. (Section 242 of the CAA does not require EPA to promulgate clean-fuel vehicle standards until November 15, 1992.) Should the subsequent Pilot Program rulemaking change these emission standards, the credit values contained in this rule will be adjusted accordingly in that rulemaking. To simplify the credit calculations, only the 50,000 mile standards are used (see table 1) rather than the 100,000 mile standards or some combination of the two.

The standards in table 1 are identical to the standards CARB established for their Low-Emission Vehicle Program. For vehicles up to 6,000 lbs GVWR, Pilot Program Phase I clean-fuel vehicles are equivalent to CARB's Transitional Low-Emitting Vehicle (TLEV) emission category and Phase II clean-fuel vehicles are equivalent to CARB's Low-Emitting Vehicle (LEV) emission category. When Phase II of the Pilot Program starts in the 2001 model year, vehicles certified to CARB's TLEV standards will no longer qualify as federal clean-fuel vehicles and will, therefore, not count toward meeting the Pilot Program sales requirements. For vehicles from 6,001 to 8,500 lbs GVWR, the CAA defines CARB's LEV emission category as a clean-fuel vehicle. The two additional emission categories for credit purposes only for this vehicle weight classification are defined to be CARB's Ultra Low-Emitting Vehicle (ULEV) and Zero Emitting Vehicle (ZEV) classifications (see CARB's: Proposed Regulations for Low-Emission Vehicle and Clean-Fuel, Staff Report; in the docket).

6. Credit Weighting

Section 246(f)(2)(C) of the CAA requires that credits be adjusted with appropriate weighting to reflect the level of emission reductions achieved by clean-fuel vehicles. Standards-based weighting factors depend not only on the more stringent standards EPA is required to promulgate, but also on the standards for conventional vehicles and for the minimum clean-fuel vehicle. The amount of credit assigned to a cleaner vehicle depends upon how much further these vehicles go beyond the

minimum clean-fuel vehicle in reducing emissions.

In the NPRM on the Pilot Program, EPA proposed to use the same credit weighting system and methodology as was required in the Clean-Fueled Fleets Program. The fleets program credit weighting system is based on NMOG exhaust emission reductions. The fleet credit program NPRM also proposed an optional credit weighting system that non-attainment areas could choose to apply in lieu of the otherwise required NMOG system, based on a combination of NMOG and NOx exhaust emission reductions. As proposed in the Pilot Program NPRM, EPA is only promulgating credit weightings based on NMOG emissions since this is more consistent with the CARB program. For further discussion of this issue the reader is referred to the NPRM.

As mentioned above, EPA is using the emission standards listed in table 1 for the purpose of credit calculations at this time. Should the rulemaking establishing the rest of the Pilot Program change these standards, new values will be included in that rulemaking.

As discussed in the NPRM, the credit values proposed for the fleets program do not take into account Phase I clean-fuel vehicles (i.e., TLEVs) because Phase I vehicles are not subject to the fleets program. Therefore, in addition to adopting the fleets credit values for 2001 and subsequent model-years, EPA is establishing credit values for the Phase I vehicles of the Pilot Program using the same methodology as used to determine the credit values in the fleets program. All credit values are normalized to the NMOG exhaust emission reduction required by LDVs to facilitate the exchange of credits across all subclasses of LDVs and LDTs. Therefore, the term "vehicle-equivalent" refers to the reduction calculated for a LDV certified to the minimum clean-fuel vehicle standard (TLEV through 2000, LEV 2001 and later). For early clean-fuel vehicle sales and extra clean-fuel vehicle sales, vehicle equivalent credits are calculated by dividing the difference between the 50,000 mile NMOG standards for a conventional vehicle and the clean-fuel vehicle in question (vehicles of the same vehicle type) by the difference between the conventional vehicle standard and minimum clean-fuel vehicle standard for a light duty vehicle (0.125 g/mi through 2000, 0.175 g/mi 2001 and after). For the sale of clean-fuel vehicles meeting more stringent clean-fuel vehicle standards, credits are calculated by dividing the difference between the 50,000 mile NMOG standard for the minimum clean fuel vehicle (TLEV through 2000, LEV 2001 and after) and the standard for the clean fuel vehicle in question (vehicles of the same vehicle type) by the difference between the conventional vehicle standard and minimum clean-fuel vehicle standard for a light-duty vehicle (0.125 g/mi through 2000, 0.175 g/mi 2001 and later). The credit values for Phase I are shown in table 2 and are valid through model year 2000. The credit values developed for the fleets program and established for 2001 and subsequent model-years are shown in table 3. For a more detailed explanation of the methodology used for determining the credit values, see the Fleets Program NPRM (56 FR 50196).

Since the LDTs over 6000 lbs GVWR will not be included in the minimum sales requirement until the standards for these trucks become effective in the 1998 model-year, the credit values in table 2.2 for these vehicles do not apply until the 1998 model-year. Manufacturers may still earn early credits for LDTs over 6000 lbs GVWR corresponding to the values in table 2.1.

The credits calculated by the above methodology and shown in tables 2 and 3, are based solely on emission standards and do not reflect any subclass differences in mileage or vehicle life. Any useful life difference among the clean-fuel vehicle classes that might affect the level of emission reduction was considered to be insignificant and was, therefore, not incorporated into the calculations. Since there is not a substantial difference between the full useful lives of LDVs (10 years/100,000 miles) and LDTs (11 years/120,000 miles), and since the trend in these vehicle classes is toward increasing similarity in usage patterns and technology, adjusting the credit is not justifiable given the increased complexity that these factors would present.

7. Credits for Electric Vehicles

The Electric Transportation Coalition (ETC) provided comments on the NPRM and stated that higher credits should be made available for electric vehicles through 1995 for LDVs and through 1997 for LDTs. They stated that this would spur the early development of electric vehicles which would in turn result in much greater air quality benefits. They supported their stance by pointing out that electric vehicles do not experience any emission deterioration with increasing time and mileage as do most other vehicles. Without any deterioration, electric vehicles provide an even greater emission reduction than they are given credit for based upon their certification standards. Consequently, ETC supports greater credits for ZEVs, suggesting that these credits could be doubled to reflect the greater emissions savings that can be realized by the use of electric vehicles. In addition, ETC suggested that greater (double) credits also be given to ULEVs.

While EPA recognizes the positive aspects of electric vehicles and the fact that their emissions do not deteriorate over time, at this time it is not possible to determine whether additional credit is justified. If the air quality benefits of the Pilot Program are to be realized, electric vehicles must be given appropriate credit for their in-use emission reductions relative to those from all other clean-fuel vehicles. Unfortunately, at the present time, adequate information is not available to predict the in-use emission performance of all other types of clean-fuel vehicles. Because of the new technology anticipated to be used to meet the clean-fuel vehicle standards, the emission deterioration rates for clean-fuel vehicles are likely to be significantly different from that of current conventional vehicles, and are likely to vary dramatically among clean-fuel vehicle types. Until further data and information on the in-use performance of the various new technologies that will be used to meet the CFV standards becomes available, EPA believes it is appropriate to base the credit calculations on the 50,000 mile certification standards.

The credit program established by CARB yields credit weightings similar to those under the Pilot Program for each vehicle emission class. Thus, maintaining the proposed credit weightings in the final program is consistent with the aim of the Pilot Program to be as similar as possible to CARB's Program in order to make compliance with the two programs for all parties involved as smooth as possible.

Furthermore, EPA does not believe that providing electric vehicles greater credit under the Pilot Program would significantly spur their development. Requirements for the sale of clean-fuel vehicles under the Pilot Program are expected to be dwarfed by the requirements of CARB's LEV program, causing Pilot Program credits to be of relatively little importance. In addition, CARB's special sales mandates for ZEV's in the LEV program are expected to do far more to spur the development of clean-fuel vehicles than any additional credit granted under the Pilot Program ever could. Thus, EPA will retain the proposed credit values and not grant additional credit for electric vehicles. Nevertheless, EPA is sensitive

to the matter of non-deteriorating emissions from electric vehicles and may propose adjustments to the credit values for ZEVs and other clean-fuel vehicles in the future when further data and information becomes available.

In response to EPA's request for comments on the possibility of providing credits for hybrid electric vehicles (HEVs), ETC and CARB responded with comments in favor of credits of HEVs. ETC suggested that HEVs receive the full credit value of a ZEV where it can be shown that the HEV can travel 50 or more miles, based on the Federal Urban Dynamometer Driving Schedule (UDDS), on a single charge of the battery using battery power alone and as long as the vehicle cannot be operated solely on non-electric power. In addition ETC suggested that ULEV credits be granted to HEVs that can be operated solely on their internal combustion engine regardless of their range on battery power alone.

CARB noted that its LEV program allows an HEV to be averaged into a manufacturer's fleet average NMOG requirement at a lower NMOG value than the emission category to which it was certified, provided it has a certain minimum battery operating range. CARB stated that this feature encourages the development of HEVs having greater battery ranges. CARB encouraged EPA to consider allowing similar additional credits for HEVs having a minimum battery range.

EPA believes that the emissions from HEVs when they are operated non-electrically are highly uncertain. Also, there is no guarantee that a vehicle owner will choose to run a vehicle electrically for any length of time. The total percentage of time that an individual vehicle owner will operate a vehicle solely on electricity is extremely variable and therefore it is difficult to make a determination of its emission level. This is further complicated by the wide variety of HEV concepts currently being considered by the industry. Much more information is required about the nature of HEVs before any decisions can be made regarding their respective emission categories. At the same time, EPA recognizes the potential air quality benefits of these vehicles and the need to provide them with the same opportunities as other vehicles. Therefore, EPA may reconsider these issues in the future.

8. Use of Credits

If in meeting its minimum clean-fuel vehicle sales requirement a manufacturer sells clean-fuel vehicles which meet the more stringent emissions standards, the manufacturer shall receive credit corresponding to the credit values in table 2.2 and 3.2. If the manufacturer sells more clean-fuel vehicles that are required or clean-fuel vehicles earlier than are required, the manufacturer shall receive credit corresponding to the credit values in table 2.1 and 3.1. In the case of selling more vehicles than required, the manufacturer shall have the discretion of choosing which clean-fuel vehicles are to be treated as credit generating vehicles. Since there are no weight class restrictions, it will be in the best interest for the vehicle manufacturer to select those vehicles for credit generation which receive the greatest amount of credit in tables 2.1 and 3.1.

In the case where a manufacturer does not sell the minimum number of clean-fuel vehicles required by the Pilot Program, it must purchase sufficient credits in lieu of the clean-fuel vehicles it did not sell. These credit values are listed in table 2.3 or 3.3. The manufacturer will have the discretion of choosing which of the conventional vehicles it sold were in lieu of selling the required clean-fuel vehicles. This is an important consideration because the manufacturer will then be required to purchase sufficient credits according to the credit values of the vehicle classes and/or subclasses it chose. Since EPA is requiring only one trading class for the credits, the manufacturer will be free to apply the obtained credit to any of its vehicle classes and/or subclasses.

The subsequent Pilot Program rulemaking, which will define the certification and enforcement provisions of the clean-fuel vehicle sales requirement, will also define the enforcement provisions for both sales reporting requirements and credit shortfalls necessary for this rulemaking. These enforcement provisions are common to both rulemakings and are better handled with all other enforcement provisions in the later rulemaking.

9. Early Credits

In the NPRM EPA proposed that early credits could be granted for clean-fuel vehicles sold prior to 1996. The granting of early credits would allow manufacturers to back credits, which could be used for averaging and trading in the initial years of the Pilot Program to assist in a smooth transition into the program. EPA proposed that clean-fuel vehicles sold in the 1994 model-year be the first vehicles eligible to receive early vehicle credits because 1994 would be the first full model-year after promulgation of all clean-fuel vehicle standards and certification requirements. Prior to 1994 there will not be a mechanism in place by which to certify vehicles and grant credits accordingly.

Comments were received from MVMA and ETC with both organizations suggesting that early credits be allowed before 1994. They stated that early credits will assist Small Volume Manufacturers (SVM) by making more credits available for trading earlier in the program. They also suggested that the introduction of credits prior to 1994 will provide "an incentive for manufacturers to introduce clean-fuel vehicles earlier, thus providing earlier environmental benefits and earlier consumer acceptance of clean-fuel vehicles."

EPA agrees with the commenters that granting credit for vehicles produced before the 1994 MY will encourage the early introduction of clean-fuel vehicles into the marketplace. Such a provision would also be more consistent with CARB's program. Furthermore, EPA believes that by allowing credits for 1992 through 1995 model year CFV sales, CARB's program will be virtually assured of providing that an adequate number of CFVs are sold in all years to fulfill the Pilot Program requirements. Thus, despite the fact that before-the-fact certification to EPA's standards will not be possible, EPA will allow retroactive credits, beginning with model year 1992. Credits will be granted retroactively, however, only if the vehicles receive a valid California certification and also fulfill the Federal certification and also fulfill the Federal requirements established in the Pilot Program standards rulemaking. The granting of retroactive credits will occur only if the Federal standards are replaced with CARB's standards in the clean-fuel vehicles standards rulemaking pursuant to section 243(e) of the CAA, which will mean that a vehicle certification to CARB's standards also meets the Federal certification standards. This determination will be made in the rulemaking for the Pilot Program to be published at a later date. If CARB's standards are found to be as protective then retroactive credits will be granted for qualifying vehicles back to model year 1992. Because this determination can not be made until the final rule for the standards portion of the Pilot Program is published, the calculation of any retroactive credits will not be made until 1996, the first year of required sales for the Pilot Program. This will allow manufacturers to use any accumulated credits in the first year of required Pilot Program sales. If CARB's standards are determined not to be as protective as the Federal standards then

retroactive credits will be granted from model year 1992 to 1996 as long as the vehicles were certified to the Federal standards.

10. Credit Trading to Stationary Sources

No language was contained in the NPRM regarding the possibility of trading mobile source credits derived from this program with stationary source credits. The Clean Fuel Fleets Credit Program NPRM, however, did solicit comments on the possibility of including stationary source trading. As a result, comments were received on the Pilot Program in this regard as well.

ETC recommended that EPA look into ways to allow mobile source emission credits generated under the Pilot Program to be traded with the emissions generated from stationary sources. They believe that having the broadest possible trading base will make the entire system much more flexible.

EPA is currently reviewing a variety of mobile source-stationary source trading issues and is planning to issue a guidance that will address mobile stationary source trading. Thus, EPA is not including any provisions in these regulations regarding trading to stationary sources.

11. Sales Requirements

In the NPRM, EPA stated that the sales requirements for the Pilot Program would be promulgated under a later rulemaking. EPA proposed a definition of the term "sales", at that time, in order to define the basis for granting credits. In the NPRM, EPA asked for comments on how the term sales could be defined in order to minimize the burden on the manufacturers while still adhering to the statutory requirements of the definition of "sales" stated in section 249(c)(1) of the CAA as vehicles that are "produced, sold, and distributed (in accordance with normal business practices and applicable franchise agreements) to ultimate purchasers in California."

In response to EPA's request MVMA commented that the term "sales" could be counted as sales "by a manufacturer to a dealer, distributer, fleet operator, broker, or any other entity which comprises the first point of sale." It noted that this definition would be consistent with that adopted in the rulemaking regarding the Tier I emission standards (56 FR 12724). MVMA also pointed out an additional aspect of the Tier I regulations that allows the substitution of a manufacturer's production data for the manufacturer's sales data. MVMA stated that the difference between the two numbers is small. It cited data for the 1987 to 1989 model years in which the mean difference between the sales and production data was approximately 0.2 percent. MVMA suggested that manufacturers be given the option of reporting sales data (as defined above) or actual production data with demonstration of the functional equivalence of it to sales.

EPA's goal is to establish as effective a program as possible without causing an undue burden on the manufacturer. Because of this and the apparent similarity between the three methods of evaluating clean-fuel vehicle sale, EPA has decided that the point of first sale is the most reasonable basis for determining compliance. EPA believes that sales to the ultimate purchaser and the first point of sales should be essentially equivalent, because all vehicles sold to any ultimate purchaser have to pass through or possibly terminate at the first point of sale. Any other definition of sales would require the manufacturers to initiate a new and much more cumbersome and expensive vehicle tracking program without any notable benefit to the environment.

In addition to this EPA recognizes that the difference between actual manufacturer sales and their production numbers has been shown to be an increasingly smaller number on a percentage basis over time (see Tier I rulemaking 56 FR 12724). EPA also expects that CARB's LEV program will result in far more CFVs in California than will be required under the Pilot Program (see CAA Section 249(c)(1)). Also, in their own CFV program CARB is establishing their definition of sales as the number of vehicles produced by a given manufacturer for sale in the state of California. In view of this information, EPA is proposing to allow similar flexibility with the Pilot Program as will be allowed in CARB's CFV program by giving manufacturers the option of submitting production numbers in lieu of actual sales numbers for each model year. EPA reserves the right to require that actual sales data be provided if it determines that a general equality (consistent with the language of the Tier I rulemaking) no longer exists between production data and sales data. EPA believes that this definition of sales makes sense for the Pilot Program because the sales of CFVs in California should surpass the requirements of the Pilot Program due to CARB's sales requirements. Consequently, this definition for vehicle sales will not necessarily be appropriate in all contexts.

12. Small Volume Manufacturer Concerns

Rover Group and CARB commented that small volume manufacturers may have difficulty complying with the emission and sales standards of the Pilot Program. They asked that EPA consider special provisions similar to those proposed by CARB whereby manufacturers with an average annual vehicles sales volume of less than 3000 units for the 1989–1991 model years would be exempt from the sales requirements until the year 2000. (See CARB's proposed rules in the docket).

The CAA is silent with respect to the treatment of small volume manufacturers. EPA believes that credit trading, which is addressed in this rulemaking, will help to alleviate the difficulties small volume manufacturers might otherwise have had in meeting a CFV sales requirement. The possibility of other provisions similar to CARB's, such as small volume manufacturer exemptions for a given period of time, will be addressed in the NPRM proposing the clean-fuel vehicle sales requirements for the Pilot Program.

III. Environmental Impact

EPA believes that the credit program will not result in a negative environmental impact and that all reasonable means have been taken to ensure the environmental neutrality of the credit program. Furthermore, the magnitude of CARB's Low-Emission Vehicle program, which requires clean-fuel vehicle sales that far exceed the sales requirements of the Pilot Program, should ensure that all environmental benefits expected to result from the Pilot Program are achieved.

IV. Economic Impact

The intent of the credit program is to provide flexibility to the vehicle manufacturers in meeting their clean-fuel vehicle sales requirements. This should minimize any potential for economic hardship resulting from the Pilot Program, while at the same time yielding no decrease in environmental benefits. Since CARB's Low-Emission Vehicle program will create greater environmental benefits and economic impacts than the Pilot Program, the proposed credit program should provide no additional economic burden beyond that of CARB's LEV program.

Given that there are two different, but similar credit programs, it is possible, however, that on a manufacturer specific basis some minor negative economic impacts could result. A manufacturer choosing to purchase Federal credits rather than produce all

of the clean-fuel vehicles it would otherwise have to produce may have to track and purchase both Federal credits and California credits. It is understood that just the act of managing its own credits could introduce some costs to a manufacturer; however, these are not likely to be significant. Moreover, since participation in the credit program is voluntary, a manufacturer would not choose to do it unless it viewed participation in the credit program as being more economically beneficial than producing CFVs.

The trading of Federal and California credits will likely take place together because a manufacturer who needs to purchase Federal credits will also be in need of California credits. The cost to purchase credits will be determined by the free-market, but is likely to be no higher than the cost of producing clean-fuel vehicles since a manufacturer would probably produce a clean-fuel vehicle rather than pay more than its production cost for credits. The cost of producing a clean-fuel vehicle is independent of the existence of a Federal credit program. As a result, whether the manufacturers must purchase only California credits or both Federal and California credits, the cost is expected to be the same.

In conclusion, EPA believes that negative economic impacts should not occur from the credit program. Therefore, the cost of clean-fuel vehicles to the consumer is expected to be no different than what will result from the implementation of CARB's program.

V. Energy Impact

The implementation of a credit program for the Pilot Program should have a minimal energy impact. Because manufacturers can earn more credit for vehicles which meet more stringent standards, fewer clean-fuel vehicles could theoretically be sold. The result would be a smaller fleet of clean-fuel vehicles than if no credit program was available. This reduction in fleet size would also reduce the volume of each particular clean-fuel.

The more stringent the vehicle standards, however, the more likely the vehicles are to be powered by a fuel other than gasoline. EPA is currently unaware of any reliable projections of the type of vehicles, the fuel used, or the energy efficiency of the clean-fuel vehicles that will be sold.

As discussed in the environmental and economic impact sections, due to the size of CARB's program, no fuel volume changes resulting from this credit program should occur. The Pilot Program should not affect the choice of clean-fuel vehicles and the choice of fuels used beyond what CARB's program will require. EPA, therefore, believes there will be no adverse energy impact associated with this rulemaking.

VI. Administrative Designation and Regulatory Analysis

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement that a Regulatory Impact Analysis be prepared. Major regulations have an annual effect on the economy in excess of $100 million; have a significant adverse impact on competition, investment, employment or innovation; or result in a major price increase. The elements of this rulemaking package do not constitute a major rule according to the established criteria. The implementation of this credit program will not increase the cost of clean-fuel vehicles, but will instead allow manufacturers another option which will help produce clean-fuel vehicles at lower costs. Therefore, it has been determined that this proposal does not constitute a "major" regulation.

This regulation was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291. Any written comments from OMB and any EPA response to those comments have been placed in the public docket for this rulemaking.

VII. Compliance With Regulatory Flexibility Act

Under section 605 of the Regulatory Flexibility Act, the Administrator is required to certify that a regulation will not have a significant adverse economic impact on a substantial number of small business entities. There will not be a significant impact on a substantial number of small business entities due to the credit program for the Pilot Program. The credit program will be beneficial for small volume manufacturers in meeting any sales requirement issued against them due to the option of purchasing credits in lieu of undertaking the financial investment to develop clean-fuel vehicles. For this reason, the requirements of this rule will not have a significant adverse economic impact on a substantial number of small entities. The benefits given to small volume manufacturers will not impose hardships or burdens on other small entities covered by this regulation.

VIII. Reporting and Recordkeeping Requirements

The information collection requirements in this final rule have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, and have been assigned OMB control number 2060–0229. No additional requirements are added in this notice.

IX. Statutory Authority

Authority for the actions promulgated in this notice is granted to EPA by sections 241, 246, 249, and 301(a) in title II, part C of the Clean Air Act, as amended; 42 U.S.C. 7581, 7586, 7589, and 7601(a).

List of Subjects in 40 CFR Part 88

Administrative practice and procedures, Air pollution control, Gasoline, Motor vehicle pollution, Reporting and recordkeeping requirements.

Dated: November 18, 1992.

William K. Reilly,

Administrator.

For reasons set forth in the preamble, a new part 88 of title 40 of the Code of Federal Regulations is added to read as follows:

PART 88—CLEAN-FUEL VEHICLES

Subpart A—Emission Standards for Clean-Fuel Vehicles

Sec.
88.101–94 Definitions.
88.102–94 Abbreviations.

Subpart B—California Pilot Test Program

Sec.
88.201–94 Scope.
88.202-94 Definitions.
88.203–94 Abbreviations.
88.205–94 California Pilot Test Program Credits Program.

Tables to subpart B of part 88

Authority: Secs. 241, 246, 249, 301(a), Clean Air Act as Amended; 42 U.S.C. 7581, 7586, 7589, and 7601(a).

Subpart A—Emission Standards for Clean-Fuel Vehicles.

§ 88.101-94 Definitions.

The definitions in 40 CFR part 86 also apply to this subpart. The definitions in this section apply to all of part 88.

Heavy Light-Duty Truck means any light-duty truck rated greater than 6000 lbs. GVWR.

Light Light-Duty Truck means any light-duty truck rated through 6000 lbs GVWR.

Loaded Vehicle Weight is defined as the curb weight plus 300 lbs.

Low-Emission Vehicle means any light-duty vehicle or light-duty truck conforming to the applicable Low-Emission Vehicle standard, or any heavy-duty vehicle with an engine conforming to the applicable Low-Emission Vehicle standard.

Non-methane Organic Gas is defined as in section 241(3) Clean Air Act as amended (42 U.S.C. 7581(3)).

Test Weight is defined as the average of the curb weight and the GVWR.

Transitional Low-Emission Vehicle means any light-duty vehicle or light-duty truck conforming to the applicable Transitional Low-Emission Vehicle standard.

Ultra Low-Emission Vehicle means any light-duty vehicle or light-duty truck conforming to the applicable Ultra Low-Emission Vehicle standard, or any heavy-duty vehicle with an engine conforming to the applicable Ultra Low-Emission Vehicle standard.

Zero-Emission Vehicle means any light-duty vehicle or light-dutytruck conforming to the applicable Zero-Emission Vehicle standard, or any heavy-duty vehicle conforming to the applicable Zero-Emission Vehicle standard.

§ 88.102–94 Abbreviations.

The abbreviations of part 86 also apply to this subpart. The abbreviations in this section apply to all of part 88.

CO—Carbon Monoxide.
HCHO—Formaldehyde.
NMOG—Non-Methane Organic Gas.
NOx—Nitrogen Oxides.
PM—Particulate Matter.
GVWR—Gross Vehicle Weight Rating.
LVW—Loaded Vehicle Weight.
TW—Test Weight.
TLEV—Transitional Low-Emission Vehicle.
LEV—Low-Emission Vehicle.
ULEV—Ultra Low-Emission Vehicle.
ZEV—Zero-Emission Vehicle.

Subpart B—California Pilot Test Program

§ 88.201–94 Scope.

Applicability. The requirements of this subpart shall apply to the following:

(a) State Implementation Plan revisions for the State of California pursuant to compliance with section 249 of the Clean Air Act, as amended in 1990.

(b) Vehicle manufacturers with sales in the State of California.

§ 88.202–94 Definitions.

(a) The definitions in subpart A also apply to this subpart.

(b) The definitions in this subpart shall apply beginning with the 1992 model year.

Averaging for clean-fuel vehicles means the sale of clean-fuel vehicles that meet more stringent standards than required, which allows the manufacturer to sell fewer clean-fuel vehicles than would otherwise be required.

Banking means the retention of credits, by the manufacturer generating the emissions credits, for use in future model-year certification as permitted by regulation.

Sales means vehicles that are produced, sold, and distributed (in accordance with normal business practices and applicable franchise agreements) in the State of California, including owners of covered fleets under subpart C of part 86 of this chapter. The manufacturer can choose at their option from one of the following three methods for determining sales:

(i) Sales is defined as sales to the ultimate purchaser.

(ii) Sales is defined as vehicle sales by a manufacturer to a dealer, distributer, fleet operator, broker, or any other entity which comprises the first point of sale.

(iii) Sales is defined as equivalent to the production of vehicles for the state of California. This option can be revoked if it is determined that the production and actual sales numbers do not exhibit a functional equivalence per the language of § 86.708–94(b)(1) of this chapter.

Trading means the exchange of credits between manufacturers.

§ 88.203–94 Abbreviations.

The abbreviations in subpart A of this part and in 40 CFR part 86 apply to this subpart.

§ 88.205–94 California Pilot Test Program Credits Program.

(a) *General.* (1) The Administrator shall administer this credit program to enable vehicle manufacturers who are required to participate in the California Pilot Test Program to meet the clean-fuel vehicle sales requirements through the use of credits. Participation in this credit program is voluntary.

(2) All credit-generating vehicles must meet the applicable emission standards and other requirements contained in subpart A of this part.

(b) *Credit generation.* (1) Credits may be generated by any of the following means:

(i) Sale of qualifying clean-fuel vehicles earlier than required. Manufacturers may earn these credits starting with the 1992 model year, contingent upon the requirements of paragraph (g) of this section.

(ii) Sale of a greater number of qualifying clean-fuel vehicles than required.

(iii) Sale of qualifying clean-fuel vehicles that meet more stringent emission standards than those required.

(2) For light-duty vehicles and light-duty trucks, credit values shall be determined in accordance with the following:

(i) For model-years through 2000, credit values shall be determined in accordance with table B–1 of this subpart.

(ii) For the 2001 and subsequent model-years, credit values shall be determined according to table B–2 of this subpart. The sale of light-duty vehicles classified as Transitional Low-Emission Vehicles shall not receive credits starting in model year 2001.

(iii) For the calculation of credits for the sale of more clean-fuel vehicles than required, the manufacturer shall designate which sold vehicles count toward compliance with the sales requirement. The remaining balance of vehicles will be considered as sold beyond the sales requirement for credit calculations.

(3) Vehicles greater than 8500 lbs gvwr may not generate credits.

(c) *Credit use.* (1) All credits generated in accordance with these provisions may be freely averaged, traded, or banked for later use. Credits may not be used to remedy any nonconformity determined by enforcement testing.

(2) There is one averaging and trading group containing all light-duty vehicles and light-duty trucks.

(3) A vehicle manufacturer desiring to demonstrate full or partial compliance with the sales requirements by the redemption of credits, shall surrender sufficient credits, as established in this paragraph (c). In lieu of selling a clean-fuel vehicle, a manufacturer shall surrender credits equal to the credit value for the corresponding vehicle class and model year found in table B–1.3 or table B–2.3 of this subpart.

(d) *Participation in the credit program.* (1) During certification, the manufacturer shall calculate the projected credits, if any, based on quarterly sales projections.

(2) Based on information from paragraph (d)(1) of this section, each manufacturer's certification application under this section must demonstrate:

(i) That at the end of the model-year production, there is a net vehicle credit balance of zero or more with any credits obtained from averaging, trading, or banking.

(ii) It is recommended but not required that the source of the credits to be used to comply with the minimum sales requirements be stated. All such reports should include all credits involved in averaging, trading, or banking.

(3) During the model year, manufacturers must:

(i) Monitor projected versus actual production to be certain that compliance with the sales requirement is achieved at the end of the model year.

(ii) Provide the end of model year reports required under this subpart.

(iii) Maintain the quarterly records required under this subpart.

(4) Projected credits based on information supplied in the certification application may be used to obtain a certificate of conformity. However, any such credits may be revoked based on review of end-of-model year reports, follow-up audits, and any other verification steps deemed appropriate by the Administrator.

(5) Compliance under averaging, banking, and trading will be determined at the end of the model year.

(6) If EPA or the manufacturer determines that a reporting error occurred on an end-of-year report previously submitted to EPA under this section, the manufacturer's credits and credit calculations will be recalculated.

(i) If EPA review of a manufacturer's end-of-year report indicates an inadvertent credit shortfall, the manufacturer will be permitted to purchase the necessary credits to bring the credit balance to zero.

(ii) If within 90 days of receipt of the manufacturer's end-of-year report, EPA review determines a reporting error in the manufacturer's favor (i.e., resulting in a positive credit balance) or if the manufacturer discovers such an error within 90 days of EPA receipt of the end-of-year report, the credits will be restored for use by the manufacturer.

(e) *Averaging.* Averaging will only be allowed between clean-fuel vehicles under 8500 lbs gvwr.

(f) *Banking.* (1) *Credit deposits.* (i) Under this program, credits can be banked starting in the 1992 model year.

(ii) A manufacturer may bank credits only after the end of the model year and after EPA has reviewed its end-of-year report. During the model year and before submittal of the end-of-year report, credits originally designated in the certification process for banking will be considered reserved and may be redesignated for trading or averaging.

(2) *Credit withdraws.* (i) After being generated, banked/reserved credits shall be available for use and shall maintain their original value for an infinite period of time.

(ii) A manufacturer withdrawing banked credits shall indicate so during certification and in its credit reports.

(3) Banked credits may be used in averaging, trading, or in any combination thereof, during the certification period. Credits declared for banking from the previous model year but unreviewed by EPA may also be used. However, they may be revoked at a later time following EPA review of the end-of-year report or any subsequent audit actions.

(g) *Early Credits.* Beginning in model year 1992 appropriate credits, as determined from the given credits tables, will be given for the sale of vehicles certified to the clean-fuel vehicle standards for TLEV's, LEV's, ULEV's, and ZEV's, where appropriate, from model year 1992 to the beginning of the Pilot Program sales requirements in 1996. The actual calculation of such credits shall not begin until model year 1996.

Title 3—

The President

Proclamation 6515 of December 16, 1992

To Modify the Harmonized Tariff Schedule of the United States, To Extend Tariff Reductions on Certain Tropical Products, To Reduce Duties on Peach, Apricot, Raspberry, or Cherry Jams, and for Other Purposes

By the President of the United States of America

A Proclamation

1. Section 1205(a) of the Omnibus Trade and Competitiveness Act of 1988 ("1988 Act") (19 U.S.C. 3005(a)) directs the United States International Trade Commission ("Commission") to keep the Harmonized Tariff Schedule of the United States ("HTS") under continuous review and periodically to recommend to the President such modifications to the HTS as the Commission considers necessary or appropriate. Section 1205(a) sets forth five categories of such potential modifications to the HTS, including changes to conform the HTS with amendments made to the International Convention on the Harmonized Commodity Description and Coding System ("Convention"), to promote the uniform application of the Convention and its Annex, to ensure that the HTS is kept up-to-date in light of changes in technology or in patterns of international trade, to alleviate unnecessary administrative burdens, and to make technical rectifications.

2. Section 1205(d) of the 1988 Act (19 U.S.C. 3005(d)) provides that the Commission may not recommend any modification unless it is consistent with the Convention and that any amendment thereto recommended for adoption is consistent with sound nomenclature principles, ensures substantial rate neutrality, and does not alter existing conditions of competition for the affected United States industry, labor, or trade. Section 1205(d) further provides that any change to a rate of duty must be consequent to, or necessitated by, nomenclature modifications that are recommended under this section.

3. Pursuant to section 1205(b) of the 1988 Act (19 U.S.C. 3005(b)), the Commission instituted Investigations Nos. 1205–1 and 1205–2. The Commission included in its notices of investigation the proposed changes to the HTS. Pursuant to section 1205(c) of the 1988 Act (19 U.S.C. 3005(c)), taking into account the views and submissions of Federal Government agencies and other interested parties, the Commission submitted to the President two reports, one in March 1991 (with a June addendum and revision in May 1992) and the second in November 1991, recommending changes to the HTS in accordance with the provisions of section 1205. The Commission included in its reports copies or summaries of the submissions received in the investigations, together with a statement of the probable economic effect of each recommended change on any industry in the United States.

4. Pursuant to section 1206(a) of the 1988 Act (19 U.S.C. 3006(a)), I have determined that the recommended modifications are in conformity with United States obligations under the Convention and do not run counter to the national economic interest of the United States. The report and lay-over requirements of section 1206(b) of the 1988 Act (19 U.S.C. 3006(b)) have been met.

5. Pursuant to section 1102(a) of the 1988 Act (19 U.S.C. 2902(a)), on December 5, 1988, the United States entered into a trade agreement providing

for the reduction of rates of duty applicable to imports of certain tropical products. This trade agreement with other contracting parties to the General Agreement on Tariffs and Trade ("GATT") (61 Stat. (pts. 5 and 6)), as amended, committed the United States to make, on a provisional basis, tariff reductions on enumerated tropical products.

6. Pursuant to section 1102(a) of the 1988 Act, by Proclamation 6030 of September 28, 1989, and specifically Annex II thereto, I proclaimed temporary reductions of existing duties on imports of such enumerated tropical products, to be effective through December 31, 1992.

7. Pursuant to the 1988 Act, I have determined that the modification or continuance of existing duties is required or appropriate to carry out the trade agreement on tropical products. Accordingly, I have decided to extend the effective period of the temporary duty reductions on such enumerated tropical products, as set forth in headings 9903.10.01 through 9903.10.42, inclusive, of the HTS, through December 31, 1993.

8. Pursuant to subtitle B of title I of the 1988 Act (19 U.S.C. 3001–3012), by Proclamation 5911 of November 19, 1988, the United States adopted and implemented the HTS, comprising the Tariff Schedules of the United States ("TSUS") (19 U.S.C. 1202) converted into the format of the International Convention on the Harmonized Commodity Description and Coding System ("Harmonized System"). Included in the HTS, effective January 1, 1989, were new provisions covering jams of peaches, apricots, raspberries, or cherries, falling under Harmonized System subheading 2007.99. The Rates of Duty 1-General subcolumn on such products under these new HTS provisions were higher than the corresponding column 1 duty rates under the pertinent former TSUS items, because of procedures generally applied during the tariff conversion and definitional differences between the two nomenclature systems.

9. Section 312 of the Customs and Trade Act of 1990 ("1990 Act") (Public Law 101–382; 104 Stat. 666) temporarily reduced the most-favored-nation (MFN) duty rates (reflected in the column 1 rates of duty) on such imported products to the levels applicable under the former TSUS, effective through December 31, 1992. Section 312(b) of the 1990 Act authorizes the President to proclaim permanent modifications in column 1 rates of duty to restore the tariff treatment applicable under the former TSUS, upon a determination that appropriate trade concessions, including the correction of errors and oversights in foreign tariff schedules, have been obtained.

10. Accordingly, following negotiations, I have determined that appropriate trade concessions (specifically, a restoration by the European Economic Community ("EEC") of the duty rates on inedible mixtures of animal and vegetable fats and oils that applied before the EEC's implementation of a Harmonized System-based tariff in 1988) have been obtained, and that it is necessary and appropriate to restore the tariff treatment applicable under the TSUS to jams of peaches, apricots, raspberries, or cherries, falling under Harmonized System subheading 2007.99.

11. Finally, in order to effect in the HTS certain conforming changes omitted in Proclamation 6282 of April 25, 1991, Proclamation 6343 of September 28, 1991, Proclamation 6446 of June 15, 1992, and Proclamation 6455 of July 2, 1992, I have determined that it is necessary and appropriate to modify the HTS.

12. Section 604 of the Trade Act of 1974 ("Trade Act") (19 U.S.C. 2483) authorizes the President to embody in the HTS the substance of the provisions of that Act, and of other Acts affecting import treatment, and actions thereunder, including removal, modification, continuance, or imposition of any rate of duty or other import restriction. Section 1206(c) of the 1988 Act (19 U.S.C. 3006(c)) provides that any modifications proclaimed by the President under section 1206(a) of that Act may not take effect before the 15th day after the date on which the text of the proclamation is published in the **Federal Register**.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, acting under the authority vested in me by the Constitution and the laws of the United States of America, including but not limited to sections 1102 and 1206 of the 1988 Act, section 312 of the 1990 Act, and section 604 of the Trade Act, do proclaim that:

(1) The HTS is modified as set forth in Annex I to this proclamation.

(2) In order to provide for the continuation of previously proclaimed staged duty reductions on Canadian goods in the HTS provisions modified in Annex I to this proclamation, effective with respect to goods originating in the territory of Canada that are entered, or withdrawn from warehouse for consumption, on or after the dates specified in Annex II to this proclamation, the rate of duty in the HTS set forth in the Rates of Duty 1–Special subcolumn followed by the symbol "CA" in parentheses for each of the HTS subheadings enumerated in such Annex shall be deleted and the rate of duty provided in such Annex inserted in lieu thereof effective with respect to such goods on the dates specified.

(3) In order to provide for the continuation of previously proclaimed duty reductions for goods in the HTS provisions modified in Annex I to this proclamation that are the products of countries designated as beneficiary countries for purposes of the Caribbean Basin Economic Recovery Act, as amended ("CBERA") (19 U.S.C. 2701 *et seq.*), or the Andean Trade Preference Act ("ATPA") (19 U.S.C. 3201 *et seq.*), effective with respect to goods that are the products of countries designated as beneficiary countries for purposes of the CBERA or the ATPA that are entered, or withdrawn from warehouse for consumption, on or after the dates specified in Annex III to this proclamation, the rate of duty in the HTS set forth in the Rates of Duty 1-Special subcolumn followed by the symbol "E,J" in parentheses for each of the HTS subheadings enumerated in such Annex shall be deleted and the rate of duty provided in such Annex inserted in lieu thereof effective with respect to such goods on the dates specified.

(4) The duty reductions set forth in HTS headings 9903.10.01 through 9903.10.42 shall be effective with respect to goods entered, or withdrawn from warehouse for consumption, through December 31, 1993.

(5) Heading 2007 of the HTS is modified as provided in Annex IV to this proclamation.

(6) In order to provide for certain conforming changes omitted in aforementioned proclamations, the HTS is modified as set forth in Annex V to this proclamation.

(7) Any provisions of previous proclamations inconsistent with the provisions of this proclamation are hereby superseded to the extent of such inconsistency.

(8)(a) The modifications made by paragraph (1) of this proclamation shall be effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after January 1, 1993, or on or after the 15th day after the date of publication of this proclamation in the **Federal Register**, whichever is later.

(b) The modifications made by paragraphs (2), (3), and (6) of this proclamation shall be effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after the dates set forth in Annexes II, III, and V to this proclamation.

(c) The modifications made by paragraphs (4) and (5) of this proclamation shall be effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after January 1, 1993.

IN WITNESS WHEREOF, I have hereunto set my hand this sixteenth day of December, in the year of our Lord nineteen hundred and ninety-two, and of the Independence of the United States of America the two hundred and seventeenth.

George Bush

Billing code 3190-01-M

Annex I

MODIFICATIONS TO THE HARMONIZED TARIFF SCHEDULE
OF THE UNITED STATES (HTS)

The HTS is modified as provided below, with bracketed matter included to assist in the understanding of the proclaimed modifications. The following supersedes matter now in the HTS. The subheadings and superior text are set forth in columnar format, and material in such columns is inserted in the columns of the HTS designated "Heading/Subheading", "Article Description", "Rates of Duty 1-General", "Rates of Duty 1-Special", and "Rates of Duty 2", respectively.

Effective with respect to articles that are entered, or withdrawn from warehouse for consumption, on or after January 1, 1993, or on or after the fifteenth day after the date of publication of this proclamation in the Federal Register, whichever is later.

1. Subparagraph (b) of rule 5 of the General Rules of Interpretation is modified by deleting the expression "does not apply" and by inserting the expression "is not binding" in lieu thereof.

2. The following new note 2 to chapter 3 is inserted:

"2. In this chapter the term "pellets" means products which have been agglomerated either directly by compression or by the addition of a small quantity of binder."

3. The article description for heading 0305 is modified by deleting the expression "fish meal" and by inserting the expression "flours, meals and pellets of fish," in lieu thereof.

4. The article description for subheading 0305.10 is modified by deleting the expression "Fish meal" and by inserting the expression "Flours, meals and pellets of fish," in lieu thereof.

5. The article description for heading 0306 is modified by inserting after the word "brine" and before the colon the expression "; flours, meals and pellets of crustaceans, fit for human consumption".

6. The article description for subheadings 0306.19.00 and 0306.29.00 is deleted and the following is inserted for each subheading in lieu thereof:

"Other, including flours, meals and pellets of crustaceans, fit for human consumption"

7. The article description for heading 0307 is modified by inserting after the word "brine" and before the colon the expression "; flours, meals and pellets of aquatic invertebrates other than crustaceans, fit for human consumption".

8. The superior text, "Other:", immediately preceding subheading 0307.91.00 is deleted and the following is inserted in lieu thereof:

"Other, including flours, meals and pellets of aquatic invertebrates other than crustaceans, fit for human consumption:"

9. The following new note 3 to chapter 4 is inserted:

"3. This chapter does not cover:

(a) Products obtained from whey, containing by weight more than 95 percent lactose, expressed as anhydrous lactose calculated on the dry matter (heading 1702); or

(b) Albumins (including concentrates of two or more whey proteins, containing by weight more than 80 percent whey proteins, calculated on the dry matter) (heading 3502) or globulins (heading 3504)."

Annex I (con.)

10. The following new subheading note 1 to chapter 4 is inserted:

"Subheading Note

1. For the purposes of subheading 0404.10, the expression "modified whey" means products consisting of whey constituents, i.e., whey from which all or part of the lactose, proteins or minerals have been removed, whey to which natural whey constituents have been added, and products obtained by mixing natural whey constituents."

11.(a) Subheading 0404.10 is deleted and subheading 0404.10 and new subheadings 0404.10.05, 0404.10.07, and 0404.10.09 and new superior texts thereto are inserted, as follows:

"0404.10	[Whey, whether or not...:] Whey and modified whey, whether or not concentrated or containing added sugar or other sweetening matter:			
	Modified whey:			
0404.10.05	Whey protein concentrates.....	10%	Free (A,E,IL,J) 5% (CA)	20%
	Other:			
0404.10.07	Containing over 5.5 percent by weight of butterfat and not packaged for retail sale.....	16%	Free (E,IL,J) 8% (CA)	20%
0404.10.09	Other.....	10%	Free (E,IL,J) 5% (CA)	20%
	Other:"			

(b) The article description for subheadings 0404.10.20 and 0404.10.40 shall have the same degree of indentation as that of subheading 0404.10.05.

(c) Subheading 0404.90.05 is deleted.

(d) Subheadings 0404.90.40 and 0404.90.60 are renumbered as 0404.90.45 and 0404.90.65, respectively.

(e) The article description for subheading 9904.10.75 is modified by deleting the expression "0404.90.60," and inserting the expression "0404.10.09, 0404.90.65," in lieu thereof.

(f) The article description for subheading 9904.10.81 is modified by inserting a comma after the expression "by weight of butterfat" and by deleting the expression "0404.90.40, 0404.90.60," and inserting the expression "0404.10.07, 0404.10.09, 0404.90.45, 0404.90.65" in lieu thereof.

12. The article description for subheading 0406.10 is deleted and the following is inserted in lieu thereof:

"Fresh (unripened or uncured) cheese, including whey cheese, and curd:"

13. Note 3(c) to chapter 7 is deleted and the following is inserted in lieu thereof:

"(c) Flour, meal, flakes, granules and pellets of potatoes (heading 1105);"

Annex I (con.)

14 The following new note 3 to chapter 8 is inserted:

"3. Dried fruit or dried nuts of this chapter may be partially rehydrated, or treated for the following purposes.

(a) For additional preservation or stabilization (e.g., by moderate heat treatment, sulfuring, the addition of sorbic acid or potassium sorbate)

(b) To improve or maintain their appearance (e.g., by the addition of vegetable oil or small quantities of glucose syrup)

provided that they retain the character of dried fruit or dried nuts."

15.(a) Heading 0902 and subheadings 0902.10.00 and 0902.20.00 are deleted and the following is inserted in lieu thereof:

"0902	Tea, whether or not flavored:			
0902.10	Green tea (not fermented) in immediate packings of a content not exceeding 3 kg:			
0902.10.10	Flavored	10%	Free (A,E,IL,J) 5% (CA)	20%
0902.10.90	Other	Free		Free
0902.20	Other green tea (not fermented):			
0902.20.10	Flavored	10%	Free (A,E,IL,J) 5% (CA)	20%
0902.20.90	Other	Free		Free"

(b) Subheading 2106.90.60 is renumbered as 2106.90.65.

16. The article description for heading 0909 is deleted and the following is inserted in lieu thereof:

"Seeds of anise, badian, fennel, coriander, cumin or caraway; juniper berries:"

17. The article description for subheading 0909.50.00 is deleted and the following is inserted in lieu thereof:

"Seeds of fennel; juniper berries"

18. The article description for heading 1105 is deleted and the following is inserted in lieu thereof:

"Flour, meal, flakes, granules and pellets of potatoes:"

19. The article description for subheading 1105.20.00 is deleted and the following is inserted in lieu thereof:

"Flakes, granules and pellets"

20.(a) The superior text, "Industrial monocarboxylic fatty acids:", immediately preceding subheading 1519.11.00 is deleted and the following is inserted in lieu thereof:

"Industrial monocarboxylic fatty acids; acid oils from refining:"

(b) Subheading 1519.20.00 is deleted.

(c) Subheadings 1519.30, 1519.30.20, 1519.30.40 and 1519.30.60 are renumbered as 1519.20, 1519.20.20, 1519.20.40 and 1519.20.60, respectively.

21. The article description for subheading 1604.14 is deleted and the following is inserted in lieu thereof:

"Tunas, skipjack and bonito (Sarda spp.):"

Annex I (con.)

22. The article description for the superior text immediately preceding subheading 1604.14.70 is modified by deleting the expression "Atlantic bonito:" and by inserting "Bonito (Sarda spp.):" in lieu thereof.

23. The article description for subheading 1806.20 is modified by deleting the expression "blocks or slabs" and by inserting the expression "blocks, slabs or bars" in lieu thereof.

24. Note 2 to chapter 19 is deleted and the following is inserted in lieu thereof:

"2. For the purposes of heading 1901, the terms "flour" and "meal" mean:

(a) Cereal flour and meal of chapter 11, and

(b) Flour, meal and powder of vegetable origin of any chapter, other than flour, meal or powder of dried vegetables (heading 0712), of potatoes (heading 1105) or of dried leguminous vegetables (heading 1106)."

25. The article description for heading 2009 is modified by inserting the expressions "not fortified with vitamins or minerals," after the expression "Fruit juices (including grape must) and vegetable juices,".

26. Notes 1(c) through 1(g), inclusive, to chapter 21 are redesignated as 1(d) through 1(h), respectively, and the following new note 1(c) is inserted:

"(c) Flavored tea (heading 0902);"

27. Chapter 21 is modified by inserting new additional U.S. notes 1 and 2, as follows:

"Additional U.S. Notes

1. Subheadings 2106.90.16 and 2106.90.19 cover vitamin or mineral fortified fruit or vegetable juices that are imported only in concentrated form. Such juices imported in non-concentrated form are classifiable in subheadings 2202.90.30, 2202.90.35 or 2202.90.39, as appropriate.

2. For the purposes of subheadings 2106.90.16 and 2106.90.19:

(a) The term "liter" in the "Rates of Duty" column of the provisions applicable to fruit juices means liter of reconstituted fruit juice;

(b) The term "reconstituted fruit juice" means the product which can be obtained by mixing the imported concentrate with water in such proportion that the product will have a Brix value equal to that found by the Secretary of the Treasury from time to time to be the average Brix value of like natural unconcentrated juice in the trade and commerce of the United States;

(c) The term "Brix value" means the refractometric sucrose value of the juice, adjusted to compensate for the effect of any added sweetening materials, and thereafter corrected for acid;

Annex I (con.)

27 (con.):

(d) In determining the number of liters of reconstituted fruit juice which can be obtained from a concentrate, the degree of concentration shall be calculated on a volume basis to the nearest 0.5 degree, as determined by the ratio of the Brix value of the imported concentrated juice to that of the reconstituted juice, corrected for differences of specific gravity of the juices. Any juice having a degree of concentration of less than 1.5 (as determined before correction to the nearest 0.5 degree) shall be regarded as a natural unconcentrated juice; and

(e) In determining the degree of concentration of mixed fruit juices, the mixture shall be considered as being wholly of the component juice having the lowest Brix value."

28. Subheading 2106.90 is modified by inserting the following new subheadings, with superior text, in numerical sequence:

	[Food preparations...:]				
	[Other:]				
	"Fruit or vegetable juices, fortified with vitamins or minerals:				
2106.90.16	Orange juice.....	9.25¢/liter	Free (E,J) 4.6¢/liter (CA)	18¢/liter	
2106.90.19	Other.....	The rate applicable to the natural juice in heading 2009	Free (E,J) The rate applicable to the natural juice in heading 2009 (A,CA,IL)	The rate applicable to the natural juice in heading 2009"	

29. Notes 1(a) through 1(e), inclusive, to chapter 22 are redesignated as 1(b) through 1(f), respectively, and the following new note 1(a) is inserted:

"(a) Products of this chapter (other than those of heading 2209) prepared for culinary purposes and thereby rendered unsuitable for consumption as beverages (generally heading 2103);"

30. Additional U.S. notes 2 through 8, inclusive, to chapter 22 are redesignated as 3 through 9, respectively, and the following new additional U.S. note 2 is inserted:

"2. Subheadings 2202.90.30, 2202.90.35 and 2202.90.39 cover vitamin or mineral fortified fruit or vegetable juices that are imported only in non-concentrated form. Such juices imported in concentrated form are classifiable in subheadings 2106.90.16 or 2106.90.19, as appropriate."

Annex I (con.)

31.(a) Subheading 2202.90 is modified by inserting the following new subheadings, with superior text, in numerical sequence:

	[Waters, including mineral...:]				
	[Other:]				
	"Fruit or vegetable juices, fortified with vitamins or minerals:				
	Orange juice:				
2202.90.30	Not made from a juice having a degree of concentration of 1.5 or more (as determined before correction to the nearest 0.5 degree).....	5.3¢/liter	Free (E,J) 2.6¢/liter (CA)	18¢/liter	
2202.90.35	Other.....	9.25¢/liter	Free (E,J) 4.6¢/liter (CA)	18¢/liter	
2202.90.39	Other.....	The rate applicable to the natural juice in heading 2009	Free (E,J) The rate applicable to the natural juice in heading 2009 (A,CA,IL)	The rate applicable to the natural juice in heading 2009"	

(b) Subheadings 2009.19.20 and 2009.19.40 are renumbered as 2009.19.25 and 2009.19.45, respectively.

32. The article description for heading 2206.00 is deleted and the following is inserted in lieu thereof:

"Other fermented beverages (for example, cider, perry, mead); mixtures of fermented beverages and mixtures of fermented beverages and non-alcoholic beverages not elsewhere specified or included:"

33. The article description for heading 2501.00.00 is modified by deleting the expression "whether or not in aqueous solution" and by inserting the expression "whether or not in aqueous solution or containing added anticaking or free-flowing agents" in lieu thereof.

34. The article description for subheading 2528.10.00 is deleted and the following is inserted in lieu thereof:

"Natural sodium borates and concentrates thereof (whether or not calcined)"

35. Note 6(d) to chapter 28 is modified by deleting the expression "0.002 microcurie per gram;" and by inserting the expression "74 becquerels per gram (0.002 microcurie per gram);"

36. The article description for heading 2818 is deleted and the following is inserted in lieu thereof:

"Artificial corundum, whether or not chemically defined; aluminum oxide; aluminum hydroxide:"

37. The article description for subheading 2818.10 is deleted and the following is inserted in lieu thereof:

"Artificial corundum, whether or not chemically defined:"

38. The article description for subheading 2818.20.00 is deleted and the following is inserted in lieu thereof:

"Aluminum oxide, other than artificial corundum"

Annex I (con.)

39. The article description for heading 2850.00 is deleted and the following is inserted in lieu thereof:

"Hydrides, nitrides, azides, silicides and borides, whether or not chemically defined, other than compounds which are also carbides of heading 2849:"

40.(a) Subheadings 3301.30, 3301 30.10, 3301.30.50 and 3301.90.00 are superseded by:

	[Essential oils...:]			
"3301.30.00	Resinoids.....	Free		Free
3301.90	Other:			
3301.90.10	Extracted oleoresins.....	6%	Free (A*,CA,E, IL,J)	25%
3301.90.50	Other.....	Free		20%"

(b) General note 3(c)(ii)(D) to the HTS is modified by deleting "3301.30.10 India" and inserting, in numerical sequence, "3301.90.10 India" in lieu thereof.

41. Note 5 to chapter 34 is modified by inserting in (b) of the second paragraph the expression "refined or" between the words "not" and "colored"

42. The article description for heading 3502 is deleted and the following is inserted in lieu thereof:

"Albumins (including concentrates of two or more whey proteins, containing by weight more than 80 percent whey proteins, calculated on the dry matter), albuminates and other albumin derivatives:"

43. The article description for subheading 3707.10.00 is deleted and the following is inserted in lieu thereof:

"Sensitizing emulsions"

44. The article description for subheading 3806.10.00 is deleted and the following is inserted in lieu thereof:

"Rosin and resin acids"

45. The article description for subheading 3809.91.00 is deleted and the following is inserted in lieu thereof:

"Of a kind used in the textile or like industries"

46. The article description for subheading 3809.92 is deleted and the following is inserted in lieu thereof:

"Of a kind used in the paper or like industries:"

47. The article description for subheading 3809.99 is deleted and the following is inserted in lieu thereof:

"Of a kind used in the leather or like industries:"

48.(a) The article description for heading 4202, for subheadings 4202.22, 4202.22.15, 4202.32, and 4202.92, and for the superior text to subheading 4202.32.10 is modified by deleting the expression "of plastic sheeting" and by inserting the expression "of sheeting of plastics" in lieu thereof. The article description for heading 4202 is modified by deleting the expression "with such materials" and by inserting the expression "with such materials or with paper" in lieu thereof.

Annex I (con.)

48. (con.):

(b) Subheading 4202.29.00 is superseded by:

	[Trunks, suitcases,...:] [Handbags,...:] Other: Of materials (other than leather, composition leather, sheeting of plastics, textile materials, vulcanized fiber or paperboard) wholly or mainly covered with paper:			
"4202.29				
4202.29.10	Of plastics	5.3%	Free (A,E,IL,J) 2.6% (CA)	80%
4202.29.20	Of wood	5.1%	Free (A,E,IL,J) 2.5% (CA)	33 1/3%
4202.29.50	Other	7.8%	Free (E,IL,J) 3.9% (CA)	110%
4202.29.90	Other	20%	Free (CA,IL) 19% (E,J)	45%"

(c) Subheading 4202.39.00 is superseded by:

	[Trunks, suitcases,...:] [Articles...:] Other: Of materials (other than leather, composition leather, sheeting of plastics, textile materials, vulcanized fiber or paperboard) wholly or mainly covered with paper:			
"4202.39				
4202.39.10	Of plastics	5.3%	Free (A,E,IL,J) 2.6% (CA)	80%
4202.39.20	Of wood	5.1%	Free (A,E,IL,J) 2.5% (CA)	33 1/3%
4202.39.50	Other	7.8%	Free (E,IL,J) 3.9% (CA)	110%
4202.39.90	Other	20%	Free (A,CA,E,IL, J)	45%"

(d) Subheading 4202.99.00 is superseded by:

	[Trunks, suitcases,...:] [Other:] Other: Of materials (other than leather, composition leather, sheeting of plastics, textile materials, vulcanized fiber or paperboard) wholly or mainly covered with paper:			
"4202.99				
4202.99.10	Of plastics	3.4%	Free (A,E,IL,J) 1.7% (CA)	80%
	Of wood:			
4202.99.20	Not lined with textile fabrics	6.7%	Free (A,E,IL,J) 3.3% (CA)	33 1/3%
4202.99.30	Lined with textile fabrics	2.2¢/kg + 2.9%	Free (E,IL,J) 1.1¢/kg + 1.4% (CA)	11¢/kg + 20%
4202.99.50	Other	7.8%	Free (E,IL,J) 3.9% (CA)	110%
4202.99.90	Other	20%	Free (CA,IL) 19% (E,J)	45%"

(e) Subheadings 3924.90.50, 3926.90.90, 4420.90.40, 4420.90.60, 4421.90.90 and 7326.90.30 are renumbered as 3924.90.55, 3926.90.95, 4420.90.45, 4420.90.65, 4421.90.95 and 7326.90.35, respectively.

(f) The article descriptions for headings 9902.44.21 and 9902.44.22 and subheading 9905.44.15 are modified by deleting the expression "4421.90.90" and inserting the expression "4421.90.95" in lieu thereof.

49. The article description for subheading 4820.30.00 is deleted and the following is inserted in lieu thereof:

"Binders (other than book covers), folders and file covers"

Annex I (con.)

50. The following new second paragraph is inserted in note 2(A) to section XI:

"When no one textile material predominates by weight, the goods are to be classified as if consisting wholly of that one textile material which is covered by the heading which occurs last in numerical order among those which equally merit consideration."

51. Note 7(a)(iv) to chapter 59 is modified by deleting the word "fabric" and by inserting the word "fabrics" in lieu thereof.

52. The article description for subheading 5911.10 is deleted and the following is inserted in lieu thereof:

"Textile fabrics, felt and felt-lined woven fabrics, coated, covered or laminated with rubber, leather or other material, of a kind used for card clothing, and similar fabrics of a kind used for other technical purposes:"

53. Note 8 to chapter 61 is deleted and the following is inserted in lieu thereof:

"8. Garments of this chapter designed for left over right closure at the front shall be regarded as men's or boys' garments, and those designed for right over left closure at the front as women's or girls' garments. These provisions do not apply where the cut of the garment clearly indicates that it is designed for one or other of the sexes.

Garments which cannot be identified as either men's or boys' garments or as women's or girls' garments are to be classified in the headings covering women's or girls' garments."

54.(a) New subheading 6115.93.15 is inserted, as follows, in numerical sequence:

	[Panty hose, tights,...:]				
	[Other:]				
	[Of synthetic fibers:]				
"6115.93.15	Surgical compression stockings for orthopedic purposes, other than stockings merely for the treatment of varicose veins.....	5.8%	Free (A,E,IL,J) 2.9% (CA)	40%"

(b) Subheading 9021.19.80 is renumbered as 9021.19.85.

55. Note 8 to chapter 62 is deleted and the following is inserted in lieu thereof:

"8. Garments of this chapter designed for left over right closure at the front shall be regarded as men's or boys' garments, and those designed for right over left closure at the front as women's or girls' garments. These provisions do not apply where the cut of the garment clearly indicates that it is designed for one or other of the sexes.

Garments which cannot be identified as either men's or boys' garments or as women's or girls' garments are to be classified in the headings covering women's or girls' garments."

Annex I (con.)

56.(a) Additional U.S. note 4 to chapter 64 is modified by deleting the first sentence thereof, and by inserting the expression "of subheading 6406.10" after the expression "Provisions" in the second sentence thereof.

(b) The article description for heading 6406 is deleted and the following is inserted in lieu thereof:

"Parts of footwear (including uppers whether or not attached to soles other than outer soles); removable insoles, heel cushions and similar articles; gaiters, leggings and similar articles, and parts thereof:"

57. Notes 3(c) and 3(n) to chapter 71 are deleted and the following is inserted, in alphabetical order, in lieu thereof:

"(c) Goods of chapter 32 (for example, lustres);"

"(n) Articles classified in chapter 96 by virtue of note 4 to that chapter; or"

58. The article description for subheading 7308.40.00 is deleted and the following is inserted in lieu thereof:

"Equipment for scaffolding, shuttering, propping or pit-propping"

59. The article description for heading 8416 is deleted and the following is inserted in lieu thereof:

"Furnace burners for liquid fuel, for pulverized solid fuel or for gas; mechanical stokers, including their mechanical grates, mechanical ash dischargers and similar appliances; parts thereof:"

60. The article description for subheading 8416.30.00 is deleted and the following is inserted in lieu thereof:

"Mechanical stokers, including their mechanical grates, mechanical ash dischargers and similar appliances"

61. The article description for heading 8426 is modified by deleting the word "Derricks" and by inserting the expression "Ships' derricks" in lieu thereof.

62. The article description for heading 8470 is deleted and the following is inserted in lieu thereof:

"Calculating machines; accounting machines, postage-franking machines, ticket-issuing machines and similar machines, incorporating a calculating device; cash registers:"

63. The article description for heading 8521 is deleted and the following is inserted in lieu thereof:

"Video recording or reproducing apparatus, whether or not incorporating a video tuner:"

64. Heading 8528 and subheadings 8528.10, 8528.10.40 and 8528.10.80 are deleted and the following is inserted in lieu thereof:

"8528	Television receivers (including video monitors and video projectors), whether or not incorporating radiobroadcast receivers or sound or video recording or reproducing apparatus:				
8528.10	Color:				
8528.10.30	Incorporating video recording or reproducing apparatus	3.9%	Free (A,E,IL,J) 1.9% (CA)	25%	
8528.10.60	Other	5%	Free (B,E,IL,J) 2.5% (CA)	35%"	

Annex I (con.)

65. Note 3 to chapter 87 is deleted, and notes 4 and 5 to chapter 87 are redesignated as 3 and 4, respectively.

66. The article description for heading 8702 is deleted and the following is inserted in lieu thereof:

"Motor vehicles for the transport of ten or more persons, including the driver:"

67. Notes 1(b) through 1(l), inclusive, to chapter 90 are redesignated as 1(c) through 1(m), respectively, and the following new note 1(b) is inserted:

"(b) Supporting belts or other support articles of textile material, whose intended effect on the organ to be supported or held derives solely from their elasticity (for example, maternity belts, thoracic support bandages, abdominal support bandages, supports for joints or muscles) (section XI);"

68. The superior text, "Thermometers, not combined with other instruments:", immediately preceding subheading 9025.11, is deleted and the following is inserted in lieu thereof:

"Thermometers and pyrometers, not combined with other instruments:"

69.(a) Subheading 9025.19.00 is superseded by:

	[Hydrometers and similar...:]			
	[Thermometers...:]			
"9025.19	Other:			
9025.19.40	Pyrometers	3.9%	Free (A,C,E,IL,J) 1.9% (CA)	45%
9025.19.80	Other	5%	Free (A,B,C,E, IL,J) 2.5% (CA)	40%"

(b) Subheading 9025.80.30 is renumbered as 9025.80.35 and the article description for renumbered subheading 9025.80.35 is modified by deleting ", psychrometers and pyrometers" and by inserting "and psychrometers" in lieu thereof.

70. The article description for heading 9029 is modified by deleting the expression "of heading 9015;" and by inserting the expression "of heading 9014 or 9015;" in lieu thereof.

71. In note 1 to chapter 92--

(a) subparagraph (d) is modified by inserting the word "or" immediately following the semicolon.

(b) subparagraph (e) is modified by deleting the expression "9706); or" and by inserting the expression "9706)." in lieu thereof.

(c) subparagraph (f) is deleted.

72. The article description for heading 9506 is modified by deleting the expression "for gymnastics," and by inserting the expression "for general physical exercise, gymnastics," in lieu thereof.

73. The article description for subheading 9506.91.00 is deleted and the following is inserted in lieu thereof:

"Articles and equipment for general physical exercise, gymnastics or athletics; parts and accessories thereof"

74. The article description for subheading 9603.21.00 is deleted and the following is inserted in lieu thereof:

"Toothbrushes, including dental-plate brushes"

Annex I (con.)

75. In note 5 to chapter 97--

(a) the expression "are to be treated as forming part of" is deleted and the expression "are to be classified with" is inserted in lieu thereof; and

(b) the following new second sentence is inserted:

"Frames which are not of a kind or of a value normal to the articles referred to in this note are to be classified separately."

Annex II

Effective with respect to goods originating in the territory of Canada that are entered, or withdrawn from warehouse for consumption, on or after the dates set forth in the following tabulation.

For each of the following subheadings created by Annex I of this proclamation, on or after January 1 of each of the following years, the rate of duty in the Rates of Duty 1-Special subcolumn in the HTS that is followed by the symbol "CA" in parentheses is deleted and the following rates of duty inserted in lieu thereof.

HTS Subheading	1994	1995	1996	1997	1998

Annex III

Effective with respect to articles that are the product of any designated beneficiary country under the CBERA or the ATPA that are entered, or withdrawn from warehouse for consumption, on or after the dates set forth in the following tabulation.

For each of the following subheadings created by Annex I of this proclamation, on or after January 1 of each of the following years, the rate of duty in the Rates of Duty 1-Special subcolumn in the HTS that is followed by the symbol "E,J" in parentheses is deleted and the following rates of duty inserted in lieu thereof.

HTS Provision	1994	1995	1996
4202.29.90	18.5%	18%	17.5%
4202.99.90	18.5%	18%	17.5%

Annex IV

Effective with respect to goods entered, or withdrawn from warehouse for consumption, on or after January 1, 1993:

The following supersedes matter in the HTS.

1. Subheading 2007.99.05 is modified by deleting "7%" from the Rates of Duty 1-General subcolumn and by inserting "3%" in lieu thereof.

2. Subheading 2007.99.20 is modified by deleting "35%" from the Rates of Duty 1-General subcolumn and by inserting "7%" in lieu thereof.

3. Subheading 2007.99.25 is modified by deleting "15.4¢/kg + 10%" from the Rates of Duty 1-General subcolumn and by inserting "7%" in lieu thereof.

4. Subheading 2007.99.35 is modified by deleting "20%" from the Rates of Duty 1-General subcolumn and by inserting "7%" in lieu thereof.

Annex V

Section (a). Effective with respect to articles both: (i) imported on or after January 1, 1976, and (ii) entered, or withdrawn from warehouse for consumption, on or after May 1, 1991:

HTS heading 9902.30.33 is modified by deleting "2921.43.60" and inserting "2921.43.18" in lieu thereof.

Section (b). Effective with respect to articles both: (i) imported on or after January 1, 1976, and (ii) entered, or withdrawn from warehouse for consumption, on or after July 2, 1992:

General note 3(c)(ii)(D) is modified:

(1) by deleting the following HTS subheadings and the country set opposite such subheading:

2933.59.30 India	2933.90.40 India
2933.59.50 India	2933.90.48 India
2933.90.31 India	2933.90.50 India

(2) by adding in numerical sequence, the following HTS subheadings and country set opposite them:

2933.59.59 India	2933.90.85 India
2933.59.90 India	2933.90.90 India
2933.90.55 India	2933.90.95 India

Section (c). Effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after July 22, 1992:

General note 3(c)(ix)(D)(5) to the HTS is modified by deleting the expression "material which the product" and inserting the expression "material which is the product" in lieu thereof.

Section (d). Effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after January 1, 1993:

(1) General note 3(c)(v)(A) to the HTS is modified by deleting from the list of countries "Saint Christopher and Nevis" and inserting "St. Kitts and Nevis", in lieu thereof.

(2) HTS subheading 9902.81.05 is modified by deleting the "Free (CA)" rate from the Rates of Duty 1-Special subcolumn for such subheading.

(3) HTS subheading 9905.00.00 is modified by deleting from the article description for such subheading "6813.10", "6813.90", and "7312.90".

(4) HTS subheading 9905.00.30 is modified by deleting from the article description for such subheading "5801.32".

(5) HTS subheading 9905.29.37 is modified by deleting from the article description for such subheading "2935.00.33 or".

(6) HTS subheading 9905.42.10 is modified by deleting from the article description for such subheading "4202.91.00 or".

(7) HTS subheading 9905.85.05 is modified by deleting from the article description for such subheading the expression "subheadings 8501.33.30, 8501.33.40, 8501.34.30, 8501.51, 8501.53.60 or 8501.53.80" and inserting "subheading 8501.51" in lieu thereof.

Annex V (con.)

Section (d) (con.)

(8) Subchapter V of chapter 99 to the HTS is modified by deleting the following subheadings:

9905.00.10	9905.68.30
9905.25.10	9905.70.05
9905.28.01	9905.76.10
9905.28.02	9905.84.05
9905.28.03	9905.84.06

FEDERAL REGISTER SUBSCRIBERS: IMPORTANT INFORMATION ABOUT YOUR SUBSCRIPTION

After 6 years without an adjustment, it has become necessary to increase the price of the **Federal Register** in order to begin recovering the actual costs of providing this subscription service. Effective October 1, 1992, the price for the **Federal Register** will increase and be offered as follows:

(1) **FEDERAL REGISTER COMPLETE SERVICE**—Each business day you can continue to receive the daily **Federal Register**, plus the monthly **Federal Register Index** and **Code of Federal Regulations List of Sections Affected (LSA)**, all for **$415.00** per year.

(2) **FEDERAL REGISTER DAILY ONLY SERVICE**—With this subscription service, you will receive the **Federal Register** every business day for **$375.00** per year.

HOW WILL THIS AFFECT YOUR CURRENT SUBSCRIPTION?

You will receive your current complete **Federal Register** service for the length of time remaining in your subscription.

AT RENEWAL TIME

At renewal time, to keep this important subscription coming—you can continue to receive the complete **Federal Register** service by simply renewing for the entire package, or you can select and order only the parts that suit your needs:

- renew your entire **Federal Register Service** (complete service)

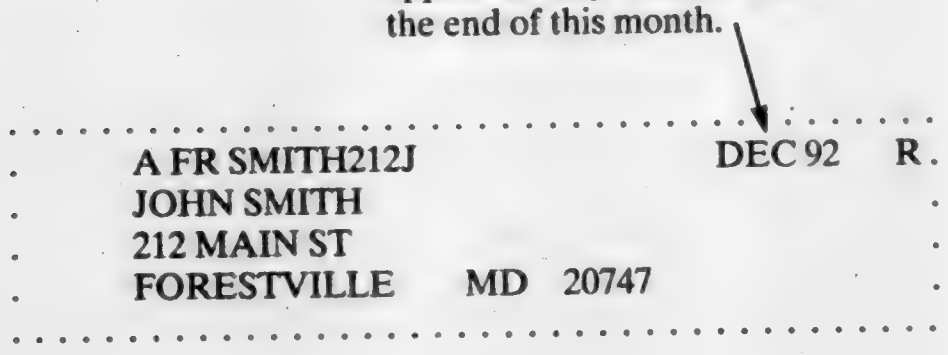
or select. . .

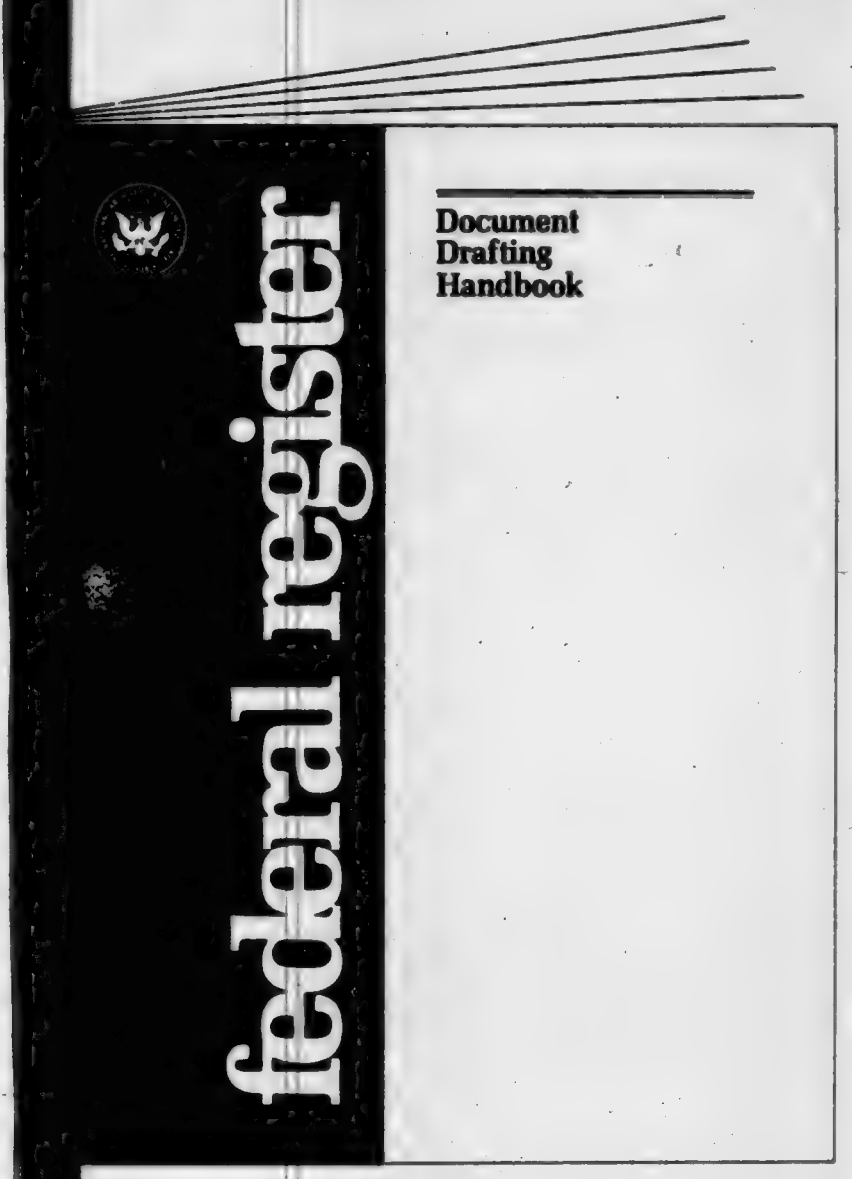
- the daily only **Federal Register** (basic service)
- and complement the basic service with either of the following supplements: the monthly **Federal Register Index** or the monthly **LSA**

When your current subscription expires, you will receive a renewal notice to continue the complete **Federal Register** service. At that time, you will also receive an order form for the daily **Federal Register** basic service, the **Federal Register Index**, and the **LSA**.

To know when to expect the renewal notice, check the top line of your subscription mailing label for the month and year of expiration as shown in this sample:

A renewal notice will be sent approximately 90 days before the end of this month.





Federal Register Document Drafting Handbook

A Handbook for Regulation Drafters

This handbook is designed to help Federal agencies prepare documents for publication in the Federal Register. The updated requirements in the handbook reflect recent changes in regulatory development procedures, document format, and printing technology.

Price $5.50

Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

GUIDE: Revised January 1, 1992

The GUIDE to record retention is a useful reference tool, compiled from agency regulations, designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

Friday
December 18, 1992

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche format and magnetic tape. The annual subscription price for the **Federal Register** paper edition is $375, or $415 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $353; and magnetic tape is $37,500. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $4.50 for each issue, or $4.50 for each group of pages as actually bound; or $1.50 for each issue in microfiche form; or $175.00 per magnetic tape. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

Rules and Regulations

Federal Register
Vol. 57, No. 244
Friday, December 18, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

FEDERAL RETIREMENT THRIFT INVESTMENT BOARD

5 CFR Part 1650

Methods of Withdrawing Funds From the Thrift Savings Plan; Correction

AGENCY: Federal Retirement Thrift Investment Board.

ACTION: Correction to interim regulations.

SUMMARY: This document contains a correction to interim regulations which were published Friday, December 4, 1992, (57 FR 57321). The regulations related to the waiver of certain requirements for participants to obtain the signature of a spouse in connection with the withdrawal of funds from the Thrift Savings Plan.

EFFECTIVE DATE: December 18, 1992.

FOR FURTHER INFORMATION CONTACT: Thomas L. Gray, (202) 942–1662 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

The interim regulations that are the subject of this correction ensure that documentation submitted in support of waiver requests based on whereabouts unknown and exceptional circumstances is reliable.

Need for Correction

As published, the interim regulations revised § 1650.21(b) to include the introductory text of § 1650.21(c) but did not contain the instruction to delete the introductory text of § 1650.21(c).

Correction of Publication

Accordingly, the publication on December 4, 1992, of the interim regulations which were the subject of FR Doc. 92–29287, is corrected as follows:

§ 1650.21 [Corrected]

Paragraph 1. On page 57322 instruction 3 is amended to add at the end thereof "and the introductory text of § 1650.21(c) is removed."

Francis X. Cavanaugh,

Executive Director.

BILLING CODE 6760–01–M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 180

[CS–91–011]

Plant Variety Protection Act: Increase of Certification Fee

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action finalizes the proposed rule published in the **Federal Register**, September 3, 1991, which proposed amending the regulations under the Plant Variety Protection act (Act) of 1970 as amended to issue corrected certificates rather than certificates of correction and to increase the fees for plant variety protection certification services to keep the administration of the Act self-supporting.

EFFECTIVE DATE: January 19, 1993.

FOR FURTHER INFORMATION CONTACT: Kenneth H. Evans; Commissioner; Plant Variety Protection Office; Science Division; Agricultural Marketing Service; National Agricultural Library Building; Room 500; Beltsville; Maryland 20705; telephone: (301) 504–5518.

SUPPLEMENTARY INFORMATION: The Plant Variety Protection Act of 1970, as amended, (7 U.S.C. 2321 *et seq*) (Act) provides for the assessment and collection of reasonable fees for expenses incurred by the Department of Agriculture for the issuance of plant variety protection certificates and for related services. On December 22, 1987, the Act was amended to provide that fees, including late payments and accrued interest, shall be credited to the account that accrues the costs and shall remain available without fiscal year limitation to pay the costs incurred. Present fees will not cover the projected costs for fiscal year 1992. Therefore, the Department increases total fees for processing an application to $2,600. The Act also provides for issuing a corrected certificate when a correction is made in the certificate. The regulations are being changed to conform with the language of the Act to provide for the issuance of a corrected certificate. Previously the regulations provided for both corrected certificates and certificates of correction.

This final rule has been reviewed under USDA procedures established to implement Executive Order 12291 and Departmental Regulation 1512–1, and has been determined to be "non-major." It will not result in an annual effect on the economy of $100 million or more; will not cause a major increase in production costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; nor will it have a significant effect on competition, employment, or on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rule has been reviewed under Executive Order 12778, Civil Justice Reform. This action is not intended to have retroactive effect. This rule would not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule. There are no administrative procedures which must be exhausted prior to any judicial challenge to the provision of this rule.

The Administrator of the Agricultural Marketing Service has determined that this rule would not have a significant economic impact on a substantial number of small entities, as defined by the Regulatory Flexibility Act (5 U.S.C. 601 *et seq*), because (1) the fee represents a minimal increase of $200 in the costs of developing and producing a new variety for the commercial market; and (2) competitive effects are offset under this voluntary program since charges are based on volume (i.e., the cost to users varies in proportion to the number of applications submitted).

This regulation does not significantly affect the environment. An environmental impact statement is not required under the National Environmental Policy Act of 1969.

From fiscal year 1981 to fiscal year 1984, the cost to the agency of processing an application was reduced

from approximately $3,600 to $2,000; and fees were increased from $750 to $1,500 and then in 1984 to $2,000 to make the program self-supporting. From the time of the 1984 fee increase to fiscal year 1988, operating costs attributed to the program rose 35 percent and fees were increased to $2,400 per certificate. Projected revenues for 1992 are estimated to be 10 percent below projected costs.

On February 6 and 7, 1991, the Plant Variety Protection Advisory Board (Board) met and was provided information concerning increased costs which would be incurred by the Department in processing an application for a plant variety protection certificate during fiscal year 1992. This information was provided to support the Plant Variety Protection Office's recommendation for a fee increase to fully fund the program. The Board recommended that fees be raised at this time, but indicated that some members felt that certain plant variety protection activities should be funded by appropriated funds, and that the program should be prepared to process an increasing number of applications.

Fees collected under the program must be sufficient to fully fund the costs of the program. Under legislation passed December 22, 1987, the Plant Variety Protection Office was converted to a user-fee trust fund program in which all moneys collected are deposited in an account designated for funding the program and are not returned to the general Treasury.

Therefore, in view of the increase in costs incurred by the agency, the Department proposes an increase in the fee charged per certificate from $2,400 to $2,600. This fee increase is necessary to keep the Plant Variety Protection Office funded on a fully user-fee basis to conform with the intent of the Act.

Alternatives to increasing the fees were considered by the agency, and found not to be feasible. For example, reducing agency staff would not be a feasible alternative to increasing fees since the output per person would stay the same. The backlog would increase as well as the time period ineligible varieties are protected under the protection-applied-for status. The financial burden of the Government also would be increased by the amount the backlog grows. In addition, reducing the staff would not decrease overhead or supervisory costs.

Also not viable as an alternative is reducing the amount of supervision and review of plant examiners' work by the Commissioner or eliminating the placement of information on new varieties in the computer file Either of these actions would increase the probability of issuing certificates on ineligible applications, which would adversely affect the integrity of the program.

No comments were received on the proposed rule published on September 3, 1991, in the **Federal Register**. Accordingly, the regulations are amended as provided in this final rule.

List of Subjects in 7 CFR Part 180

Administrative practice and procedure, Labeling, Plants.

Accordingly, for the reasons set forth in the preamble, 7 CFR Part 180 is amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: Secs. 6, 22, 23, 26, 31, 42(b), 43, 56, 57, 91(c), 84 Stat. 1542; 7 U.S.C. 2326, 2352, 2353, 2356, 2371, 2402(b), 2403, 2426, 2427, 2501(c); 29 FR 16210, as amended, 37 FR 6327, 6505; U.S.C. 2371.

2. Sections 180.120 and 180.121 are revised to read as follows:

§ 180.120 Corrected certificate—Office mistake.

When a certificate is incorrect because of a mistake in the Office and upon return of the certificate to the Office, the Secretary may issue a corrected certificate stating the fact and nature of such mistake, without charge, to be issued to the owner in accordance with section 84 of the Act and recorded in the Office.

§ 180.121 Corrected certificate—applicant's mistake.

When a certificate is incorrect because of a mistake by the applicant of a clerical or typographical nature, or of minor character, or in the description of the variety (including, but not limited to, the use of a misleading variety name or a name assigned to a different variety of the same species), and the mistake is found by the Office to have occurred in good faith and does not require a further examination, the Secretary may, upon payment of the required fee and return of the original certificate, correct the certificate by issuing a corrected certificate, in accordance with section 85 of the Act. If the mistake requires a reexamination, a correction of the certificate shall be dependent on the results of the reexamination.

3. Section 180.175 is revised to read as follows:

§ 180.175 Fees and charges.

The following fees and charges apply to the services and actions specified below:

(a) Filing the application and notifying public of filing	$275
(b) Search or examination	2,050
(c) Allowance and issuance of certificate and notifying public of issuance	275
(d) Revive an abandoned application	275
(e) Reproduction of records, drawings, certificates, exhibits, or printed material (copy per page of material)	1
(f) Authentication (each page)	1
(g) Correcting or reissuance of a certificate	275
(h) Recording assignments (per certificate/application)	25
(i) Copies of 8 × 10 photographs in color	25
(j) Additional fee for reconsideration	275
(k) Additional fee for late payment	25
(l) Additional fee for late replenishment of seed	25
(m) Appeal to Secretary (refundable if appeal overturns the Commissioner's decision)	2,600

(n) Field inspections by a representative of the Plant Variety Protection Office made at the request of the applicant shall be reimbursable in full (including travel, per diem or subsistence, and salary) in accordance with Standardized Government Travel Regulations.

(o) Any other service not covered above will be charged for at rates prescribed by the Commissioner, but in no event shall they exceed $40 per employee-hour.

BILLING CODE 3410-02-M

Food and Nutrition Service

7 CFR Parts 272 and 273

[Amendment No. 340]

Food Stamp Program; Employment and Training Provisions From the Mickey Leland Memorial Domestic Hunger Relief Act

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: On August 15, 1991, the Department published a rulemaking that proposed several provisions affecting the Food Stamp Program's Employment and Training (E&T) requirements based upon provisions from the Mickey Leland Memorial Domestic Hunger Relief Act (Pub. L. 101-624, November 28, 1990). The rulemaking also proposed to change the date by which the State agencies must submit E&T

plans to the Department. In addition, the rulemaking proposed to change to the current procedures for handling certain child care reimbursements which are issued by the Aid to Families with Dependent Children Program (AFDC). This rule addresses significant comments and finalizes certain provisions in the proposed rulemaking. A technical correction is also included in this rule.

EFFECTIVE DATE: The provisions at § 273.7(d)(1)(i) (A) and (B) are effective retroactive to October 1, 1991. The provision at § 273.7(c)(4)(viii) is effective January 19, 1993 and must be implemented by August 15, 1993. The provision at § 273.10(d)(1)(i) is effective and must be implemented by March 1, 1993. All other provisions are effective and must be implemented retroactively to February 1, 1992.

FOR FURTHER INFORMATION CONTACT: Ellen Henigan, Supervisor, Work Program Section, Food Stamp Program, Food and Nutrition Service, USDA, 3101 Park Center Drive, Alexandria, Virginia 22302, (703) 305–2762.

SUPPLEMENTARY INFORMATION:

Classification

Executive Order 12291 and Secretary's Memorandum No. 1512–1

This final rule has been review under Executive Order 12291 and has been classified as not major because it does not meet any of the three criteria identified under the Executive Order. This action will not have an annual effect on the economy of $100 million or more, nor will it result in major increases in costs or prices for consumers, individual industries, Federal, State or local government agencies or geographic regions. Furthermore, it will not have significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Executive Order 12372

The Food Stamp Program is listed in the Catalog of Federal Domestic Assistance under No. 10.551. For the reasons set forth in the final rule in 7 CFR part 3015, subpart V and related Notice (48 FR 29115, June 24, 1983), this Program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Executive Order 12778

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. This rule is intended to have preemptive effect with respect to any State or local laws, regulations or policies which conflict with its provisions or which would otherwise impede its full implementation. This rule is not intended to have retroactive effect unless so specified in the "Effective Date" paragraph of this preamble. Prior to any judicial challenge to the provisions of this rule or the application of its provisions, all applicable administrative procedures must be exhausted. In the Food Stamp Program the administrative procedures are as follows:

(1) For program benefit recipients—State administrative procedures issued pursuant to 7 U.S.C. 2020(e)(10) and 7 CFR 273.15;

(2) For State agencies—administrative procedures issued pursuant to 7 U.S.C. 2023 set out at 7 CFR 276.7 (for rules related to non-quality control (QC) liabilities) or part 284 (for rules related to QC liabilities);

(3) For program retailers and wholesalers—administrative procedures issued pursuant to 7 U.S.C. 2023 set out at 7 CFR 278.8.

Regulatory Flexibility Act

This rule has been reviewed with regard to the requirements of the Regulatory Flexibility Act (5 U.S.C. 601 through 612). Phyllis R. Gault, Acting Administrator of the Food and Nutrition Service (FNS), has certified that this action does not have a significant economic impact on a substantial number of small entities. State and local welfare agencies will be the most affected because they administer the Program.

Paperwork Reduction Act

This final rule contains information collections that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3520). The title, description, and respondent description of the information collections are shown below with an estimate of the annual reporting and recordkeeping burdens. Included in the estimate is the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection information.

Title: Application Processing.

Description: The burden associated with Program application and application processing and the eligibility, certification, and continued eligibility of Program applicants is currently approved under OMB No. 0584–0064. The requirement in § 273.1(d) of this final action that specifies that certain households must be allowed to choose their "head of household" does not alter or change the current burden estimates for applicant households. Current burden estimates already take into consideration that a "head of household" must be designated for every household by the State agency or the household, as required by regulation.

The requirement at § 273.1(d) in this final rule specifies that the State agencies must provide a written notice to all households as appropriate. The notice must identify which households have the option to select their head of household, the circumstances under which a household may change its designation, and how such changes must be reported to the State agency. It is anticipated that the State agencies will choose to implement this requirement by revising their notices for advising recipients of their rights and responsibilities. The estimated reporting burden for this provision is minimal. Because the estimated burden is minimal, it will be submitted to OMB for approval along with the Department's upcoming revision to all burdens associated with OMB No. 0584–0064, which expires in the near future.

Title: Revision to E&T Plan.

Description: State welfare agencies are required, pursuant to 7 CFR 272.2 to plan and budget program operations and establish objectives for the next year. The basic components of the State Plan of Operation are the Federal/State Agreement, the Budget Projection Statement, the Program Activity Statement, and certain attachments as specified at 7 CFR 272.2 (c) and (d). One such attachment to the Plan of Operation is the E&T plan.

This final rule contains a requirement at § 273.7(c)(4)(viii) which requires that the State agencies specify their methodology for reporting accurate work registrant information. The requirement at § 273.7(c)(4)(viii) of this action does not alter or change current burden estimates approved under OMB No. 0584–0083 for the overall Plan of Operation. Certain portions of the State Plan are required to be updated annually; including the E&T plan, while others are required to be updated when a significant change occurs. The revision to the Plan of Operation that may result from this action is not required to be submitted separately from the annual update. The current burden approval for the Plan of Operation estimates that State agencies will submit State Plan of Operation revisions or updates to various components of the

State Plan of Operation at least once annually, regardless of the reason for the revision/update.

Description of Respondents: 53 State Welfare Agencies.

Estimated Annual Reporting and Recordkeeping Burden: Current burden estimates associated with the need for 53 State welfare agencies to submit revisions/updates on various components of the State Plan of Operation at least once annually is estimated to average 10 hours, per respondent, for a total burden of 530 hours annually.

Background

The Food, Agriculture, Conservation, and Trade Act of 1990 (Pub. L. 101–624) was enacted on November 28, 1990. Title XVII of this Act, entitled the "Mickey Leland Memorial Domestic Hunger Relief Act", contains numerous provisions affecting the Food Stamp Act of 1977, as amended (7 U.S.C. 2011–2032).

On August 15, 1991, the Department published a rulemaking (56 FR 40570) that proposed to implement provisions of Public Law 101–624 affecting the Food Stamp Employment and Training (E&T) Program. The proposal would: (1) Amend the definition of head of household designation for E&T and voluntary quit purposes; (2) change the current formula for distributing the non-performance based portion of the $75 million Federal E&T grant; (3) expand the E&T program to include literacy and self-employment training as E&T components; and (4) allow two State agencies, with prior approval by FNS, to provide priority service to volunteers. The proposed rule also included two administrative provisions and several technical amendments. This action incorporates comments on the proposed rule and puts a number of the proposed amendments into final regulatory form.

The Department received nineteen comment letters on the proposed rule. Most of the comments were from State welfare agencies. The Department also received comments from two public interest groups and one State Legislature. The comments were thorough and well documented and the Department appreciates the effort which went into their preparation and submission. All comment letters received by September 16, 1991 were given full consideration for inclusion in this final rulemaking. All others were read and considered.

The provisions of this final rule are discussed in this preamble. For supplementary information on the issues involved, the reader should refer to the preamble of the proposed rule (56 FR 40570), which discusses related policy issues and contains the rationale for the content of the rule.

Designating the Head of Household—7 CFR 273.1(d)

In accordance with the amendment made by Section 1725 of Public Law 101–624, the proposed rule included a provision that would allow households to select an adult parent of children as the head of household provided all the adult household members agree to the selection. The selection could be made at each certification action or whenever there is a change in household composition.

The Department received numerous comments objecting to this provision. Most expressed concern that the provision would increase work for caseworkers, confuse food stamp applicants, complicate verification requirements and delay certification actions. The commenters also asserted that the provision would complicate current policy by allowing some households the right to designate their head of household, while the principal wage earner would be the criteria imposed on others to determine the head of household. Commenters further expressed concern that the provision would undermine program integrity by allowing certain households to select someone other than the principal wage earner as their head. To lessen the complexity of the provision, some commenters suggested that all households be given the same right of selection.

The Department recognizes that the policy surrounding the head of household designation is complex. However, Section 1725 of Public Law 101–624 clearly limits the designation selection to households with adult parents of children. Although the proposed rule would have applied the selection option to adults who have parental control over children, any further extension would exceed Congressional intent. Also, as discussed in the preamble to the proposed rule, allowing all households the option to designate their head would further undermine the intent of the voluntary quit provisions under section 6(d) of the Food Stamp Act of 1977, as amended (7 U.S.C. 2015(d)).

Accordingly, the Department is adopting the proposed version of 7 CFR 273.1(d) specifying that the State agency must provide households with an adult parent of children or an adult who has parental control over children the option of selecting such a person as the head of household.

In response to concerns that the provision may delay the application process, the Department is amending 7 CFR 273.1(d) in this final rule to specify that the State agency shall not deny an otherwise eligible household or delay the certification action if the household fails to designate its head of household. Households that fail to select an adult parent as head shall lose their right to this delegation option and shall be treated in accordance with current rules as specified at 7 CFR 273.1(d). In these instances, the State agency would designate the household's principal wage earner as the head of household if E&T or voluntary quit violations occur.

As previously discussed, households must be allowed to re-designate their head of household at each certification action or whenever there is a change in household composition. One commenter suggested that the household should only be allowed to re-designate a new head of household whenever there is a change in the adult members of the household.

The Department believes that the law is specific in allowing the option for a household to select an adult parent as its head whenever there is any change in household composition. Even though the addition of a non-adult member would not change the household's composition of adult members, the addition may cause household responsibilities to shift in a manner that would result in the household's desire to re-designate its head. For instance, a household may want to re-designate a husband as its head of household when the wife, who was previously designated as the head, gives birth to a child. Accordingly, the Department is adopting 7 CFR 273.1(d)(1), in this final rule to specify that households have the option of designating an adult parent of children, or an adult who has parental control over children, whenever there is a change in household composition.

Several commenters suggested that the regulation specify that there is no age limit. Because the statutory amendment under section 1725 of Public Law 101–624 does not include an age limit with respect to parental control, the Department is modifying the proposed rule at § 273.1(d)(1) to specify that, regardless of the child's age, households may select an adult parent of children as the head of household. However, because parental control is limited to control of children under 18 years of age, the final rule is also modified to specify that the household may select an adult who has parental control over children under 18 years of age.

Many commenters requested clarification on the proposed notice requirements associated with the head of household designation option. As proposed at § 273.1(d)(1), the State agencies would have to advise all households in writing at the time of application and as otherwise appropriate of the option certain households have in selecting their head of household. The notice would have to clearly identify those households which have the option, when the option is available, and how changes in the head of household designation must be reported to the State agency.

Commenters requested guidance on how agreement of all adult household members should be documented or verified. One commenter asked if the State agency could establish a timeframe for household responses. One commenter asked if the proposed provision required a new consent form. One commenter asked if a signed agreement would be required from all adult household members. Another commenter suggested that the Department require the notice to state why the head of household selection is made and what effect the decision could have on the household if the selected head failed to cooperate with E&T requirements or voluntarily quit a job.

The Department would like to give the State agencies flexibility in designing their notice or verification requirements. Therefore, provided all households are notified of the designation option as stated in the proposed rule at § 273.1(d)(1), a State agency may determine how to document the household's designation within its own application and notice requirements. The notice can be combined with other notices, included on the application or a stand alone document. The State agency may further determine how to document or verify the consent of all household adults. Although the Department does not believe all adult members must sign a statement indicating their concurrence with the selection, State agencies may develop these procedures if they so desire. However, as previously stated, these procedures must not delay the household's certification or result in denied benefits if the verification is not returned within the application processing timeframes. Accordingly, the proposed notice requirement at § 273.1(d)(1) is adopted in this final rule without change.

In the event that all adults do not agree to the selection, the proposed rule at § 273.1(d)(1) specified that the State agency would designate the head of household or allow the household to make another selection. One commenter suggested that the Department clarify what other selections are available or specify that the State agency shall make the designation when the adult members cannot agree. Another commenter maintained that the State agencies should not have the authority to designate the head of household if the adult household members do not agree to the selection because the option will result in too many variations.

Under current rules at 7 CFR 273.1(d), the State agency may select the head of household or allow the household to do so. The intent of the proposed rule was to allow the State agencies to revert to these current procedures whenever a household which has the option to select an adult parent as its head fails to do so. Therefore, the State agencies have the flexibility to implement a policy which, in these instances, allows: (1) The State agency to designate the head of household; or (2) allows the household to make another selection.

Accordingly, the Department is adopting the proposed provision at § 273.1(d)(1) that specifies what action must be taken if all adult members do not agree to the selection in this final rule. The Department believes the proposed procedures provide the State agencies with flexibility and lessen administrative complexities.

Under section 1725 Public Law 101–624, households must be permitted to select an adult parent of children as their head of household. The Department's proposal would have applied the option to designate a head of household to adults who have parental control over children. One commenter requested that the Department define "parental control." Another commenter asked if parental control would have to be verified.

The Department is not including a definition of "parental control" in this final rulemaking. However, the Department's policy has been that parental control refers to adults who supervise minors who are dependents, financial or otherwise, of the household as opposed to independent units.

The final rule does not require the State agencies to verify parental control. The State agencies may establish verification requirements if they wish provided that certification is not delayed or denied for lack of verification of parental control.

One commenter questioned whether or not the proposed provision would affect the current regulation at 7 CFR 273.1(d)(2) that prohibits the State agency from designating a child of any age as the head of household if certain conditions exist. As specified under this current rule, these conditions exist if the child is living with a parent, or person fulfilling the role of a parent, who is registered for work or exempt from work registration requirements because the parent is: (1) Subject to and participating in any work requirement under Title IV of the Social Security Act; (2) in receipt of unemployment compensation; (3) registered for work as part of the unemployment compensation or has registered for work as part of the application process; or (4) employed or self-employed and working a minimum of 30 hours weekly or receiving weekly earnings equal to the Federal minimum wage multiplied by 30 hours. Although the proposed rule did not address the effect the designation option would have on this current rule, the Department believes that this sentence must be revised to clarify that the household has the choice to select an adult parent as its head of household even if the adult parent meets the conditions specified in the current regulations. Therefore, the final rule amends § 273.1(d)(2) to clarify that the household has the option to select an adult parent who meets the criteria specified under this section as its head of household if all adult members of the household agree to this selection.

The proposed rule included an amendment to § 273.7(g) specifying the effect the statutory provision will have in situations when a noncompliant head of household moves from one food stamp household to another. Under current rules, a sanction is imposed on the new household if the new member is designated as the head of household. The proposed rule specified that the new member could not be designated as the head of household by the State agency in instances where the new household has already selected an adult parent as its head *unless* the new household elects to choose the newly joining individual as its head.

Several commenters expressed their support of this provision. Accordingly, the Department is adopting the amendments at 7 CFR 273.7(g) as proposed in this final rule.

Many commenters submitted a number of specific questions related to the designation of the head of household. The Department is providing the following responses to these questions.

Question—Is the household allowed to designate someone other than the adult parent of children as the head of household? For example, if the household does not want the adult parent as its head, can the State agency allow the household to select someone else?

Answer: Yes, the State agency may allow the household to select someone else if the household does not want to select the household's adult parent of children as its head. However, for the purposes of determining compliance with E&T and voluntary quit provisions, the State agency must consider the household's principal wage earner as the head of household unless the household selected an adult parent of children.

Question: Does the new head of household rule take precedence over the principal wage earner?

Answer: The State agency may not designate the household's principal wage earner as the head of household if the household has selected another adult parent of children as its head.

Question: May a household which has an adult parent of children who is the principal wage earner designate a different adult parent of children as the head of household? If so, would the entire household be disqualified if the principal wage earner voluntarily quit a job?

Answer: The household may select any adult parent of children as its head of household provided all adult household members agree to the selection. If the household selected an adult parent of children as its head of household over the household's principal wage earner and the principal wage earner quit his or her job, the State agency would have to consider the selected adult parent as the head of household when determining if a voluntary quit violation occurred. In this instance, a voluntary quit violation does not exist because it was not the head of household who quit the job.

Question: Is a designation binding for sanction purposes if the adult household members do not agree to select the adult parent of children as the head and the State agency designates another head of household?

Answer: The State agency shall consider the principal wage earner as head of household for E&T and voluntary quit unless the household has selected an adult parent of children as its head and all adult members agree to the selection. The selection would then be binding.

Question: Why is the household's selection as head of household required in project areas in which no E&T program exists?

Answer: The consequences of establishing the head of household extend beyond the scope of the E&T program. The new provisions affect the voluntary quit requirements as specified at 7 CFR 273.7(n). They also apply, as specified under § 273.7(g) in this final rule, when a head of household, who has been sanctioned for either an E&T or voluntary quit violation, moves to another household. If the household receiving the sanctioned individual is deprived of its right to select its head, because no E&T program is operating in its project area, the household receiving the sanctioned head of household may be disqualified from the program.

If given the option, the household might have selected an adult parent in the household its head rather than have the new member, by virtue of his or her wages, be designated as head.

Distribution of Nonperformance-Based Federal E&T Funds—7 CFR 273.7(d)

The proposed rule included a provision from section 1753 of Public Law 101–624 which requires the Department, as of Fiscal Year 1993, to distribute the nonperformance-based Federal E&T grant ($60 Million) on the basis of each State agency's percentage of work registrants compared to the number of work registrants nationwide. Prior to this amendment, the Department distributed the nonperformance-based portion of the E&T grant based on each State agency's average monthly caseload as a percentage of the average monthly caseload nationwide. As required under section 1753 of Public Law 101–624, the Department implemented, or phased in, the new allocation formula in Fiscal Year (FY) 1992. Under the phase in provisions of the law, the FY 1992 allocations were based on each State agency's work registrant and caseload populations with additional adjustments mitigating the losses of States which would receive allotments of less than $50,000. Funds were allocated solely on the work registrant population in FY 1993.

Many commenters support the formula specified under Public Law 101–624 because it distributes E&T funds on the basis of each State agency's proportion of the work registrant population served in the E&T program. Even so, some commenters suggested that the Department implement additional modifications to the formula. One commenter suggested that the formula take into consideration the number of work registrants who are exempted from participation (e.g., geographic or individual) under the State agency's approved E&T plan. Because a number of State agencies receive approval from the Department to exempt a significant portion of their work registrant population, the commenter stressed that this modification would further direct E&T funds to those States which have the greatest need for the funds, based on their proportion of work registrants. Another commenter recommended that the formula also include recipients who are exempt from work registration but who request to participate in the E&T program (i.e., exempt volunteers).

The Department agrees that a formula directing E&T funds towards actual participants may result in an equitable distribution of the funds. However, these suggestions are not being adopted. It is the Department's opinion that section 1753 of Public Law 101–624 specifically requires *all* work registrants to be included in the formula for allocating E&T funds and does not mention including volunteers in the calculation. In addition, counting volunteers in the formula is inequitable to State agencies that are serving only their work registrant population. Accordingly, the Department is not amending the proposed provisions at § 273.7(d)(1) to incorporate these suggestions.

The proposed language at § 273.7(d)(1)(i)(A) specified that, by using the work registrant data from the most recent Federal fiscal year, the E&T nonperformance-based grants would be allocated on the basis of the average monthly number of work registrants in each State as a percentage of the average monthly number of work registrants nationwide. Two commenters questioned how the Department would determine a monthly average when the FNS Form 583 requires a total count of work registrants in the month of October and new work registrants in the remaining eleven months. The commenters also noted that the preamble to the proposed rule did not discuss that a monthly average would be used. The preamble indicated that each State agency's percentage of work registrants from the most recent Federal fiscal year would be used.

The Department intended to specify, as discussed in the preamble to the proposed rule, that work registrant data reported in the most recent Federal fiscal year would be used to determine each State agency's percentage of work registrants. The Department agrees that the 583 database does not produce a monthly average because the same work registrant data is not reported in all twelve months of the fiscal year. Accordingly, the Department is amending the proposed provision at § 273.7(d)(1)(i)(A) to specify that, effective in FY 1992, the E&T grants shall be allocated on the basis of work registrants in each State agency as a percentage of work registrants nationwide.

When allocating the nonperformance-based E&T funds to the State agencies, the Department proposed to use work registrant information that is reported, on a quarterly basis, through FNS Form 583. The FNS Form 583 identifies the number of work registrants in the State as of October 31st, and all new work registrants that are certified in the remaining eleven months of the fiscal year. Even though the 583 database is the most reliable source of work registrant information, the Department acknowledged that certain reporting practices would result in some State agencies overreporting their work registrants numbers. To address this concern, the proposed rule included provisions which would require State agencies that universally work register or double count work registrants within a fiscal year to specify in their E&T plans their methodology for adjusting their work registrant figures.

The Department received many comments with respect to the use of the 583 database. Most expressed concern that the database is unreliable and, if used as the basis for allocating E&T funds, would result in an equitable distribution. Many commenters pointed to the wide variations in the percent of work registrant populations that existed in the 583 database used for the FY 1992 allocations as an example of problems with the 583 database. Because of these concerns, some commenters recommended that the Department delay the implementation of the new allocation formula until a reliable work registrant database exists. Others suggested that the Department take additional measures, such as validating the work registrant populations in State agencies that report substantial increases in their work registrant populations. One commenter also suggested that *aln* State agencies specify how work registrant information is collected and what measures are taken to adjust for overreporting or double counting within a fiscal year.

Given the provisions specified under section 1753 of Public Law 101–624, the Department does not have the option of delaying the implementation of the allocation formula or substituting another database that does not reflect work registrant information. However, the Department shares the commenters' concerns that the 583 database is valid and has taken numerous steps, in addition to the proposed provisions, to correct apparent discrepancies. Discrepancies that existed in the database used for the FY 1992 allocations were corrected and the State agencies were notified of the resulting adjustments to their allocations. FNS Regional Offices also conduct a Management Evaluation review of work registrant reporting systems if a State agency's reported percentage of work registrants compared to caseload is outside the range of 6 to 10 percent. The Department believes that these activities help ensure that reliable work registrant data is used.

The Department also concurs that all State agencies should identify their procedures for collecting work registrant data and ensuring that individuals are not counted as work registrants more than one time in each fiscal year. This will allow the Department to scrutinize each State agency's methodology and resolve any problems if it is determined that questions exist with the work registrant figures reported on the FNS Form 583. Accordingly, the Department is amending the proposal at § 273.7(c) in this final rule to specify that the E&T plan must describe the State agency's method for collecting and reporting accurate work registrant information.

Under the proposed rule, the Department specified that FNS reserves the right to adjust a State agency's figure if it is determined that the State agency's work registrant data is questionable or unacceptable. The State agency would have 30 days to submit revised figures that satisfy the Department's concern.

One commenter suggested that the State agency be provided with an opportunity to respond to the Department's concern before it takes place. Another commenter stated that the Department should define "questionable" and "unacceptable." One other commenter maintained that the procedures for correcting duplicate counts will delay notification to the State agencies of their E&T allocations.

It is the Department's intention that the State agency would be notified of the Department's proposed adjustment before it takes place so that it has an opportunity to respond to the Department's concern. This will expedite the resolution of contested work registrant data by allowing the State agency to respond to the Department's adjustment in its submittal of another methodology. With respect to suggested definitions, the Department does not believe a regulatory definition for "questionable" or "unacceptable" work registrant data is workable or appropriate. The Department will clearly inform the State agency of the reasons its work registrant data is considered questionable or unacceptable as the situation warrants. The Department is therefore adopting the proposed amendment at § 273.7(c)(4)(viii) in this final rule without change.

Expansion of E&T Programs—7 CFR 273.7(f)(1)

In accordance with section 1726 of Public Law 101–624, the Department proposed changes to 7 CFR 273.7(f)(1) to add two new activities to the list of potentially approvable E&T components. The first is any educational component that will improve a participant's literacy. The second is a component designed to improve the self-sufficiency of recipients through self-employment programs including programs that provide instruction for self-employment ventures.

All the comments received on this provision were in support of the Department's proposal. However, since the publication of the proposed rule, the Department published final regulations (56 FR 55052) on October 24, 1991 that amend 7 CFR 273.7(f)(1)(vi) to specify that a remedial education program designed to achieve a basic literacy level is an acceptable educational program. The Department is amending 7 CFR 273.7(f)(1) in this final action to specify that programs designed to improve the self-sufficiency of recipients through self-employment programs is a potentially acceptable E&T component.

Priority Volunteer Service—7 CFR 273.7(f)(5)

As specified under section 1726 of Public Law 101–624, the proposed rule contained a provision that would allow two State agencies, upon FNS approval, to give priority service to food stamp participants who volunteer to participate in E&T provided that the State agencies continue to meet nationally established performance standards. Once an application is approved, the State agency may provide service to volunteers (exempt and non-exempt) through September 30, 1995.

Several commenters objected to the Department's decision to limit the number of applications to two, when, as specified under Public Law 101–624, the authority exists to approve more. Some commenters maintained that the results from more than two voluntary programs would be necessary for the Department to adequately assess voluntary programs. One commenter further suggested that the Department publish a Notice in the Federal Register inviting State agencies to apply for approval to conduct voluntary E&T service if at least two applications are not received within the proposed 90-day period.

The Department does not intend to approve more than two applications at this time. It is the Department's opinion that two programs will be sufficient to examine the effect of volunteer service.

Accordingly, the final rule adopts the proposal at 7 CFR 273.7(f)(5), specifying that the Department will approve two acceptable applications for priority volunteer service. As previously discussed in the preamble to the proposed rule, the Department will review all applications received within 90 days after the publication of this final rule. If two approvable applications are not received within this time period, the Department will continue to accept and review applications until two applications are approved.

The preamble to the proposed rule discussed the current definition of exempt and non-exempt volunteers at 7 CFR 273.7(f)(4) of the regulations. A number of commenters stressed that this definition is too restrictive and would not allow the State agencies to effectively provide volunteer service when established performance standards must be met. Rather than apply the current definition of volunteer, several commenters suggested that the Department conform the definition of volunteer to that used by the Job Opportunities and Basic Skills (JOBS) program.

The JOBS program encompasses the work requirement for Aid to Families with Dependent Children (AFDC) recipients as specified under Title IV F of the Social Security Act (42 U.S.C. 681). As specified under 45 CFR 250.31 of the JOBS program regulations, a volunteer could be a recipient who is not exempt from work requirements but chooses to participate in the JOBS program prior to being assigned to a JOBS activity on a mandatory basis. Commenters stressed that this would allow the State agencies to serve a significant volunteer population while meeting required performance standards. Mandatory work registrants could volunteer to participate without first completing an E&T component on a mandatory basis.

The Department agrees that, to effectively provide priority service to volunteers while still meeting applicable performance standards, some deviation from current policy must be allowed. It was the Department's intention in the proposed rule to allow State agencies flexibility in defining their volunteer population for priority volunteer service. Accordingly, the final rule amends the proposal at § 273.7(f)(5)(i)(A) to clarify that the State agencies submitting an application for priority service to volunteers have the flexibility to define their volunteer population, with certain restrictions, as discussed below.

One commenter recommended that the regulations clarify that AFDC recipients who are exempt from work registration because they are subject to JOBS requirements could volunteer for priority volunteer service. One other commenter expressed support for the provision if it would allow the State agencies to leverage JOBS funding and count participation in both programs.

It is not the Department's position that JOBS participants may be considered E&T volunteers unless the JOBS participants are assigned to an E&T activity that is separate from the assignment under the JOBS program. For example, a JOBS participant assigned to an education component could volunteer for an E&T Job Club component. However, a JOBS participant assigned to an education component under the JOBS program could not be considered an E&T volunteer in the same education component that is operated through the E&T program. Counting the same activity in both programs would misrepresent program participation for both the JOBS and E&T programs.

As specified under current regulations at 7 CFR 273.7(f)(4)(ii), any food stamp recipient who is exempt from food stamp work registration may volunteer for the E&T program. Accordingly, the final rule does not amend the proposal at § 273.7(f)(5) and continues to allow a State agency discretion in defining its volunteer population.

The Department's proposed rule identified the required information a State agency's application must contain for it to be approvable. Very few comments were received on the proposed application requirements. However, two commenters objected to the requirement that, without an increase in funding, the State agency obtain an outside agency to provide an evaluation of its volunteer service.

As discussed in the preamble to the proposed rule, there is considerable debate surrounding the merits of a voluntary program over a mandatory program. Because the provisions of section 1726 of Public Law 101–624 represent the first major change from the mandatory nature of the E&T program, the Department believes it is important that the approved volunteer programs be evaluated by an objective organization outside of the State agency operating the program. Although no additional funds were provided under Public Law 101–624 for the implementation or operation of the priority volunteer service experiments, a State agency may, as stated in the preamble to the proposed rule, include the costs of the evaluation as part of its E&T program costs.

The Department intends to allow State agencies discretion in defining what aspects of volunteer service the evaluation will study. A State agency may design the evaluation to study its primary reason for providing priority service for volunteers. Other aspects of priority service to volunteers would not necessarily need to be included in the evaluation. For instance, the State agency may want to assess if voluntary participants, who are under no obligation to participate in the E&T program, benefit more from the completion of an E&T component over mandatory participants who may lose their benefits if they fail to comply with the E&T components. Such a benefit could be measured by test scores taken before and after a participant completes the component. The State agency may also want to assess the degree to which volunteers begin or complete component activities when compared to mandatory participants. These are examples of information that may be useful in assessing the potential benefits of providing priority volunteer service in the E&T program.

Accordingly, the proposed provisions at § 273.7(f)(5)(i) and § 273.7(f)(5)(ii) are adopted in this final rule with one additional change. The change in the final rules at § 273.7(f)(5)(i)(E) requires the State to identify a recommended research design in its application that will be used to evaluate priority volunteer service. This information will provide the Department with sufficient information when approving applications for priority service.

Due Date for Plan Submissions—7 CFR 273.7(c)(5)

The proposed rule included a provision that would allow the Department additional time to approve E&T plan submittals by requiring the State agencies to submit their E&T plans to the Department no later than 60 days prior to the applicable fiscal year. As specified under 7 CFR 273.7(c)(5) of the regulations, State agencies currently must submit their E&T plans 45 days (August 15) prior to the beginning of the fiscal year.

Some commenters supported the provision, provided the Department notifies the State agencies of their E&T allocations and other pertinent E&T plan instructions in sufficient time for the State agencies to meet the deadline. Other commenters objected to the proposal because the change would complicate program coordination and

may not provide sufficient time for the State agencies to submit their plans.

It has been common in the past for State agencies to miss the August 15 deadline. In such cases it is often difficult to conduct a thorough review, obtain necessary clarifications, and approve these plans prior to the beginning of the upcoming Federal fiscal year. The Department believes that the proposal would lessen the administrative and financial complexities that are created when plan approval are not finalized by the beginning of the Federal fiscal year. However, because of the objections to this proposal and the difficulties some commenters believed it would create, the Department is withdrawing its proposal to change the deadline for submitting E&T plans. This final rule does not amend current rules at 7 CFR 273.7(c)(5).

Transitional Child Care Expenses—7 CFR 273.10(d)(1)(i)

On October 13, 1988, Public Law 100–485, the Family Support Act of 1988, was enacted. Title II of the Act (42 U.S.C. 602) establishes the JOBS program. Title III of the Act, Supportive Services for Families, provides for Transitional Child Care (TCC), extended child care for eligible families which have ceased to receive AFDC as a result of the increased hours or increased income from employment. Title III of the Family Support Act also specifies that any money received as payment for child care or any reimbursement for costs incurred for child care shall not be treated as income for purposes of any other Federal or federally-assisted program that bases eligibility for, or the amount of benefits, upon need, such as the Food Stamp Program.

Under current food stamp policy, AFDC TCC payments are treated neither as income nor as a reimbursement. Households that pay child care providers directly and receive AFDC TCC payments may receive a dependent care deduction from income for the amount of the child care costs, up to the regular limit. In the more common situation where a household's child care expenses are paid directly to the child care provider, a deduction is not allowed because the household does not pay the expense. This uneven treatment is not consistent with other food stamp policy concerning reimbursement for expenses. In order to make the policy internally consistent, treat day care recipients more equitably, and conform Food Stamp policy with AFDC, the Department proposed at 7 CFR 273.10(d)(1)(i) to treat these funds as a reimbursement, which allows a deduction only for the portion of child care expenses not reimbursed by JOBS or TCC.

The Department received five comments on this proposal. Four commenters were State agencies; one was a public interest group. Two State agencies supported the provision. Commenters who opposed the provision believed that TCC should be treated in the same manner as the Low Income Home Energy Assistance Program (LIHEAP) payments. Households which receive LIHEAP are also entitled to receive a deduction for the standard utility allowance. The Department believes that these are not analogous payments. The special provisions that allow households to have their utility expenses reimbursed with LIHEAP and also to receive a standard utility allowance deduction are mandated by section 5(e) of the Food Stamp Act of 1977, as amended. There is no legislative provision that provides for both an income exemption for the TCC payments and for the payments not to be treated as a reimbursement. Accordingly, the Department is adopting 7 CFR 273.10(d)(1)(i) as proposed in this final rule.

Technical Amendments

E&T Plans

The rule proposed two technical changes regarding the submission of E&T plans. The first change concerned current regulations at 7 CFR 273.7(c)(4) which state that interim E&T State plans are due to the Department by March 1987. This provision reflects the initial plan requirements for the E&T program. The proposed rule would have removed this date as well as other outdated references to the initial start-up of the E&T program.

The second change concerned current regulations at 7 CFR 273.7(c)(5) which specify that plans shall be submitted "biannually" beginning with FY 1991. The Department intended that plans be submitted "biennially" (i.e., every two years) not "biannually" (i.e., twice a year). The proposed rule would correct this mistake. Also, the submission of plans on a biennial basis began prior to FY 1991. The proposed rule would also correct this technical error.

No comments were received on either of the proposed technical changes. Therefore, the proposed amendments contained in 7 CFR 273.7(c) (4) and (5) are adopted as final without change by this final action.

Plan of Operation Submission Requirements

Food Stamp Program regulations at 7 CFR 272.2(e) specify the submission requirements of the State Plan of Operations which includes the State E&T plan. The proposed rule would amend § 272.2(e) to specify that the E&T plan must be submitted in accordance with 7 CFR 273.7(c)(5). This conforming amendment does not propose to change the current submission requirements specified at 7 CFR 273.7(c)(5).

No comments were received on this proposed technical amendment. Therefore, the proposed amendment contained in 7 CFR 272.2(e) is adopted without change by this final action.

Technical Correction—7 CFR 273.7(g)

A final rule published on October 24, 1991 (56 FR 55052) inadvertently removed language at 7 CFR 273.7(g)(1)(i) that clarified that noncompliant household members who join other households as nonheads of household are to be ineligible for two months. This sanction provision is prescribed by the statute and was implemented by a final rule published on August 15, 1990 (55 FR 33275). This final rule corrects this technical error by replacing the language that was unintentionally removed.

Implementation

In accordance with section 1781 of Public Law 101–624, the provisions at § 273.7(d)(1)(i)(A) and (B) which specify that the non-performance portion of the Federal E&T grant be distributed on the basis of each States agency's proportion of food stamp work registrants were effective and implemented by the Department on October 1, 1991. The provision at § 273.7(c)(4)(viii) which identifies information that must be included in the State agency's E&T plan is effective and must be implemented by August 15, 1993, the date the E&T plan must be submitted to FNS. The provision at § 273.10(d)(1)(i) which pertains to the treatment of certain child care reimbursements is effective 30 days after publication and must be implemented the first of the month following 45 days after publication of this rule. All other provisions contained in this rule are effective and must be implemented retroactively to February 1, 1992, as specified under section 1781 of Public Law 101–624.

In a March 4, 1992 memorandum to the FNS Regional Offices, the State agencies were instructed to implement the provisions at § 273.1(d), related to the households' option to designate their head of household, retroactively to

February 1, 1992. In accordance with guidance provided in this memorandum, the State agencies are not required to conduct a case file review of certification actions made since February 1, 1992.

Variances resulting from implementation of the provision regarding transitional child care shall be excluded from error analysis for 90 days from the required implementation date, in accordance with 7 CFR 275.12(d)(2)(vii).

List of Subjects

7 CFR part 272

Alaska, Civil rights, Food Stamps, Grant programs—social programs, Reporting and recordkeeping requirements.

7 CFR part 273

Administrative practice and procedure, Aliens, Claims, Food stamps, Fraud, Grant programs—social programs, Penalties, Reporting and recordkeeping requirements, Social security, Students.

Accordingly, 7 CFR parts 272 and 273 are amended as follows:

1. The authority citation for parts 272 and 273 continue to read as follows:

Authority: 7 U.S.C. 2011–2031.

PART 272—REQUIREMENTS FOR PARTICIPATING STATE AGENCIES

2. In § 272.1, a new paragraph (g)(127) is added to read as follows:

§ 272.1 General terms and conditions.

* * * * *

(g) * * *

(127) *Amendment No. 340.* (i) The provisions at § 273.7(d)(1)(i)(A) and § 273.7(d)(1)(i)(B) are effective retroactive to October 1, 1991.

(ii) The provision at § 273.7(c)(4)(viii) is effective and must be implemented by August 15, 1993, the date E&T plans must be submitted to FNS.

(iii) The provision at § 273.10(d)(1)(i) is effective January 19, 1993 and must be implemented by March 1, 1993.

(iv) The remaining provisions of Amendment No. 340 are effective and must be implemented retroactively to February 1, 1992.

(v) Any variances resulting from implementation of the provision at § 273.10(d)(1)(i) shall be excluded from error analysis for 90 days from the required implementation date in accordance with 7 CFR 273.12(d)(2)(vii).

3. In § 272.2, a new paragraph (e)(9) is added to read as follows:

§ 272.2 Plan of operation.

* * * * *

(e) *Submittal Requirements.* * * *

(9) The Employment and Training Plan shall be submitted as specified under § 273.7(c)(5).

* * * * *

PART 273—CERTIFICATION OF ELIGIBLE HOUSEHOLDS

4. In § 273.1, paragraph (d)(1) and the first and fourth sentences of paragraph (d)(2) are revised to read as follows:

§ 273.1 Household concept.

* * * * *

(d) *Head of household.* (1) A State agency shall not use the head of household designation to impose special requirements on the household, such as requiring that the head of household, rather than another responsible member of the household, appear at the certification office to make application for benefits. When designating the head of household, the State agency shall allow the household to select an adult parent of children (of any age) living in the household, or an adult who has parental control over children (under 18 years of age) living in the household, as the head of household provided that all adult household members agree to the selection. The State agency shall permit such households to select their head at each certification action or whenever there is a change in household composition. The State agency shall provide written notice to all households at the time of application and as otherwise appropriate that specifies the household's right to select its head of household in accordance with this paragraph. The written notice shall identify which households have the option to select their head of household, the circumstances under which a household may change its designation of head of household, and how such changes must be reported to the State agency. If all adult household members do not agree to the selection or decline to select an adult parent as the head of household, the State agency may designate the head of household or permit the household to make another selection. In no event shall the household's failure to select an adult parent of children or an adult who has parental control over children as the head of household delay the certification or result in the denial of benefits of an otherwise eligible household. For households that do not consist of adult parents and children or adults who have parental control of children living in the household, the State agency shall designate the head of household or permit the household to do so.

(2) For purposes of failure to comply with § 273.7 and § 273.22 (to the extent that workfare programs operated under this paragraph are included as components of State agency E&T programs), the head of household shall be the principal wage earner unless the household has selected an adult parent of children as specified in § 273.1(d)(1). * * * No person of any age living with a parent or person fulfilling the role of a parent who is registered for work or exempt from work registration requirements because such parent or person fulfilling the role of a parent is subject to and participating in any work requirement under Title IV of the Social Security Act, or in receipt of unemployment compensation (or has registered for work as part of the application for or receipt of unemployment compensation), or is employed or self-employed and working a minimum of 30 hours weekly or receiving weekly earnings equal to the Federal minimum wage multiplied by 30 hours shall be considered the head of household unless the person is an adult parent of children as specified in § 273.1(d)(1) and the household elects to designate the adult parent as its head of household. * * *

* * * * *

5. In § 273.7:

a. The introductory text of paragraph (c)(4) is amended by removing the first two sentences and adding a new sentence in their place.

b. Paragraphs (c)(4)(viii) through (c)(4)(xii) are redesignated as paragraphs (c)(4)(ix) through (c)(4)(xiii), respectively, and a new paragraph (c)(4)(viii) is added.

c. Paragraph (c)(5) is amended by removing the first sentence and revising the second sentence.

d. Paragraph (d)(1)(i)(A) is revised.

e. Paragraphs (d)(1)(i)(B) through (d)(1)(i)(F) are redesignated as paragraphs (d)(1)(i)(C) through (d)(1)(i)(G) respectively and a new paragraph (d)(1)(i)(B) is added.

f. A new paragraph (f)(1)(vii) is added.

g. A new paragraph (f)(5) is added.

h. The fifth sentence in paragraph (g)(1)(i) is amended by adding the words, "as specified under § 273.1(d)(1) or (d)(2)" after the words "joins another household as head of the household".

i. The last sentence of paragraph (g)(1)(i) is amended by adding the words, "ineligible for two months and shall be" between the words, "be" and "considered".

j. Paragraph (n)(1)(vii) is redesignated as paragraph (n)(1)(viii), the last three

sentences of paragraph (n)(1)(vi) are redesignated as paragraph (n)(1)(vii) and the first sentence in newly redesignated paragraph (n)(1)(vii) is amended by adding the words, "as specified under § 273.1(d)(1) or (d)(2)" to the end of the sentence.

The additions and revisions read as follows:

§ 273.7 Work requirements.

* * * * *

(c) *State agency responsibilities.*

* * *

(4) In accordance with 7 CFR 272.2(e)(9), each State agency must prepare and submit an Employment and Training plan to its appropriate FNS Regional Office and to the FNS National Office. * * *

(viii) The method the State agency uses to report work registrant information and prevent work registrants from being reported twice within a Federal fiscal year on the quarterly FNS Form 583. This method must specify how work registrants are excluded if the State agency work register all food stamp applicants (i.e., universal work registration) when the applicants are exempt from work registration as specified under paragraph (b) of this section *or* if the State agency work registers nonexempt participants whenever a new application is submitted and the participants may have already been registered within the past twelve months as specified under paragraph (a) of this section. If the method the State agency uses is questionable or unacceptable, FNS reserves the right to adjust a State agency's work registrant count. FNS shall advise a State agency of how the adjusted figure was determined and shall allow the State agency 30 days to submit another method for consideration by FNS.

* * * * *

(5) Plans shall be submitted biennially, 45 days before the start of the fiscal year, beginning in FY 1990.

* * *

* * * * *

(d) Federal financial participation.—(1) *Employment and training grants.* (i) * * *

(A) Except as otherwise provided in paragraph (d)(1)(i)(D) of this section, effective in FY 1992, the nonperformance based Federal funding for employment and training grants shall be allocated on the basis of work registrants in each State agency as a percentage of work registrants nationwide. FNS will use work registrant data from the most recent Federal fiscal year. In FY 1992, each State agency shall receive an increase or decrease that is one-half of the difference between:

(*1*) an amount that is based on the percent of each State agency's caseload in FY 1990 as compared to the average monthly caseload nationwide; and

(*2*) an amount that is based on the percent of each State agency's work registrant population in FY 1990 as compared to number of work registrants nationwide.

(B) Effective in FY 1992, no State agency shall receive less than $50,000 in nonperformance based Federal E&T funds. To ensure that no State agency receives less than $50,000 in FY 1992, each State agency that is allocated more than $50,000 and would receive an increase in its E&T grant shall have its grant reduced if necessary. The reduction shall be proportionate to the number of work registrants in each State receiving more than $50,000 and receiving an increase in its E&T grant as compared to the total number of work registrants in all the States receiving more than $50,000 coupled with increases in their E&T grants. To ensure that no State agency receives less than $50,000 as of FY 1993, each State agency that is allocated to receive more than $50,000 shall have its grant reduced, if necessary, proportionate to the number of work registrants in each State as compared to the total number of work registrants in all the State agencies receiving more than $50,000. The funds from the reduction shall be distributed to State agencies initially allocated to receive less than $50,000.

* * * * *

(f) *Employment and Training programs.* * * *

(1) *Components.* * * *

(vii) A program designed to improve the self-sufficiency of recipients through self-employment including programs that provide instruction for self-employment ventures.

* * * * *

(5) *Priority Service to Volunteers.* With prior approval from FNS, two State agencies may provide priority service to volunteers through September 30, 1995. State agencies that submit an application to provide priority service to volunteers have the flexibility to establish procedures that deviate from regulations specified under paragraph (f)(4) of this section.

(i) To be eligible for FNS approval, a State agency shall submit an application that:

(A) Describes the volunteer population it intends to serve (e.g., number served, volunteer definition, characteristics of the target group, percent of volunteer population that are mandatory work registrants under normal E&T requirements and percent that are exempt from work registration);

(B) Describes the component activities that will be offered to volunteer participants;

(C) Identifies where the volunteer program will operate (i.e., Statewide or selected counties);

(D) Specifies the duration of the volunteer program;

(E) Identifies the criteria and research design the State agency recommends to evaluate the effectiveness of the program;

(F) Provides assurances that applicants who are subject to work registration as specified under § 273.7 (a) and (b) are required to work register as a condition of eligibility;

(G) Provides assurances that the State agency will meet the established performance standards under § 273.7(o); and

(H) Provides assurances that the evaluation will be conducted by an organization separate from the administration of the State agency and that ongoing and final result of the evaluation will be provided to FNS.

(ii) State agencies which receive approval to provide priority volunteer service shall:

(A) Submit a revised E&T plan that incorporates the voluntary service provisions;

(B) Continue to report quarterly (i.e., Form FNS 583) as specified under paragraph (c)(6) of this section;

(C) Meet the performance standards as specified under § 273.7(o); and

(D) Submit data annually which show the number of volunteers who fail to complete an assigned E&T activity.

* * * * *

6. In § 273.10, paragraph (d)(1)(i) is amended by adding a new sentence at the end of the paragraph.

§ 273.10 Determining household eligibility and benefit levels.

* * * * *

(d) *Determining deductions.* * * *

(1) *Disallowed expenses.* (i) * * * A child care expense which is reimbursed or paid for by the Job Opportunities and Basic Skills Training (JOBS) program under Title IV–F of the Social Security Act (42 U.S.C. 681) or the Transitional Child Care (TCC) program shall not be deductible.

BILLING CODE 3410–30–M

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

7 CFR Parts 1955, 1956, 1962 and 1965

Liquidation of Loans Secured by Real Estate and Acquisition of Real and Chattel Property

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its Servicing and Liquidation of Chattel Security regulations to address servicing of bankruptcy cases and update references to forms in the Agency's regulations. These amendments will consist of conforming changes and cross references in several FmHA servicing regulations. The intended effect of this action is to add clarification in bankruptcy cases.

EFFECTIVE DATE: December 18, 1992.

FOR FURTHER INFORMATION CONTACT: Edward Yaxley, Senior Loan Officer, Farmer Programs Loan Servicing and Property Management Division, Farmers Home Administration, U.S. Department of Agriculture, room 5435-South, Washington, DC 20250, Telephone (202) 720–6293.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established in Departmental Regulation 1512–1, which implements Executive Order 12291, and has been determined to be exempt from those requirements because it involves only internal Agency management. It is the policy of this Department to publish for comment rules relating to public property, loans, grants, benefits, or contracts, notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. This action, however, is not published for proposed rulemaking since it involves only internal Agency management, making publication for comment unnecessary. These revisions clarify the following provisions. Section 1955.15(d)(6)(i) of subpart A of part 1955 of chapter XVIII of the Code of Federal Regulations is being revised to clarify that when a bankruptcy petition has been filed after an account has been accelerated FmHA foreclosure will be suspended until the requirements of the Bankruptcy Code have been met. There has been some confusion about whether FmHA's existing regulation intended to suspend all foreclosure activity including sales by a trustee in bankruptcy. FmHA has never intended to suspend the actions of other parties in its regulations, and is clarifying this regulation so that it includes FmHA foreclosures only.

Exhibit E–1 to FmHA Instruction 1955–A (available in any FmHA office) entitled "Notice of Acceleration of Farmer Program Loan Accounts Secured by Real Estate and/or Chattels in Cases Involving Discharged Chapter 11, 12 and 13 Bankruptcy Borrowers" is added to provide a notice of acceleration for discharged borrowers who default under their confirmed bankruptcy plans under chapter 11, 12 and 13 of this Bankruptcy Code. Exhibit E of FmHA Instruction 1955–A (available in any FmHA office) is an unpublished exhibit entitled "Notice of Acceleration of Farmer Program Loan Accounts Secured by Real Estate and/or Chattels in Cases Involving Bankruptcy" is being clarified to change its title to "Notice of Intent to Foreclose on the Security of Farmer Program Borrowers Discharged Under Chapter 7 of the Bankruptcy Code and Terminate Any Farmer Program Family Living and Farm Operating Expenses" and to state that FmHA will be foreclosing on its loan security and not attempting to collect the debt as an individual liability against a borrower who has been discharged in a chapter 7 bankruptcy. Exhibit F of FmHA Instruction 1955–A (available in any FmHA office) is an unpublished exhibit entitled "Notice Declaring FmHA Debt Immediately Due and Payable and Advising of the Availability of Debt Settlement." This exhibit is being clarified to remove the due and payable clause. The revision is consistent with existing FmHA regulations at [56 FR 10145–10150], March 11, 1991, which removed the due and payable requirement for farmer program debt settlements. The revisions also update several cross-references and add references to Exhibit E–1 described above which is being added to FmHA Instruction 1955–A. Exhibit A of subpart B of part 1956 of chapter XVIII of the Code of Federal Regulations is removed. This exhibit is strictly an internal management document to summarize the debt settlement case file to assist the approval officer in the review of the case. It was unintentionally published March 11, 1991 [56 FR 10147].

Intergovernmental Consultation

1. For the reasons set forth in the final rule related to Notice 7 CFR part 3015, subpart V [48 FR 29115, June 24, 1983] and FmHA Instruction 1940–J, "Intergovernmental Review of Farmers Home Administration Programs and Activities" (December 23, 1983), Emergency loans, Farm Operating Loans, and Farm Ownership Loans are excluded, with the exception of nonfarm enterprise activity, from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

2. The Soil and Water Loan Program is subject to the provisions of Executive Order 12372 and FmHA Instruction 1940–J.

Programs Affected

These changes affect the following FmHA programs as listed in the Catalog of Federal Domestic Assistance:

10.404—Emergency Loans
10.406—Farm Operating Loans
10.407—Farm Ownership Loans
10.416—Soil and Water Loans

Environmental Impact Statement

This document has been reviewed in accordance with 7 CFR part 1940, subpart G, "Environmental Program." It is the determination of FmHA that this action does not constitute a major Federal action significantly affecting the quality of the human environment, and in accordance with the National Environmental Policy Act of 1969, Public Law 91–190, an Environmental Impact Statement is not required.

List of Subjects

7 CFR Part 1955

Foreclosure, Government acquired property.

7 CFR Part 1956

Accounting, Loan programs—Agriculture, Rural areas.

7 CFR Part 1962

Crops, Government property, Livestock, Loan programs—Agriculture, Rural areas.

7 CFR Part 1965

Foreclosure, Loan programs—Agriculture, Rural areas.

Accordingly, chapter XVIII, title 7, Code of Federal Regulations is amended as follows:

PART 1955—PROPERTY MANAGEMENT

1. The authority citation for part 1955 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.33 and 2.70.

Subpart A—Liquidation of Loans Secured by Real Estate and Acquisition of Real and Chattel Property

2. Section 1955.15 is amended by revising the introductory text of paragraphs (d)(2) and (d)(6)(i) to read as follows:

§ 1955.15 Foreclosure by the Government of loans secured by real estate.

* * * * *

(d) * * *

(2) *Acceleration of account.* Subject to paragraphs (d)(2)(i), (d)(2)(ii), and (d)(2)(iii) of this section, the account will be accelerated using a notice substantially similar to Exhibits B, C, D, E, or E–1 of this subpart (available in any FmHA office), as appropriate, to be signed by the official who approved the foreclosure. The accounts of borrowers with pending Chapter 12 and 13 cases which have not been discharged will be accelerated in accordance with instructions from OGC. Upon OGC approval, accounts of these borrowers may be accelerated using a notice substantially similar to Exhibit D of this subpart. Loans secured by chattels must be accelerated at the same time as loans secured by real estate in accordance with § 1965.26 (c) of subpart A of part 1965 of this chapter. The notice will be sent by certified mail, return receipt requested, to each obligor individually, addressed to the last known address. If different from the property address and/or the address the Finance Office uses, a copy of the notice will also be mailed to the property address and the address currently used by the Finance Office. (In chattel liquidation cases which have been referred for civil action under subpart A of part 1962 of this chapter, the Finance Office will be sent a copy of Exhibits D, E, or E–1 (available in any FmHA office) as applicable. County Office and Finance Office loan records will be adjusted to mature the entire debt in such cases). If a signed receipt for at least one of these acceleration notices sent by certified mail is received, no further notice is required. If no receipt is received, a copy of the acceleration notice will be sent by regular mail to each address to which the certified notices were sent. This type mailing will be documented in the file. A State Supplement may be issued if OGC advises different or additional language or format is required to comply with State laws or if notice and mailing instructions are different from that outlined in this paragraph. A conformed copy of the acceleration notice will be forwarded to the servicing official. Farmer Program appeals will be concluded before acceleration. For MFH loans, a copy of the acceleration letter will also be forwarded to the National Office, ATTN: MFH Servicing and Property Management Division, for monitoring purposes. Accounts may be accelerated as follows:

* * * * * —

(6) * * *

(i) When bankruptcy is filed after an account has been accelerated, any foreclosure action initiated by FmHA must be suspended until:

* * * * *

PART 1956—DEBT SETTLEMENT

3. The authority citation for part 1956 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 31 U.S.C. 3711; 7 CFR 2.23; 7 CFR 2.70.

Subpart B—Debt Settlement—Farmer Programs and Housing

4. Exhibit A of Subpart B is removed.

PART 1962—PERSONAL PROPERTY

5. The authority citation for part 1962 continues to read as follows:

Authority: 7 U.S.C. 1989; 5 U.S.C. 301; 7 CFR 2.23 and 2.70.

Subpart A—Servicing and Liquidation of Chattel Security

6. Section 1962.17(a)(1) is revised to read as follows:

§ 1962.17 Disposal of chattel security, use of proceeds and release of lien.

(a) * * *

(1) The borrower must account for all security and will be instructed of this requirement by the County Supervisor when a loan is made and as often afterward as necessary. When the borrower sells security, the property and proceeds remain subject to the lien until the lien is released by the County Supervisor. Purchasers of security who inquire should be informed that the property is subject to FmHA's lien and will remain subject to it until they deliver any proceeds in cash to the County Supervisor or make checks payable jointly to the borrower and FmHA and the check has cleared. When the borrower fails to account properly for security, the County Supervisor will take the actions required in § 1962.18 of this subpart. Releases of sales proceeds will automatically be terminated when Exhibits D, E, or E–1 to subpart A of part 1955 of this chapter is sent to the borrower. Termination of such release will not occur prior to that time.

* * * * *

§ 1962.40 [Amended]

7. Section 1962.40 is amended by adding in the fourth sentence of the introductory text of paragraph (b)(2) the words ", or 9–A and 10–A, as appropriate," after the words "Attachments 9 and 10"; by revising in the fifth sentence of the introductory text of paragraph (b)(2) the words "attachments 4, 6 or 10" to read "Attachments 4, 6, 6–A, 10 or 10–A "; and by revising in paragraphs (b)(2)(i) and (b)(2)(ii) the words "Exhibits D or E" to read "Exhibits D, E, or E–1".

8. Section 1962.41(c) is revised to read as follows:

§ 1962.41 Sale of chattel security or EO property by borrowers.

* * * * *

(c) *Government takes possession.* The borrower may also turn over possession of the chattels to FmHA by signing Form FmHA 455–4, "Agreement for Voluntary Liquidation of Chattel Security." This form authorizes FmHA to sell the security at either public or private sale. If FmHA hires a caretaker, services should be obtained by use of Form AD–838, "Purchase Order."

* * * * *

§ 1962.49 [Amended]

9. Section 1962.49 is amended in paragraph (c)(2) by revising the words "Exhibit D or Exhibit E" to read "Exhibits D, E, or E–1" and by removing in paragraph (c)(3)(ii)(A) the words "or Form FmHA 451–25, 'Status of Account,' ".

PART 1965—REAL PROPERTY

10. The authority citation for part 1965 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23 and 2.70.

Subpart A—Servicing of Real Estate Security for Farmer Program Loans and Certain Note-Only Cases.

11. Section 1965.34 is amended by revising paragraph (e) to read as follows:

§ 1965.34 Non-Program (NP) loans.

* * * * *

(e) *Default.* When an NP debtor is in default of the loan and/or security instruments and the default cannot be corrected in a reasonable period of time (usually less than 1 year) the account will be accelerated by the use of Exhibits D, E, or E–1 of subpart A of part 1955 (available in any FmHA office), as applicable. The statement regarding deferrals in Exhibit D will be deleted. If the debtor has not cured the default within the time provided in the acceleration notice, FmHA will proceed with the foreclosure without further notice or any extension of time.

BILLING CODE 3410–07–M

Animal and Plant Health Inspection Service

9 CFR Part 51

[Docket No. 91-128-3]

Animals Destroyed Because of Brucellosis

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule; withdrawal.

SUMMARY: On December 18, 1981, we published in the **Federal Register** (46 FR 61641, Docket No. 81-099) a document suspending the effective date of that part of a final rule published in the **Federal Register** on November 20, 1981 (46 FR 57026-57027), that increased the maximum Federal indemnity which could be paid for breeding swine destroyed because of brucellosis. This document withdraws that part of the final rule of November 20, 1981.

EFFECTIVE DATE: Effective December 18, 1992. The amendment to the second sentence of § 51.3(b) (1), (2), and (3), that was published at 46 FR 57027, November 20, 1981, and suspended at 46 FR 61641, December 18, 1981, is withdrawn.

FOR FURTHER INFORMATION CONTACT: Dr. Delorias M. Lenard, Senior Staff Veterinarian, Swine Health Staff, VS, APHIS, USDA, room 736-A, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-7767.

SUPPLEMENTARY INFORMATION:

Background

Brucellosis is a serious infectious disease of animals and man caused by bacteria of the genus Brucella. Brucellosis in swine is characterized by abortion, infertility, orchitis, posterior paralysis, and lameness. The regulations is 9 CFR part 512 provide for payment of Federal indemnity to owners of animals destroyed because of brucellosis.

On November 20, 1981 (46 FR 57026-57027), we published in the **Federal Register** a final rule that amended that the regulations in § 51.3(b)(1), (b)(2), and (b)(3) by, among other things, increasing the maximum Federal indemnity that could be paid for breeding swine destroyed because of brucellosis. On December 18, 1981, we published in the **Federal Register** (46 FR 61641, Docket No. 81-099) a document suspending the effective date of only that part of the final rule. The suspension was necessary because there were no funds available at the time to pay increased Federal indemnity for breeding swine destroyed because of brucellosis.

In a final rule published and effective on November 2, 1992 (57 FR 49375-49376, Docket No. 91-128-2), we amended the regulations in § 51.3(b)(2) and (b)(3) to increase the amount of Federal indemnity for breeding swine destroyed because of exposure to brucellosis. The proposed rule was published in the Federal Register on July 1, 1991 (57 FR 29225-29226, Docket No. 91-128). As explained in the proposed rule, this increase was based on a reevaluation of the brucellosis eradication program and a determination that funds were available to pay a higher level of indemnity for those exposed breeding swine. The final rule did not increase the amount of indemnity that could be paid for breeding swine destroyed as brucellosis reactors, so that owners of breeding swine would have a financial incentive to destroy brucellosis exposed swine in a timely manner, reducing the risk of the disease spreading.

It was our intention for the final rule of November 2, 1992, to supersede the suspended part of the final rule published in November 20, 1981. However, we did not include specific instructions to that effect in the November 2, 1992, final rule. This document corrects that oversight.

Accordingly, we are withdrawing the amendment to § 51.3(b), the second sentences in paragraphs (b)(1), (2), and (3), that was published in the **Federal Register** on November 20, 1981 (46 FR 57027) and suspended at 46 FR 61641, December 18, 1981.

Authority: 21 U.S.C. 111-113, 114, 114a, 114a-1, 120, 121, 125, and 134b.

Done in Washington, DC, this 15th day of December 1992.

Lonnie J. King,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 92-30769 Filed 12-17-92; 8:45 am]

BILLING CODE 3410-34-M

---

9 CFR Part 162

[Docket No. 91-027-4]

Accreditation of Veterinarians

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule; correction.

SUMMARY: In a final rule published in the **Federal Register** and effective on November 23, 1992 (57 FR 54906-54916, Docket No. 91-027-3), we amended our regulations in 9 CFR part 162 to accredit veterinarians and authorize them to perform, on behalf of the Animal and Plant Health Inspection Service, certain animal health activities. We also revised procedures for suspending and revoking accredited veterinarian status, and added language describing how civil and criminal penalties may be imposed on accredited veterinarians who violate regulatory requirements.

In response to a comment on the preceding proposed rule published on June 4, 1992 (57 FR 23540-23548, Docket No. 91-027), our final rule stated in the preamble that we were removing a sentence in proposed § 162.12(d) that read: "Issuance of three or more letters of dismissal within a 5-year period citing incidents of minor violations by an accredited veterinarian may be cause for more severe action under this section and § 161.4." We inadvertently left this sentence in the regulatory text. We are correcting this error in the regulatory text of the final rule.

FOR FURTHER INFORMATION CONTACT: Dr. J.A. Heamon, Staff Veterinarian, Sheep, Goat, Equine, and Poultry Diseases Staff, VS, APHIS, USDA, room 700, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-6954.

Correction

In FR Doc. 92-28318, page 54915, in § 162.12, third column, paragraph (d) is corrected by removing the last sentence.

Done in Washington, DC, this 15th day of December 1992.

Lonnie J. King,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-M

FEDERAL RESERVE SYSTEM

12 CFR Part 206

[Regulation F; Docket No. R-0769]

Interbank Liabilities

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board is publishing in final a new Regulation F, Interbank Liabilities. The final rule implements section 308 of the Federal Deposit Insurance Corporation Improvement Act of 1991 (FDICIA), which requires the Board to prescribe standards to limit the risks posed by exposure of insured depository institutions to other depository institutions. The final rule applies to banks, savings associations,

and branches of foreign banks with deposits insured by the Federal Deposit Insurance Corporation (FDIC).

The final rule generally requires insured banks, savings associations, and branches of foreign banks, referred to collectively as "banks," to develop and implement internal prudential policies and procedures to evaluate and control exposure to the depository institutions with which they do business, referred to as "correspondents."

The rule also establishes a general "limit" stated in terms of the exposed bank's capital, for overnight "credit exposure" to an individual correspondent, as defined by the rule. Under the rule, a bank ordinarily should limit its credit exposure to an individual correspondent to an amount equal to not more than 25 percent of the exposed bank's total capital, unless the bank can demonstrate that its correspondent is at least "adequately capitalized." No limit is specified by the rule for credit exposure to correspondents that are at least "adequately capitalized," but a bank is required to establish and follow its own internal policies and procedures with regard to exposure to all correspondents, regardless of capital level.

The final rule provides for a thirty-month transition period after the effective date for full implementation of the rule. Banks must have in place the internal policies and procedures required by the rule on June 19, 1993. The regulatory limit on credit exposure to correspondents that a bank cannot demonstrate are at least "adequately capitalized" will be phased in, with the limit set at 50 percent of the exposed bank's capital for a one-year period beginning on June 19, 1994, and reduced to 25 percent as of June 19, 1995.

EFFECTIVE DATE: December 19, 1992.

SUPPLEMENTARY INFORMATION: On July 20, 1992, the Board published for comment a proposed Regulation F, Interbank Liabilities, to implement section 308 of the Federal Deposit Insurance Corporation Improvement Act of 1991 (FDICIA). 57 FR 31974, July 20, 1992. Section 308, which added a new section 23 to the Federal Reserve Act (FRA), requires the Board to prescribe standards, by regulation or order, that will have the effect of limiting the risks posed by an insured depository institution's exposure to another depository institution.

Summary of the Proposed Rule

The Board's proposed rule was designed to ensure that banks adopt prudent limits on credit and liquidity risks in dealing with other depository institutions. The proposed rule required banks to establish limits on both credit and settlement exposure to each individual correspondent. The proposed rule also established "benchmark" guidelines on the overnight credit exposure to individual correspondents that ordinarily should not be exceeded. The benchmark guidelines were stated as percentages of the exposed bank's capital. The levels of overnight credit exposure considered to be permissible under the benchmarks were tiered based on the capital of the correspondent with which the bank is dealing, so that higher levels of a bank's capital may be exposed to better capitalized correspondents. The benchmark guidelines under the proposed rule were intended to establish the maximum credit exposure that ordinarily would be considered to be prudent with respect to a correspondent with a particular level of capital.

The benchmark guidelines, which were based on a measure of credit exposure that excluded certain relatively low-risk transactions, generally permitted a bank to have credit exposure to an individual correspondent in an amount up to 25 percent of the exposed bank's total capital. For a correspondent that a bank could demonstrate is "adequately capitalized," the bank could have credit exposure under the proposed rule equal to 50 percent of the bank's total capital, but no more than 25 percent of the bank's capital could be exposed through transactions with a term to maturity of more than thirty days. No specific benchmark guideline was provided under the proposed rule for credit exposure to a correspondent that the bank could demonstrate was "well capitalized."

Summary of Final Rule

The final rule continues to require that a bank adopt internal policies and procedures to address exposure to correspondents, and includes a "regulatory limit" for exposure to correspondents that are less than adequately capitalized. As with the proposed rule, "correspondent" includes both domestically chartered depository institutions that are federally insured and foreign banks. The Board has made several significant modifications to the proposed rule, however, in order to improve the effectiveness of the rule and to reduce burdens identified by the comments.

Prudential Standards

The final rule provides greater detail concerning the prudential standards in order to clarify the rule's requirements for internal policies and procedures to identify and control risk. Under the final rule, a bank is required to adopt internal policies and procedures to address the risk arising from exposure to a correspondent, taking into account the financial condition of the correspondent and the size, form, and maturity of the exposure. The final rule allows banks to adopt flexible policies and procedures to meet this requirement in order to permit banks to allocate resources in a manner that will result in real reductions in risk, while minimizing the burden of compliance with the rule.

The final rule requires a bank to maintain written policies and procedures to prevent excessive exposure to any individual correspondent in relation to the financial condition of the correspondent. Under the final rule, a bank's board of directors must review annually the bank's policies and procedures concerning correspondents, but need not approve individual correspondent relationships. The policies and procedures adopted by the board must provide for consideration of credit and liquidity risks, including operational risks, in establishing and maintaining relationships with correspondents. Where a bank's exposure to a correspondent is significant, considering the size and maturity of the exposure and the condition of the correspondent, the bank must periodically review the financial condition of the correspondent. The final rule does not require periodic review of the financial condition of all correspondents. For example, the final rule does not require periodic review of the financial condition of a correspondent to which the bank has only insignificant levels of exposure, such as small balances maintained for clearing purposes.

The final rule requires that a bank take into account any deterioration in

the condition of a correspondent in evaluating the creditworthiness of the correspondent, and lists other factors that have a bearing on the financial condition of the correspondent. A bank may base its review of the financial condition of a correspondent on publicly available information, such as call reports, Thrift Financial Reports, Uniform Bank Performance Reports, or annual reports.[1] The final rule generally does not require a bank to obtain non-public information on which to base its analysis of the financial condition of a correspondent.[2]

The final rule provides that a bank may rely on another party, such as its bank holding company, a bank rating agency, or another correspondent, to provide financial analysis of a correspondent, as long as the bank has reviewed the assessment criteria used by that party. Additionally, a bank may rely on its bank holding company to select and monitor correspondents, or on a correspondent, such as a bankers' bank, to choose other correspondents with which to place the bank's federal funds, as long as the bank has reviewed and approved the selection criteria used.

The final rule requires that a bank establish internal limits on exposure only where the financial condition of the correspondent and the form or maturity of the exposure create a significant risk that payments will not be made as contemplated. Limits must be consistent with the risk undertaken, but may be flexible, based on factors such as the level of monitoring of the exposure and the condition of the correspondent. The final rule also provides that a bank need not set one overall limit on exposure to a correspondent, but may instead set separate limits for different forms of exposure, products, or maturities.

The final rule provides that, for the significant sources of exposure for which internal limits are required, the bank either should monitor its exposure or structure transactions with the correspondent in order to ensure that the exposure ordinarily remains within the internal limits established by the bank.[3] Where monitoring is used, the final rule indicates that the appropriate level of monitoring will depend on the type and volatility of the exposure, on the extent to which the exposure approaches the bank's internal limits, and on the condition of the correspondent. The final rule also indicates that *ex post* monitoring generally is sufficient.

Although the purpose of requiring monitoring or structuring of transactions to which limits apply is to ensure that exposure generally remains within established limits, the final rule recognizes that occasional excesses over limits may result from factors such as unusual market disturbances, unusual favorable market moves, or other unusual increases in activity or operational problems. The final rule requires the bank to establish appropriate procedures to address excesses over internal limits.

The final rule continues to require that a bank's internal policies and procedures address intraday exposure. As with other exposure of longer maturities, however, the final rule does not necessarily require that limits be established on intraday exposure. Such limits would be required only if the size of the intraday exposure and the condition of the correspondent indicated that there is a significant risk that payments will not be made as contemplated.

Limit on Credit Exposure to Certain Correspondents

The final rule provides that a bank's internal policies and procedures should limit overnight credit exposure to a correspondent to 25 percent of the exposed bank's capital, unless the bank can demonstrate that its correspondent is at least "adequately capitalized," as defined by the rule. The final rule does not specify limits for credit exposure to adequately or well-capitalized correspondents.[4]

The benchmark guideline included in the proposed rule for exposure to adequately capitalized correspondents served largely as a transition from the unrestricted exposure permitted for well-capitalized correspondents to the 25 percent benchmark for correspondents that are less than adequately capitalized. The final rule requires banks to take into account the maturity of exposure and changes in the financial condition of the correspondent in establishing internal prudential limits and monitoring, and therefore decreases the need for formal limits on credit exposure to adequately capitalized correspondents. Additionally, because existing exposure above the 25 percent limit for credit exposure to a less than adequately capitalized correspondent is not "grandfathered" under the rule if the correspondent slips below adequately capitalized, the existence of this limit will encourage banks to shorten the maturity of exposure to correspondents that are at risk of dropping below the capital levels required to be adequately capitalized.

This regulatory "limit" requires that a bank's internal policies and procedures limit "credit exposure" to a correspondent to 25 percent or less of the exposed bank's capital, unless the bank can demonstrate that the correspondent is at least "adequately capitalized," as defined in the rule. As in the proposed rule, this limit should be viewed as a maximum level for credit exposure, rather than as a safe harbor. Formal limits on credit exposure to such a correspondent would not be necessary where the banks' policies and procedures effectively limit credit exposure to an amount below the 25 percent limit, such as where only small balances are maintained with the correspondent, or where the correspondent has only been approved for a limited relationship. Although in many cases it will be necessary for a bank to establish formal internal limits to meet the regulatory limit, the provisions of § 206.3 of the final rule concerning excesses over internal limits also apply to limits established for the purpose of controlling "credit exposure" under § 206.4 of this rule.

As in the proposed rule, the "credit exposure" that is limited under the final rule is based on the assets and off-balance sheet transactions against which the bank must maintain capital under the risk-based capital guidelines, with the same exclusions of lower-risk

[1] For significant correspondent banking relationships, the Board believes that banks generally have considerable non-public information concerning their correspondents, such as information on the quality of management, general portfolio composition, and similar information. The limitation of the rule to financial analysis based on publicly available information is intended to recognize that access to non-public information is not always available, and is not intended to discourage the use of more extensive information, where available.

[2] A bank is required to obtain non-public information to evaluate a correspondent's condition only for those foreign banks for which no public financial statements are available. In these limited circumstances, the bank would need to obtain financial information directly from the correspondent.

[3] A bank could meet the requirements of the rule by monitoring actual overall exposure, or by establishing individual lines for significant sources of exposure, such as federal funds sales, and establishing procedures to ensure that exposure generally remained within the established lines. A bank could also maintain limits on exposure by establishing limits monitored by a correspondent, such as for sales of federal funds through the correspondent as agent.

[4] While the proposed rule referred to "benchmark guidelines" to reflect that the numerical limits were subject to exceptions, the successor provision in final rule refers to "limits" to reflect that this "limit" is an outside limit on the bank's own internal limits. This limit, as well as the bank's internal limits, are subject to exceptions noted in the final rule. Thus, the nature of this limit is substantially the same as the benchmark guidelines in the proposed rule.

transactions permitted. The final rule clarifies that "credit exposure" does not include settlement exposure, transactions in which the bank acts as agent, and other forms of exposure that are not covered by the capital adequacy guidelines.

Transition Provisions

To mitigate the need for a bank to reduce exposure rapidly to a correspondent whose capital has slipped below the levels needed to be considered adequately capitalized, the final rule increases the transition period for application of the 25 percent limit on credit exposure to 120 days. The longer transition period will avoid undue disruptions in correspondent relationships due to temporary declines in capital ratios by allowing the correspondent an opportunity to bring its capital ratios back above the relevant levels before the end of the next quarterly report. The extended period will also provide the exposed bank more time to implement any monitoring required to demonstrate compliance with the limit on credit exposure and to adjust the maturities or level of its exposure to the correspondent.

Initial Implementation Period

The proposed rule required that banks have internal policies and procedures in place by December 19, 1992, with the benchmark guidelines to be phased in over a two-year period. The final rule provides a transition period of six months before the prudential standards become effective, with the remaining limit on credit exposure phased in over a two-year period after that date. The longer initial implementation period will enable banks that have not made credit assessments of their correspondents to do so, and will provide an opportunity for banks to review and, where appropriate, improve their monitoring procedures.

Additional modifications to the proposed rule are detailed in the discussion below.

Summary of Comments

The Board received 321 comment letters on the proposed rule. Two hundred fourteen commenters opposed the rule. Five commenters supported the regulation's implementation of section 308. An additional seventeen commenters offered qualified support for the rule, urging the Board to modify implementation to make it less burdensome, by, for example, eliminating the guidelines based on capital. The others expressed no opinion or offered detailed comments. The comments included seventy-three "form letters," forty-one of which focused on the effect of the proposed rule on bankers' banks and sixty-one of which addressed the competition between Federal Reserve Banks and private sector correspondents. All of the form letters were from small banks.[5] The 321 commenters by category included 233 commercial banks, 41 bank holding companies, 18 bankers' banks, 13 trade associations, 5 clearinghouses, 6 savings associations, 1 Federal Home Loan Bank, and 6 others.

General Comments

Cost. One hundred fifty-one commenters expressed concern over the additional cost burden the proposed rule would impose. The Board has attempted to minimize costs to banks of implementing the final rule, but some costs are inherent in any new rule that results in changes in bank practices.

Excessive regulation. One hundred sixty-six commenters believed the proposed rule created excessive regulation. While the Board recognizes the regulatory burden associated with the new rule, the Board believes that the provisions of the final rule are necessary to carry out the intent of section 308.

Federal Reserve Bank and Federal Home Loan Bank competition. One hundred seventy-nine commenters expressed concern that the proposed rule would divert business from the private sector to the Federal Reserve Banks and Federal Home Loan Banks. Two commenters suggested that the Board reduce the competitive impact by including Federal Reserve Banks in the definition of correspondent. Another commenter suggested the Board require banks to conduct the same analysis of Federal Reserve Banks that would be required for a private correspondent. Because exposure to a Federal Reserve Bank or Federal Home Loan Bank poses minimal risk to a respondent, the Board does not believe that Federal Reserve Banks and Federal Home Loan Banks should be included in the definition of correspondent in the final rule. To treat Federal Reserve Banks and Federal Home Loan Banks as correspondents under the final rule would impose unnecessary costs and burdens on banks, with no appreciable reduction in risk.

Five commenters proposed that the Board rectify the competitive effect of the rule by changing the private-sector adjustment factor or the prices charged for check collection.[6] The Board will review the calculation of the private-sector adjustment factor to determine if modifications are appropriate.

Disruption of the federal funds market. Twenty-four commenters expressed concern that the proposed rule would disrupt the federal funds market by preventing banks from selling all of their federal funds to a single correspondent, and stated that the need to diversify federal funds sales among a number of purchasers could result in higher transaction costs. In addition, commenters expressed concern that the need to evaluate the financial condition of correspondents could lead banks that are members of the Federal Home Loan Banks to deposit funds in those banks rather than selling them to correspondents.

While the Board recognizes that there may be some initial restructuring of the channels for federal funds sales, the Board does not believe that the regulation will result in a material or lasting disruption of the federal funds market or to a material reduction in the availability of federal funds. The federal funds market is competitive, and the Board believes that creditworthy correspondents that are buyers of federal funds will continue to be able to fund profitable business utilizing this market. The Board also believes that modifications incorporated in the final rule, including elimination of the regulatory limit on credit exposure to adequately capitalized correspondents, will reduce the effect of the rule on the federal funds market.

Availability of credit. Fifty-six commenters asserted that the proposed rule would exacerbate the "credit crunch," generally either because of disruption in the federal funds markets or because of diversion of funds to Federal Reserve Banks or Federal Home Loan Banks. Twenty-two of these commenters claimed that this effect would be particularly pronounced in small communities. As discussed above, the Board believes that the modifications incorporated in the final rule have significantly reduced the

[5] For example: 30 commercial banks and bank holding companies sent identical letters which focused on competition from Federal Reserve Banks; 19 bankers' banks and their customers sent an identical resolution on the effect of the proposed rule on bankers' banks and competition from Federal Reserve Banks; 10 commercial banks, customers and shareholders of a bankers' bank, sent identical letters concerning the proposal's effect on bankers' banks; and 9 commercial banks sent substantially similar letters on bankers' banks and Reserve Bank competition.

[6] Two commenters noted that, in addition to the cost of maintaining capital, correspondents generally would have to bear the cost of disseminating call reports in order to provide their respondents with information on their capital ratios, and that Reserve Banks would not have to bear this cost.

likelihood of any reduction in the availability of funds for lending.

Effect on the FDIC funds. Thirty-eight commenters, nine of whom submitted a substantially similar letter, expressed concern that the proposed rule would weaken the Federal Deposit Insurance funds. Another commenter, however, asserted that the proposed rule would actually strengthen the funds. To the degree that the proposed rule diverts deposits, generally in the form of compensating balances, from depository institutions to Federal Reserve Banks or Federal Home Loan Banks, it may reduce FDIC insurance assessments. However, the Board believes that the overall effect of the final rule will be to strengthen the funds by reducing losses.

Repeal. Forty-six commenters urged the repeal of the statute and one commenter asserted that similar limits at the state level have failed. The power to repeal the statute, however, rests with the Congress rather than the Board.

Miscellaneous. Thirteen commenters suggested that, as an alternative to regulating respondents, the federal regulators supervise the correspondent banking business by restricting which banks could engage in such business, notifying respondents that do business with unsound correspondents, setting limits on the amount of exposure a correspondent can accept, or automatically transferring balances from weak correspondents to strong ones and notifying respondents later. Seven other commenters noted that it is inefficient for a thousand banks to monitor the same correspondent, which is also being monitored by a regulator. The Board does not believe that it would be appropriate to endorse specific correspondents, as such a practice could perpetuate the "too big to fail" concept that section 308 was designed to address.

One commenter urged the Board to create a new instrument for Treasury obligations for which the Federal Reserve Banks would be the broker and administrator. The Board does not believe that the creation of such an instrument is necessary, as the government securities market is broad and deep, offering many opportunities for investment. Another commenter suggested that the Board permit banks to sell federal funds to Federal Reserve Banks. The Board does not believe that such a practice would be appropriate because it would interfere with the conduct of monetary policy.

Another commenter suggested that the Board change Regulation D and the FDIC insurance calculation to encourage fee payment. The final rule increases the incentives for respondents to compensate correspondents by fees, and the Board believes that the market will make appropriate adjustments to this change.

One commenter suggested that the Board expand legal lending limits to include off-balance sheet items. The Board does not have the authority to effect such a change, however, as these limits are administered by the Comptroller of the Currency under the National Bank Act and by state banking regulators under state law.

One commenter urged the Board to tailor the rule to the strength of the respondent on the assumption that well-capitalized respondents would be managed wisely. The final rule places greater emphasis on a bank's internal policies and procedures.

Section-by-Section Comments

The section and paragraph numbers in the headings refer to the numbering of the proposed rule. Where a provision has been renumbered or moved, the appropriate cite in the final rule is provided in brackets.

Section 206.2 Definitions

Section 206.2(a) Bank

The proposed rule defined "bank" as an insured depository institution as defined under section 3 of the Federal Deposit Insurance Act (12 U.S.C. 1813). Banks covered by this definition must control their exposure to correspondents under this rule. The Board received twenty-seven comments on this section.

Exclusion of Small Banks

Fourteen commenters proposed that the Board exclude small or community banks, defined by some commenters as banks with assets under $1 billion, or hold such banks to a more lenient standard, especially in their correspondents are well or adequately capitalized. Another thirteen commenters, nine of whom submitted a substantially similar letter, asserted that the current rule violated Congressional intent, as Congress did not intend to harm small banks with this regulation.

Section 308 states that the Board should address the risk posed to an insured depository institution by the failure of another depository institution. It does not restrict that mandate to risks posed to large institutions. Section 308 is designed to limit bank failures attributable to losses due to the failure of a correspondent. An exemption for small bank exposure to correspondents would be contrary to this design, as the failure of a correspondent would continue to precipitate the failure of small banks.

Coverage of Definition

One commenter urged that the Board clarify that a nonbank credit card company is excluded from the definition of "bank."
Nonbank credit card companies are not considered to be banks for the purposes of this rule. However, bank users of credit card or other payment services may, depending upon the terms of their services, incur exposure to other banks by virtue of use of such services.

The definition in the final rule has been redrafted for clarity.

Section 206.2(b) Correspondent [Final Rule—Section 206.2(c)]

The proposed rule defined "correspondent" as a U.S. depository institution or a foreign bank, as defined in the proposed rule, to which a bank had exposure. The Board received 134 comments on this section.

Exclusion of Bankers' Banks

One hundred twenty-two commenters urged exclusion of bankers' banks from the definition of correspondent. Forty-seven commenters, twenty-six of whom submitted substantially similar letters, argued that bankers' banks pose no systemic risk, either because the bankers' banks are themselves small, or because they serve only small banks. Thirteen commenters, nine of whom submitted a substantially similar letter, asserted that bankers' banks reduce systemic risk by providing alternative correspondent services. Twenty-seven commenters, eighteen of whom submitted a substantially similar letter, argued that a bankers' bank may be less risky because it is a local institution, it is chartered to serve only banks, and its board includes officers of its respondent banks, who are therefore in a position to monitor its financial condition more closely.

Forty-six commenters, twenty-nine of whom submitted a substantially similar letter, pointed out that bankers' banks rely exclusively on interbank liabilities and are thus uniquely vulnerable to the interbank liability limits. Sixty-three commenters, including twenty-eight form letters and a number of bankers' banks, argued that Congress did not intend bankers' banks to be targeted. Many of these commenters concluded that the rule should create special provisions for bankers' banks. Thirty-two commenters, nine of whom submitted a substantially similar letter, argued that Congress recognized the unique role of bankers' banks in the Depository Institutions Deregulation and Monetary Control Act of 1980. One commenter argued that it was unfair to

subject bankers' banks to the rule when central liquidity facilities, which provide services to credit unions, are not covered. Another commenter argued that bankers' banks are not commercial banks and that the deserve the same treatment as Federal Reserve Banks. Eleven commenters argued that bankers' banks should be excluded from the scope of the rule because banks would otherwise be forced to obtain correspondent services from their competitors.

In contrast, two commenters argued that exclusion of bankers' banks would unfairly restructure the market for correspondent services, and another commenter noted that exemptions for some providers of correspondent services would erode competition.

The Board recognizes that bankers' banks are providing important services to respondents and are meeting a market need, and that Congress has given special status to bankers' banks in other statutes. Nonetheless, the Board does not believe that other legislation or the statutory language or legislative history of section 308 demonstrate a Congressional intent to exclude bankers' banks from the coverage of section 308. Nor does the Board believe the Congress intended for bankers' banks to be targeted by the rule. Accordingly, the final rule treats bankers' banks no differently than other correspondents.

The Board does not believe that bankers' banks will be unduly harmed by being treated as correspondents under the rule. Bankers' banks generally are at least adequately capitalized and there is no regulatory limit on credit exposure to an adequately capitalized correspondent under the final rule. Although respondents will need to obtain information on correspondents' capital ratios in order to demonstrate that correspondents are at least adequately capitalized, bankers' banks can reduce this burden by providing the information to their respondents directly. To the extent that bankers' banks are concerned that the burden of meeting the requirements of the rule's prudential standards will cause banks to transfer business from a bankers' bank to a Federal Reserve Bank or Federal Home Loan Bank, the Board believes that the more extensive guidance provided in the language of the final rule will reduce this effect.

The Board believes that including bankers' banks within the scope of the rule is appropriate. Bankers' banks represent a concentration of interbank risk because they rely exclusively on interbank liabilities and because their assets subject them to the same risks as other banks. Further, an exception for bankers' banks could alter the market for correspondent services, possibly increasing risk as correspondent business moves to such special purpose banks. With regard to arguments that including bankers' banks as correspondents under the rule will force banks to obtain services from their competitors, the Board notes that banks often do business with competitors.

Sixteen commenters asserted that the rule would result in a reduction in deposits at bankers' banks which, in turn, would reduce the capacity of bankers' banks to provide "overline" loan and participation arrangements and other correspondent services. The Board believes that the demand for these services will provide incentives for banks to continue to do business with bankers' banks rather than shifting to Federal Reserve Banks or Federal Home Loan Bands, which provide only limited services.

Six commenters stated that the proposed rule would preclude a bankers' bank from raising capital when it is most needed because banks could not increase exposure to the bankers' bank through stock investments. Although most bankers' banks are well or adequately capitalized, the Board recognizes that the capital of bankers' banks generally represents exposure of the owner-customers of the bankers' bank. The Board notes, however, that capital ratios may be increased by other means, such as by reducing certain assets of the bankers' bank.

Restriction of Coverage to Large, Weak Banks

Fifty-nine commenters concerned with the regulatory burden imposed by the proposed rule urged that the rule focus exclusively on banks that might be considered "too big to fail." Thirty-five of these commenters, twenty-eight of whom submitted a substantially similar letter, suggested that the Congressional intent was to focus on the risk caused by the failure of a large depository institution, and that small banks were not to be affected by the regulation. In addition, thirty-five commenters, thirty of whom submitted a substantially similar letter, urged the Board to exempt exposure to well-capitalized correspondents from the regulation or at least to treat exposure to them no differently than exposure to a Federal Reserve Bank.

Although the introductory language in section 308 refers to the failure of a large depository institution, the text of the statute directs the Board to limit risks posed by exposure to "any other depository institution." Further, excluding exposure to small correspondents from the rule could cause correspondent business to shift to small correspondents, regardless of their financial condition, thereby increasing the risk that the failure of a small correspondent would cause the failure of other banks. Finally, entirely excluding exposure to well-capitalized correspondents could encourage banks to take exposure to a well-capitalized correspondent that may be excessive in relation to the overall financial condition of the correspondent. Thus, the Board believes that the definition of "correspondent" should not exclude depository institutions on the basis of size or capitalization.

Expansion of the Definition of Correspondent

Nine commenters expressed concern about competition in the correspondent business from nonbanks and credit unions. Three of these commenters proposed that the definition of correspondent encompass all providers of correspondent services, including nonbanks. One commenter pointed out that Edge Act companies are not defined as correspondents but are included as subsidiaries.

The Board notes that the interbank liability provisions of section 308 concern exposure to depository institutions, not to financial service providers generally. The definition of "correspondent" in the proposed rule was limited to institutions that receive special treatment under the capital adequacy guidelines, which provide that claims against certain foreign banks and federally insured domestic depository institutions generally are given a 20 percent risk weight.[7] Furthermore, the Board does not believe that nonbank providers of correspondent services, including credit unions, provide a full range of correspondent services in competition with traditional correspondents or that risk to banks will increase materially through migration to providers of services that are not covered by the rule. Finally, the failure of financial institutions that are not insured by the Federal Deposit Insurance Corporation would not pose a threat to the Federal Deposit Insurance funds through invocation of "too big to fail."

Final Rule

The definition of correspondent has been amended to exclude commonly controlled correspondents that are subject to cross-guarantees under the

[7] Claims against other types of financial institutions generally are given a 100 percent risk-weighting under the capital adequacy guidelines.

Federal Deposit Insurance Act. The proposed rule excluded commonly controlled correspondents from the limits on credit exposure, but not from the prudential standards. In the final rule this exclusion has been extended to the prudential standards for consistency. This exclusion does not affect the applicability of other statutory provisions governing transactions with affiliated institutions, such as section 23A of the Federal Reserve Act (12 U.S.C. 371c).

Section 206.2(c) Exposure [Final Rule—Section 206.2(d)]

The proposed rule defined "exposure" as the risk that payment to complete a transaction will not be made in a timely manner or that an obligation will not be paid in full. The definition further provided that "exposure" includes the operational and liquidity risks related to the settlement of transactions and risk related to the creditworthiness of a correspondent. Both overnight and intraday exposure were covered by the definition. The proposed rule required exposure to be monitored under the prudential standards. The Board received twenty comments on this section.

Scope of the Definition

Ten commenters urged that the scope of the definition be restricted. Nine commenters suggested that the definition of exposure include only significant exposure measured by the amount at risk and the product line at issue to a particular correspondent. Four of these commenters suggested that the Board provide guidance, such as that in the payments system risk policy, as to what constitutes significant exposure. One commenter urged that the definition exclude items covered by FDIC insurance. Another commenter suggested that the purchase and sale of Treasury securities be excluded. One commenter suggested that the Board exclude settlement risk from the definition of exposure. Another commenter suggested that the settlement risk in delivery-versus-payment systems be excluded. Two commenters, clearinghouses, suggested that the settlement risk attendant to a clearing and settlement system that includes settlement finality should be excluded from the definition of exposure because it is insignificant. One commenter asked the Board to exclude collateralized interest rate swaps from the definition of exposure. Another commenter questioned whether other exposures like payroll, pending ATM, and coin and currency settlements should be included in exposure. One commenter suggested that the definition of exposure distinguish exposure due to capital market transactions from exposure due to correspondent banking activity. In addition, four commenters urged the exclusion of short-term exposure. One commenter suggested that the rule exclude all exposure with a maturity of less than 14 days, two others urged the exclusion of demand deposits, and the fourth called for the exclusion of federal funds transactions. Three commenters expressed concern that regulators would unreasonably expand the definition.

The final rule excludes certain lower-risk transactions from the definition of "credit exposure," which is the measure of exposure subject to a specific regulatory limit under the rule. The general definition of "exposure" used in the final rule, however, covers all types of transactions that create a risk of nonpayment or delayed payment. The Board believes that banks should consider all types of financial exposure in establishing prudential policies and procedures. As discussed in the summary of the final rule, however, the prudential standards in the final rule have been amended to clarify that a bank is not required to treat all types of exposure in the same manner, and that a bank's internal policies and procedures may provide for differential treatment of exposure based on the form, maturity, and size of the exposure, as well as on the condition of the correspondent.

Clarification of the Definition

Seven commenters found the definition of exposure too vague. Two commenters sought clarification of the definition of settlement risk. One commenter asked for clarification of how settlement risk relates to automated clearinghouse (ACH) transactions. One commenter urged that exposure arising out of credit card transactions should be excluded from the definition of exposure because a bank cannot control the banks to which it has this exposure. In this regard, the Board notes that exposure arising from the following transactions generally is insignificant because the exposed bank usually has prompt recourse to other parties or because the amounts involved are not significant: (1) A collecting bank's risk that a check will be returned, (2) an originating bank's risk that an ACH debit transfer will be returned or its settlement reversed, (3) a receiving bank's risk that settlement for an ACH credit transfer will be reversed, or (4) a credit card transaction. Under the final rule, a bank is not required to conduct periodic reviews of the financial condition of a correspondent where the amount of the exposure is insignificant and would not be required to limit exposure unless there is a significant risk that payment will not be made as contemplated.

Another commenter requested clarification of the terms "liquidity risk" and "operational risk" used in the definition of exposure. Liquidity risk is the risk that payment will be delayed for some period of time. For example, a bank is subject to the liquidity risk that a payment due from a failed correspondent will not be made on time; the bank's credit risk may be a lesser amount due to later distributions from the correspondent's receiver. Liquidity risk is included in the definition of exposure in the final rule. Operational risk if the risk that operational problems at a correspondent, such as computer failure, may prevent it from making payments, thereby creating liquidity risks for other banks, and is also included in the definition of exposure in the final rule.

One commenter asked if correspondent obligations that a bank holds in a fiduciary capacity are excluded. Because obligations held in a fiduciary capacity do not expose the bank itself to loss due to credit, liquidity, or operational problems, such obligations are not included in the definition of exposure.

One commenter argued that depository institution equity securities taken as collateral or in satisfaction of a debt should be excluded from the definition of "exposure" because they are not payment obligations. Such transactions are covered by the definition of "exposure," in the final rule, as they create a credit risk to the bank should the depository institution fail. The definition in the final rule has been redrafted for clarity.

Section 206.2(d) Foreign Banks [Final Rule—Section 206.2(e)]

The proposed rule defined a "foreign bank" as an institution that is organized under the laws of a country other than the United States, engages in the business of banking, is recognized as a bank by the bank supervisory or monetary authorities of the country of the bank's organization, receives deposits to a substantial extent in the regular course of business, and has the power to accept demand deposits. Foreign banks were included in the definition of correspondent in the proposed rule. The Board received seven comments on this section.

Exclusion of Foreign banks

Two commenters urged that the rule exclude foreign banks because of the cost and difficulty in obtaining necessary information, such as capital information, and because the proposed rule would harm the competitiveness of U.S. banks in foreign correspondent markets. These commenters also argued that foreign banks do not pose a risk to the deposit insurance fund, or to the U.S. banking system as a whole. An additional two commenters, focusing on the lack of current risk-based capital ratio information and on the decreased risk posed by foreign banks, suggested that exposure to foreign banks be excluded from application of the benchmark guidelines and subjected only to the prudential standards. Two other commenters, however, strongly supported the coverage of foreign banks in the rule, arguing that exclusion would grant such banks a competitive advantage over domestic banks. One commenter, a clearinghouse, noted that its members were divided on this issue.

Foreign banks were included as correspondents under the proposed rule because failure to cover foreign banks could encourage a migration of correspondent and interbank business to foreign banks irrespective of their condition, thereby potentially increasing risk to insured depository institutions. Consequently, the Board does not believe that foreign banks should be excluded from coverage of the limits on credit exposure or the prudential standards. To address problems with obtaining adequate information concerning foreign banks, however, the final rule provides greater flexibility as to the timing and frequency with which a bank must obtain information on the capital levels of its foreign bank correspondents.

Clarification of the Definition

Two commenters called for recognition of the decreased risk posed by a foreign central bank or a bank guaranteed by a foreign government, and perhaps even exclusion of these institutions from coverage as "correspondents" under this rule. The definition of "foreign bank" is based on the criteria used in the risk-based capital guidelines. As those guidelines exclude the central bank of a foreign country, such institutions would be excluded for the purposes of this rule as well. The Board believes, however, that banks guaranteed by foreign central governments may pose risks and should be included as correspondents for the purposes of this rule.

The definition remains unchanged in the final rule.

Section 206.2(e) Primary Federal Supervisor [Final Rule—Section 206.2(f)]

No comments were received on this section, and the definition remains unchanged in the final rule.

Section 206.2(f) Quality Asset [Final Rule—Section 206.4(f)(3)]

The proposed rule defined a "quality asset" as an asset that is not in a nonaccrual status, on which principal or interest is not more than thirty days past due, and whose terms have not been renegotiated or compromised due to the deteriorating financial condition of the primary obligor. Furthermore, under the proposed rule an asset would not be considered to be a "quality asset" if any other loans to the primary obligor on the asset have been classified as "substandard," "doubtful," or "loss" or treated as "other loans specially mentioned" in the most recent report of examination or inspection of the bank or an affiliate prepared by either a federal or a state supervisory agency. Under the proposed rule, a transaction for which a correspondent is only secondarily liable could be excluded from a bank's "credit exposure" to the correspondent as long as the transaction could be considered a "quality asset."

The Board received one comment, which criticized this definition as too restrictive. The commenter urged that the definition include assets on which principal or interest is not more that 90 days past due, as is the standard in SEC Guide 3 Section III C.1. This SEC standard is used for reporting and disclosure purposes and does not appear to be appropriate for the purposes of this rule. The Board believes that the proposed definition, which was derived from section 23A of the Federal Reserve Act (12 U.S.C. 371c), permits a more accurate measure of actual credit exposure. In the final rule the definition of "quality asset" has been incorporated into the section concerning "credit exposure" (§ 206.4).

Section 206.2(g) Subsidiary [Final Rule—Section 206.4(e)]

Under the proposed rule, the term "subsidiary" was given the same meaning as that term under section 23A of the Federal Reserve Act, and therefore included any company in which a bank owns or control 25 percent or more of any class of voting securities. This definition in the final rule has been modified and incorporated into § 206.4, and is discussed below in the description of comments on that section.

Section 206.2(i) Total Capital [Final Rule—Section 206.2(g)]

The proposed rule defined total capital as the total of a bank's Tier 1 and Tier 2 capital under the risk-based capital guidelines provided by the bank's primary federal supervisor. For an insured branch of a foreign bank organized under the laws of a country that subscribes to the principles of the Basle Capital Accord, "total capital" means total Tier 1 and Tier 2 capital as calculated under the standards of that country. For an insured branch of a foreign bank organized under the laws of a country that does not subscribe to the principles of the Basle Capital Accord, "total capital" means total Tier 1 and Tier 2 capital as calculated under the provisions of the Accord. The Board received two comments on this section.

Two commenters requested clarification that the benchmark guidelines would be based on the total capital of a foreign bank, rather than only on the capital of the branch. The limit on credit exposure of the insured branch of a foreign bank is based on the foreign bank's total capital, as defined in this section, not on the imputed capital of the branch.

The definition remains unchanged in the final rule.

Section 206.2(j) U.S. depository Institution [Final Rule—Section 206.2(h)]

The proposed rule defined "U.S. depository institution" as a federally insured depository institution chartered in the United States under federal or state law, and included an insured national bank, state bank, District bank, or savings association, as those terms are defined under section 3 of the Federal Deposit Insurance Act (12 U.S.C. 1813), but did not include an insured branch of a foreign bank. U.S. depository institutions were included in the definition of "correspondent" in the proposed rule. The Board received eight comments on this section, two of which supported the definition as written.

Scope of the Definition

Three commenters urged the inclusion of credit unions, asserting that they poses risks to the financial system through the large inter-institution liabilities of credit union corporate centrals. Credit unions do not offer a full range of correspondent services to FDIC-insured banks and are not insured by the FDIC. Therefore, the Board does not believe that exposure to credit unions poses risks to insured banks and

to the FDIC insurance funds of the type that section 308 was designed to address.

Clarification of the Definition

Three commenters suggested that the final rule include specific language excluding Federal Home Loan Banks. The Board believes that the definition excludes Federal Home Loan Banks and that a specific exclusion for Federal Home Loan Banks is unnecessary. The definition in the final rule has been redrafted for clarity.

Section 206.3 Prudential Standards

Section 206.3(a) Internal limits. [Final Rule—Section 206.3(c)]

The proposed rule required that a bank establish and maintain policies and procedures to limit exposure to the correspondents with which it does business. The rule further required that banks establish and periodically review and revise, as necessary, limits on exposure to individual correspondents based on an evaluation of the overall financial condition and other factors being on the creditworthiness of each correspondent. Finally, it required that a bank structure these limits to avoid undue concentration of settlement or credit risk with respect to any individual correspondent. Most of the comments received addressed the prudential standards, and 110 of those comments addressed § 206.3(a) on internal limits.

Appropriateness of Internal Prudential Standards

Twenty-four commenters agreed that the prudential standards reflect prudent banking and general industry practice, and twenty-eight commenters indicated that they had already established prudential standards for interbank exposure. Moreover, twenty-four commenters suggested that this provision, supplemented by examination, be the heart of the regulation. On the other hand, forty-two commenters, including five who indicated that they already conduct similar prudential analyses, disagreed with the Board's approach to the problem of interbank liabilities. These commenters argued that the examination process can adequately address the problem, both because adequate controls already exist in the safety and soundness criteria and because the examination and consultative process is superior to regulation. These commenters concluded, therefore, that the rule would impose increased costs without achieving a commensurate reduction in risk. Three of these commenters suggested that the Board conduct an empirical study of the risks associated with interbank liabilities and the cost of controlling those risks.

Thirty-two commenters offered alternatives to the prudential standards. Three suggested approval of correspondent relationships by vote of the bank's board of directors. Eighteen commenters, submitting an identical letter, suggested that the prudential standards require only that a bank obtain information from its correspondents once a year to demonstrate that the correspondents meet appropriate capital standards. One commenter suggested that banks be permitted to tier their prudential standards in a similar fashion as the capital guidelines. Six commenters favored a simple statement that the risks must be addressed, while another suggested that the standard be the same due diligence standard applied to any loan. One commenter urged the Board to require specific, detailed lending policies, similar to those for highly leveraged transactions, while another commenter asserted that only on-site examinations offer a true measure of risk. One commenter suggested that the rule require an annual review of capital, management experience, and income trends.

Implementation of the Requirement

Twelve commenters expressed a desire for greater specificity regarding the preparation and review of the internal limits. Six requested specificity as to the factors that a bank should evaluate or argued that the factors be limited. One commenter sought clarification of whether internal standards could ever be breached. Four commenters indicated that respondents may lack the expertise to analyze the financial condition and risk of larger correspondent banks, particularly where the correspondent has significant off-balance sheet activities. Six commenters expressed concern about the availability of the information. One of these commenters stated that correspondents that compete on other fronts may be unwilling to divulge non-public information. One commenter asked whether banks could rely on information from correspondents. Two commenters expressed concern that call and audit reports do not address overall conditions and operations, although both are mentioned as factors in the proposed rule. Five commenters expressed concern that the proposed rule failed to encourage banks to improve continuously their risk management programs and may encourage banks to abandon a more sophisticated system for one which tracks the guidelines. One of those commenters urged that the Board adopt uniform examination guidelines that reflect to the greatest degree possible existing risk monitoring and control practices.

Final Rule

The primary focus of the final rule is on a bank's analysis of the creditworthiness of its correspondents. Many of the concerns raised by these commenters are addressed by the more extensive guidance in the final rule as to the standards that a bank's internal policies and procedures would be expected to meet. The final rule states that internal procedures should be directed at preventing excessive exposure to a correspondent in relation to the financial condition of the correspondent, and allows banks to adopt flexible policies and procedures to meet this standard. The final rule does not require the same procedures to be used for all correspondents or all types of exposure.

Under the final rule, a bank's internal policies and procedures must provide for periodic reviews of a correspondent's financial condition only where exposure to the correspondents is significant. Periodic review of the financial condition of correspondents to which the bank has only insignificant levels of exposure, such as small balances maintained for clearing purposes, would not be required under the final rule. While the bank's board of directors would be required to review the bank's policies and procedures concerning correspondents on an annual basis, the board would not be required to approve individual correspondent relationships. The final rule also does not require the bank to obtain non-public information on which to base its analysis of the financial condition of a correspondent, but permits use of publicly available information, such as call reports, Uniform Bank Performance Reports, and annual reports.[8]

Additionally, the final rule requires the establishment of internal limits only where the financial condition of the correspondent and the form or maturity of the exposure create a significant risk that payments will not be made as contemplated. The rule does not require a particular structure or method of maintaining such limits, but permits the bank flexibility to structure limits in a

[8] A bank would be required to obtain non-public financial information only in the limited circumstances where no publicly available source of information existed, such as for certain privately owned foreign banks.

manner that will meet the needs of the bank. For example, in appropriate circumstances a bank may establish limits for longer term exposure to a correspondent, while not setting limits for overnight or intraday exposure.

Clarification of the Requirement

Eight commenters inquired whether the Board would permit a lead bank or bank holding company to conduct the prudential analysis for affiliated banks. The final rule clarifies that a bank may rely on its bank holding company, a bank rating agency, or another party to provide financial analysis of correspondents or to select correspondents, as long as the board of directors of the bank has reviewed the assessment or selection criteria used by that party.

Section 206.3(b) Monitoring. [Final Rule—§ 206.3(c)]

The proposed rule required that a bank structure transactions with a correspondent or monitor exposure to a correspondent to ensure that its exposure does not exceed its internal limits established under § 206.3(a) and that its credit exposure ordinarily not exceed any applicable guidelines on credit exposure specified in § 206.4. The Board received 160 comments on this section.

One hundred fourteen commenters, thirty of whom submitted a substantially similar letter, protested the cost burden implicit in the monitoring requirements. Sixteen commenters argued that the costs of the monitoring provisions of the proposed rule outweigh the benefits. Fifty-nine commenters argued that these costs will be exacerbated if banks must spread their correspondent business among a number of banks. Two commenters complained that the cost burden would fall disproportionately. One asserted that small community banks would bear the brunt of it and another asserted it would fall inequitably on the adequately and well-capitalized banks of the Midwest. Seven commenters pointed out that even well-capitalized private correspondents and respondents will have to bear these costs.

Clarification of the Requirement

Six commenters requested clarification as to whether the requirement of the rule would be satisfied by structuring relations so that the limits are not exceeded, such as through agency sales policies. Five commenters urged the Board to consider permitting a lead or parent bank in a bank holding company to monitor exposure for its affiliated banks. Two commenters urged that the monitoring requirements distinguish between significant and insignificant exposure. Another urged that the final rule permit systems consistent with the institution's business, internal systems operations, and personnel. Seven commenters expressed concern that examiners might unduly restrict the regulatory flexibility that was designed to permit the use of diverse existing monitoring and risk control practices. They urged the Board to adopt uniform examination guidelines that would accommodate existing systems. Two commenters suggested as a model the guidelines for self-assessments on payment system risk.

Frequency of Monitoring

Twelve commenters argued that daily monitoring is excessive if not impossible. One commenter asserted that a banker cannot know the balance on a pass-through account. Two other commenters stated that global monitoring of outstanding exposures on a daily basis in products such as interest rate swaps, letters of credit, and other transactions would be extremely difficult, and that banks should be permitted to use their prudential limits as proxies for actual exposure where these limits are below the benchmarks. One commenter urged that the final rule match the frequency of review with the risk, while another urged the Board to permit banks to monitor exposure in arrears and take corrective action should exposure exceed prearranged levels. One commenter urged the Board to permit banks to monitor weekly or monthly averages. Two commenters expressed approval of the proposed rule's acceptance of *ex post* monitoring.

Monitoring Overnight Exposure

Fourteen commenters urged the Board to clarify the requirements for monitoring overnight interbank transactions and to consider eliminating monitoring of these transactions. Four of these commenters stated that the likelihood of a bank failing solely on the basis of its overnight exposure is very remote, and two argued that market factors weed out weak correspondent banks. Five other commenters argued that the regulatory burden on small banks in monitoring and controlling overnight interbank transactions is unreasonable and costly, and could force small banks to transfer their business to Reserve Banks. Another commenter urged the exclusion of overnight federal funds sales from the exposure that must be monitored as long as the sales were made under a preauthorized line to an approved list of correspondents, on the grounds that it may be difficult to determine other exposure to a correspondent at the time of a federal funds transaction.

Monitoring Credit Exposure

Fifteen commenters addressed the issue of monitoring credit exposure. Five of these commenters urged that the proposed rule's acceptance of occasional or inadvertent excesses be maintained and broadened sufficiently that small banks with unexpected large deposits or late incoming wire transfers be permitted to adjust their balances within a day or two. Six commenters expressed concern that the guidelines would be viewed as rigid limits. Another commenter asserted that the proposed rule's acceptance of occasional excesses would be where the trouble spots would arise. Three other commenters requested clarification as to how often and under what circumstances a bank may exceed the guidelines. One commenter suggested that the final rule grant banks time to bring combined credit exposures due to mergers or other acquisitions into compliance with the benchmark guidelines.[9]

Monitoring Intraday Exposure

Eleven commenters urged the Board to eliminate any requirement for intraday monitoring. Three of these commenters stated that most banks, and especially smaller banks, would find it difficult or impossible to monitor and manage intraday exposure. Another commenter expressed concern that banks' attempts to limit intraday exposure by delaying settlements pending receipt of offsetting funds could lead to system gridlock. Two commenters argued that intraday exposure was similar to cash items in the process of collection and should be excluded from the rule. Four additional commenters sought clarification as to whether daylight overdrafts would be violations of the rule.

The Final Rule

The final rule allows a bank to adopt monitoring policies and procedures that are appropriate for the bank's particular situation. The final rule does not require the establishment of limits or monitoring for all sources of exposure to all correspondents. The final rule provides that, for the significant sources of exposure for which internal limits are required, a bank may either monitor exposure or structure transactions to

[9] Other comments on monitoring credit exposure are addressed in the discussion of the guidelines on credit exposure.

ensure that internal limits generally are not exceeded. A bank could accomplish this either by monitoring actual overall exposure, or by establishing individual lines for significant sources of exposure, such as federal funds sales, and establishing procedures to ensure that exposure generally remained within the established lines. A bank could also maintain limits on exposure by establishing limits with correspondents, such as for federal funds sold on an agency basis.

Under the final rule, banks are not expected to monitor exposure to correspondents on a real-time basis. Monitoring generally may be done retrospectively, and the required frequency depends on the extent to which exposure approaches the bank's internal limits, on the volatility of the exposure, and on the condition of the correspondent.

Although the purpose of requiring monitoring or structuring of transactions is to ensure that exposure generally remains within established limits, the final rule recognizes that occasional excesses may occur. The final rule provides that a bank should structure transactions or monitor exposure to a correspondent to ensure that exposure ordinarily does not exceed internal limits, except for occasional excesses resulting from factors such as unusual market disturbances, market movements favorable to the bank, operational problems, or increases in activity. Unusual late incoming wires or unusually large cash letters would be considered examples of the types of activities that could lead to excesses over internal limits that would not be considered impermissible under the final rule. The final rule requires the bank to establish appropriate procedures to address excesses over internal limits.

With respect to intraday monitoring, the Board recognizes that intraday exposure may be difficult for a bank to actively monitor and limit. Under the final rule, intraday exposure, like interday exposure, may be monitored retrospectively. Further, where the risk resulting from intraday exposure is low, taking into account the condition of the correspondent and the size of the exposure, specific limits and monitoring to those limits would not be required under the final rule.

Additionally, to ease monitoring in the case of mergers or acquisitions, the final rule excludes exposure resulting from the merger or acquisition of a bank from the calculation of "credit exposure," for the purposes of the limit on credit exposure for one year after the merger or acquisition.

Under the final rule, a bank's internal policies and procedures are required to limit credit exposure to a less than adequately capitalized correspondent to not more than 25 percent of the exposed bank's capital. Therefore, these monitoring requirements for exposure would also apply to monitoring credit exposure limits.

Section 206.4 Guidelines for Credit Exposure

The proposed rule provided that, in addition to the prudential limits on exposure established by a bank under § 206.3, a bank ordinarily would be expected to maintain credit exposure to an individual correspondent, as calculated under § 206.5, within certain guidelines or limits unless the exposure is to a commonly controlled insured depository institution, as provided in paragraph (b) of that section. The proposed guidelines or limits were structured as "benchmarks" that would be considered prudent outside limits on credit exposure and were not intended to endorse levels of credit exposure that otherwise would not be considered prudent based on the condition and operations of the correspondent. The Board received 112 comments addressing this section specifically.

Elimination of the Guidelines

Forty-three commenters, primarily large banks, opposed the requirement that banks adhere to these limits. Forty commenters argued that the Board should eliminate the guidelines, and three commenters urged that the guidelines be merged into the prudential standards to retain responsibility in management for the safe and sound management of exposure. One commenter proposed that where banks have appropriate internal prudential policies, they need not demonstrate that they are within the guidelines. Seven commenters argued that the proposed rule would require the creation of a comprehensive system to monitor credit exposure, as measured by the rule, simply to demonstrate that credit exposure is substantially within the guidelines. Ten other commenters argued that the benchmarks are crudely calibrated and that compliance with them would divert resources within banks away from activities designed to achieve real reductions in risks. Eight other commenters stated that the guidelines would create costly inefficiencies and reduce interbank liquidity, as banks would reduce exposure to an individual correspondent solely to avoid monitoring costs. One commenter contended that the guidelines would, in effect, penalize banks with existing internal controls. One commenter asserted that many banks lack the information technology that would permit on-line access to information on credit exposure to a specific correspondent, and that purchasing such a system would cost $1 million. Two commenters argued that it is impossible to monitor and therefor to limit global exposure daily.

The Level of the Guidelines

The board received fifty-seven comments concerning the amount of permissible exposure under the guidelines, two of which specifically endorsed the guidelines. Two commenters urged that banks in a bank holding company be permitted to aggregate their credit exposure to individual correspondents in measuring compliance with the guidelines. One commenter argued that the limits were too high and suggested that they not exceed the legal lending limits, which are themselves too high in the opinion of the commenter. The remainder of the commenters argued that the guidelines were too restrictive.

The commenters presented a number of arguments for relaxing the guidelines. Seventeen commenters noted that the benchmarks could force a bank to reduce its exposure to a well-managed, adequately capitalized correspondent while taking more exposure to other correspondents that the bank may not believe are as creditworthy. Eight commenters stated that small banks' federal funds sales can fluctuate dramatically, making continuous compliance costly and difficult. Six commenters expressed concern that cash letter fluctuations would make compliance with the guidelines difficult. Two commenters expressed concern that the guidelines would make it difficult to fund their correspondent to cover payments system transactions. One commenter argued that the guidelines would force inexperienced banks to engage in securities trading in order to avoid federal funds sales.

Sixty-two commenters emphasized the difficulty of diversifying correspondent business in order to comply with the guidelines. Fifty-nine of these commenters focused on the costs of establishing and maintaining additional correspondent relationships, and many argued that the expense of diversification exceeds the reduction in risk. Four commenters asserted that mergers and acquisitions have reduced the number of suitable correspondents. One commenter argued that larger correspondents were not interested in providing services to smaller banks.

Five correspondents argued that concentrating correspondent business is beneficial because a close relationship covering multiple services is important and brings such benefits as preferred customer status. One commenter argued that only by concentrating its correspondent business can a small bank engage in a broad range of transactions, such as settling trades in Treasury bills in an amount large enough to obtain the maximum yield. Six other commenters argued that concentrating correspondent business may reduce systemic risk by facilitating closer monitoring.

Eight commenters contended that reducing exposure by selling federal funds through an agent is more expensive. Four commenters asserted that reducing exposure by shifting from compensating balances to fees reduces profitability because compensating balances often provide a higher return than short-term investments. Another commenter argued that fees created a risk to the correspondent of nonpayment.

Three commenters proposed modifications to the guidelines. One urged an exemption for well-managed banks and two others suggested that the tiers be altered to permit a minimum percentage or dollar amount of acceptable exposure without regard to capitalization.

The Final Rule

The final rule places greater emphasis on analysis of the creditworthiness of correspondents and decreases the emphasis on across-the-board limits. The limit on credit exposure to adequately capitalized correspondents has been eliminated. The limit on credit exposure to correspondents that a bank cannot demonstrate are at least adequately capitalized remains, however. The Board believes that the elimination of the limit for adequately capitalized correspondents will significantly reduce the problems associated with the limits. Because fewer correspondents would be subject to the limits, monitoring to ensure compliance should be less costly. Additionally, because the remaining limit on credit exposure would be implemented as part of the bank's normal policies and procedures, the final rule permits a bank to choose to implement the limit through structuring of relationships or monitoring.

Section 206.4(a)(1) Well-Capitalized Correspondents [Final Rule—Included With Adequately Capitalized Correspondents Under Section 206.4(a)(1)]

The proposed rule stated that, except as otherwise provided in § 206.3, a bank need not limit its credit exposure to a correspondent that the bank can demonstrate is well capitalized, as defined in § 206.6 of the proposed rule. The Board received three comments on this section, two of which strongly endorsed the rule as written.

One commenter expressed concern that regulators will restrict respondent's discretion in creating exposure to well-capitalized banks and that respondents, fearing that, will themselves restrict their exposure, reducing liquidity and fragmenting correspondent relationships. The final rule continues to provide that, while prudential limits to well-capitalized correspondents may be appropriate, these limits are not bounded by an express limit in the rule.

Section 206.4(a)(2) Adequately Capitalized Correspondents [Final Rule—Included in Section 206.4(a)(1)]

The proposed rule provided that a bank ordinarily should limit its daily interday credit exposure to a correspondent that the bank can demonstrate is adequately capitalized, as defined in § 206.6 of the proposed rule, to an amount equal to not more than 50 percent of the bank's total capital. The proposed rule also provided that, for such a correspondent, the bank ordinarily should limit its daily inter-day credit exposure with a remaining term to maturity of more than thirty days to an amount equal to not more than 25 percent of the bank's total capital. Twenty-three commenters specifically addressed this section.

Elimination of Limit

Eighteen commenters suggested that the final rule eliminate the distinction between adequately and well-capitalized correspondents altogether.

A number of banks argued that this provision would have an adverse effect on adequately capitalized banks or that the difference between adequately and well-capitalized banks was not meaningful. One commenter argued that the rule would interfere with an adequately capitalized bank's ability to compete in international funding markets. Three commenters pointed out that, although the difference between a well-capitalized bank and an adequately capitalized bank is insignificant at the margin, the rule imposes a significant monitoring burden on respondents dealing with an adequately capitalized correspondent. Two other commenters asserted that the burden of complying with the rule would lead respondents to cease to do business with adequately capitalized banks. Three commenters argued that it would be very difficult for banks to regain market share if they drop, even temporarily, from well to adequately capitalized. Two commenters suggested that the rule may exacerbate systemic risk by restricting credit to a bank when that bank's capital declines by an arbitrary amount.

Two commenters complained that, in effect, the rule would force banks to restrict their exposure to transactions with maturities shorter than 30 days, leading banks to concentrate bank funding in shorter maturities, rather than balancing short- and long-term exposure. These commenters also argued that the rule would force banks to buy securities, reducing liquidity and exacerbating the credit crunch. In addition, two commenters expressed concern that misunderstanding of the purpose of the capital classifications could lead to a retreat from institutions that do not pose a risk to the banking system or to their customers, but that do not meet the standards to be considered "well capitalized."

Proposed Changes

Six commenters proposed changes to the guidelines concerning adequately capitalized banks. Two commenters suggested that the 25 percent limit only apply to exposures with a maturity of over 90 days. One suggested that the only restriction on banks dealing with adequately capitalized correspondents be a limit of 50 percent of capital on exposure with maturities of 90 days or more. Two other commenters suggested that the exposure limit be increased to 100 percent of capital with a 50 percent limit for 30 day maturities. Conversely, one commenter suggested that the Board eliminate limits on credit exposure with maturities longer than 30 days, asserting that tracking exposure by maturity is expensive, especially for small banks, and that as a result banks will eliminate exposure to adequately capitalized banks.

The Final Rule

The final rule does not include a regulatory limit on credit exposure to adequately capitalized institutions. The Board believes that this change will reduce monitoring costs and avoid unwarranted reductions in the business of adequately capitalized banks due to the implementation of section 308. Elimination of this limit also reflects the difficulty in setting an appropriate

exposure limit that reflects the actual credit and liquidity effects of a correspondent's failure in light of prompt partial payment by the FDIC.

Further, the proposed limit on credit exposure for adequately capitalized correspondents served largely as a transition from the unrestricted credit exposure permitted for well-capitalized correspondents to the 25 percent limit for less than adequately capitalized correspondents. The prudential standards of the proposed final rule have been modified to address this issue more directly by emphasizing analysis of the creditworthiness of a correspondent and requiring a bank to take into account any deterioration in the financial condition of its correspondent.

Finally, credit exposure in excess of 25 percent of the bank's total capital would not be "grandfathered" under the proposed final rule, thus encouraging a bank with significant credit exposure to a correspondent that is in danger of slipping below adequately capitalized to limit the maturity of any credit exposure in excess of the 25 percent guideline.

The final rule also reduces the need for a rapid reduction in exposure to a correspondent that has slipped below adequately capitalized by extending the transition provision to 120 days, allowing the bank more time to evaluate exposure and restructure activities.

Section 206.4(a)(3) Other Correspondents [Final Rule—Incorporated in Section 206.4(a)(1)]

The proposed rule provided that a bank ordinarily should limit its daily interday credit exposure to a correspondent that the bank cannot demonstrate is well or adequately capitalized to an amount equal to not more than 25 percent of the bank's total capital. The Board received nine comments on this section, one of which supported the regulation as written.

Three commenters proposed that the rule increase permissible exposure to 50 percent of capital. One of these commenters suggested that this increase be contingent upon the respondent conducting due diligence quarterly. Another commenter argued that restricting exposure to less than adequately capitalized banks would increase the likelihood of their failure. Three commenters suggested that the final rule be more stringent. Two suggested that the rule prohibit any uninsured exposure to a significantly or critically undercapitalized correspondent, and the other suggested that the rule prevent significantly undercapitalized banks from purchasing federal funds or certificates of deposit with maturities over seven days. Finally, one commenter questioned why the proposed rule did not distinguish between undercapitalized, significantly undercapitalized, and critically undercapitalized banks.

As discussed above, the limit on credit exposure to correspondents that a bank cannot demonstrate are at least adequately capitalized has been retained in the final rule. Greater credit exposure to such correspondents would generally create undue risk to banks. However, the Board does not believe that additional guidelines to address more significantly impaired correspondents are warranted. Banks' prudential policies and procedures should address exposure to particularly troubled correspondents.

Section 206.4(b) Commonly Controlled Insured Depository Institutions [Final Rule—Section 206.2(b) and (c)]

The proposed rule provided that, except for the general prudential standards in § 206.3, a bank need not limit its credit exposure to a correspondent that is commonly controlled with the bank and for which the bank is subject to liability under section 5(e) of the Federal Deposit Insurance Act.

The proposed rule defined a correspondent as commonly controlled with the bank if 25 percent or more of any class of voting securities of the bank and the correspondent were owned, directly or indirectly, by the same depository institution or company; or, either the bank or the correspondent owns 25 percent or more of any class of voting securities of the other. Exposure to a commonly controlled depository institution was excluded from the limits on credit exposure because there is no effective way for an insured bank to limit its credit exposure to an FDIC-insured depository institution that is commonly controlled with the bank. The cross-guarantee provisions of the Federal Deposit Insurance Act make an insured depository institution potentially liable to the FDIC for losses resulting from the failure of a commonly controlled insured depository institution. The Board received fourteen comments on this section, three of which supported the section as written.

Substantive Comments

Eleven commenters criticized the exemption for commonly controlled institutions. Eight of them, submitting a substantially similar letter, argued that this provision would permit big banks to evade the purpose of the statute by shifting funds among commonly controlled institutions. Another commenter argued that depositor risk is measured by institutions and that risk to the deposit insurance system is not reduced because of bank consolidation. The commenter questioned whether the rule reflects a regulatory bias towards consolidation. In contrast, two other commenters argued that the Board should exclude inter-affiliate transactions from the rule entirely.

The provisions of the proposed rule reflected the authority of the FDIC to invoke cross-guarantees and thereby override any efforts of a bank to limit exposure to a commonly controlled correspondent, as well as current inter-affiliate funding arrangements within bank holding companies. Because of the cross-guarantees, disruption of these arrangements would not yield a commensurate reduction in risk to the FDIC insurance funds or to the banking system. The Board believes that exposure to commonly controlled correspondents should not be covered by either the limits on credit exposure or the prudential standards provisions of the final rule, as a bank cannot effectively limit its exposure to such correspondents under either provision. However, the Board notes that section 23A(a)(4) of the Federal Reserve Act would continue to apply to transactions with affiliates, including commonly controlled insured depository institutions.

One commenter suggested that the exclusion apply to banks that own shares in bankers' banks. The Board does not believe that it is appropriate to apply the exclusion to owners of a bankers' bank because the failure of the bankers' bank would not subject the owners to the cross-guarantee provisions of section 5(e) of the Federal Deposit Insurance Act.

Drafting

Two commenters suggested that the exception include banks subject to the provisions of section 23A of the Holding Company Act. This portion of the rule reflects those banks subject to the cross-guarantee provisions, which will cover virtually all those covered by section 23A.

This provision has been retained in the final rule but has been moved to the definitions section with conforming drafting changes.

Section 206.4(c) Exposure of Subsidiaries [Final Rule—Section 206.4(e)]

The proposed rule provided that, in calculating credit exposure to a correspondent under this part, a bank must include the credit exposure of the bank's subsidiaries to the

correspondent. If the bank did not own 100 percent of the shares of the subsidiary, the proposed rule required the bank's credit exposure to include a *pro rata* portion of the subsidiary's exposure, based on the percentage ownership of the bank in the subsidiary. The purpose of this section was to capture the full exposure of a bank to a correspondent. The Board received five comments on this section.

Four commenters argued for restricting the scope of the regulation to subsidiaries of which the bank owns a majority of the voting stock. Two commenters argued that where a bank owns only a minority position, it may be unable to obtain daily exposure figures. Three commenters stated that the parent bank is unlikely to have consolidated systems for calculating exposure for minority-owned subsidiaries, and one noted that the percentage ownership may not justify the expense to the subsidiary of establishing an information reporting system for the shareholder bank. One of the commenters argued a bank cannot cause a subsidiary that the bank does not control to reduce its exposure, and the bank therefore could ensure compliance with the limits only by selling its interest in the subsidiary or by reducing its own exposure to the counterparty. Finally, three commenters argued that where the subsidiary is not included in the bank's consolidated financial statements, but is only reported as an investment, the parent's exposure is not the subsidiary's exposure but is limited to the bank's investment.

One commenter queried how the *pro rata* portion should be determined if a bank holds different classes of stock in the subsidiary. This commenter suggested that the provision only apply to banks holding common stock because the same credit exposure does not exist if the bank holds preferred stock, and proposed that where a bank holds a different class of stock, it should be permitted to use any reasonable method to calculate exposure.

In formulating the proposed rule, the Board noted that banks may assume obligations to support a subsidiary beyond their actual investment. However, the Board has modified the final rule to require a bank to include with the bank's own credit exposure 100 percent of the credit exposure of any subsidiary that the bank is required to consolidate on its Report of Condition and Income or Thrift Financial Report. This provision generally captures the credit exposure of any majority-owned subsidiary of the bank. Under the final rule, therefore, none of a minority-owned subsidiary's exposure and all of a majority-owned subsidiary's exposure would be included in the parent bank's exposure calculation.

Section 206.4(d) Transition Provisions [Final Rule—Section 206.4(a)(2)]

The proposed rule required that, where a bank is no longer able to demonstrate that a correspondent is adequately capitalized or well capitalized for the purposes of § 206.4(a)(1) or (2), including where the bank cannot obtain adequate information concerning the capital ratios of the correspondent, the bank should reduce its credit exposure to the appropriate level under § 206.4(a) within 30 days after the date when current call report or other relevant financial data normally would be available. The Board received forty-seven comments on this section.

Extension of the Transition Period

Forty-five commenters expressed concern about the increase in monitoring requirements when a correspondent drops from well to adequately capitalized, the competitive impact on the correspondent, and compliance burdens. These commenters urged the Board to avoid overreaction to temporary dips in capital and to extend the transition period. Thirty of these commenters, submitting a substantially similar letter, proposed that banks be given one year to resume well-capitalized status. Eight commenters recommended transition periods ranging from 90 to 120 days. Four commenters noted that a variety of factors, such as regulatory changes, increases in reserves, asset revaluation, or acquisitions, could cause a bank's capitalization ratio to change abruptly without necessarily signifying significantly increased risk. Another commenter argued that the proposed rule, as written, would require a swift, abrupt adjustment to temporary swings in capital, resulting in a market bias for banks with capital less subject to fluctuations. Five commenters argued that where the credit exposure consists of off-balance sheet items or instruments with maturities of longer than 30 days, judicious reductions in credit exposure may not be possible within the rule's time frame. Three others stated that delays in financial reporting, especially where the respondent relies on a reporting service, may make compliance with the transition provisions extremely difficult.

One commenter inquired whether a respondent must adjust its exposure if the correspondent provides assurances that it will reacquire its former status within the next reporting period.

The Board believes that a longer transition period of at least a calendar quarter will avoid undue disruptions in correspondent relationship for temporary declines in capital ratios by allowing the correspondent an opportunity to bring its capital ratios back the relevant levels before the next quarterly report. The extended period will also provide the exposed bank more time to implement any monitoring required to demonstrate compliance with the regulatory limit and to adjust the maturities or level of exposure to the correspondent. Accordingly, the final rule would permit a bank 120 days to reduce its credit exposure to a correspondent.

If a bank has been relying on information from call reports or from a bank rating service for a correspondent's capital ratios, the 120-day period would run from the date when the call report or bank rating reflecting the correspondent's reduced capital ratios was received, or from the date that the information normally would be received. If a bank has been relying on information received from the correspondent to demonstrate that the correspondent is at least adequately capitalized, and the correspondent is no longer providing such information, the 120-day period would run from the date when the bank ordinarily would have received the information from the correspondent.

Section 206.5 Credit Exposure [Final Rule Consolidated in Section 206.4]

Section 206.5(a) Scope of Credit Exposure [Final Rule—Section 206.4(b)]

The proposed rule defined the credit exposure of a bank to a correspondent as the bank's assets and off-balance sheet items that are subject to capital requirements under the capital adequacy guidelines of the bank's primary federal supervisor and that involve claims on the correspondent. The proposed rule excluded certain relatively lower-risk items. In addition, for the purposes of this section, the rule provided that off-balance sheet items were to be valued on the basis of current exposure. Under the proposed rule, "credit exposure" was subject to the numerical benchmark guidelines or limits. In addition to the comments concerning the definition of exposure, addressed in § 206.2(c) above, the Board received ten comments on the definition of credit exposure.

One commenter noted that credit exposure is difficult to measure and criticized the proposed rule's emphasis on it. The proposed final rule deemphasizes credit exposure by

eliminating the regulatory limit on credit exposure to adequately capitalized correspondents. While most of the commenters addressed the specific exclusions from the calculation of credit exposure, one commenter expressed concern about the inclusion of derivative instruments, such as swaps, in the calculation of interbank exposures, especially in light of the fact that non-bank correspondents or parties to derivative instruments are excluded. This commenter argued that the rule would drive the derivative business to non-bank counter-parties, weakening the safety protocols introduced into the swaps and other derivative markets as a result of bank participation in the markets. The Board believes that banks should have similar controls on credit exposure to nonbanks as on credit exposure to banks. However, exposure to nonbanks was not addressed by the statute. Further, the Board believes that it is not appropriate to exclude credit exposure from derivative instruments from the rule, as it represents a significant source of interbank exposure in many cases.

One commenter argued that depository institution equity securities taken as collateral or in satisfaction of a debt should be excluded from the definition of "credit exposure" because these instruments are not payment obligations. Such transactions give rise to a risk of loss if the correspondent fails, and therefore are covered by the definition of "credit exposure." In some circumstances, however, obligations collateralized by bank stock may qualify for exclusion under 206.4(d)(3) of the final rule. The definition in the final rule has been redrafted to clarify that capital instruments issued by the correspondent are included in the definition of "credit exposure."

Another commenter asked if the calculation of "current replacement value" for interest rate and foreign exchange contracts means that banks must make daily mark-to-market calculations on a counterparty by counterparty basis. The rule provides that monitoring must be on a mark-to-market basis. However, the marking need only be done at the appropriate monitoring intervals, which depend on the factors listed in the revised monitoring provision discussed above, not daily. One commenter stated that it has a sophisticated system which measures fractional rather than mark-to-market exposure, and inquired whether it may use its own system rather than the proposed rules. As noted above in the discussion of monitoring, alternative systems may be used where they will effectively maintain exposure within the prescribed limits.

Six commenters urged that settlement exposure be specifically excluded for the sake of clarity. Two commenters urged that intraday exposure be specifically excluded. One commenter suggested that intraday exposure be defined as exposure of less than 24 hours.

The proposed final rule has been redrafted for greater clarity, specifying that intraday or settlement exposure and agented funds are not included in "credit exposure."

Section 206.5(b) Netting [Final Rule—Section 206.4(c)]

The proposed rule provided that transactions covered by netting agreements that are valid and enforceable under all applicable laws may be netted in calculating exposure. The Board received two comments on this section.

One commenter urged the Board to permit mutual correspondents to deduct the reciprocal "due from" balances from exposure limits because they reduce exposure risk. Another commenter requested that the Board clarify the requirements that a bank "must have reasoned legal opinions" that netting contracts are valid and enforceable.

Under the final rule, the netting provision remains unchanged. Reciprocal "due from" balances that do not result in legally binding netting do not reduce credit risk to the same extent as legally binding netting. Reasoned legal opinions that netting contracts are valid would include opinions of counsel describing the legal reasoning that led to the conclusions expressed in the opinions.

Section 206.5(c) Exclusions [Final Rule—Section 206.4(d)]

The proposed rule established four exclusions to the scope of credit exposure.

Section 206.5(c)(1) Secured Transactions [Final Rule—Section 206.4(d)(1)]

The first exclusion involved transations, including reverse repurchase agreements, that are fully secured by government securities or readily marketable collateral having a current market value equal to 100 percent of the credit exposure under the transaction. For the purpose of this exclusion, "government securities" were defined as obligations of, or obligations fully guaranteed as to principal and interest by, the United States government or any department, agency, bureau, board, commission, or establishment of the United States, or any corporation wholly owned directly or indirectly by the United States. "Readily marketable collateral" means financial instruments or bullion that may be sold in ordinary circumstances with reasonable promptness at a fair market value determined by quotations based on actual transactions on an auction or a similarly available daily bid- and ask-price market. Both of these definitions were taken from the Office of the Comptroller of the Currency's lending limits on national banks. The Board received six comments on this section.

Two commenters suggested that this exception cover transactions to the extent that they are secured. The final rule has been redrafted to exclude transactions to the extent that they are secured.

Two other commenters suggested that the definition of government securities include those backed by the full faith and credit of a state government as well. The definition of government securities has not been changed, but the Board believes that most state securities would be covered by the definition of "readily marketable collateral." Transactions secured by these securities, therefore, would be excluded from credit exposure.

One commenter asked if letters of credit guaranteed by the Export-Import Bank of the United States would be considered government securities. The Board notes that, regardless of whether guaranteed letters of credit would be considered to be government securities, such transactions generally would qualify for exclusion from the calculation of credit exposure provided under § 206.4(d)(3) of the final rule (see discussion under "Quality assets").

Another commenter expressed concern that the exclusion for transactions secured by government-backed securities would lead to increased investment in government securities and decreased loans. The Board recognizes that the rule could encourage investment in government securities, but investment in government securities reflects lower credit risk than many other transactions and is consistent with the capital guidelines.

Section 206.5(c)(2) Cash Items in the Process of Collection (CIPC) [Final Rule—Section 206.4(d)(2)]

The second exclusion from the calculation of credit exposure covered the proceeds of checks and other cash items deposited in an account at a correspondent that are not yet available for withdrawal. The Board received nine

comments on this section, three of which supported the section as written.

Three commenters expressed concern about the rule's treatment of when a cash item becomes exposure. One asked if "due from" balances should be measured by the actual available balance as reported by the bank on its internal ledger balance. The final rule requires that such balances be measured by the actual available balance. Two trade associations commenting on the rule stated that current correspondent practice is to make funds available as early in the day as possible, causing respondents under the proposed rule to incur a measurable exposure for a longer period of time and perhaps before collection of the underlying item has actually taken place. The Board notes that the valuation of cash items in the process of collection that would not be considered to be deposits by the FDIC, acting as receiver of a failed bank, can only be made after the fact. The Board believes, however, that the proposed standard best approximates this value and has retained it in the final rule.

Clarification

Six commenters asked what comparable items are included in "checks and other cash items." One commenter specifically suggested that credit card and debit card transaction be covered by the exclusion. Two commenters urged that it exclude all cash items, since the associated risk tends to be relatively short in duration. While cash items that are not treated as "agency" transactions by the FDIC clearly result in credit risk and should be included in credit exposure, the Board believes that it is appropriate to exclude from credit exposure any item that the FDIC treats as being collected in an agency capacity rather than as a deposit or claim. The Board does not believe, however, that the FDIC has addressed whether the credit and debit card transactions are collected in an agency capacity.

Miscellaneous

One commenter asked if the Board would provide systems support in accounting for settlement exposure and cash items in the process of collection. The Board believes that this support is better provided by the market, and that correspondents may provide such support.

This exclusion remains unchanged in the final rule.

Section 206.5(c)(3) Quality Assets [Final Rule—Section 206.4(d)(3)]

The third exclusion covered "quality assets" on which the correspondent is secondarily liable or that result in secondary exposure to the correspondent, including loans to third parties secured by stock or debt obligations of the correspondent, loans to third parties purchased from the correspondent with recourse, and loans or obligations of third parties backed by stand-by letters of credit issued by the correspondent. The Board received three comments on this section.

One commenter expressed concern that the definition of "quality asset" raises the possibility that a loan secured by the stock of a correspondent may lose its status and be counted as exposure, discouraging such loans. Another commenter suggested that the rule give an exposed bank at least 30 days to adjust to a decline in the quality of a quality asset. The third commenter argued that credit exposure backed by a quality asset, such as a letter of credit, should be excluded from the definition of credit exposure.

In the final rule the exclusion for quality assets has been broadened to include direct exposure to a correspondent that is backed by a creditworthy obligor as well as a correspondent's secondary exposure on a quality asset. Additionally, under the final rule, the potential for excesses in exposure is recognized and a bank is required to have appropriate procedures to deal with such excesses.

Section 206.5(c)(4) FDIC-Insured Amounts [Final Rule—Section 206.4(d)(5)]

No comments were received on this section and it remains unchanged in the final rule.

Mergers and Acquisitions [Final Rule—Section 206.4(d)(4)]

As noted above, one commenter suggested that banks be given time after a merger to bring exposure within the guidelines for credit exposure. The final rule excludes exposure that results from a merger or acquisition of a bank from the definition of "credit exposure" for one year after the merger or acquisition. This exclusion gives banks one year to merge their systems for monitoring credit exposure.

Section 206.6 Capital Levels of Correspondents [Final Rule—Section 206.5]

The proposed rule provided that, for the purpose of compliance with the credit exposure guidelines, a correspondent would be considered "well capitalized" if the correspondent has a total risk-based capital ratio of 10.0 percent or greater, a Tier 1 risk-based capital ratio of 6.0 percent or greater, and a leverage ratio of 5.0 percent or greater. A correspondent would be considered "adequately capitalized" if the correspondent has a total risk-based capital ratio of 8.0 percent or greater, a Tier 1 risk-based capital ratio of 4.0 percent or greater, and a leverage ratio of 4.0 percent or greater. As used in the proposed rule, the terms "well capitalized" and "adequately capitalized" were similar but not identical to the definition of those terms as used for the purposes of the prompt corrective action standards under section 38 of the Federal Deposit Insurance Act (12 U.S.C. 1831o) ("prompt corrective action standards"). The proposed rule further provided that a correspondent that is a foreign bank may be considered "well capitalized" or "adequately capitalized" under this section without regard to the minimum leverage ratios required under subparagraphs (a)(1)(iii) and (a)(2)(iii) of this section of the proposed rule. The Board received 137 comments on this section.

Criticism of the Emphasis on Capital

Sixteen commenters disagreed with the Board's approach to structuring the limits on credit exposure. Ten commenters argued that the proposed rule overemphasized capital relative to other creditworthiness indicators such as liquidity, asset quality, earnings strength, regional and product line portfolio diversity, and operating environment. These commenters expressed concern that the proposed rule could encourage banks to focus on capitalization rather than on their own, broader based, prudential systems for analyzing correspondent credit or on the efficiency or competitiveness of the correspondent's payments and processing systems. In addition, seven commenters questioned the value of capital as an indicator of strength. One commenter pointed out that risk-based capital provides a numerical assessment of subjective risks. Another commenter asserted that capital levels measured on a daily or quarterly basis are notoriously inaccurate. A third commenter argued that the limits on credit exposure should be based on the book value rather than on the market value of a correspondent's assets. A bank holding company argued that inadequate loan loss provisions can lead to a misrepresentation of a bank's actual strength. Two commenters suggested that if the proposed rule is seeking an objective measure it should select one which is easy to measure and not subject to frequent fluctuations. One commenter suggested that, as an alternative, the guidelines be based on

the financial markets. In contrast, two commenters pointed out that the advantage of using capital is that it will encourage large banks that are not well capitalized to strengthen their capital position in order to maintain their interbank business. The final rule has been amended to de-emphasize the capital of correspondents by removing the limit on credit exposure to adequately capitalized correspondents.

Monitoring Capital of Domestic Banks

Sixteen commenters argued that gathering and analyzing data to the extent required by the rule is extremely difficult and unfairly burdensome, and that small banks lack the technical capacity and resources to conduct this analysis. Eight commenters objected to the cost of monitoring capital. Another commenter claimed that large banks may resist giving capitalization information to smaller banks seeking to initiate a correspondent relationship. Moreover, this commenter pointed out that prompt corrective action rules forbid advertizing capital levels. One commenter argued that without access to its correspondent's examination report, it would be unable to determine if the correspondent was adequately capitalized. Four commenters noted that CAMEL ratings are confidential.

Nineteen commenters suggested that regulatory agencies publish capitalization ratings, lists of well and adequately capitalized correspondents, or exposure limits for particular correspondents, domestic and foreign. These commenters justified the request by arguing that regulatory agencies have access to the information and have the capacity to make a more complete evaluation of safety and soundness. One commenter urged that the regulatory authorities release the data they have available. Five others urged that call reports or financial reports be altered to require banks to disclose capital adequacy.

Four commenters expressed concern that small banks will be unable to analyze capitalization information from a call report due to the length and complexity of the document. Four commenters urged that where federal funds are sold on an agency basis, the respondent should be able to rely on the capitalization information supplied by the agent. One commenter expressed concern that although the regulation only required a ratio analysis, respondents will ask for quarterly call reports. Moreover, seven commenters complained of the cost of disseminating this information. One of these commenters, for example, noted that it has 110 respondents to distribute the report to. Two other commenters expressed concern that the compliance burden would increase the advantage enjoyed by other financial service providers. One commenter proposed that the Board draft a model form with only the essential information necessary to comply with the rule.

Eight commenters urged the Board to shift the burden from respondents to correspondents. Two commenters proposed that the rule require correspondents to prepare uniform disclosure reports and to disclose promptly any deterioration in capitalization. Two other commenters urged that the rule permit respondents to base their credit assessment on a correspondent's self-assessment of its capital adequacy classification together with any supporting information it may provide. Twenty commenters, nineteen of whom submitted a substantially similar letter, urged the Board to permit respondents to rely on a correspondent's annual documentation of its capital levels. Thirty-four commenters suggested that quarterly submissions satisfy the requirement. One commenter urged the Board to inform correspondents that the financial information provided to other banks is subject to review by examiners and should be consistent with the information provided to regulators.

The Board recognizes that it is currently difficult to obtain information on the risk-based capital levels of a correspondent. Under the final rule, this task is somewhat simplified, as a bank will be required to demonstrate only that its correspondent's capital ratios qualify it as at least adequately capitalized. While the call report for correspondents that are not required to file a complete Schedule RC–R currently does not provide sufficient information to calculate a correspondent's precise capital ratios, it can be relied on to demonstrate that a correspondent is at least adequately capitalized.[10] Further, the Board anticipates that most banks will receive information on their correspondent's capital ratios either directly from the correspondents or from a bank rating agency. Finally, the Board notes that the standard used in the rule is based solely on capital ratios and does not require disclosure of CAMEL ratings.

Five commenters asked for clarification of permissible sources for capitalization information. One claimed that the most accurate information is informal information and sought acknowledgement of the validity of it as a source. Another suggested that the rule explicitly permit banks to rely on call reports in determining capitalization. Two commenters requested that banks be permitted to rely on call reports alone. Three commenters asked the Board to describe a publicly available information base. The final rule does not limit a bank to a single source of information for capital ratios, but indicates that a bank may rely on capital information obtained from a correspondent, bank rating agency, or other reliable source of information. The bank may also rely on information contained in the call report for this purpose. While the Board recognizes that informal information may be useful in evaluating the overall condition of a correspondent, such information is not sufficient to justify the higher levels of credit exposure permitted to adequately or well-capitalized correspondents under the rule. As stated in the summary of the final rule, the rule does not limit a bank to the use of publicly available information, but merely provides that a bank generally is not required to obtain non-public information.

Application of the Provision to Foreign Banks

Thirteen commenters expressed concern about the difficulty and cost of monitoring capital levels of foreign banks. One commenter noted that disclosure of capital information varies widely among foreign banks and another noted that information is difficult to obtain from the institution or from secondary sources. One requested that G–10 banks be required to provide uniform information. Two other commenters suggested that additional flexibility be granted to U.S. banks which deal with non-Basle banks because of the added difficulty in obtaining capital information. Two commenters requested that the Board develop a method to determine the capital levels of foreign correspondents.

One commenter proposed that the rule permit respondents to rely on annual data if that is the best available. Another commenter argued that it is inequitable to require quarterly analysis of the capital of U.S. banks while permitting banks to analyze the

[10] Banks with assets of $1 billion or less generally are required to complete only Part I of the Schedule, which provides a rough estimate of risk-based capital. A bank may assume that its correspondent is at least adequately capitalized if the correspondent has completed only Part I of Schedule RC–R. For correspondents that file a complete Schedule RC–R, the call report does include sufficient information to calculate a correspondent's risk-based capital. The Board expects that further information to facilitate this calculation will be made available prior to the implementation of the regulatory limit on credit exposure to less than adequately capitalized correspondents.

capitalization of foreign banks semi-annually because information on foreign banks is unavailable on a more frequent basis. A third commenter proposed that if information is not available at least semi-annually, exposure to foreign banks should be restricted to 25 percent.

As in the proposed rule, the final rule permits a foreign correspondent to be considered "adequately capitalized" without regard to the level of the foreign bank's leverage ratio. As indicated in the supplementary information to the proposed rule, the Board believes that this treatment of foreign banks is consistent with the findings of the Capital Equivalency Report submitted by the Board and the Department of Treasury to Congress earlier this year.

The Board recognizes that public sources of information on risk-based capital ratios may not be available for many foreign bank correspondents. As with domestic correspondents, however, the Board anticipates that in most instances the correspondent will provide the information to the banks with which it does business. As foreign banks do not necessarily prepare financial statements on a quarterly basis, as domestic banks do, the final rule would permit a bank to rely on the foreign bank correspondent's most recent financial statements.

Clarification of the Provision

Eight commenters quoted the supplementary information to the proposed rule, which stated that banks should not rely on capitalization alone and that weakness in a correspondent's management, operations, or loan portfolio might lead a bank to restrict its exposure below the permissible limits on credit exposure. These commenters pointed out that these terms are subjective and that their interpretation by the various federal bank regulators may lead to substantial and unevenly enforced compliance burdens. Two of these commenters added that it may be prohibitively expensive to judge any potential "weakness" in a correspondent and, as a result, respondents may shift their correspondent activities to the public sector. One commenter suggested that to facilitate compliance, the final rule eliminate references which cut back on what is permissible under the guidelines and leave other considerations for the prudential analysis section.

The Board continues to believe that the remaining limit on credit exposure should be viewed as a maximum level for credit exposure rather than a safe harbor. To the extent that a bank's prudential policies and procedures suggest a lower level of credit exposure to a correspondent, the bank should adhere to the lower level.

Frequency of Monitoring

Twenty-six commenters sought clarification of the frequency with which capital must be monitored and the way it must be measured. Two commenters suggested that quarterly monitoring is too frequent and another proposed that capital be monitored annually. Twenty-three commenters, nineteen of whom submitted a substantially similar letter, urged that capital be measured over a period of time, rather than at a point in time. Three commenters urged that the capitalization of a correspondent in a multibank holding company be based on the capital of the bank holding company.

Under the final rule for domestic correspondents, capital should be monitored quarterly to pick up information based on the correspondent's most recent call report, financial statement, or bank rating report. For foreign bank correspondents, monitoring frequency should be related to the frequency with which financial statements or other regular reports are available. Although such information is available quarterly for some foreign banks, for many foreign banks financial statements generally will be available only on a semi-annual basis. Further, quarterly monitoring of capital is only required for correspondents to which a bank's potential credit exposure is more than 25 percent of its own capital. If the internal systems of a bank ordinarily limit credit exposure to a correspondent to less than 25 percent of the exposed bank's capital, no monitoring of the correspondent's capital would be necessary, although periodic reviews of the correspondent's financial condition may be required under § 206.3(a)(2) if exposure to the correspondent is significant.

Six commenters expressed concerns about the timeliness of the required information. Three noted substantial delays before generally published reports become available and another noted that this information is more expensive if it is obtained before it is commercially available. Two commenters requested guidelines on the requisite freshness of this data. Because information in risk-based capital ratios is generally based on the call report, a bank would be justified in relying on the most recently available reports based on call report data. While there may be a significant lag in such data, the Board believes that where the information in such reports is followed by the bank on a continuing basis, the reports remain a useful monitor of trends in the conditions of the correspondent.

Definition of "Adequately Capitalized"

Several commenters criticized the definition of "adequately capitalized." One suggested that the definition include all banks with a leverage ratio of 4 percent or greater and a total risk based capital ratio in excess of 8 percent. One suggested it include all banks with a tier 1 ratio of at least 5 percent. Another argued that the definition of adequately capitalized is unjustifiably more restrictive than the definition in the prompt corrective action standards and suggested that the definition include correspondents with a capital ratio of 3 percent and a 1 CAMEL rating. While acknowledging that a bank cannot disclose its CAMEL rating, the commenter suggested that it could disclose if it is adequately capitalized under this standard. Another bank suggested that the leverage ratio be excluded because it is not applied to foreign banks. Commenters also addressed the definition of "well capitalized," which has been deleted. One commenter suggested that the rule be written to state clearly the capital requirements imposed upon correspondents. Another commenter supported the capital definitions.

The definition of adequately capitalized in the proposed rule was based on, but not identical to, the definition used for prompt corrective action. The difference between the definitions is to enable banks to determine, from publicly available information, a correspondent's capital for the purpose of this rule. The Board believes that it would be confusing to make further changes in this rule's definition of "adequately capitalized" and the definition in the final rule remains unchanged.

Section 206.7 Waiver [Final Rule—Section 206.6]

The proposed rule provided that the Board may waive the application of § 206.4(a) to a bank if the primary federal supervisor of the bank advises the Board that the bank is not reasonably able to obtain necessary services, including payment-related services and placement of funds, without incurring exposure to a correspondent in excess of otherwise applicable limits. The Board received three comments on this section.

Two commenters suggested that if the guidelines are not relaxed, small rural banks with seasonal cash flows should receive waivers. As noted above, the

proposed final rule would eliminate the regulatory limit on credit exposure for adequately capitalized banks, substantially easing this constraint. To the extent that seasonal cash flows require rural banks to sell federal funds or engage in other transactions in excess of 25 percent of their capital, the Board believes that they should deal with banks that are adequately capitalized or better or diversify their credit exposure.

Another commenter suggested that the Board use its waiver authority liberally when the exposure is of a length or a type that extrication within 30 days is quite difficult. The Board does not believe that this use of the waiver authority is appropriate. The waiver is designed for low capital banks that need payment services and would not be able to obtain them otherwise. Rather than liberalize the waiver provisions, the Board has extended to 120 days the transition period for compliance with the limit on credit exposure to a correspondent that is less than adequately capitalized. This extension should permit banks to reduce exposure judiciously to a bank whose capital has been reduced. Under the final rule, the waiver provision remains unchanged.

Section 206.8 Record Retention [Deleted in Final Rule]

The proposed rule required that banks establish recordkeeping reasonably designed to demonstrate compliance with the provisions of §§ 206.3 and 206.4. The Board received forty-seven letters that commented on this section specifically and one hundred eight letters that complained of excessive paperwork generally.

Concerns With Cost Burdens

All of the forty-seven comments on this section complained of the cost and burden of these requirements. A trade association pointed out that banks already confront substantial compliance and recordkeeping requirements and that the requirements in the proposed rule may exceed banks' compliance capacity and ability. Two commenters asserted that requiring documentation of every closed transaction would substantially increase compliance costs. These commenters stated that records of closed transactions generally are not retained. Rather, limits are set for specific products and maturities, and internal limits are monitored to ensure they are not exceeded without specific credit approval. The commenters proposed that rather than requiring that records of closed transactions be available for review, the final rule should focus on the adequacy of a bank's establishment and monitoring of limits, including any reported overages.

Clarification of the Requirement

Three commenters requested that the final rule articulate what documentation must be maintained on file, in what format, and for how long, both to assist banks in maintaining reasonable records and to provide examiners with guidelines to effect uniform enforcement.

Proposals of Modification

Thirty-eight commenters offered specific suggestions for reducing the burden. Two commenters suggested that the requirements should not apply to exposure covered by FDIC insurance and that the requirements should be reduced for smaller amounts of exposure regardless of the correspondent's capitalization. Another commenter suggested an exception when exposure is less than 25% of capital.

Thirty-two commenters urged a reduction in recordkeeping requirements for respondents dealing with well-capitalized banks. Thirty of them sent an identical letter urging that the recordkeeping requirement be the same for a well-capitalized bank as it is for a Federal Reserve Bank. One commenter suggested that if a respondent selects a well-capitalized correspondent the recordkeeping burden should be restricted to maintaining on file the correspondent's quarterly disclosure and certification of its capitalization.

Other commenters urged a generalized reduction in the burden. One commenter suggested that the prudential standards requirement be limited to documenting an annual review. Two commenters suggested that the capital monitoring requirement be satisfied by documentation of an annual review of capital.

One commenter urged that the requirement be eliminated altogether, proposing that examiners rely on the adequacy of the prudential policies and that the burden be on the examiners to prove a violation of the regulation rather than on banks to prove compliance.

Final Rule

The specific record retention requirement has been deleted from the final rule. Examiners will use examiner guidance to determine compliance with the rule.

Section 206.9 Transition Provisions [Final Rule—Section 206.7]

The proposed rule provided that for a period of one year beginning on December 19, 1992, a bank would be required to comply with the prudential standards required under § 206.3(a), and under § 206.3(b) would be required to structure transactions with a correspondent or monitor exposure to a correspondent to ensure that its exposure did not exceed its internal limits established under § 206.3(a). During this period, the proposed rule did not require the bank to meet the guidelines for credit exposure established under § 206.4 or monitor credit exposure under § 206.3(b).

The proposed rule further provided that for a period of one year beginning on December 19, 1993, the overall guideline for credit exposure to an adequately capitalized correspondent contained in § 206.4(b)(ii) would be 100 percent of the bank's total capital, with the guideline for credit exposure having a remaining term to maturity of more than 30 days at 50 percent of the bank's capital. The proposed rule set the interim guideline on credit exposure to an individual correspondent contained in § 206.4(a)(iii) at 50 percent of the exposed institution's total capital. This section was designed to allow banks adequate time to rearrange their correspondent banking relationship to meet the new requirements. The Board received twelve comments on this section, one of which supported the provision as written and another of which supported the idea of a transition period.

Proposed Extension of the Transition Period.

Nine commenters urged the Board to extent the initial transition period, i.e. the period before the prudential guidelines become effective, to permit banks to prepare new policies or review and revise existing policies, to establish procedures to monitor and control interbank exposures, and to restructure correspondent relationships. Two commenters suggested that the proposed implementation date would not allow bank regulatory agencies sufficient time to train examiners.

The Board believes that a longer initial transition period will enable banks that have not made credit assessments of their correspondents to do so and for banks to review and, where appropriate, improve their monitoring procedures. An extended initial transition period also will enable the Board to develop examination guidelines related to the rule. Therefore, the final rule provides for a six-month transition period before the prudential standards become effective, with the regulatory limit on credit exposure

phased in over a two year period after that date.

Competitive Analysis

The proposed rule included a competitive impact analysis discussing the effects of the proposed rule on the ability of private sector correspondent banks to compete effectively with the Federal Reserve Banks in providing similar services. The proposed rule did not limit credit exposure of a bank to Federal Reserve Banks or to "well capitalized" correspondents because such exposure would not pose a risk to the bank. However, the proposed rule did impose three substantive requirements on a bank's exposure to a well capitalized correspondent that are not imposed on a bank's exposure to a Federal Reserve Bank, requiring a bank to have internal policies and procedures to limit exposure to a well capitalized correspondent, to structure transactions or monitor exposure to ensure that exposure ordinarily remains within the internal limits established, and to obtain sufficient information to demonstrate that the correspondent is well capitalized. Additionally, for adequately-capitalized correspondents, the proposed rule required a bank to limit overall credit exposure to an amount equal to not more than 50 percent of the exposed bank's capital, and to limit credit exposure with a term to maturity of greater than thirty days to an amount equal to not more than 25 percent of the exposed bank's capital.

The analysis included with the proposed rule indicated that the rule could have a direct and material adverse effect on the ability of correspondents to compete effectively with the Federal Reserve Banks in providing payment services, particularly in the area of check collection. The analysis concluded that this adverse effect was due to the differing legal powers of the Federal Reserve Banks. In assessing whether the objective of the proposed rule, to limit the risks that the failure of a correspondent would pose to exposed banks, could be reasonably achieved with a lesser or no adverse competitive impact, the Board concluded that the structure of the proposed rule minimized any adverse competitive effects on correspondents by not imposing rigid limits on credit exposure, by permitting higher levels of credit exposure to correspondents with higher capital levels, and by excluding cash items in the process of collection from the calculation of credit exposure to a correspondent.

In light of comments received on the proposed rule, however, the Board has made a number of modifications to the final rule to reduce further any adverse competitive effect on private sector correspondents. These modifications, described in detail above, include removing the limit on credit exposure to adequately capitalized correspondents, requiring internal limits on exposure to a correspondent only where there is a significant risk that payments will not be made as contemplated, and requiring monitoring or structuring of transactions to remain within limits only where limits are required by the final rule. Additionally, the final rule affords a longer initial implementation period in order to provide banks adequate time to review existing internal policies and procedures. The Board believes that the extended implementation period, along with the other modifications to the final rule, will reduce the likelihood that a bank will conclude that it must transfer activities to a Federal Reserve Bank.

While the Board recognizes that the modifications to the final rule do not completely remove the adverse competitive effects of the rule, the Board believes that the provisions of the final rule are necessary to fulfill the statutory objectives. Additionally, the Board will consider whether modifications should be made to the private-sector adjustment factor (PSAF) used to calculate the prices of Reserve Bank services to address disparities in capital ratios between the Reserve Banks and private correspondents resulting from the rule.

Regulatory Flexibility Analysis

Pursuant to section 603 of the Regulatory Flexibility Act (Pub. L. 96–354, U.S.C. 601 *et seq.*), the Board published for comment an initial regulatory flexibility analysis analyzing the provisions of its proposed Regulation F. Section 604 of the Regulatory Flexibility Act requires the Board to publish a final regulatory flexibility analysis with the final rule containing: (1) A statement of the need for, and objectives of, the rule; (2) a summary of the issues raised by the public comment in response to the initial regulatory flexibility statement, a summary of the assessment of such comments, and a statement of changes made in the proposed rule in response to comments; (3) a description of each of the significant alternatives to the rule consistent with the stated objectives of applicable statutes and designed to minimize any significant economic impact of the rule on small entities, and a statement of why these alternatives were rejected.

Each of these items are discussed in detail in the Supplementary Information above. The Board believes that the modifications included in the final rule significantly reduce the recordkeeping and regulatory burden imposed by the rule. The final rule places greater emphasis on the general internal policies and procedures of the bank, and does not require internal limits for all exposure to correspondents. The proposed rule also had been clarified to reduce the burden of monitoring such exposure. Additionally, the limit on credit exposure to adequately capitalized correspondents has been removed, significantly reducing the regulatory burden on banks in complying with the rule. This change lessens the probability that a bank will be required to diversify its exposure to a correspondent as a result of the rule, and eliminates the need for banks to monitor credit exposure to an adequately capitalized correspondent. Although a bank will continue to be required to monitor the capital levels of correspondents to which it has significant exposure, the final rule clarifies that a bank may rely on information obtained from its bank holding company, correspondent, or other party, significantly reducing the burden of obtaining the information.

Notice of Final Rule

A final rule is generally required to be published at least thirty days prior to its effective date. 5 U.S.C. 553(d). An exception is provided, however, where the agency has found good cause and provided the basis for the finding in the publication of the rule. 5 U.S.C. 553(d)(3). The final rule has been made effective as of December 19, 1992, in order to comply with the requirements of section 308 of FDICIA, which becomes effective on December 19, 1992. Further, although less than thirty days' notice has been provided before the effective date of the final rule, the rule contains transition provisions for actual compliance with the provisions of the regulation. Depository institutions covered by the rule will have six months after the effective date before actual compliance with any of the provisions of the rule is required. The Board therefore finds that there is good cause for the final rule to be made effective with less than a thirty-day notice period.

List of Subjects in 12 CFR Part 206

Banks, Banking, Interbank liability, Lending limits, Savings associations.

For the reasons set forth in the preamble, and pursuant to the Board's authority under section 23 of the Federal Reserve Act, 12 U.S.C. 371b–2, the Board is adding 12 CFR Part 206 to read as follows:

PART 206—LIMITATIONS ON INTERBANK LIABILITIES

Sec.
206.1 Authority, purpose, and scope.
206.2 Definitions.
206.3 Prudential standards.
206.4 Credit exposure.
206.5 Capital levels of correspondents.
206.6 Waiver.
206.7 Transition provisions.

Authority: Section 308 of Public Law 102–242, 105 Stat. 2236, 12 U.S.C. 371b–2.

§ 206.1 Authority, purpose, and scope.

(a) *Authority and purpose.* This part (Regulation F, 12 CFR part 206) is issued by the Board of Governors of the Federal Reserve System (Board) to implement section 308 of the Federal Deposit Insurance Corporation Improvements Act of 1991 (Act), 12 U.S.C. 371b–2. The purpose of this part is to limit the risks that the failure of a depository institution would pose to insured depository institutions.

(b) *Scope.* This part applies to all depository institutions insured by the Federal Deposit Insurance Corporation.

§ 206.2 Definitions.

As used in this part, unless the context requires otherwise:

(a) *Bank* means an insured depository institution, as defined in section 3 of the Federal Deposit Insurance Act (12 U.S.C. 1813), and includes an insured national bank, state bank, District bank, or savings association, and an insured branch of a foreign bank.

(b) *Commonly-controlled correspondent* means a correspondent that is commonly controlled with the bank and for which the bank is subject to liability under section 5(e) of the Federal Deposit Insurance Act. A correspondent is considered to be commonly controlled with the bank if:

(1) 25 percent or more of any class of voting securities of the bank and the correspondent are owned, directly or indirectly, by the same depository institution or company; or

(2) Either the bank or the correspondent owns 25 percent or more of any class of voting securities of the other.

(c) *Correspondent* means a U.S. depository institution or a foreign bank, as defined in this part, to which a bank has exposure, but does not include a commonly controlled correspondent.

(d) *Exposure* means the potential that an obligation will not be paid in a timely manner or in full. "Exposure" includes credit and liquidity risks, including operational risks, related to intraday and interday transactions.

(e) *Foreign bank* means an institution that: (1) Is organized under the laws of a country other than the United States;

(2) Engages in the business of banking;

(3) Is recognized as a bank by the bank supervisory or monetary authorities of the country of the bank's organization;

(4) Receives deposits to a substantial extent in the regular course of business; and

(5) Has the power to accept demand deposits.

(f) *Primary federal supervisor* has the same meaning as the term "appropriate Federal banking agency" in section 3(q) of the Federal Deposit Insurance Act (12 U.S.C. 1813(q)).

(g) *Total capital* means the total of a bank's Tier 1 and Tier 2 capital under the risk-based capital guidelines provided by the bank's primary federal supervisor. For an insured branch of a foreign bank organized under the laws of a country that subscribes to the principles of the Basle Capital Accord, "total capital" means total Tier 1 and Tier 2 capital as calculated under the standards of that country. For an insured branch of a foreign bank organized under the laws of a country that does not subscribe to the principles of the Basle Capital Accord, "total capital" means total Tier 1 and Tier 2 capital as calculated under the provisions of the Accord.

(h) *U.S. depository institution* means a bank, as defined in § 206.2(a) of this part, other than an insured branch of a foreign bank.

§ 206.3 Prudential standards.

(a) *General.* A bank shall establish and maintain written policies and procedures to prevent excessive exposure to any individual correspondent in relation to the condition of the correspondent.

(b) *Standards for selecting correspondents.* (1) A bank shall establish policies and procedures that take into account credit and liquidity risks, including operational risks, in selecting correspondents and terminating those relationships.

(2) Where exposure to a correspondent is significant, the policies and procedures shall require periodic reviews of the financial condition of the correspondent and shall take into account any deterioration in the correspondent's financial condition. Factors bearing on the financial condition of the correspondent include the capital level of the correspondent, level of nonaccrual and past due loans and leases, level of earnings, and other factors affecting the financial condition of the correspondent. Where public information on the financial condition of the correspondent is available, a bank may base its review of the financial condition of a correspondent on such information, and is not required to obtain non-public information for its review. However, for those foreign banks for which there is no public source of financial information, a bank will be required to obtain information for its review.

(3) A bank may rely on another party, such as a bank rating agency or the bank's holding company, to assess the financial condition of or select a correspondent, provided that the bank's board of directors has reviewed and approved the general assessment or selection criteria used by that party.

(c) *Internal limits on exposure.* (1) Where the financial condition of the correspondent and the form of maturity of the exposure create a significant risk that payments will not be made in full or in a timely manner, a bank's policies and procedures shall limit the bank's exposure to the correspondent, either by the establishment of internal limits or by other means. Limits shall be consistent with the risk undertaken, considering the financial condition and the form and maturity of exposure to the correspondent. Limits may be fixed as to amount of flexible, based on such factors as the monitoring of exposure and the financial condition of the correspondent. Different limits may be set for different forms of exposure, different products, and different maturities.

(2) A bank shall structure transactions with a correspondent or monitor exposure to a correspondent, directly or through another party, to ensure that its exposure ordinarily does not exceed the bank's internal limits, including limits established for credit exposure, except for occasional excesses resulting from unusual market disturbances, market movements favorable to the bank, increases in activity, operational problems, or other unusual circumstances. Generally, monitoring may be done on a retrospective basis. The level of monitoring required depends on:

(i) The extent to which exposure approaches the bank's internal limits;

(ii) The volatility of the exposure; and

(iii) The financial condition of the correspondent.

(3) A bank shall establish appropriate procedures to address excesses over its internal limits.

(d) *Review by board of directors.* The policies and procedures established under this section shall be reviewed and approved by the bank's board of directors at least annually.

§ 206.4 Credit exposure.

(a) *Limits on credit exposure.* (1) The policies and procedures on exposure established by a bank under § 206.3(c) of this part shall limit a bank's interday credit exposure to an individual correspondent to not more than 25 percent of the bank's total capital, unless the bank can demonstrate that its correspondent is at least adequately capitalized, as defined in § 206.5(a) of this part.

(2) Where a bank is no longer able to demonstrate that a correspondent is at least adequately capitalized for the purposes of § 206.4(a) of this part, including where the bank cannot obtain adequate information concerning the capital ratios of the correspondent, the bank shall reduce its credit exposure to comply with the requirements of § 206.4(a)(1) of this part within 120 days after the date when the current Report of Condition and Income or other relevant report normally would be available.

(b) *Calculation of credit exposure.* Except as provided in §§ 206.4 (c) and (d) of this part, the credit exposure of a bank to a correspondent shall consist of the bank's assets and off-balance sheet items that are subject to capital requirements under the capital adequacy guidelines of the bank's primary federal supervisor, and that involve claims on the correspondent or capital instruments issued by the correspondent. For this purpose, off-balance sheet items shall be valued on the basis of current exposure. The term "credit exposure" does not include exposure related to the settlement of transactions, intraday exposure, transactions in an agency or similar capacity where losses will be passed back to the principal of other party, or other sources of exposure that are not covered by the capital adequacy guidelines.

(c) *Netting.* Transactions covered by netting agreements that are valid and enforceable under all applicable laws may be netted in calculating credit exposure.

(d) *Exclusions.* A bank may exclude the following from the calculation of credit exposure to a correspondent:

(1) Transactions, including reverse repurchase agreements, to the extent that the transactions are secured by government securities or readily marketable collateral, as defined in paragraph (f) of this section, based on the current market value of the collateral;

(2) The proceeds of checks and other cash items deposited in an account at a correspondent that are not yet available for withdrawal;

(3) Quality assets, as defined in paragraph (f) of this section, on which the correspondent is secondarily liable, or obligations of the correspondent on which a creditworthy obligor in addition to the correspondent is available, including but not limited to:

(i) Loans to third parties secured by stock or debt obligations of the correspondent;

(ii) Loans to third parties purchased from the correspondent with recourse;

(iii) Loans or obligations of third parties backed by stand-by letters of credit issued by the correspondent; or

(iv) Obligations of the correspondent backed by stand-by letters of credit issued by a creditworthy third party;

(4) exposure that results from the merger with or acquisition of another bank for one year after that merger or acquisition is consummated; and

(5) The portion of the bank's exposure to the correspondent that is covered by federal deposit insurance.

(e) *Credit exposure of subsidiaries.* In calculating credit exposure to a correspondent under this part, a bank shall include credit exposure to the correspondent of any entity that the bank is required to consolidate on its Report of Condition and Income or Thrift Financial Report.

(f) *Definitions.* As used in this section:

(1) *Government securities* means obligations of, or obligations fully guaranteed as to principal and interest by, the United States government or any department, agency, bureau, board, commission, or establishment of the United States, or any corporation wholly owned, directly or indirectly, by the United States.

(2) *Readily marketable collateral* means financial instruments or bullion that may be sold in ordinary circumstances with reasonable promptness at a fair market value determined by quotations based on actual transactions on an auction or a similarly available daily bid- ask-price market.

(3)(i) *Quality asset* means an asset:

(A) That is not in a nonaccrual status;

(B) On which principal or interest is not more than thirty days past due; and

(C) Whose terms have not been renegotiated or compromised due to the deteriorating financial conditions of the additional obligor.

(ii) An asset is not considered a "quality asset" if any other loans to the primary obligor on the asset have been classified as "substandard," "doubtful," or "loss," or treated as "other loans specially mentioned" in the most recent report of examination or inspection of the bank or an affiliate prepared by either a federal or a state supervisory agency.

§ 206.5 Capital levels of correspondents.

(a) *Adequately capitalized correspondents.*[1] For the purpose of this part, a correspondent is considered adequately capitalized if the correspondent has:

(1) A total risk-based capital ratio, as defined in paragraph (e)(1) of this section, of 8.0 percent or greater;

(2) A Tier 1 risk-based capital ratio, as defined in paragraph (e)(2) of this section, of 4.0 percent or greater; and

(3) A leverage ratio, as defined in paragraph (e)(3) of this section, of 4.0 percent or greater.

(b) *Frequency of monitoring capital levels.* A bank shall obtain information to demonstrate that a correspondent is at least adequately capitalized on a quarterly basis, either from the most recently available Report of Condition and Income, Thrift Financial Report, financial statement, or bank rating report for the correspondent. For a foreign bank correspondent for which quarterly financial statements or reports are not available, a bank shall obtain such information on as frequent a basis as such information is available. Information obtained directly from a correspondent for the purpose of this section should be based on the most recently available Report of Condition and Income, Thrift Financial Report, or financial statement of the correspondent.

(c) *Foreign banks.* A correspondent that is a foreign bank may be considered adequately capitalized under this section without regard to the minimum leverage ratio required under paragraph (a)(3) of this section.

(d) *Reliance on information.* A bank may rely on information as to the capital levels of a correspondent obtained from the correspondent, a bank rating agency, or other party that it reasonably believes to be accurate.

(e) *Definitions.* For the purposes of this section:

(1) *Total risk-based capital ratio* means the ratio of qualifying total capital to weighted risk assets.

(2) *Tier 1 risk-based capital ratio* means the ratio of Tier 1 capital to weighted risk assets.

(3) *Leverage ratio* means the ratio of Tier 1 capital to average total consolidated assets, as calculated in accordance with the capital adequacy

[1] As used in this part, the term "adequately capitalized" is similar but not identical to the definition of that term as used for the purposes of the prompt corrective action standards. See, *e.g.* 12 CFR part 208, subpart B.

guidelines of the correspondent's primary federal supervisor.

(f) *Calculation of capital ratios.* (i) For a correspondent that is a U.S. depository institution, the ratios shall be calculated in accordance with the capital adequacy guidelines of the correspondent's primary federal supervisor.

(ii) For a correspondent that is a foreign bank organized in a country that has adopted the risk-based framework of the Basle Capital Accord, the ratios shall be calculated in accordance with the capital adequacy guidelines of the appropriate supervisory authority of the country in which the correspondent is chartered.

(iii) For a correspondent that is a foreign bank organized in a country that has not adopted the risk-based framework of the Basle Capital Accord, the ratios shall be calculated in accordance with the provisions of the Basle Capital Accord.

§ 206.6 Waiver.

The Board may waive the application of § 206.4(a) of this part to a bank if the primary Federal supervisor of the bank advises the Board that the bank is not reasonably able to obtain necessary services, including payment-related services and placement of funds, without incurring exposure to a correspondent in excess of the otherwise applicable limit.

§ 206.7 Transition provisions.

(a) Beginning on June 19, 1993, a bank shall comply with the prudential standards prescribed under § 206.3 of this part.

(b) Beginning on June 19, 1994, a bank shall comply with the limit on credit exposure to an individual correspondent required under § 206.4(a) of this part, but for a period of one year after this date the limit shall be 50 percent of the bank's total capital.

By order of the Board of Governors of the Federal Reserve System, December 11, 1992.

William W. Wiles,

Secretary of the Board.

[FR Doc. 92-30587 Filed 12-17-92; 8:45 am]

BILLING CODE 6210-01-M

FARM CREDIT ADMINISTRATION

12 CFR Part 625

RIN 3052-AB11

Application for Award of Fees and Other Expenses Under the Equal Access to Justice Act

AGENCY: Farm Credit Administration (FCA).

ACTION: Final rule.

SUMMARY: The FCA issues regulations to implement the Equal Access to Justice Act (EAJA). In accordance with the EAJA, the regulations establish conditions under which parties who prevail over the FCA in certain administrative proceedings may be awarded attorney fees and other expenses.

EFFECTIVE DATE: The regulation shall become effective upon the expiration of 30 days after publication during which either or both houses of Congress are in session. Notice of the effective date will be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT:

William L. Larsen, Senior Attorney, Regulatory Operations Division, Office of General Counsel, Farm Credit Administration, McLean, Virginia 22102-5090, (703) 883-4020, TDD (703) 883-4444

or

Richard A. Cohn, Senior Attorney, Administrative Law and Enforcement Division, Office of General Counsel, Farm Credit Administration, McLean, Virginia 22102-5090, (703) 883-4020, TDD (703) 833-4444.

SUPPLEMENTARY INFORMATION: On August 5, 1985, Congress enacted Public Law 99-80, 99 Stat. 183, which reauthorized and amended the Equal Access to Justice Act, 5 U.S.C. 504. The EAJA provides for the award of attorney fees and other expenses to parties who prevail over Federal agencies in certain administrative proceedings. The EAJA requires Federal agencies, after consultation with the Chairman of the Administrative Conference of the United States (ACUS), to establish uniform procedures for the submission and consideration of applications for fee and expenses awards.

On July 16, 1992, after consultation with ACUS, the FCA proposed rules implementing the EAJA. (57 FR 31463). The FCA received two comment letters in response to its EAJA implementation proposal. The Farm Credit Council (FCC) raised five issues in its letter, with which the Farm Credit Bank of Baltimore concurred generally.

The final rules are in large part the same as the proposed rules, which followed generally the ACUS Model Rules For Implementation of the Equal Access to Justice Act in Agency Proceedings, 1 CFR part 315 (model rules). The FCA has adopted several changes in the rules as proposed, based on its further consideration of the EAJA and ACUS model rules and in response to public comments. Discussion of these changes follows.

Analysis of Changes by Subpart

Subpart A—General Provisions

Section 625.2(d) is amended to further clarify that references in the regulations to the "presiding officer" may also apply to the FCA Board (Board) where the Board conducts proceedings under the EAJA.

As noted in the rule proposal, these EAJA implementation regulations do not apply to judicial awards of costs and fees in civil actions. See 28 U.S.C. 2412. Nevertheless, the FCC suggested that the regulations would be clearer if reference were made to fee awards in the context of court review of the underlying adversary adjudication, Therefore, the FCA has added a new § 625.2(e) stating the statutory requirement of 5 U.S.C. 504(c)(1) that an award for fees in connection with a court review of an underlying adversary adjudication may be made only pursuant to 28 U.S.C. 2412(d)(3).

To clarify that the regulations are consistent with the EAJA, § 625.5(b) is amended to substitute the language of the EAJA regarding compensation of expert witnesses.

Section 625.5(c) is amended to change the reference from "FCA" to the "presiding officer." This change responds to a comment from the FCC noting an apparent inconsistency with other provisions of the proposed regulations. It is also in accord with the intent of the clarifying amendment to § 625.2(d) regarding the Board's authority to preside over EAJA proceedings.

The EAJA limits attorney or agent fees to a maximum of $75 per hour unless the agency determines by regulation that a higher fee is justified by an increase in the cost of living or by special circumstances. The FCA did not propose to establish a specific regulatory procedure through which the public could petition the FCA to raise the ceiling on EAJA attorney or agent fee awards because it would seem to restate current law. The Administrative Procedure Act, 5 U.S.C. 551 *et seq.*, already grants interested parties the right to petition an agency to change its rules and the EAJA clearly authorizes FCA rulemaking on a higher rate ceiling. As the FCC commented, however, the ACUS model rules contain a separate provision (1 CFR 315.107) covering agency rulemaking on maximum rates for attorney fees that establishes the procedure for such rulemaking. The FCC suggested that the FCA add the ACUS model provision in the interest of completeness and clarity. While it is not bound to adopt the ACUS model rules, the FCA agrees that the addition of the

ACUS model provision on maximum rate rulemaking may be helpful in illuminating this aspect of the EAJA. The FCA believes the 60-day timetable established by the ACUS model rule provision may be impractical depending on the rulemaking workload of the agency. Therefore, the FCA is setting the deadline for action on a petition at 90 days. The new provision appears as § 625.6.

Subpart C—Procedures for Considering Applications

Section 625.22 provides for the FCA counsel's answer to the application for fees. The FCC suggested in its comments that this provision be revised along lines similar to the ACUS model rules to treat a failure to file an answer to an application within 30 days "as a consent to the award requested." 1 CFR 315.302(a). While the FCA has no objection to the time constraint on an agency answer to an EAJA application, it does not agree that failure to answer an application within 30 days should result in a default award of fees without a further showing that the application is meritorious. Accordingly, the FCA is amending § 625.22(a) to include language similar to § 315.302(a) of the ACUS model rules, but modified to require the applicant to make a satisfactory showing of entitlement to an EAJA fee award before such an award could be granted by the presiding officer.

The FCC comment letter also suggested that the FCA include in its EAJA rules a provision similar to ACUS model rule § 315.304, which permits any party to a proceeding other than the applicant and agency counsel to file timely comments on an application or answer. The FCA viewed this model rule provision as having little practical applicability to its adjudications, and thus did not include it in the proposed rules. Recognizing, however, that there might be limited circumstances of applicability, the FAC is now adding new § 625.24, which is based on ACUS model rule § 315.304.

List of Subjects in 12 CFR Part 625

Application, Attorney fees, Delegation, Equal Access to Justice Act, Organization and functions, and Procedures.

For the reasons stated in the preamble, part 625 is added to chapter VI of title 12 of the Code of Federal Regulations to read as follows:

PART 625—APPLICATION FOR AWARD OF FEES AND OTHER EXPENSES UNDER THE EQUAL ACCESS TO JUSTICE ACT

Subpart A—General Provisions

Sec.
625.1 Purpose.
625.2 Proceedings covered.
625.3 Eligibility of applicants.
625.4 Standards for awards.
625.5 Allowable fees and expenses.
625.6 Rulemaking on maximum rates for attorney fees.
625.7 Awards against other agencies

Subpart B—Applicant Information Required

625.10 Contents of application.
625.11 Net worth exhibit.
625.12 Documentation of fees and expenses.
625.13 When an application may be filed.

Subpart C—Procedures for Considering Applications

625.20 Settlement.
625.21 Filing and service of documents.
625.22 Answer to application.
625.23 Reply.
625.24 Comments by other parties.
625.25 Further proceedings.
625.26 Recommended decision.
625.27 Board decision.
625.28 Judicial review.
625.29 Payment of award.

Authority: 5 U.S.C. 504, 12 U.S.C. 2252.

Subpart A—General Provisions

§ 625.1 Purpose.

These rules implement the Equal Access to Justice Act, 5 U.S.C. 504 (EAJA). The EAJA provides for the award of attorney fees and other expenses to eligible individuals and entities who are parties to certain administrative proceedings (designated by the EAJA as "adversary adjudications") before Federal agencies. An eligible party may receive an award when it prevails over an agency, unless the agency's position was substantially justified or special circumstances make an award unjust. The rules in this part explain how the EAJA applies to Farm Credit Administration (FCA) proceedings. The rules describe the parties eligible for awards, how such parties may apply for awards, and the procedures and standards that govern FCA consideration of applications.

§ 625.2 Proceedings covered.

(a) The EAJA applies to adversary adjudications conducted by the FCA either on its own behalf or in connection with any other agency of the United States that participates in or in any way is a part of the adversary adjudication. Adversary adjudications are:

(1) Adjudications under 5 U.S.C. 554 in which the position of the FCA or other agency is presented by an attorney or other representative who enters an appearance and participates in the proceeding; and

(2) Enforcement proceedings under 12 U.S.C. 2261–2273.

(b) The failure of the FCA to identify a type of proceeding as an adversary adjudication shall not preclude the filing of an application by a party who believes that the proceeding is covered by the EAJA; whether the proceeding is covered shall then be an issue for resolution in proceedings on the application.

(c) If a proceeding includes both matters covered and excluded from coverage by the EAJA, any award made will include only fees and expenses related to covered issues.

(d) Proceedings under this part may be conducted by the FCA Board (Board) or by the presiding officer (referred to as the "adjudicative officer" in the EAJA), as defined in § 622.2(f) of this chapter. If the Board conducts proceedings, reference to the "presiding officer" in this part shall mean the Board, in applicable context. Where the Board presides, the recommended decision under § 625.26 of this part will be omitted and the Board will make a final decision on the application in accordance with § 625.27 of this part.

(e) If a court reviews the underlying decision of the adversary adjudication, an award for fees and other expenses may be made only pursuant to 28 U.S.C. 2412(d)(3).

§ 625.3 Eligibility of applicants.

(a) To be eligible for an award under the EAJA, an applicant must be a prevailing party named or admitted to the adversary adjudication for which an award is sought. The applicant must show that it meets all conditions of eligibility set out in this subpart and in subpart B of this part.

(b) The types of eligible applicants are as follows:

(1) An individual with a net worth of $2 million or less;

(2) The sole owner of an unincorporated business who has both a net worth of $7 million or less (including personal and business interests), and 500 or fewer employees;

(3) A charitable or other tax-exempt organization described in section 501(c)(3) of the Internal Revenue Code (26 U.S.C. 501(c)(3)) with 500 or fewer employees;

(4) A cooperative association as defined in section 15(a) of the Agricultural Marketing Act (12 U.S.C. 1141j(a)) with 500 or fewer employees; and

(5) Any other partnership, corporation, association, unit of local government, or organization with a net worth of $7 million or less and 500 or fewer employees.

(c) For eligibility purposes, the net worth and number of employees of an applicant shall be determined as of the date the adversary adjudication was initiated.

(d) An applicant who owns an unincorporated business will be considered as an "individual" rather than a "sole owner of an unincorporated business" if the issues on which the applicant prevails are related primarily to personal interests rather than to business interests.

(e) The employees of an applicant include all persons who regularly perform services for remuneration for that applicant, under the applicant's direction and control. Part-time employees shall be included on a proportional basis.

(f) The net worth and number of employees of the applicant and all of its affiliates shall be aggregated to determine eligibility unless the presiding officer determines that aggregation would be unjust and contrary to the purposes of the EAJA in light of the actual relationship between the affiliated entities.

(1) For purposes of this part, an affiliate is:

(i) Any individual, corporation, or other entity that directly or indirectly controls or owns a majority of the voting shares or other interests of the applicant; or

(ii) Any corporation or other entity of which the applicant directly or indirectly owns or controls a majority of the voting shares or other interests.

(2) The presiding officer may determine that financial relationships of the applicant other than those described in paragraph (f)(1) of this section constitute special circumstances that would make an award unjust.

(g) An applicant that participates in an adversary adjudication primarily on behalf of one or more other persons or entities that would be ineligible is not itself eligible for an award.

§ 625.4 Standards for awards.

(a) If an eligible applicant prevails over the FCA in an adversary adjudication, or in a significant and discrete substantive portion thereof, the applicant may receive an award for fees and expenses incurred in the adjudication, or portion thereof, unless the position of the FCA over which the applicant prevailed was substantially justified.

(b) The position of the FCA includes:

(1) The position taken by the FCA in the adversary adjudication; and

(2) The action or inaction of the FCA upon which the adversary adjudication is based.

(c) Except as provided in paragraph (d) of this section, the FCA must prove that its position was substantially justified before an award may be denied to an otherwise eligible applicant.

(d) An award will be reduced or denied if the applicant has unduly or unreasonably protracted the adversary adjudication or if special circumstances make the award sought unjust.

§ 625.5 Allowable fees and expenses.

(a) Awards will be based on rates customarily charged by persons engaged in the business of acting as attorneys, agents, and expert witnesses, even if the services were made available without charge or at a reduced rate to the applicant.

(b) No award for the fee of an attorney or agent under these rules may exceed $75 per hour. No award to compensate an expert witness may exceed the highest rate at which the FCA pays expert witnesses. However, an award also may include the reasonable expenses of the attorney, agent, or expert witness as a separate item, if the attorney, agent, or expert witness ordinarily charges clients separately for such expenses.

(c) In determining the reasonableness of the fee sought for an attorney, agent, or expert witness, the presiding officer shall consider the following:

(1) If the attorney, agent, or expert witness is in private practice, his or her customary fees for similar services, or, if an employee of the applicant, the fully allocated costs of the services;

(2) The prevailing rate for similar services in the community in which the attorney, agent, or expert witness ordinarily performs services;

(3) The time actually spent in the representation of the applicant;

(4) The time reasonably spent in light of the difficulty or complexity of the issues in the adversary adjudication; and

(5) Such other factors as may bear on the value of the services provided.

(d) The reasonable cost of any study, analysis, audit, engineering report, test, project, or similar matter prepared on behalf of a party may be awarded, to the extent that the charge for the service does not exceed the prevailing rate for similar services, and the study or other matter was necessary for the preparation of the applicant's case.

§ 625.6 Rulemaking on maximum rates for attorney fees.

(a) If warranted by an increase in the cost of living or by special circumstances (such as limited availability of attorneys qualified to handle certain types of proceedings), the FCA may adopt regulations providing that attorney fees may be awarded at a rate higher than $75 per hour in some or all of the types of proceedings covered by this part. The FCA will conduct any rulemaking proceedings for this purpose under the informal rulemaking procedures of the Administrative Procedure Act.

(b) Any person may file with the FCA a petition for rulemaking to increase the maximum rate for attorney fees. The petition should identify the rate the petitioner believes the FCA should establish and the types of proceedings in which the rate should be used. It should also explain fully the reasons why the higher rate is warranted. The FCA will respond to the petition within 90 days after it is filed, by initiating a rulemaking proceeding, denying the petition, or taking other appropriate action.

§ 625.7 Awards against other agencies.

If an applicant is entitled to an award because it prevails over another agency of the United States that participates in or in any way is a part of an adversary adjudication before the FCA and that agency's position is not substantially justified, the award or an appropriate portion of the award shall be made against that agency.

Subpart B—Applicant Information Required

§ 625.10 Contents of application.

(a) An application for an award of fees and other expenses under the EAJA shall identify the applicant and the adversary adjudication for which an award is sought. The application shall show that the applicant has prevailed in the adversary adjudication. If the application is made on the basis of significant and discrete substantive issues on which the applicant prevailed, the issues must be specifically identified. The application also shall identify each position of the FCA or other agencies that the applicant alleges was not substantially justified. Unless the applicant is an individual, the application shall describe briefly the type and purpose of its organization or business and state the number of persons employed.

(b) The application shall include a statement that the applicant's net worth does not exceed $2 million (if an

individual) or $7 million (for all other applicants, including their affiliates). However, an applicant may omit this statement if:

(1) It states that it has 500 employees or fewer and attaches a copy of a ruling by the Internal Revenue Service that it qualifies as an organization described in section 501(c)(3) of the Internal Revenue Code (26 U.S.C. 501(c)(3)) or, in the case of a tax-exempt organization not required to obtain a ruling from the Internal Revenue Service on its exempt status, a statement that describes the basis for the applicant's belief that it qualifies under such section; or

(2) It states that it is a cooperative association as defined in section 15(a) of the Agricultural Marketing Act (12 U.S.C. 1141j(a)) with 500 or fewer employees.

(c) The application shall state the total amount of fees and other expenses for which an award is sought.

(d) The application may include any other relevant matters that the applicant wishes the FCA to consider in determining whether and in what amount an award should be made.

(e) The application shall be signed by the applicant or an authorized officer or attorney of the applicant. The application must contain a written verification under oath or under penalty of perjury that the information provided in the application and any supporting documents is accurate.

§ 625.11 Net worth exhibit.

(a) Each applicant, except a qualified tax-exempt organization or cooperative association, must provide with its application a detailed exhibit showing the net worth of the applicant and any affiliates (as defined in § 625.3(f)(1) of this part) as of the date when the adversary adjudication was initiated. The exhibit may be in any convenient form that provides full disclosure of the assets and liabilities of the applicant and its affiliates and is otherwise sufficient to demonstrate that the applicant qualifies under the standards in this part. The presiding officer may require an applicant to file additional information supporting its eligibility for an award.

(b) An applicant that objects to public disclosure of information in any portion of the net worth exhibit and believes there are legal grounds for withholding it from disclosure may submit that portion of the exhibit directly to the presiding officer in a sealed envelope labeled "Confidential Financial Information," accompanied by a motion under § 622.11 of this chapter to withhold the information from public disclosure. The motion shall describe the information sought to be withheld and explain, in detail, why it falls within one or more of the specific exemptions from mandatory disclosure under the Freedom of Information Act, 5 U.S.C. 552(b) (1)–(9), why public disclosure of the information would adversely affect the applicant, and why disclosure is not required in the public interest. The material in question shall be served on counsel representing the FCA, but need not be served on any other party to the application proceeding. If the presiding officer, or the FCA Board pursuant to § 622.11(e) of this chapter, finds that the information should not be withheld from disclosure, it shall be placed in the public record of the application proceeding. Otherwise, any request to inspect or copy the exhibit shall be treated in accordance with the FCA's procedures regarding release of information (12 CFR part 602).

§ 625.12 Documentation of fees and expenses.

The application shall be accompanied by full documentation of the fees and expenses, including the cost of any study, analysis, audit, engineering report, test, project, or similar matter, for which an award is sought. A separate itemized statement shall be submitted for each professional firm or individual whose services are covered by the application, showing the hours spent in connection with the proceeding by each individual, a description of the specific services performed, the rates at which each fee has been computed, any expenses for which reimbursement is sought, and the total amount paid or payable by the applicant or by any other person or entity for the services provided. Under § 625.25 of this part, the presiding officer may require the applicant to provide vouchers, receipts, logs, or other substantiation for any fees or expenses claimed.

§ 625.13 When an application may be filed.

(a) An application may be filed whenever the applicant has prevailed in the adversary adjudication, or in a significant and discrete substantive portion thereof, but in no case later than 30 days after the FCA's final disposition of the adversary adjudication.

(b) For purposes of this rule, final disposition means the date on which a decision or order disposing of the merits of the adversary adjudication is issued or any other complete resolution of the adversary adjudication, such as a settlement or voluntary dismissal, becomes final and is unreviewable by the FCA, any other administrative body, or the courts.

(c) If review, reconsideration, or appeal is sought or taken of an adversary adjudication decision as to which an applicant believes it has prevailed, application proceedings for any award of fees and other expenses shall be stayed pending final disposition of the underlying controversy.

Subpart C—Procedures for Considering Applications

§ 625.20 Settlement.

A prevailing party and the FCA through its counsel may agree on a proposed settlement of an award at any time, either in connection with a settlement of the underlying adversary adjudication or after the underlying adversary adjudication has been concluded. If a prevailing party and the FCA counsel agree on a proposed settlement of an award, the proposed settlement must be submitted to the presiding officer for a recommended decision pursuant to § 625.26 of this part. If it has not been previously filed, the application must be submitted to the presiding officer along with the proposed settlement.

§ 625.21 Filing and service of documents.

Any application for an award or other pleading or document related to an application shall be filed and served on all parties to the adversary adjudication in the same manner as other pleadings in the adversary adjudication (*see* §§ 622.18 and 622.19 of this chapter), except as provided in § 625.11(b) of this part for confidential financial information.

§ 625.22 Answer to application.

(a) Within 30 days after service, counsel for the FCA may file an answer to the application. Unless the FCA counsel requests an extension of time for filing or a statement of intent to negotiate under paragraph (c) of this section is filed, the presiding officer, upon a satisfactory showing of entitlement by the applicant, may make an award for the applicant's fees and other expenses under the EAJA.

(b) The answer shall set forth any objections to the requested award and identify the facts relied on in support of the FCA's position. If the answer is based on any alleged facts not already in the record of the adversary adjudication, the FCA counsel shall include with the answer either supporting affidavits or a request for further proceedings under § 625.25 of this part.

(c) If the FCA counsel and the applicant believe that the issues in the fee application can be settled, they may jointly file a statement of their intent to

negotiate a settlement. The filing of this statement shall extend the time for filing an answer for an additional 30 days, and further extensions may be granted by the presiding officer upon request by the FCA counsel and the applicant.

§ 625.23 Reply.

Within 15 days after service of an answer, the applicant may file a reply. If the reply is based on any alleged facts not already in the record of the adversary adjudication, the applicant shall include with the reply either supporting affidavits or a request for further proceedings under § 625.25 of this part.

§ 625.24 Comments by other parties.

Any party to a proceeding other than the applicant and FCA counsel may file comments on an application within 30 days after it is served or on an answer within 15 days after it is served. A commenting party may not participate further in proceedings on the application unless the presiding officer determines that the public interest requires such participation in order to permit full exploration of matters raised in the comments.

§ 625.25 Further proceedings.

(a) The determination of an award shall be made on the basis of the written record unless the presiding officer finds that further proceedings are necessary for full and fair resolution of the issues arising from the application. Such further proceedings may be at the request of either the applicant or the FCA counsel, or on the presiding officer's own initiative, and shall be conducted as promptly as possible. Further proceedings may include an informal conference, oral argument, additional written submissions, or other actions required by the presiding officer, but may not include discovery or an evidentiary hearing with respect to the issue of whether the agency's position was substantially justified.

(b) Whether or not the position of the agency was substantially justified shall be determined on the basis of the administrative record, as a whole, which is made in the adversary adjudication for which fees and other expenses are sought.

(c) A request that the presiding officer order further proceedings under this section shall specifically identify the information sought or the disputed issues and shall explain why the additional proceedings are necessary to resolve the issues.

§ 625.26 Recommended decision.

The presiding officer shall file a recommended decision within 30 days after completion of proceedings on the application, and, promptly upon filing, shall serve a copy of the recommended decision upon each party to the proceedings. The decision shall include written findings and conclusions on the applicant's eligibility, status as a prevailing party, the recommended amount of the award, if any, and an explanation of the reasons for any difference between the amount requested and the amount awarded. The decision shall also include, if at issue, findings on whether the FCA's position was substantially justified, whether the applicant unduly protracted the adversary adjudication, or whether special circumstances make an award unjust. If the applicant has sought an award against more than one agency, the decision shall allocate responsibility for payment of any award made among the agencies, and shall explain the reasons for the allocation made.

§ 625.27 Board decision.

Following filing of the recommended decision with the Board, the Board shall render a final decision on the application. The Board maintains full discretion to uphold, reverse, remand, or alter the recommended decision. The Board may order further proceedings (including those set forth in §§ 622.11 and 622.13 through 622.16 of this chapter) upon request by any party to the application proceeding or on its own initiative, but such proceedings may not include discovery or an evidentiary hearing with respect to the issue of whether the agency's position was substantially justified.

§ 625.28 Judicial review.

Judicial review of final FCA decisions on awards may be sought as provided in 5 U.S.C. 504(c)(2).

§ 625.29 Payment of award.

(a) An applicant seeking payment of an award shall submit to the Secretary to the Board a copy of the final decision granting the award, accompanied by a certification that the applicant will not seek judicial review of the decision. The required submission and certification should be sent to: Secretary to the Board, Farm Credit Administration, 1501 Farm Credit Drive, McLean, Virginia 22102–5090.

(b) The FCA will pay the amount awarded to the applicant within 60 days of receipt of the applicant's submission and certification.

Dated: December 10, 1992.

Curtis M. Anderson,

Secretary, Farm Credit Administration Board.

BILLING CODE 6705–01–M

FARM CREDIT SYSTEM ASSISTANCE BOARD

12 CFR Chapter XIII

Removal of Regulations

AGENCY: Farm Credit System Assistance Board.

ACTION: Final rule.

SUMMARY: The Farm Credit System Assistance Board (Assistance Board) was established by the Agricultural Credit Act of 1987 as a temporary agency, which terminates on December 31, 1992. All agency program activities officially end on that date. Accordingly, it is the purpose of this action to deactivate the Assistance Board's regulations and to remove such regulations from the Code of Federal Regulations.

EFFECTIVE DATE: December 31, 1992.

FOR FURTHER INFORMATION CONTACT: For information before or on December 31, 1992, contact Isabella W. Sammons, General Counsel, or Christine C. Dion, Senior Attorney, (202) 737–9255.

SUPPLEMENTARY INFORMATION:

Classification

This is not a major rule under E.O. 12291 since it has no effect on costs, prices or economic competition.

Public Comment

Pursuant to 12 U.S.C. 2278a–10, the Assistance Board is not required to follow the requirements of the Administrative Procedure Act (APA) with respect to notice and comment on rulemaking. Furthermore, this removal of regulations is issued as a final rule without opportunity for public comment in the sole interest of informing the public. It does not impose any new requirements on any individuals or organizations involved in the Assistance Board's program activities.

Statutory Authority

This removal of regulations is issued under the authority Public Law 92–181, title VI, § 6.10, as added by Public Law 100–233, title II, section 201, Jan. 6, 1988, 101 Stat. 1594.

Paperwork Reduction Act

There is no information collection requirement in this action.

List of Subjects in 12 CFR Part 1300

Removal of Regulations

CHAPTER XIII—[REMOVED]

PART 1300—[REMOVED]

Accordingly, under the authority of § 6.10 of title VI of Public Law 92–181, as amended, part 1300 of title 12 of the Code of Federal Regulations is removed and chapter XIII of title 12 of the Code of Federal Regulations is vacated, effective December 31, 1992.

Kenneth L. Peoples,

President and Chief Executive Officer.

BILLING CODE 3810–FC–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 92–NM–147–AD; Amendment 39–8434; AD 92–27–01]

Airworthiness Directives; Aerospatiale Model ATR42 and ATR72 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to all Aerospatiale Model ATR42 and ATR72 series airplanes, that requires a one-time general visual inspection of certain door linings and door posts to determine the date of manufacture, and replacement, if necessary. This amendment is prompted by results of inspections that have revealed that the fire resistance of certain painted door linings may be inadequate. The actions specified by this AD are intended to prevent increased risk of injury to the passengers and crew members in the event of a fire within the airplane cabin.

DATES: Effective January 22, 1993.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of January 22, 1993.

ADDRESSES: The service information referenced in this AD may be obtained from Aerospatiale, 316 Route de Bayonne, 31060 Toulouse, Cedex 03, France. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Gary Lium, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–1112; fax (206) 227–1320.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to all Aerospatiale Model ATR42 and ATR72 series airplanes was published in the **Federal Register** on September 24, 1992 (57 FR 44138). That action proposed to require a one-time general visual inspection of certain door linings and door posts to determine the date of manufacture, and replacement, if necessary.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter supports the proposed rule.

Another commenter requests that the proposed rule be revised to make the requirements consistent with the procedures contained in the applicable service bulletins for each model. The commenter notes that, as proposed in the notice, the rule would require that the door linings as well as the door posts be removed on both the Model ATR42 and Model ATR72 prior to performing the general visual inspection to determine the date of manufacture. However, as described in the applicable service bulletin, only the door linings (not the door posts) need to be removed from the Model ATR42. The requirement to remove both the door posts and the door linings should apply only to the Model ATR72. The FAA concurs with the commenter and has revised the final rule to make this distinction in the requirements.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the change previously described. The FAA has determined that this change will neither increase the economic burden on any operator nor increase the scope of the AD.

The FAA estimates that 99 airplanes of U.S. registry will be affected by this AD, that it will take approximately 1 work hour per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $5,445, or $55 per airplane. This total cost figure assumes that no operator has yet accomplished the requirements of this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92–27–01. Aerospatiale: Amendment 39–8434. Docket 92–NM–147–AD.

Applicability: All Model ATR42 and ATR72 series airplanes, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent increased risk of injury to the passengers and crew members in the event of a fire within the airplane cabin, accomplish the following:

(a) For Model ATR42 series airplanes: Within 2 years after the effective date of this

AD, remove the door linings and perform a general visual inspection to determine the date of their manufacture, in accordance with Aerospatiale Service Bulletin ATR42–25–0084, dated April 10, 1992.

(1) If the door linings were manufactured prior to January 15, 1990, prior to further flight, replace them with linings manufactured after January 15, 1990, in accordance with Aerospatiale Service Bulletin ATR42–25–0075, dated September 4, 1991.

(2) If the door linings were manufactured on or after January 15, 1990, reinstall the linings. No further action is required by this AD.

(b) For Model ATR72 series airplanes: Within 2 years after the effective date of this AD, remove the door linings and door posts and perform a general visual inspection to determine the date of their manufacture, in accordance with Aerospatiale Service Bulletin ATR72–25–1025, Revision 1, dated May 18, 1992.

(1) If the door linings or door posts were manufactured prior to January 15, 1990, prior to further flight, replace them with linings or posts manufactured after January 15, 1990, in accordance with ATR72–25–1020, dated September 4, 1991.

(2) If the door linings or door posts were manufactured on or after January 15, 1990, reinstall the linings or posts. No further action is required by this AD.

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM–113.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM–113.

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(e) The inspections and replacements shall be done in accordance with Aerospatiale Service Bulletin ATR42–25–0084, dated April 10, 1992; Aerospatiale Service Bulletin ATR42–25–0075, dated September 4, 1991; Aerospatiale Service Bulletin ATR72–25–1025, Revision 1, dated May 18, 1992; or Aerospatiale Service Bulletin ATR72–25–1020, dated September 4, 1991; as applicable. Aerospatiale Service Bulletin ATR72–25–1025, Revision 1, dated May 18, 1992, contains the following list of effective pages:

Page No.	Revision level shown on page	Date shown on page
1	1	May 18, 1992.
2–9	Original	Apr. 10, 1992.

This incorporation by reference was approved by the Director of the **Federal Register** in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51. Copies may be obtained from Aerospatiale, 316 Route de Bayonne, 31060 Toulouse, Cedex 03, France. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(f) This amendment becomes effective on January 22, 1993.

Issued in Renton, Washington, on December 7, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain de Havilland Model DHC–7 series airplanes, that requires an inspection to determine whether rivets securing the upper longeron in each inner nacelle are installed, and modification of the upper longerons, if necessary. This amendment is prompted by reports that four rivets securing the upper longeron in each engine inner nacelle may have been omitted inadvertently during production. The actions specified by this AD are intended to prevent reduced structural integrity of the engine nacelles.

DATES: Effective January 22, 1993.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of January 22, 1993.

ADDRESSES: The service information referenced in this AD may be obtained from de Havilland, Inc., Garratt Boulevard, Downsview, Ontario M3K 1Y5, Canada. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, New England Region, New York Aircraft Certification Office, 181 South Franklin Avenue, room 202, Valley Stream, New York; or at the Office of the Federal Register, 800 North Capitol Street NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Sol Maroof, Aerospace Engineer, Airframe Branch, ANE–172, FAA, Engine and Propeller Directorate, 181 South Franklin Avenue, room 202, Valley Stream, New York 11581; telephone (516) 791–6220; fax (516) 791–9024.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain de Havilland Model DHC–7 series airplanes was published in the **Federal Register** on September 29, 1992 (57 FR 44710). That action proposed to require an inspection to determine whether rivets securing the upper longeron in each inner nacelle are installed, and modification of the upper longerons, if necessary.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the two comments received.

Both commenters support the proposed rule.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

The FAA estimates that 4 de Havilland Model DHC–7 series airplanes of U.S. registry will be affected by this AD, that it will take approximately 1 work hour per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. The cost of parts will be negligible. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $220, or $55 per airplane. This total cost figure assumes that no operator has yet accomplished the requirements of this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT

Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92-27-03. De Havilland, Inc.: Amendment 39-8436. Docket 92-NM-158-AD.

Applicability: Model DHC-7 series airplanes; serial numbers 1 through 7, inclusive, and 9, 10, and 11; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent reduced structural integrity of the engine nacelles, accomplish the following:

(a) Within 6 months after the effective date of this AD, conduct an inspection to determine whether rivets that secure the upper longerons in each inner engine nacelle have been installed, in accordance with de Havilland Service Bulletin 7-54-9, dated February 29, 1980.

(1) If any rivets are missing, prior to further flight, accomplish Modification No. 7/1707, in accordance with the service bulletin.

(2) If all rivets are detected, no further action is required by this AD.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, New York Aircraft Certification Office (ACO), ANE-170, FAA, Engine and Propeller Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, New York ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the New York ACO.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The inspection and modification shall be done in accordance with de Havilland Service Bulletin 7-54-9, dated February 29, 1980. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from de Havilland, Inc., Garrett Boulevard, Downsview, Ontario M3K 1Y5, Canada. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, New England Region, New York Aircraft Certification Office, 181 South Franklin Avenue, room 202, Valley Stream, New York; or at the Office of the Federal Register, 800 North Capitol Street NW., suite 700, Washington, DC.

(e) This amendment becomes effective on January 22, 1993.

Issued in Renton, Washington, on December 7, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92-30713 Filed 12-17-92; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 92-NM-110-AD; Amendment 39-8440; AD 92-27-06]

Airworthiness Directives; McDonnell Douglas Model DC-8 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain McDonnell Douglas Model DC-8 series airplanes, that requires visual and eddy current inspections to detect cracking of the rudder pedals adjuster hub assembly and replacement of the assembly, if necessary. This amendment is prompted by several occurrences of failure of the rudder pedals adjuster hub assembly due to broken detent lugs. The actions specified by this AD are intended to prevent loss of rudder pedals control and reduction of braking capability.

DATES: Effective January 22, 1993.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of January 22, 1993.

ADDRESSES: The service information referenced in this AD may be obtained from McDonnell Douglas Corporation, P.O. Box 1771, Long Beach, California 90846-1771, Attention: Business Unit Manager, Technical Publications—Technical Administrative Support, C1-L5B. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Mike Lee, Aerospace Engineer, Los Angeles Aircraft Certification Office, ANM-122L, FAA, Transport Airplane Directorate, 3229 East Spring Street, Long Beach, California 90806-2425; telephone (310) 988-5325; fax (310) 988-5210.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain McDonnell Douglas Model DC-8 series airplanes was published in the **Federal Register** on June 18, 1992 (57 FR 27200). That action proposed to require visual and eddy current inspections to detect cracking of the rudder pedals adjuster hub assembly and replacement of the assembly, if necessary.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the two comments received.

Both commenters support the proposed rule.

Since issuance of the notice, however, the manufacturer has advised the FAA that it does not have an adequate supply of parts so that replacement, if necessary, can be accomplished on the U.S. fleet within the proposed compliance time of 180 days. Based on this new data, the FAA has determined that an extension of the compliance time to 270 days for the initial inspection of the rudder pedals adjuster hub assembly is appropriate. The FAA has determined that such an extension of the compliance time will not adversely affect safety. The final rule has been revised accordingly.

Paragraph (c) of the final rule has been revised to clarify that replacement rudder pedals adjuster hub assemblies must continue to be inspected in accordance with the requirements of paragraph (a) of the AD (that is, the assembly must be inspected prior to the accumulation of 15,000 landings on the

assembly) and, if no cracks are detected, must be reinspected in accordance with paragraph (b) of the AD (that is, at intervals not to exceed 3,500 landings.) The notice only referenced paragraph (a) with regard to repetitive inspection intervals.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 341 McDonnell Douglas Model DC–8 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 222 airplanes of U.S. registry will be affected by this AD, that it will take approximately 3 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $36,630, or $165 per airplane. This total cost figure assumes that no operator has yet accomplished the requirements of this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92–27–06. McDonnell Douglas: Amendment 39–8440. Docket 92–NM–110–AD.

Applicability: Model DC–8 series airplanes, as listed in McDonnell Douglas DC–8 Alert Service Bulletin A27–275, Revision 1, dated February 3, 1992; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent loss of rudder pedals control and reduction of braking capability, accomplish the following:

(a) Prior to the accumulation of 15,000 landings or within 270 days after the effective date of this AD, whichever occurs later, conduct a visual and eddy current inspection to detect cracks of the rudder pedals adjuster hub assembly, part number 4616066, in accordance with McDonnell Douglas DC–8 Alert Service Bulletin A27–275, Revision 1, dated February 3, 1992.

(b) If no cracks are detected as a result of the inspections required by paragraph (a) of this AD, repeat the inspections at intervals not to exceed 3,500 landings.

(c) If cracks are detected as a result of the inspections required by paragraph (a) or (b) of this AD, prior to further flight, replace the rudder pedals adjuster hub assembly, part number 4616066, with a new assembly having the same part number, in accordance with McDonnell Douglas DC–8 Alert Service Bulletin A27–275, Revision 1, dated February 3, 1992. Thereafter, conduct visual and eddy current inspections of the replacement rudder pedals adjuster hub assembly in accordance with paragraphs (a) and (b) of this AD.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

(e) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(f) The inspections and replacement shall be done in accordance with McDonnell Douglas DC–8 Alert Service Bulletin A27–275, Revision 1, dated February 3, 1992. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from McDonnell Douglas Corporation, P.O. Box 1771, Long Beach, California 90846–1771, Attention: Business Unit Manager, Technical Publications—Technical Administrative Support, C1–L5B. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(g) This amendment becomes effective on January 22, 1993.

Issued in Renton, Washington, on December 9, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[Docket No. 92–NM–86–AD; Amendment 39–8441; AD 92–27–07]

Airworthiness Directives; McDonnell Douglas Model DC–9 and Model DC–9–80 Series Airplanes; Model MD–88 Airplanes; and C–9 (Military) Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to certain McDonnell Douglas Model DC–9 and DC–9–80 series airplanes; Model MD–88 airplanes; and C–9 (military) airplanes. This amendment requires visual and eddy current inspections to detect cracking of the rubber pedals adjuster hub assembly and replacement of the assembly, if necessary. This amendment is promoted by several occurrences of failure of the rudder pedals adjuster hub assembly due to broken detent lugs. The actions specified by this AD are intended to prevent loss of rudder pedals control and reduction of braking capability.

DATES: Effective January 22, 1993.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of January 22, 1993.

ADDRESSES: The service information referenced in this AD may be obtained from McDonnell Douglas Corporation, P.O. Box 1771, Long Beach, California 90846–1771, Attention: Business Unit Manager, Technical Publications—Technical Administrative Support, C1–L5B. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Mike Lee, Aerospace Engineer, Los Angeles Aircraft Certification Office, ANM–122L, FAA, Transport Airplane Directorate, 329 East Spring Street, Long Beach, California 90806–2425; telephone (310) 988–5325; fax (310) 988–5210.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain McDonnell Douglas Model DC–9 and DC–9–80 series airplanes, Model MD–88 airplanes, and C–9 (Military) series airplanes was published in the **Federal Register** on June 18, 1992 (57 FR 27199). That action proposed to require visual and eddy current inspections to detect cracking of the rudder pedals adjuster hub assembly and replacement of the assembly, if necessary.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter supports the rule as proposed.

Several commenters request that the proposed compliance time of 180 days for the initial visual and eddy current inspection of the rudder pedals adjuster hub assembly be extended, for a variety of reasons:

One commenter requests that the compliance time be extended to 3,500 landings or 1 year, whichever occurs later. This commenter's entire fleet has accumulated in excess of 15,000 landings and would be required to accomplish the initial inspection within 180 days after the effective date of this AD. To do so would require that this commenter schedule numerous airplanes for the initial inspection and/or repair at places other than regular maintenance bases, where necessary equipment and trained personnel may not be available. The commenter considers this request to be justified since there have been no failures of the rudder pedals adjuster hub assembly on airplanes in its fleet.

Several other commenters are concerned about the possibility that sufficient replacement parts will be available, and request that the compliance time for inspections be extended. The commenters state that airplanes will be grounded if replacement of a lug or hub assembly is required within the proposed compliance time of 180 days and no replacement components are available.

The FAA concurs that the compliance time may be extended somewhat. Since issuance of the notice, the manufacturer has advised the FAA that it does not have an adequate supply of parts so that replacement, if necessary, could be accomplished on the U.S. fleet within the proposed compliance time of 180 days. Based on this new data, the FAA has determined that an extension of the compliance time to 270 days for the initial inspection is appropriate. Such an extension (1) will not adversely affect safety, (2) will allow the majority of affected operators sufficient time to schedule and accomplish the initial inspection and any necessary replacement during a regularly scheduled maintenance interval; and (3) will allow sufficient time for the manufacturer to procure a sufficient number of replacement parts.

Another commenter requests that this AD be delayed until such time that a terminating modification is available to operators. Since such a modification would terminate the requirement for repetitive inspections, the commenter asserts that delay of this AD will be a considerable cost and time savings for operators. The FAA does not concur. In its response to commenters, above, the FAA has already extended the compliance time for this AD by three additional months (in effect, delaying the AD for three months). The FAA has determined that any further delay of this AD is not warranted. The degradation of safety due to the unsafe condition outweighs any cost savings operators may incur if this AD is further delayed. The FAA has determined that the required inspections must be conducted in order to ensure continued safety. Once a terminating modification is developed and approved, the FAA may consider further rulemaking action at that time.

Paragraph (c) of the final rule has been revised to clarify that replacement rudder pedals adjuster hub assemblies must continue to be inspected in accordance with the requirements of paragraph (a) of the AD (that is, the assembly must be inspected prior to the accumulation of 15,000 landings on the assembly) and, if no cracks are detected, must be reinspected in accordance with paragraph (b) of the AD (that is, at intervals not to exceed 3,500 landings.) The notice only referenced paragraph (a) with regard to the repetitive inspection intervals.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 721 McDonnell Douglas Model DC–9 and Model DC–9–80 series airplanes, Model MD–88 airplanes, and C–9 (military) airplanes of the affected design in the worldwide fleet. The FAA estimates that 373 airplanes of U.S. registry will be affected by this AD, that it will take approximately 3 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $61,545, or $165 per airplane. This total cost figure assumes that no operator has yet accomplished the requirements of this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "**ADDRESSES.**"

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92-27-07. McDonnell Douglas: Amendment 39-8441. Docket 92-NM-86-AD.

Applicability: Model DC-9-10, -20, -30, -40, and -50 series airplanes; Model DC-9-81, -82, -83, and -87 series airplanes; Model MD-88 airplanes; and C-9 (Military) airplanes; as listed in McDonnell Douglas DC-9 Alert Service Bulletin A27-325, Revision 1, dated February 3, 1992; certified in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent loss of rudder pedals control and reduction of braking capability, accomplish the following:

(a) Prior to the accumulation of 15,000 landings or within 270 days after the effective date of this AD, whichever occurs later, conduct a visual and eddy current inspection to detect cracks of the rudder pedals adjuster hub assembly, part number 4616066, in accordance with McDonnell Douglas DC-9 Alert Service Bulletin A27-325, Revision 1, dated February 3, 1992.

(b) If no cracks are detected as a result of the inspections required by paragraph (a) of this AD, repeat the inspections at intervals not to exceed 3,500 landings.

(c) If cracks are detected as a result of the inspections required by paragraph (a) or (b) of this AD, prior to further flight, replace the rudder pedals adjuster hub assembly, part number 4616066, with a new assembly having the same part number, in accordance with McDonnell Douglas DC-9 Alert Service Bulletin A27-325, Revision 1, dated February 3, 1992. Thereafter, conduct visual and eddy current inspections of the replacement rudder pedals adjuster hub assembly in accordance with paragraph (a) and (b) of this AD.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

(e) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(f) The inspections and replacement shall be done in accordance with McDonnell Douglas DC-9 Alert Service Bulletin A27-325, Revision 1, dated February 3, 1992. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from McDonnell Douglas Corporation, P.O. Box 1771, Long Beach, California 90846-1771, Attention: Business Unit Manager, Technical Publications—Technical Administrative Support, C1-L5B. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW, Renton, Washington; or at the FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(g) This amendment becomes effective on January 22, 1993.

Issued in Renton, Washington, on December 9, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92-30719 Filed 12-17-92; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 92-NM-212-AD; Amendment 39-8439; AD 92-24-51]

Airworthiness Directives; Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This document publishes in the Federal Register an amendment adopting Airworthiness Directive (AD) T92-24-51 that was sent previously to all known U.S. owners and operators of Boeing Model 747 series airplanes by individual telegrams. This AD supersedes an existing AD to require the replacement of certain nacelle strut midspar fuse pins, and inspections to detect corrosion and cracks of certain other fuse pins. This AD also decreases the initial inspection threshold and adds airplanes to the applicability of the AD. This amendment is prompted by numerous reports of corrosion and fatigue cracking found in the subject fuse pins. The actions specified by this AD are intended to prevent failure of the engine support structure and the inability of the strut to carry required engine support loads.

DATES: Effective January 4, 1993, to all persons except those persons to whom it was made immediately effective by telegraphic AD T92-24-51, issued November 13, 1992, which contained the requirements of this amendment.

Incorporation by reference of Boeing Service Bulletin 747-54-2063, Revision 9, dated April 23, 1992, was approved previously by the Director of the Federal Register as of November 27, 1992 (57 FR 53546, November 12, 1992).

The incorporation by reference of Boeing Alert Service Bulletin 747-54A2150, Revision 1, dated November 13, 1992, is approved by the Director of the Federal Register as of January 4, 1993.

Comments for inclusion in the Rules Docket must be received on or before February 16, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-212-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056.

The applicable service information may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124-2207. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Tim Backman, Aerospace Engineer, Airframe Branch, ANM-120S, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055-4056; telephone (206) 227-2776; fax (206) 227-1181.

SUPPLEMENTARY INFORMATION: On November 13, 1992, the FAA issued telegraphic AD T92-24-51, applicable to all Boeing Model 747 series airplanes, which supersedes AD 92-21-51 R1, Amendment 39-8414 (57 FR 53546, November 12, 1992).

The FAA previously issued AD 92-21-51 R1 on November 4, 1992. That AD was applicable to certain Boeing Model 747 series airplanes, and required:

1. Repetitive ultrasonic inspections to detect cracks in the "old style" nacelle strut midspar fuse pins, and replacement of the pins, if necessary;

2. Repetitive inspections of the "new style" fuse pins to detect cracks and corrosion, and rework or replacement of the pins, if necessary;

3. Repetitive detailed visual inspections of the midspar fitting lugs to detect cracks, and repair or replacement of any cracked lugs found; and

4. The submission of written reports to the FAA of all findings of cracks or corrosion as a result of initial inspections.

That AD action was prompted by 14 reports of fatigue cracks initiating at corrosion sites on the inside diameter of new style fuse pins at the pin insert on airplanes equipped with Pratt and Whitney and Rolls Royce engines. In addition, results of an inspection revealed a crack in a midspar fitting lug.

The actions required by that AD were intended to prevent failure of the engine support structure and the inability of the strut to carry the required engine support loads.

As a result of the reporting requirement of AD 92-21-51 R1, the FAA has received numerous reports of corrosion and 13 additional reports of fatigue cracking in new style fuse pins. The FAA has received reports of heavy corrosion found on fuse pins that were in service fewer than five years (approximately 5,000 landings). Therefore, the FAA has determined that the existing initial inspection threshold of 5,000 landings must be reduced in order to detect corrosion and cracking in a timely manner.

Recently, one operator reported that the ultrasonic inspection procedures required by AD 92-21-51 R1 failed to detect a crack in the presence of heavy corrosion. That AD requires removing one fuse pin insert and performing a visual inspection to detect corrosion, followed by an ultrasonic inspection to detect cracks. Due to the presence of heavy corrosion, the operator removed the fuse pin itself to perform the visual inspection to detect cracking in the corroded area. Subsequently, the operator and Boeing performed ultrasonic inspections of the fuse pin prior to removal of the corrosion; these inspections failed to detect cracking in the corroded area. From this data, the FAA concludes that the ultrasonic inspection procedure, as required by AD 92-21-51 R1, does not detect cracks reliably when corrosion is present. Since that AD requires inspection of the fuse pin from only one end, the possibility exists for corrosion or cracks to remain undetected in the other end of the pin. Therefore, the FAA has determined that it is necessary to correct this unsafe condition by requiring a detailed visual inspection to detect corrosion and, following the removal of any corrosion, an ultrasonic inspection to detect cracks from each end of the pin with both inserts removed.

Additionally, the FAA recently received a report of a cracked old style fuse pin that was found on a Model 747 series airplane that had accumulated 257 flight cycles since the last inspection of the fuse pins. These fuse pins were installed on earlier Model 747 series airplanes. Service data show that these old style fuse pins are even more susceptible to cracking than the new style fuse pins. Therefore, the FAA has determined that the old style fuse pins must be removed from service.

Fatigue cracks in the nacelle strut midspar fuse pins, if not detected and corrected, could result in failure of the engine support structure and the consequent inability of the strut to carry the required engine support loads.

(It should be noted that investigations related to two recent accidents, both of which involved Model 747-200 freighter airplanes, are continuing. These accidents occurred in Amsterdam in October 1992 and in Taiwan in December 1991. No determination has been made that cracking of the fuse pins was the cause of either accident.)

The FAA has reviewed and approved Boeing Alert Service Bulletin 747-54A2150, Revision 1, dated November 13, 1992, that describes procedures for detailed visual inspections to detect corrosion and ultrasonic inspections to detect cracks of the new style fuse pins at both ends of the fuse pin, and replacement or rework of the pins, if necessary.

The fuse pins installed on the nacelle struts of Model 747 series airplanes equipped with General Electric engines are identical to those installed on Pratt and Whitney and Rolls Royce engines. In view of the widespread findings of corrosion and cracks on fuse pins installed on other types of engines, the FAA finds that this condition is likely to exist as well on airplanes equipped with General Electric engines.

Since the unsafe condition described is likely to exist or develop on other airplanes of the same type design, the FAA issued Telegraphic AD T92-24-51 on November 13, 1992, the requirements of which are intended to prevent failure of the nacelle strut midspar fuse pins. This AD is applicable to all Model 747 series airplanes, regardless of engine type. This AD supersedes AD 92-21-51 R1 to require removal of the old style nacelle strut midspar fuse pins and replacement of these fuse pins with new style fuse pins.

This AD also requires detailed visual inspections to detect corrosion and ultrasonic inspections to detect cracks of the new style fuse pins at both ends of the fuse pin, and replacement or rework, if necessary. These inspections are required to be accomplished in accordance with the service bulletin described previously.

This AD also decreases the initial inspection threshold from that specified in the existing AD and adds airplanes equipped with General Electric engines to the applicability of the AD.

It should be noted that repetitive ultrasonic inspections of the midspar fitting lugs are required currently by AD 85-22-07, Amendment 39-5153 (50 FR 42146, October 18, 1985). Inspecting these lugs using ultrasonic techniques, rather than the detailed visual techniques required by AD 92-21-51 R1, will detect cracking of the lugs more reliably. Consequently, the FAA has not included a requirement for detailed visual inspections of the lugs in this AD. The FAA may consider further rulemaking to address inspections of the lugs.

Since it was found that immediate corrective action was required, notice and opportunity for prior public comment thereon were impracticable and contrary to the public interest, and good cause existed to make the AD effective immediately by individual telegrams issued on November 13, 1992, to all known U.S. owners and operators of Boeing Model 747 series airplanes. These conditions still exist, and the AD is hereby published in the **Federal Register** as an amendment to section 39.13 of part 39 of the Federal Aviation Regulations (FAR) to make it effective to all persons.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES**. All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92–NM–212–AD." The postcard will be date stamped and returned to the commenter.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows: Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39–8414 (57 FR 53546, November 12, 1992), and by adding a new airworthiness directive (AD), to read as follows:

92–24–51. BOEING: Amendment 39–8439. Docket 92–NM–212–AD. Supersedes AD 92–21–51 R1, Amendment 39–8414.

Applicability: All Model 747 series airplanes, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

Note: Paragraphs (d) and (f) of this AD require inspections from both ends of the nacelle strut midspar fuse pins, whereas AD 92–21–51 R1, Amendment 39–8414 (57 FR 53546, November 12, 1992), which is superseded by this AD, required inspection from only one end of the fuse pins. As allowed by the phrase, "unless accomplished previously," paragraphs (d) and (f) of this AD do not require that the inspections performed previously from one end of the fuse pins in accordance with AD 92–21–51 R1 be repeated. For those fuse pins, only the end of the fuse pin not inspected previously must be inspected to comply with the initial inspection requirements of this AD.

To prevent failure of the nacelle strut midspar fuse pins, accomplish the following:

(a) Within 30 days after the effective date of this AD, remove all old style nacelle strut midspar fuse pins and replace with new style fuse pins, in accordance with Boeing Service Bulletin 747–54–2063, Revision 9, dated April 23, 1992. When an old style fuse pin is removed, the engine must be removed in accordance with the Boeing Model 747 Maintenance Manual, section 54–10–03; or supported in accordance with the service bulletin; or supported in a manner approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

(b) As of 30 days after the effective date of this AD, no person shall install an old style nacelle strut midspar fuse pin on any airplane.

(c) Perform the inspection required by paragraph (d) of this AD at the times specified in paragraph (c)(1), (c)(2), or (c)(3) of this AD, as applicable.

(1) For airplanes equipped with Pratt and Whitney or Rolls Royce engines on which the new style nacelle strut midspar fuse pins have accumulated 5,000 or more landings as of the effective date of this AD: Inspect inboard engine positions 2 and 3 within 30 days after the effective date of this AD; and inspect outboard engine positions 1 and 4 within 60 days after the effective date of this AD.

(2) For all other airplanes equipped with Pratt and Whitney, Rolls Royce, or General Electric engines having new style nacelle strut midspar fuse pins, other than those identified in paragraph (c)(1) of this AD: Inspect inboard engine positions 2 and 3 at the later of the times specified in paragraph (c)(2)(i) or (c)(2)(ii) of this AD.

(i) Prior to the accumulation of 3,000 landings on the fuse pin or within 3 years since installation of the fuse pin, whichever occurs first; or

(ii) Within 60 days after the effective date of this AD.

(3) For all other airplanes equipped with Pratt and Whitney, Rolls Royce, or General Electric engines having new style nacelle strut midspar fuse pins, other than those identified in paragraph (c)(1) of this AD: Inspect outboard engine positions 1 and 4 at the later of the times specified in paragraph (c)(3)(i) or (c)(3)(ii) of this AD:

(i) Prior to the accumulation of 3,000 landings on the fuse pin or within 3 years since installation of the fuse pin, whichever occurs first; or

(ii) Within 90 days after the effective date of this AD.

(d) In accordance with the compliance times specified in paragraph (c) of this AD, perform a detailed visual inspection to detect corrosion of the new style nacelle strut midspar fuse pins from each end of the fuse pin with the insert removed, in accordance with Boeing Alert Service Bulletin 747–54A2150, Revision 1, dated November 13, 1992. When a new style fuse pin is removed, the engine must be removed in accordance with the Boeing Model 747 Maintenance Manual, Section 54–10–03; or supported in accordance with the service bulletin; or supported in a manner approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

(e) If corrosion is detected as a result of the inspection required by paragraph (d) of this AD, prior to further flight, accomplish the following:

(1) If the amount of corroded material that must be removed exceeds the 0.010-inch limit on the fuse pin inner diameter specified in the service bulletin, replace the fuse pin with a new style fuse pin. Thereafter, accomplish the actions required by this AD on the newly-installed fuse pins.

(2) If the amount of corroded material that must be removed is more than light, and equal to or less than the 0.010-inch limit on the fuse pin inner diameter specified in the service bulletin, rework the fuse pin in accordance with the service bulletin instructions, or replace the pin with a new style fuse pin. "Light" corrosion is characterized by discoloration or pitting to a depth of not more than 0.001-inch maximum. This type of corrosion can be removed normally by light hand sanding. A fuse pin that has been reworked in accordance with Boeing Alert Service Bulletin 747–54A2150, dated October 5, 1992; or Revision 1, dated November 13, 1992, must be replaced with a new fuse pin prior to the accumulation of 3,000 landings on the fuse pin, or 3 years since the pin was reworked and reinstalled, whichever occurs first.

(3) If the corrosion is light, remove the corroded material in accordance with the service bulletin. Thereafter, repeat the inspections required by paragraph (h) of this AD.

(f) Following accomplishment of the actions required by paragraphs (d) and (e) of this AD, if the fuse pin has been found to be corrosion free, or if the pin has been reworked on the airplane to remove light corrosion, prior to further flight, perform an ultrasonic inspection to detect cracks in the fuse pin from each end of the fuse pin with the insert removed, in accordance with Boeing Alert Service Bulletin 747–54A2150, Revision 1, dated November 13, 1992. When a new style fuse pin is removed, the engine must be removed in accordance with the Boeing Model 747 Maintenance Manual, section 54–10–03; or supported in accordance with the service bulletin; or supported in a manner approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

(g) If any crack is found as a result of the inspections required by paragraph (d) or (f) of this AD, prior to further flight, replace the pin with a new style fuse pin in accordance with Boeing Alert Service Bulletin 747–54A2150, Revision 1, dated November 13, 1992. Thereafter, accomplish the actions required by this AD on the newly-installed fuse pins.

(h) Thereafter, repeat the actions required by paragraphs (d), (e), (f), and (g) of this AD at intervals not to exceed 500 landings.

(i) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(j) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(k) The inspections, replacement, and rework shall be done in accordance with Boeing Alert Service Bulletin 747–54A2150, Revision 1, dated November 13, 1992; and Boeing Service Bulletin 747–54–2063, Revision 9, dated April 23, 1992; as applicable. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Incorporation by reference of Boeing Service Bulletin 747–54–2063, Revision 9, dated April 23, 1992, was approved previously by the Director of the Federal Register as of November 27, 1992 (57 FR 53546, November 12, 1992). Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(l) This amendment becomes effective on January 4, 1993, to all persons except those persons to whom it was made immediately effective by telegraphic AD T92–24–51, issued on November 13, 1992, which contained the requirements of this amendment.

Issued in Renton, Washington, on December 9, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–M

---

14 CFR Part 39

[Docket No. 92–NM–228–AD; Amendment 39–8442; AD 92–27–08]

Airworthiness Directives; Cessna Citation Model 650 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to certain Cessna Citation Model 650 series airplanes. This action requires a one-time inspection of the inboard attach fittings of the elevator torque tubes to detect cracking and to determine the thickness of the wall of the fitting; and the replacement of the fittings, if necessary. This amendment is prompted by a report indicating that a single inboard attach fitting on an elevator torque tube was found cracked. The actions specified in this AD are intended to prevent potential loss of elevator control.

DATES: Effective January 4, 1993.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of January 4, 1993.

Comments for inclusion in the Rules Docket must be received on or before February 16, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 92–NM–228–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

The service information referenced in this AD may be obtained from Cessna Aircraft Company, Citation Marketing Division, P.O. Box 7706, Wichita, Kansas 67277. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Wichita Aircraft Certification Office, 1801 Airport Road, room 100, Mid-Continent Airport, Wichita, Kansas; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Douglas Haig, Aerospace Engineer, Airframe Branch, ACE–120W, FAA, Wichita Aircraft Certification Office, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209; telephone (316) 946–4125; fax (316) 946–4407.

SUPPLEMENTARY INFORMATION: Recently, the manufacturer found a cracked inboard attach fitting of the elevator torque tube, while installing a modification on a Cessna Citation Model 650 series airplane. The cause of this cracking has been attributed to insufficient thickness in the wall of the inboard attach fitting of the elevator torque tube. The discrepant part was installed at the time of manufacture of the airplane; however, the manufacturer subsequently purged all discrepant parts from its stock. Inboard attach fittings of the elevator torque tube with appropriate thickness in the wall have been installed on airplanes having serial numbers –0220 and subsequent, and –7014 and subsequent. Cracked attach fittings, if not detected and corrected in a timely manner, could lead to failure of the fitting and consequent loss of elevator control.

The FAA has reviewed and approved Cessna Citation Alert Service Letter A650–27–30, dated November 12, 1992, that describes procedures for inspection to determine the minimum material wall thickness of the inboard attach fittings of the elevator torque tube, and the replacement of the fittings, if necessary.

Since an unsafe condition has been identified that is likely to exist or develop on other Cessna Citation Model 650 series airplanes of the same type design, this AD is being issued to prevent the potential loss of elevator control. This AD requires a one-time inspection of the inboard attach fittings of the elevator torque tube to detect cracking and to determine the thickness of the wall of the fitting; and replacement of the fittings, if necessary. The actions are required to be accomplished in accordance with the alert service letter described previously.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for prior public comment hereon are impracticable, and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements

affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption "ADDRESSES." All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92–NM–228–AD." The postcard will be date stamped and returned to the commenter.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92–27–08. Cessna: Amendment 39–8442. Docket 92–NM–228–AD.

Applicability: Citation Model 650 series airplanes, having serial numbers –0001 thru –0219, inclusive, and –7001 thru –7013, inclusive; certificated in any category.

Compliance: Required as indicated, unless accomplished previously. To prevent the potential loss of elevator control, accomplish the following:

(a) Within 25 hours time-in-service after the effective date of this AD: Perform an inspection of the inboard attach fittings of the left-hand and right-hand elevator torque tubes to determine minimum material wall thickness in accordance with Cessna Citation Alert Service Letter A650–27–30, dated November 12, 1992; and perform a visual inspection of the fittings to detect cracking.

(1) If the material thickness of the inboard attach fitting, at all locations, is 0.045 inch or thicker, and if no cracked fitting is found, no further action is required by this AD.

(2) If the material thickness of the inboard attach fitting, at any location, is equal to or greater than 0.040 inch but less than 0.045 inch, and if no cracked fitting is found, within 150 flight hours, replace the inboard attach fitting in accordance with the service letter.

(3) If the material thickness of the inboard attach fitting, at any location, is thinner than 0.040 inch, or if a cracked fitting is found, prior to further flight, replace the fitting with a fitting having part number 6234132–8, in accordance with the service letter.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Wichita Aircraft Certification Office (ACO), FAA, Small Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Wichita ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Wichita ACO.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The inspection and replacement shall be done in accordance with Cessna Citation Alert Service Letter A650–27–30, dated November 12, 1992. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Cessna Aircraft Company, Citation Marketing Division, P.O. Box 7706, Wichita, Kansas 67277. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at FAA, Wichita Aircraft Certification Office, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(e) This amendment becomes effective on January 4, 1993.

Issued in Renton, Washington, on December 9, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92–30701 Filed 12–17–92; 8:45 am]

BILLING CODE 4910–13–M

DEPARTMENT OF COMMERCE

Bureau of Export Administration

15 CFR Parts 778 and 799

[Docket No. 920817–2217]

Revisions to the Commerce Control List: Chemical Precursors, Microorganisms and Toxins

AGENCY: Bureau of Export Administration, Commerce.

ACTION: Interim rule.

SUMMARY: The Bureau of Export Administration maintains the Commerce Control List (CCL), which appears in the Export Administration Regulations (EAR). This rule amends the CCL by revising Export Control Classification Numbers (ECCNs) 1C60C and 1C61B. These ECCNs control dual-use items that can be used in the production of chemical and biological weapons (CBW). The changes made by

this rule are intended to conform the list of CBW related items controlled by the United States to the lists of items agreed to and adopted by countries participating in the Australia Group.

DATES: This rule is effective December 18, 1992. Comments must be received by January 19, 1993.

ADDRESSES: Written comments (six copies) should be sent to Patricia Muldonian, Office of Technology and Policy Analysis, Bureau of Export Administration, Department of Commerce, P.O. Box 273, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: For questions on foreign policy controls, call Toni Jackson, Office of Technology and Policy Analysis, Bureau of Export Administration, telephone: (202) 482–4531.

For questions of a technical nature on chemical weapon precursors, biological agents, and equipment that can be used to produce chemical and biological weapons agents, call James Seevaratnam, Office of Technology and Policy Analysis, Bureau of Export Administration, telephone: (202) 482–4777.

SUPPLEMENTARY INFORMATION:

Background

This interim rule amends ECCN 1C60C by adding four chemical precursors to the list of items controlled: Sulfur monochloride (C.A.S. #10025–67–9), sulfur dichloride (C.A.S. #10545–99–0), N,N-Diisopropyl-2-aminoethyl chloride hydrochloride (C.A.S. #4261–68–1), and triethanolamine hydrochloride (C.A.S. #637–39–8). These items are added to ECCN 1C60C in order to conform the list of chemical precursors controlled by the United States with the list of chemical precursors adopted by the countries participating in the Australia Group. The twenty-two member Australia Group, in which the United States participates, seeks to prevent the proliferation of chemical and biological weapons.

Exports and reexports of chemical precursors controlled by ECCN 1C60C require an individual validated license to all destinations, except countries participating in the Australia Group or NATO. In addition to the United States and Canada, the countries participating in the Australia Group include: Australia, Austria, Belgium, Denmark, Germany, Finland, France, Greece, Ireland, Italy, Japan, Luxembourg, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom. Prior to the publication of this interim rule, exports and reexports to Finland or Sweden of chemical precursors controlled by ECCN 1C60C required an individual validated license. This interim rule removes the individual validated license requirement for Finland and Sweden, since both countries now participate in the Australia Group.

This rule also amends ECCN 1C61B to add the following microorganisms that the delegates at the June 1992 meeting of the Australia Group agreed to adopt, subject to approval by their governments:

(1) *Viruses:* African swine fever virus, avian influenza virus, bluetongue virus, foot and mouth disease virus, goat pox virus, herpes virus (Aujeszky's disease), hog cholera virus, Newcastle disease virus, peste des petits ruminants virus, porcine enterovirus type 9, rinderpest virus, sheep pox virus, teschen disease virus, and vesicular stomatitis virus;

(2) *Bacteria:* Mycoplasma mycoides, pseudomonas solanacerum, xanathonomas campestris pv citri, and xanthomonas campestris pv oryzae;

(3) *Fungi:* Heliminthosporium maydis, heliminthosprium oryzae, puccinia glumarum, puccinia graminis, puccinia striiformis, pyricularia grisea, and ustilago maydis.

(4) *Genetically modified microorganisms:* (a) Genetically modified micro-organisms or genetic elements that contain nucleic acid sequences associated with pathogenicity and are derived from organisms identified in the Commerce Control List (CCL);

(b) Genetically modified micro-organisms or genetic elements that contain nucleic acid sequences associated with pathogenicity derived from plant pathogens identified in the Commerce Control List (CCL).

Exports and reexports of microorganisms and toxins controlled by 1C61B require an individual validated license to all destinations except Canada.

The additions to ECCN 1C61B made by this interim rule follow a total revision of this entry by an interim rule published on July 15, 1992 (57 FR 31309). That interim rule revised ECCN 1C61B to provide a positive list of viruses, rickettsiae, bacteria, genetically modified organisms, and toxins. The changes made by the July 15, 1992, interim rule marked the first time the Australia Group had agreed in principle to establish multilateral export controls on biological items. The Administration has been working in cooperation with participating governments in the Australia Group to establish multilateral controls on CBW related items.

Savings Clause

Shipments of items removed from general license authorizations as a result of this regulatory action that were on dock for loading, on lighter, laden aboard an exporting carrier, or en route aboard carrier to a port of export pursuant to actual orders for export before January 4, 1993 may be exported under the previous general license provisions up to and including January 19, 1993. Any such items not actually exported before midnight January 19, 1993, require a validated export license in accordance with this regulation.

Rulemaking Requirements

1. This rule is consistent with Executive Orders 12291 and 12661.

2. This rule involves collections of information subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). These collections have been approved by the Office of Management and Budget under control numbers 0694–0005 and 0694–0010.

3. This rule does not contain policies with Federalism implications sufficient to warrant preparation of a Federalism assessment under Executive Order 12612.

4. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by section 553 of the Administrative Procedure Act (5 U.S.C. 553) or by any other law, under sections 3(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a) and 604(a)) no initial or final Regulatory Flexibility Analysis has to be or will be prepared.

5. The provisions of the Administrative Procedure Act (5 U.S.C. 553), requiring notice of proposed rulemaking, the opportunity for public participation, and a delay in effective date, are inapplicable because this regulation involves a military or foreign affairs function of the United States. No other law requires that a notice of proposed rulemaking and an opportunity for public comment be given for this rule.

However, because of the importance of the issues raised by these regulations, this rule is issued in interim form and comments will be considered in the development of final regulations. Accordingly, the Department encourages interested persons who wish to comment to do so at the earliest possible time to permit the fullest consideration of their views.

The period for submission of comments will close January 19, 1993. The Department will consider all comments received before the close of the comment period in developing final

regulations. Comments received after the end of the comment period will be considered if possible, but their consideration cannot be assured. The Department will not accept public comments accompanied by a request that a part or all of the material be treated confidentially because of its business proprietary nature or for any other reason. The Department will return such comments and materials to the person submitting the comments and will not consider them in the development of final regulations. All public comments on these regulations will be a matter of public record and will be available for public inspection and copying. In the interest of accuracy and completeness, the Department requires comments in written form.

Oral comments must be followed by written memoranda, which will also be a matter of public record and will be available for public review and copying. Communications from agencies of the United States Government or foreign governments will not be made available for public inspection.

The public record concerning these regulations will be maintained in the Bureau of Export Administration Freedom of Information Records Inspection Facility, room 4525, Department of Commerce, 14th Street and Pennsylvania Avenue, NW., Washington, DC 20230. Records in this facility, including written public comments and memoranda summarizing the substance of oral communications, may be inspected and copied in accordance with regulations published in part 4 of title 15 of the Code of Federal Regulations. Information about the inspection and copying of records at the facility may be obtained from Margaret Cornejo, Bureau of Export Administration Freedom of Information Officer, at the above address or by calling (202) 482–5653.

List of Subjects

15 CFR Part 778

Exports, Nuclear energy, Reporting and recordkeeping requirements.

15 CFR Part 799

Exports, Reporting and recordkeeping requirements.

Accordingly, parts 778 and 799 of the Export Administration Regulations (15 CFR parts 730–799) are amended as follows:

1. The authority citation for 15 CFR part 778 continues to read as follows:

Authority: Pub. L. 90–351, 82 Stat. 197 (18 U.S.C. 2510 *et seq.*), as amended; Pub. L. 95–223, 91 Stat. 1626 (50 U.S.C. 1701 *et seq.*); Pub. L. 95–242, 92 Stat. 120 (22 U.S.C. 3201 *et seq.* and 42 U.S.C. 2139a); Pub. L. 96–72, 93 Stat. 503 (50 U.S.C. App. 2401 *et seq.*), as amended; E.O. 12002 of July 7, 1977 (42 FR 35623, July 7, 1977), as amended; E.O. 12058 of May 11, 1978 (43 FR 20947, May 16, 1978; E.O. 12214 of May 2, 1980 (45 FR 29783, May 6, 1980); E.O. 12730 of September 30, 1990 (55 FR 40373, October 2, 1990), as continued by Notice of September 26, 1991 (56 FR 49385, September 27, 1991); and E.O. 12735 of November 16, 1990 (55 FR 48587, November 20, 1990), as continued by Notice of November 14, 1991 (56 FR 58171, November 15, 1991).

2. The authority citation for 15 CFR part 799 continues to read as follows:

Authority: Pub. L. 90–351, 82 Stat. 197 (18 U.S.C. 2510 *et seq.*), as amended; sec. 101, Pub. L. 93–153, 87 Stat. 576 (30 U.S.C. 185), as amended; sec. 103, Pub. L. 94–163, 89 Stat. 877 (42 U.S.C. 6212), as amended; secs. 201 and 201(11)(e), Pub. L. 94–258, 90 Stat. 309 (10 U.S.C. 7420 and 7430(e)), as amended; Pub. L. 95–223, 91 Stat. 1626 (50 U.S.C. 1701 *et seq.*); Pub. L. 95–242, 92 Stat. 120 (22 U.S.C. 3201 *et seq.* and 42 U.S.C. 2139a); sec. 208, Pub. L. 95–372, 92 Stat. 668 (43 U.S.C. 1354); Pub. L. 96–72, 93 Stat. 503 (50 U.S.C. App. 2401 *et seq.*), as amended; sec. 125, Pub. L. 99–64, 99 Stat. 156 (46 U.S.C. 466c); E.O. 11912 of April 13, 1976 (41 FR 15825, April 15, 1976); E.O. 12002 of July 7, 1977 (42 FR 35623, July 7, 1977), as amended; E.O. 12058 of May 11, 1978 (43 FR 20947, May 16, 1978; E.O. 12214 of May 2, 1980 (45 FR 29783, May 6, 1980); E.O. 12730 of September 30, 1990 (55 FR 40373, October 2, 1990), as continued by Notice of September 26, 1991 (56 FR 49385, September 27, 1991); and E.O. 12735 of November 16, 1990 (55 FR 48587, November 20, 1990), as continued by Notice of November 14, 1991 (56 FR 58171, November 15, 1991).

PART 778—[AMENDED]

3. Section 778.8 is amended:

a. By revising paragraph (a)(1) introductory text;

b. By revising paragraph (a)(5)(i);

c. By revising paragraph (a)(5)(iv)(B); and

d. By revising paragraph (a)(5)(v), to read as follows:

§ 778.8 Chemical precursors and biological agents, and associated equipment, software, and technology.

(a) * * *

(1) Chemicals identified in ECCN 1C60 require a validated license for export from the United States to all destinations except Australia, Austria, Belgium, Canada, Denmark, the Federal Republic of Germany, Finland, France, Greece, Iceland, Ireland, Italy, Japan, Luxembourg, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and the United Kingdom.

* * * * *

(5) * * *

(i) General License GTDR is not available for technical data for the production of chemical precursors described in paragraph (a)(1) of this section, except to Australia, Austria, Belgium, Canada, Denmark, the Federal Republic of Germany, Finland, France, Greece, Iceland, Ireland, Italy, Japan, Luxembourg, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and the United Kingdom;

* * * * *

(iv) * * *

(B) This prohibition on use of General License GTDR is available only to Australia, Austria, Belgium, Canada, Denmark, the Federal Republic of Germany, Finland, France, Greece, Iceland, Ireland, Italy, Japan, Luxembourg, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and the United Kingdom;

(v) General License GTDR is available only to Australia, Austria, Belgium, Canada, Denmark, the Federal Republic of Germany, Finland, France, Greece, Iceland, Ireland, Italy, Japan, Luxembourg, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and the United Kingdom, for software for process control that is specifically configured to control or initiate the production of chemical weapons precursors controlled by ECCN 1C60.

* * * * *

PART 799—[AMENDED]

Supplement No. 1 to § 799.1 [Amended]

4. In Supplement No. 1 to § 799.1, Category 1, ECCN 1C60C is revised to read as follows:

1C60C Precursor and intermediate chemicals used in the production of chemical warfare agents.

Requirements

Validated License Required: QSTVWYZ, *except* Australia, Austria, Belgium, Denmark, Germany, Finland, France, Greece, Iceland, Ireland, Italy, Japan, Luxembourg, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and the United Kingdom.
Unit: Liters or kilograms, as appropriate
Reason for Control: CB
GLV: $0
GCT: No
GFW: No

Notes: 1. *Sample Shipments:* General License G–DEST is available for one sample shipment of a 55-gallon container (209 liters) or less of each chemical to any one consignee per calendar year (not applicable to Iran, Iraq, Syria, Country Groups S and Z, the South

African military and police, or countries subject to an embargo administered by the Department of the Treasury).

2. *Compounds:* General License G–DEST is available, except to Country Groups S and Z and the South African military and police, for compounds that are created from chemicals controlled under this ECCN 1C60C provided that the compound itself is not controlled under this ECCN or another ECCN on the CCL. (Mixtures that contain chemicals controlled under this ECCN are controlled as precursors, except when the precursor chemical is merely an impurity that was not intentionally added or is a normal ingredient in consumer goods intended for retail sales.)

List of Items Controlled

(See Supplement No. 1 to § 799.2, Interpretation 23: Precursor Chemicals, for synonyms for the following chemicals.)

1. (C.A.S. #1341–49–7) Ammonium hydrogen fluoride;
2. (C.A.S. #7784–34–1) Arsenic trichloride;
3. (C.A.S. #76–93–7) Benzilic acid;
4. (C.A.S. #107–07–3) 2-Chloroethanol;
5. (C.A.S. #78–38–6) Diethyl ethylphosphonate;
6. (C.A.S. #15715–41–0) Diethyl methylphosphonite;
7. (C.A.S. #2404–03–7) Diethyl-N,N-dimethylphosphoroamidate;
8. (C.A.S. #762–04–9) Diethyl phosphite;
9. (C.A.S. #100–37–8) N,N-Diethylethanolamine;
10. (C.A.S. #5842–07–9) N,N-Diisopropyl-.beta.-aminoethane thiol;
11. (C.A.S. #4261–68–1) N,N-Diisopropyl-.2.-aminoethyl chloride hydrochloride;
12. (C.A.S. #96–80–0) N,N-Diisopropyl-.beta.-aminoethanol;
13. (C.A.S. #96–79–7) N,N-Diisopropyl-.beta.-aminoethyl chloride;
14. (C.A.S. #108–18–9) Diisopropylamine;
15. (C.A.S. #6163–75–3) Dimethyl ethylphosphonate;
16. (C.A.S. #756–79–6) Dimethyl methylphosphonate;
17. (C.A.S. #868–85–9) Dimethyl phosphite (dimethyl hydrogen phosphite);
18. (C.A.S. #124–40–3) Dimethylamine;
19. (C.A.S. #506–59–2) Dimethylamine hydrochloride;
20. (C.A.S. #57856–11–8) O-Ethyl-2-diisopropylaminoethyl methylphosphonite (QL);
21. (C.A.S. #1498–40–4) Ethylphosphonous dichloride [Ethylphosphinyl dichloride];[1]
22. (C.A.S. #430–78–4) Ethylphosphonous difluoride [Ethylphosphinyl difluoride];[1]
23. (C.A.S. #1066–50–8) Ethylphosphonyl dichloride;
24. (C.A.S. #753–98–0) Ethylphosphonyl difluoride;
25. (C.A.S. #7664–39–3) Hydrogen fluoride;
26. (C.A.S. #3554–74–3) 3-Hydroxyl-1-methylpiperidine;
27. (C.A.S. #76–89–1) Methyl benzilate;
28. (C.A.S. #676–83–5) Methylphosphonous dichloride [Methylphosphinyl dicloride];[1]
29. (C.A.S. #753–59–3) Methylphosphonous difluoride [Methylphosphinyl difluoride];[1]
30. (C.A.S. #676–97–1) Methylphosphonyl dichloride;
31. (C.A.S. #676–99–3) Methylphosphonyl difluoride;
32. (C.A.S. #10025–87–3) Phosphorus oxychloride;
33. (C.A.S. #10026–13–8) Phosphorus pentachloride;
34. (C.A.S. #1314–80–3) Phosphorus pentasulfide;
35. (C.A.S. #7719–12–2) Phosphorus trichloride;
36. (C.A.S. #75–97–8) Pinacolone;
37. (C.A.S. #464–07–3) Pinacolyl alcohol;
38. (C.A.S. #151–50–8) Potassium cyanide;
39. (C.A.S. #7789–23–3) Potassium fluoride;
40. (C.A.S. #7789–29–9) Potassium hydrogen fluoride;
41. (C.A.S. #1619–34–7) 3-Quinuclidinol;
42. (C.A.S. #3731–38–2) 3-Quinuclidinone;
43. (C.A.S. #1333–83–1) Sodium bifluoride;
44. (C.A.S. #143–33–9) Sodium cyanide;
45. (C.A.S. #7681–49–4) Sodium fluoride;
46. (C.A.S. #1313–82–2) Sodium sulfide;
47. (C.A.S. #10025–67–9) Sulfur monochloride;
48. (C.A.S. #10545–99–0) Sulfur dichloride;
49. (C.A.S. #111–48–8) Thiodiglycol;
50. (C.A.S. #7719–09–7) Thionyl chloride;
51. (C.A.S. #102–71–6) Triethanolamine;
52. (C.A.S. #637–39–8) Triethanolamine hydrochloride;
53. (C.A.S. #122–52–1) Triethyl phosphite; and
54. (C.A.S. #121–45–9) Trimethyl phosphite.

5. In Supplement No. 1 to § 799.1, Category 1, ECCN 1C61B is revised to read as follows:

1C61B Microorganisms and toxins.

Requirements

Validated License Required: QSTVWYZ
Unit: $ value
Reason for Control: CB
GLV: $ 0
GCT: No
GFW: No

List of Items Controlled

a. Viruses, as follows:
a.1. African swine fever virus;
a.2. Avian influenza virus;
a.3. Bluetongue virus;
a.4. Chikungunya virus;
a.5. Congo-Crimean haemorrhagic fever virus;
a.6. Dengue fever virus;
a.7. Eastern equine encephalitis virus;
a.8. Ebola virus;
a.9. Foot and mouth disease virus;
a.10. Goat pox virus;
a.11. Hantaan virus;
a.12. Herpes virus (Aujeszky's disease);
a.13. Hog cholera virus;
a.14. Japanese encephalitis virus;
a.15. Junin virus;
a.16. Lassa fever virus;
a.17. Lymphocytic choriomeningitis virus;
a.18. Machupo virus;
a.19. Marburg virus;
a.20. Monkey pox virus;
a.21. Newcastle disease virus;
a.22. Peste des petits ruminants virus;
a.23. Porcine enterovirus type 9;
a.24. Rift Valley fever virus;
a.25. Rinderpest virus;
a.26. Sheep pox virus;
a.27. Teschen disease virus;
a.28. Tick-borne encephalitis virus (Russian Spring-Summer encephalitis virus);
a.29. Variola virus;
a.30. Venezuelan equine encephalitis virus;
a.31. Vesicular stomatitis virus;
a.32. Western equine encephalitis virus;
a.33. White pox; or
a.34. Yellow fever virus.

b. Rickettsiae, as follows:
b.1. Coxiella burnetii;
b.2. Rickettsia quintana;
b.3. Rickettsia prowasecki; or
b.4. Rickettsia rickettsii.

c. Bacteria, as follows:
c.1. Bacillus anthracis;
c.2. Brucella abortus;
c.3. Brucella melitensis;
c.4. Brucella suis;
c.5. Chlamydia psittaci;
c.6. Clostridium botulinum;
c.7. Francisella tularensis;
c.8. Mycoplasma mycoides;
c.9. Pseudomonas mallei;
c.10. Pseudomonas pseudomallei;
c.11. Pseudomonas solanacerum;
c.12. Salmonella typhi;
c.13. Shigella dysenteriae;
c.14. Vibrio cholerae;
c.15. Xanthonomas campestris pv citri;
c.16. Xanthomonas campestris pv oryzae; or
c.17. Yersinia pestis.

[1] Chemical name used elsewhere in the List of Chemicals for this ECCN 1C60C.

d. Fungi, as follows:
d.1. Heliminthosporium maydis;
d.2. Heliminthosporium oryzae;
d.3. Puccinia glumarum;
d.4. Puccinia graminis;
d.5. Puccinia striiformis;
d.6. Pyricularia grisea; or
d.7. Ustilago maydis.

e. Genetically modified micro-organisms, as follows:

e.1. Genetically modified micro-organisms or genetic elements that contain nucleic acid sequences associated with pathogenicity and are derived from organisms identified in this ECCN;

e.2. Genetically modified micro-organisms or genetic elements that contain nucleic acid sequences associated with pathogenicity derived from plant pathogens identified in this ECCN; or

e.3. Micro-organisms genetically modified to produce any of the toxins listed in paragraph f. of this ECCN.

f. Toxins, as follows:
f.1. Botulinum toxins;
f.2. Clostridium perfringens toxins;
f.3. Conotoxin;
f.4. Mocrocystin (cyanogenosin);
f.5. Ricin;
f.6. Saxitoxin;
f.7. Shiga toxin;
f.8. Staphylococcus aureus toxins;
f.9. Tetrodotoxin; or
f.10. Verotoxin.

Dated: December 11, 1992.

James M. LeMunyon,

Acting Assistant Secretary for Export Administration.

[FR Doc. 92-30514 Filed 12-17-92; 8:45 am]

BILLING CODE 3510-DT-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 8432]

RIN 1545-AP18

Branch Profits Tax; Correction

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correction to final regulations.

SUMMARY: This document contains corrections to Treasury Decision 8432, which was published in the Federal Register for Friday, September 11, 1992 (57 FR 41644). The final regulations relate to the branch profits tax, branch-level interest tax and qualified resident rules issued under section 884 of the Internal Revenue Code of 1986.

EFFECTIVE DATE: October 13, 1992.

FOR FURTHER INFORMATION CONTACT: Elizabeth U. Karzon, (202) 622-3860 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The final regulations that are the subject of these corrections provide guidance needed to comply with this section and generally affect foreign corporations engaged in trade or business in the United States. These regulations also provide guidance relating to the application of section 884 to foreign governments in light of the changes made by the Technical and Miscellaneous Revenue Act of 1988 under section 892(a)(3) of the Internal Revenue Code.

Need for Correction

As published, T.D. 8432 contains errors which may prove to be misleading and is in need of clarification.

Correction of Publication

Accordingly, the publication of the final regulations (T.D. 8432), which was the subject of FR Doc. 92-21297, is corrected as follows:

§ 1.884-0 [Corrected]

1. On page 41650, column 2, § 1.884-0(b), the entry for § 1.884-2T(c)(3), first line, the language, "Transferor's dividend equivalent among" is corrected to read "Transferor's dividend equivalent amount".

§ 1.884-1 [Corrected]

2. On page 41651, column 3, § 1.884-1(b)(4), *Example 5*, third line from the bottom of the paragraph, the language "A has $50 of accumulated ECEP (i.e. 110" is corrected to read "A has $50 of accumulated ECEP (i.e. $110".

3. On page 41653, column 1, § 1.844-1(d)(2)(vii) is corrected to read:

(d) * * *

(2) * * *

(vii) *Securities held by a foreign corporation engaged in a banking, financing or similar business.* Securities described in § 1.864-4(c)(5)(ii)(*b*)(*3*) held by a foreign corporation engaged in the United States during the taxable year shall be treated as U.S. assets in the same proportion that income, gain, or loss from such securities is ECI for the taxable year under § 1.864-4(c)(5)(ii).

4. On page 41654, column 1, § 1.884-1(d)(3)(iii), in the *Example*, line fifteen, the language, "The real estate securities each have an" is corrected to read "The real estate and the securities each have an".

§ 1.884-2T [Corrected]

5. On page 41659, column 3, § 1.884-2T(b), second line from the bottom of the paragraph, the language "substitution is not less than their" is corrected to read "substitution not less than their".

§ 1.884-4 [Corrected]

6. On page 41663, column 2, § 1.884-4(b)(6)(ii), line ten, the language, "next latest payment until the amount of" is corrected to read "next-latest payment until the amount of".

§ 1.884-5 [Corrected]

7. On page 41667, column 2, § 1.884-5(b)(1)(iv)(B), line three, the language "its not-for-profit status;" is corrected to read "its not-for-profit status; and".

8. On page 41669, column 1, § 1.884-5(b)(3)(iii), second line from the bottom of the concluding text, the language, "conditions set forth in this paragraph are" is corrected to read "conditions set forth in this paragraph (b)(3)(iii) are".

9. On page 41669, column 1, § 1.884-5(b)(3)(v), line twelve, the language, "specified in paragraph (b)(3) or (b)(8) of" is corrected to read "specified in this paragraph (b)(3) or (b)(8) of".

10. On page 41669, column 1, § 1.884-5(b)(3)(v), line twenty-one, the language, "in a timely manner and a describing the" is corrected to read "in a timely manner and describing the".

11. On page 41675, column 3, § 1.884-5(e)(4)(iii), the last line of the paragraph, the language, "consistent manner from year-to-year" is corrected to read "consistent manner from year to year".

Dale D. Goode,

Federal Register Liaison Officer, Assistant Chief Counsel (Corporate).

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 100

[CGD7 92-119]

Special Local Regulations; City of Pompano Beach, FL

AGENCY: Coast Guard, DOT.

ACTION: Temporary rule.

SUMMARY: Special local regulations are being adopted for the 30th Annual Christmas Boat Parade. This event will be held on December 20, 1992, from 6:30 p.m. e.s.t. (Eastern Standard Time) until 9 p.m. e.s.t. The regulations are needed to provide for the safety of life on navigable waters during the event.

EFFECTIVE DATES: These regulations will become effective on December 20, 1992, at 6 p.m. e.s.t. and terminate on December 20, 1992, at 9:30 p.m. e.s.t.

FOR FURTHER INFORMATION CONTACT: LTJG T.M. Perez, U.S.C.G. Group Miami, (305) 535–4346.

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. 553, a notice of proposed rulemaking has not been published for these regulations. Following normal rulemaking procedures would have been impracticable as there was not sufficient time remaining to publish proposed rules in advance of the event or to provide for a delayed effective date.

Drafting Information

The drafters of this regulation are LT Jacqueline M. Losego, Project Attorney, Seventh Coast Guard District Legal Office, and LTJG Teresa M. Perez, Project Officer, U.S.C.G. Group Miami.

Discussion of Regulations

The City of Pompano Beach 30th Annual Christmas Boat Parade is a nighttime parade of approximately one hundred fifty (150) pleasure and fishing boats ranging in length from 23 feet to 125 feet and decorated with holiday lights. There will be approximately seventh-five (75) spectator craft.

Federalism

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the rulemaking does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environmental Assessment

The Coast Guard has considered the environmental impact of this proposal consistent with Section 2.B.2.08 of Commandant Instruction M16475.1B, and this proposal has been determined to be categorically excluded. Specifically, the Coast Guard has consulted with the U.S. Fish and Wildlife Service, the Florida Department of Natural Resources, and the National Marine Fisheries Service about the environmental impact of this event, and it was determined that the event does not threaten protected species.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water).

Regulations

In consideration of the foregoing, part 100 of title 33, Code of Federal Regulations, is amended as follows:

1. The authority citation for part 100 continues to read as follows:

Authority: 33 U.S.C. 1233, 49 CFR 1.46 and 33 CFR 100.35.

2. A temporary § 100.35–07–119 is added to read as follows:

§ 100.35–07–119 City of West Palm Beach, FL.

(a) *Regulated Area.* A regulated area is established in the Intracoastal Waterway with the southern boundary formed by latitude 26–13 N, the northern boundary formed by latitude 26–15 N, and the eastern and western boundaries formed by the ICW.

(b) *Special local regulations.* (1) Vessel movement or anchoring in the regulated area is prohibited unless authorized by the Patrol Commander.

(2) A succession of not fewer than 5 short whistle or horn blasts from a patrol vessel will be the signal for any nonparticipating vessel to stop immediately. The display of an orange distress smoke signal from a patrol vessel will be the signal for any and all vessels to stop immediately.

(c) *Effective dates:* These regulations become effective on December 20, 1992, from 6 p.m. e.s.t., and terminate on December 20, 1992, at 9:30 p.m. e.s.t.

Dated: December 2, 1992.

W.P. Leahy,

Rear Admiral, U.S. Coast Guard Commander, Seventh Coast Guard District.

33 CFR Part 165

[CGD1 92–131]

Safety Zone; Sandy Hook Bay, New Jersey

AGENCY: Coast Guard, DOT.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard plans to establish a safety zone in Sandy Hook Bay, New Jersey. This zone is needed to protect the maritime community from the possible dangers and hazards to navigation associated with an Army training exercise involving numerous parachutists entering a drop zone in this area. Entry into or movement within this zone is prohibited unless authorized by the Captain of the Port, New York.

EFFECTIVE DATE: This zone becomes effective on January 9, 1993 between 12 p.m. and 8 p.m., and again on January 10, 1992 between 1:30 am to 5 am.

FOR FURTHER INFORMATION CONTACT: Lieutenant (junior grade) J. E. Peschel, Waterways Management Officer, Coast Guard Group New York (212) 668-7933

SUPPLEMENTARY INFORMATION:

Drafting Information

The drafters of this notice are LTJG J. E. Peschel, Captain of the Port, New York and LCDR J. Stieb, Project Attorney, First Coast Guard District, Legal Office.

Regulatory History

Pursuant to 5 U.S.C. 553, a notice of proposed rulemaking was not published for this regulation and good cause exists for making it effective in less than 30 days after **Federal Register** publication. Publishing an NPRM and delaying its effective date would be contrary to public interest since immediate action is needed to respond to any potential hazards, and sufficiently protect the boating public from this Army training exercise. Due to the date that this application was received, there was not sufficient time to publish proposed rules in advance of the event or to provide for a delayed effective date.

Background and Purpose

This regulation is required to protect the maritime public from possible dangers and hazards associated with an Army training exercise in the waters of Sandy Hook Bay. The exercise includes a large number of paratroopers dropping into a ½ mile drop zone. This zone is needed to protect the participants from marine traffic and also to aid in rescue operations should the need arise. No vessel will be permitted to enter or move within the safety zone unless authorized to do so by Captain of the Port, New York.

Regulatory Evaluation

This regulation is not major under Executive Order 12291 and not significant under Department of Transportation Regulatory Policies and Procedures (44 FR 11040; February 26, 1979). The impact of this regulation is expected to be minimal due to the following factors: Limited duration of the exercises, the extensive advisories made to the affected maritime community, the location of the zone away from shipping channels, and the fact that the event is taking place on a Saturday night and Sunday morning, which typically doesn't experience a significant volume of commercial marine traffic. The Coast Guard expects the economic impact of this regulation to be so minimal that a Regulatory Evaluation is unnecessary.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), the Coast Guard must consider whether this regulation will have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominent in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business act (15 U.S.C. 632).

For reasons set forth in the above Regulatory Evaluation, the Coast Guard certifies under 5 U.S.C. 605(b) that this regulation will not have a significant economic impact on a substantial number of small entities.

Collection of Information

This regulation contains no collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501).

Federalism

The Coast Guard has analyzed this action in accordance with the principles and criteria contained in Executive Order 12612 and has determined that this regulation does not raise sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environment

The Coast Guard considered the environmental impact of this regulation and concluded that under section 2.B.2.c. of Commandant Instruction M16475.1B, it is an action under the Coast Guard's statutory authority to protect public safety, and thus is categorically excluded from further environmental documentation.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For reasons set out in the preamble, the Coast Guard proposes to amend 33 CFR part 165 as follows:

1. The authority citation for part 165 continuous to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 160.5, 49 CFR 1.46.

2. A temporary § 165.T01–131 is added to read as follows:

§ 165.T01–131 Sandy Hook Bay, New Jersey.

(a) *Location.* The safety zone will include all waters of Sandy Hook Bay within a 1000 yard radius of a point located at 40° 26′ 30″N and 74° 02′ 00″W, located approximately 1.5 miles north of Atlantic Highlands, NJ shoreline.

(b) *Effective period.* This zone becomes effective on January 9, 1993 between 12 p.m. and 8 p.m., and again on January 10, 1993 between 1:30 am to 5 am.

(c) *Regulations.* (1) No person or vessel may enter, transit, or remain in the safety zone during the effective period of regulation unless participating in the event as authorized by the U.S. Coast Guard Captain of the Port (COTP), New York. The COTP will attempt to minimize any delays for commercial vessels transiting the area and will monitor channel 16 VHF–FM.

(2) All persons and vessels shall comply with the instructions of the COTP NY or the designated on scene personnel. U.S. Coast Guard patrol personnel include commissioned, warrant, and petty officers of the Coast Guard. Upon hearing five or more blasts from a U.S. Coast Guard vessel, the operator of a vessel shall stop immediately and only proceed as directed.

Dated: December 3, 1992.

R.M. Larrabee,

Captain, U.S. Coast Guard, Captain of the Port, New York.

[FR Doc. 92–30785 Filed 12–17–92; 8:45 am]

BILLING CODE 4910–14–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 22 and 124

[FRL–4546–9]

Changes to Regulations to Reflect the Role of the Environmental Appeals Board in Agency Adjudications; Amendment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Technical amendments.

SUMMARY: This document contains corrections to the final regulations published on Thursday, February 13, 1992. The regulations were promulgated to reflect the role of the Environmental Appeals Board in Agency adjudications.

EFFECTIVE DATE: December 18, 1992.

FOR FURTHER INFORMATION CONTACT: James W. Black, Environmental Appeals Board (MC–1103B), 401 M Street, SW., Washington, DC 20460, (202) 501–7077.

SUPPLEMENTARY INFORMATION: Parts 22 and 124 of title 40 of the Code of Federal Regulations contain procedures governing most administrative permit and penalty proceedings conducted by the Agency. On February 13, 1992, parts 22 and 124 were amended to reflect the role of the newly created Environmental Appeals Board as the final Agency decisionmaker in such cases. As published, however, the final regulations contain technical errors that may cause confusion and are therefore in need of clarification.

In addition, when the February 13, 1992 rule change was published, the Agency had intended to include in that rule change a revision of 40 CFR 124.5(b), which provides that denials of requests for modification, revocation and reissuance, or termination of the permit under that section may be informally appealed to the Administrator. The Agency had intended to include in the February 13, 1992 rule change an amendment reflecting the fact that the Board has received delegated authority from EPA's Administrator to render final Agency decisions in such informal appeals. The Agency inadvertently neglected to include such an amendment in the February 13, 1992 rule change. That the Agency had intended to include such an amendment in the rule change is evident from the fact that the rule change did amend paragraph 1.c.ii. of figure 1 of appendix A of part 124 to provide that if a request for modification, revocation and reissuance, or termination under § 124.5 is denied, an informal appeal to the Board is available. The inconsistency between appendix A of part 124 and paragraph (b) of § 124.5 is hereby being corrected.

List of Subjects

40 CFR Part 22

Administrative practice and procedure, Air pollution control, Hazardous substances, Hazardous waste, Penalties, Pesticides and pests, Poison prevention, Water pollution control.

40 CFR Part 124

Administrative practice and procedure, Air pollution control, Hazardous waste, Indians-lands, Reporting and recordkeeping requirements, Water pollution control, Water supply.

Edward E. Reich,

Environmental Appeals Judge.

Accordingly, 40 CFR ch. I is amended as follows.

PART 22—CONSOLIDATED RULES OF PRACTICE GOVERNING THE ADMINISTRATIVE ASSESSMENT OF CIVIL PENALTIES AND THE REVOCATION OR SUSPENSION OF PERMITS

1. The authority citation for part 22 continues to read as follows:

Authority: 15 U.S.C. 2615; 42 U.S.C. 7413(d), 7524(c), 7545(d), 7547(d), 7601 and 7607(a); 7 U.S.C. 136 (l) and (m); 33 U.S.C. 1319, 1415 and 1418; 42 U.S.C. 6912, 6928, and 6991(e); 42 U.S.C. 9609; 42 U.S.C. 11045.

2. Section 22.04 is amended by revising the section heading to read as follows:

§ 22.04 Powers and duties of the Environmental Appeals Board, the Regional Administrator, the Regional Judicial Officer, and the Presiding Officer; disqualification.

* * * * *

3. Section 22.16 is amended by revising the first and last sentences of paragraph (b) to read as follows:

§ 22.16 Motions.

* * * * *

(b) * * * A party's response to any written motion must be filed within ten (10) days after service of such motion, unless additional time is allowed for such response. * * * The Presiding Officer, the Regional Administrator, or the Environmental Appeals Board, as appropriate, may set a shorter time for response, or make such orders concerning the disposition of motions as they deem appropriate.

* * * * *

PART 124—PROCEDURES FOR DECISIONMAKING

1. The authority citation for part 124 continues to read as follows:

Authority: Resource Conservation and Recovery Act, 42 U.S.C. 6901 *et seq.*; Safe Drinking Water Act, 42 U.S.C.300(f) *et seq.*; Clean Water Act, 33 U.S.C. 1251 *et seq.*; and Clean Air Act, 42 U.S.C. 1857 *et seq.*

2. Section 124.2 is amended by revising the second sentence of the definition of "Environmental Appeals Board" to read as follows:

§ 124.2 Definitions.

* * * * *

Environmental Appeals Board

* * * The Administrator delegates authority to the Environmental Appeals Board to issue final decisions in RCRA, PSD, UIC, or NPDES permit appeals filed under this subpart, including informal appeals of denials of requests for modification, revocation and reissuance, or termination of permits under Section 124.5(b). * * *

* * * * *

3. Section 124.5 is amended by revising the third, fourth, and fifth sentences of paragraph (b) to read as follows:

§ 124.5 Modification, revocation and reissuance, or termination of permits.

* * * * *

(b) * * * Denials by the Regional Administrator may be informally appealed to the Environmental Appeals Board by a letter briefly setting forth the relevant facts. The Environmental Appeals Board may direct the Regional Administrator to begin modification, revocation and reissuance, or termination proceedings under paragraph (c) of this section. The appeal shall be considered denied if the Environmental Appeals Board takes no action on the letter within 60 days after receiving it. * * *

40 CFR Part 271

[FRL-4153-5]

Extension of States' Interim Authorization Option to Implement HSWA Regulations

AGENCY: Environmental Protection Agency.

ACTION: Interim final rule with request for comments.

SUMMARY: Pursuant to sections 3006(c)(2) and 3006(g) of the Resource Conservation and Recovery Act (RCRA), 42 U.S.C. 6926(c)(2) and (g), the U.S. Environmental Protection Agency (EPA) extends until January 1, 2003, the availability of interim authorization for States to implement requirements of the 1984 Hazardous and Solid Waste Amendments (HSWA). The current regulatory deadline, as codified in 40 CFR 271.24, is scheduled to expire on January 1, 2003. A State will need to obtain final authorization by that date for those requirements for which it holds HSWA interim authorization. EPA is promulgating this action as an interim final rule to maintain the availability of HSWA interim authorization for eligible States and to avoid the reversion to EPA of those portions of State programs with HSWA interim authorization.

Through HSWA interim authorization, EPA may authorize State hazardous waste programs which are substantially equivalent to federal regulations issued under HSWA. It can be used to enhance and expedite State authorization and reduce EPA's direct implementation responsibility.

DATES: This extension of HSWA interim authorization availability to the States shall be effective on December 18, 1992. Comments on this interim final rule will be accepted until January 19, 1993. EPA will promulgate a final rule affirming or modifying the interim final rule in response to any comments April 19, 1993.

ADDRESSES: The public must send an original and two copies of their comments to: EPA RCRA Docket Clerk, room 2427 (OS-332), 401 M Street, SW., Washington, DC 20460.

Place "Docket Number F92-ISAP-FFFFF" on your comments. Copies of materials relevant to this interim rulemaking are located in the docket at the address listed above. The Office of Solid Waste (OSW) Docket is located in room 2427 at the above address, and is open from 9 a.m. to 4 p.m., Monday through Friday, excluding Federal holidays. The public must make an appointment to review docket materials by calling (202) 260-9327. The public may copy material from any regulatory docket at a cost of $0.15 per page.

FOR FURTHER INFORMATION CONTACT: Richard LaShier, State and Regional Programs Branch, Permits and State Programs Division, Office of Solid Waste, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 260-2210.

SUPPLEMENTARY INFORMATION:

I. Background

When Congress enacted RCRA in 1976, interim authorization was established to allow States to continue operating their own hazardous waste programs, while striving to achieve the requirements for final authorization, RCRA section 3006(c), 42 U.S.C. 6926(c). Interim authorization was the vehicle used to expedite the States' lead in hazardous waste program implementation, thus reducing the time during which there would be dual Federal/State programs. It was intended to provide States a transition period to adopt all the changes necessary to implement programs equivalent to the Federal requirements. The statutory provision for interim authorization under RCRA expired on January 31, 1986. See 45 FR 33378 (May 19, 1980) for more information about interim authorization for the base RCRA program.

Under RCRA, the relationship between the Federal and State program is structured so that once a State becomes authorized for the base RCRA

program, any additional RCRA regulations promulgated by EPA only become effective in the authorized State once the State has adopted those regulatory provisions. EPA reviews and authorizes these program revisions as they are submitted by the State.

The Hazardous and Solid Waste Amendments (HSWA), enacted in 1984, changed the Federal/State relationship. Regulations promulgated under HSWA authority become effective at the same time in all States and are implemented by EPA until the State has revised its regulatory program and received authorization for those provisions. HSWA also included a new provision, section 3006(g)(2), to allow EPA to grant interim authorization for the implementation of HSWA provisions to any State which received interim or final authorization for RCRA prior to the enactment of HSWA, and which submitted evidence showing that the State's analogous requirements were substantially equivalent to the Federal regulations. The new HSWA interim authorization provision provided States a developmental period in which to prepare requirements fully equivalent to the Federal regulations, and ensure adequate State capability to carry out the program.

Congress did not establish an expiration date for interim authorization under the new HSWA provision, section 3006(g), but section 3006(c)(2) required EPA to establish a regulatory deadline for the expiration of HSWA interim authorization. EPA selected January 1, 1993 as the deadline for HSWA interim authorization expiration, expecting that date to provide adequate time for the States to adopt the HSWA provisions, including any modifications they deemed necessary. See 50 FR 28731–28732 (July 15, 1985) and 51 FR 33712, 33719 (September 22, 1986).

II. Discussion

Final authorization allows a State to implement its own hazardous waste program in lieu of EPA, once it has demonstrated that its program is "equivalent" to the Federal requirements. However, to obtain interim authorization, a State must only show that its program is "substantially equivalent" to the Federal program. A substantially equivalent State program may include most, but not all of the provisions of the Federal program. Without interim authorization, a State must first modify its provisions in order to make them fully equivalent to the Federal requirements. These modifications may require additional State rulemaking or amendments to State statutes, which may take a minimum of one to two years to complete. Until EPA grants a State either interim or final authorization for a particular HSWA requirement, EPA must implement that HSWA requirement. This dual Federal/State implementation creates unnecessary costs and a duplication of efforts.

The legislative history of both RCRA and HSWA indicates that Congress intended that the Federal program be administered so as to encourage each State to assume or continue primary responsibility for program administration. Congress intended that States be granted interim authorization in a relatively liberal manner to encourage States to take the lead in program implementation. Congress clearly provided for interim authorization for both RCRA and HSWA requirements. With the HSWA interim authorization provision, States can assume the lead role in HSWA implementation more rapidly, pending final authorization.

Despite the eight year time period that had been considered sufficient for interim authorization, the need for the provision remains. The overall RCRA program and authorization process has become much more complex than when HSWA was first enacted. Since November 1984, the Office of Solid Waste has published 38 regulations and listing determinations based on HSWA, and the regulatory development process is not yet complete. EPA projects the completion of 27 or more additional HSWA rulemakings through at least the fall of 1998.

Although many States have adopted as part of their State law many of the HSWA requirements, EPA authorization of State regulations in lieu of both RCRA and HSWA Federal rules has lagged. Only fourteen States (as of May 30, 1992) have been authorized for any of the HSWA regulations promulgated since June 30, 1987. No State has achieved final authorization for all of the HSWA requirements promulgated to date.

Some States are currently operating portions of the HSWA program on an interim basis, and others may be considered for HSWA interim authorization in early 1993. Expiration of HSWA interim authorization availability on January 1, 1993 would cause those portions of the State program that are authorized on an interim basis to revert to EPA for implementation. Reversion of the affected portions of the State program would cause disruption for States currently granted HSWA interim authorization, and impede other States eligible for HSWA interim authorization from implementing portions of the HSWA program, pending the development of fully equivalent requirements under State law.

Furthermore, if HSWA interim authorization is allowed to lapse on January 1, 1993, there will be confusion among the members of the regulated community due to the shifting of regulatory implementation authority for the affected HSWA program elements from the States to the Federal government. EPA believes that such a lapse would have significant adverse effects on State and Federal relationships, and in the continuity of permitting responsibilities. Therefore, to avoid this disruption, EPA is promulgating this action as an interim final rule. EPA will fully consider any comments on this interim final rule and promulgate a final rule within 120 days affirming or modifying the rule in response to comments received.

HSWA mandated joint EPA/State implementation of hazardous waste management programs to ensure the HSWA requirements were implemented at the same time everywhere. However, the statute maintained the RCRA emphasis on State implementation and provided interim authorization as a mechanism to expedite the transfer of authority to the State. Interim authorization allows a State to maintain its lead role, while it is establishing the stronger, more comprehensive program that is fully equivalent to the Federal requirements. An extension of the interim authorization option will allow States to continue assuming this responsibility.

In the proposed Subpart S rule for corrective action, 55 FR 30798 (July 27, 1990), interim authorization has been cited as the appropriate tool to avoid disruption of State corrective action programs authorized before the issuance of the final subpart S rule. Without interim authorization, EPA would have to step back in immediately to implement the revised HSWA provisions, until the State could demonstrate full equivalence. It is likely that up to fifteen States will be authorized for corrective action by the end of the summer of 1992. The impact of not having this tool available could be even more extensive, however, since the number of States authorized for corrective action is expected to increase steadily in the near future.

The proposed subpart S rule states that Congress clearly did not intend for the authorized State program's authority to return, in part, to EPA every time EPA promulgates a subsequent, more stringent modification or addition to these requirements under HSWA. See

55 FR 30860 (July 27, 1990). Interim authorization was the mechanism designed to prevent this problem.

HSWA interim authorization may prove useful as well for handling the adoption of other future significant additions or revisions to HSWA requirements. When such a situation arises, interim authorization will ensure that authorized States maintain regulatory authority, without the need for EPA to step in to implement the modified provisions. Because interim authorization is designed to respond to changing HSWA requirements, Congress did not want the States to lose this important tool.

Interim authorization can be used in a variety of ways to complement and enhance both State and Federal resources. It can ease State adoption and implementation of amendments to Federal corrective action and other HSWA requirements, without reverting to joint EPA/State implementation. It can provide flexibility in approving State programs which are nearly equivalent to the Federal requirements. By facilitating State program implementation, interim authorization minimizes duplicative activities at the Federal level. For all these reasons, EPA believes that it would be contrary to the public interest to lose the availability of HSWA interim authorization. While providing the benefits previously listed, the extension of the provision will not add any additional costs or burdens to the program.

EPA is designating January 1, 2003 as the new expiration date for HSWA interim authorization because the Agency believes that up to an additional ten years will be needed for State programs to be fully authorized for HSWA. HSWA mandated regulations are currently projected to be promulgated through at least 1988. Based on our experience, States will need additional time to expand their programs and submit them to EPA for approval.

Although we currently believe that a ten year time frame would be most appropriate for HSWA interim authorization, we solicit comment on this issue. Either a shorter or longer time period could be used. If a shorter period is employed, it is likely that EPA would need to seek another extension, as there would not likely be adequate time for the States to adopt all the expected regulatory changes and obtain approval from EPA.

Conversely, EPA cannot predict all the changes that might occur in the long term. There may be additional amendments to the RCRA statute; EPA cannot anticipate the modifications that will be needed to implement those statutory changes. As changes take place, the Agency will consider their impact upon State authorization and make the necessary adjustments. Interim authorization should not be used indefinitely, since the statute, RCRA section 3006(c)(2), requires that the EPA Administrator establish a deadline.

The extension of the availability of interim authorization to States for HSWA regulations shall become effective today. The Agency requests comments on the ten year time frame designated, or other options noted above, for the extension of HSWA interim authorization. EPA will either withdraw the interim final decision or promulgate a final rule by April 19, 1993.

III. Economic and Regulatory Impacts

A. Regulatory Impact Analysis

Under Executive Order 12291, EPA must determine whether a new regulation is a "major" rule and prepare a Regulatory Impact Analysis in connection with a major rule. A "major" rule is defined as one likely to result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State/Tribal, and local government agencies or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of U.S. based enterprises in domestic or export markets.

This interim final will have none of the above effects. Because this rulemaking does not meet the definition of a major regulation, the Agency is not conducting a Regulatory Impact Analysis at this time. Today's interim final was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 et seq.) requires an agency to prepare, and make available for public comment, a regulatory flexibility analysis that describes the impact of a proposed or final rule on small entities (i.e., small businesses, small organizations, and small governmental jurisdictions). No regulatory flexibility analysis is required if the head of an agency certifies the rule will not have significant economic impact on a substantial number of small entities.

This interim final will not have significant impact on a substantial number of small entities, since the proposal has direct effects only on State Agencies. Therefore, no regulatory flexibility analysis has been prepared.

C. Paperwork Reduction Act

No new information collection requirements will be imposed by today's interim final. Therefore, an Information Collection Request (ICR) has not been prepared by EPA.

D. Administrative Procedure Act

EPA is invoking the good cause exception in section 553(b)(3) and 553(d)(3) of the Administrative Procedure Act, 5 U.S.C. 553(b)(3) and 553(d)(3), to immediately extend the expiration of HSWA interim authorization to January 1, 2003. As discussed above, EPA is taking this action to avoid the disruption and confusion among States and the regulated community that would be caused by reversion to EPA of portions of State programs implementing HSWA requirements under HSWA interim authorization. In addition, EPA is taking this action to maintain the availability of HSWA interim authorization for eligible States, and thereby facilitate State implementation of HSWA requirements while this rulemaking is undergoing public comment.

EPA is today soliciting comments on whether a ten year time frame is appropriate for HSWA interim authorization. The Agency will fully evaluate the comments and withdraw today's rule or promulgate a final rule affirming or modifying the interim final rule in response to comments received.

List of Subjects in 40 CFR Part 271

Administrative practice and procedure, Hazardous materials transportation, Hazardous waste, Indians-lands, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Water pollution control, Water supply.

Dated: December 3, 1992.

William K. Reilly,

Administrator.

For reasons set out in the preamble, title 40 of the Code of Federal Regulations, part 271 is amended as set forth below:

PART 271—[AMENDED]

1. The authority citation for part 271 continues to read as follows:

Authority: 42 U.S.C. 6905, 6912(a), and 6926.

2. Section 271.24 is revised to read as follows:

§ 271.24 Interim authorization under section 3006(g) of RCRA.

(a) Any State which is applying for or has been granted final authorization pursuant to section 3006(b) of RCRA may submit to the Administrator evidence that its program contains (or has been amended to include) any requirement which is substantially equivalent to a requirement identified in § 271.1(j) of this part. Such a State may request interim authorization under section 3006(g) of RCRA to carry out the State requirement in lieu of the Administrator carrying out the Federal requirement.

(b) The applications shall be governed by the procedures for program revisions in § 271.21(b) of this part.

(c) Interim authorization pursuant to this section expires on January 1, 2003.

BILLING CODE 6560–50–M

GENERAL SERVICES ADMINISTRATION

41 CFR Part 101–38

[FPMR Amendment G–100]

Motor Vehicle Registration, Identification, and Exemptions

AGENCY: Federal Supply Service, GSA.

ACTION: Final rule.

SUMMARY: This regulation adds the license plate code MC for the Marine Corps. This new code was requested by the Marine Corps and approved by the General Services Administration. This action will allow the Marine Corps to procure motor vehicle license plates showing the code designation MC.

EFFECTIVE DATE: December 18, 1992.

FOR FURTHER INFORMATION CONTACT: Michael W. Moses, Sr., Fleet Management Division, 703–305–7169.

SUPPLEMENTARY INFORMATION: The General Services Administration (GSA) has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. GSA has based all administrative decisions underlying this rule on adequate information concerning the need for and consequences of this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

CFR Correction

In title 41 of the Code of Federal Regulations, chapter 201 to end, revised as of July 1, 1992, the text appearing on page 48 is correct as published. CFR correction published at 57 FR 56280 through 56284, Nov. 27, 1992 reinstating part 201–38 consisting of §§ 201–38.000 through 201–38.017 and reserved subpart 201–38.1 is withdrawn.

BILLING CODE 1505–01–D

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 2 and 90

[PR Docket No. 91–295; RM–7182, FCC 92–534]

Private Land Mobile Radio Services; Additional 72–76 MHz Frequencies

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission has released a Report and Order that amends Part 90 of its Rules to provide 20 additional frequencies in the 72–76 MHz band for low-power mobile use on a shared basis in the Business, Manufacturers, Petroleum, Power, and Railroad Radio Services. This action will result in less congestion on existing frequencies.

EFFECTIVE DATE: January 19, 1993.

FOR FURTHER INFORMATION CONTACT: Eugene Thomson, Rules Branch, Land Mobile and Microwave Division, Private Radio Bureau, (202) 634–2443.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, PR Docket No. 91–295, adopted November 30, 1992, and released December 14, 1992. The full text is available for inspection and copying during normal business hours in the FCC Dockets Branch, room 230, 1919 M Street NW., Washington, DC. The complete text may be purchased from the Commission's copy contractor, Downtown Copy Center, 1990 M Street NW., suite 640, Washington, DC 20036, telephone (202) 452–1422.

Summary of Report and Order

1. The action taken in the Report and Order creates twenty frequencies in the 74.6–74.8 MHz and 75.2–75.4 MHz bands for low-power mobile use by eligibles in the Business, Manufacturers, Petroleum, Power, and Railroad Radio Services. The frequencies will be limited for use within specific confines appropriate to each eligible radio service and will be subject to the provisions of § 90.257(b)(1) of the Rules that govern the use of 72–76 MHz low-power mobile frequencies.

2. Providing additional 72–76 MHz low-power mobile frequencies for use in the Manufacturers and Railroad Radio Services will relieve the congestion currently being experienced by these services. These frequencies will also provide new spectrum for low-power applications by eligibles in the Power, Petroleum, and Business Radio Services.

Final Regulatory Flexibility Analysis

We certify that the Regulatory Flexibility Act of 1980 does into apply to this rule making proceeding because the adopted rule amendments will not have significant economic impact on small business entities as defined by Section 601(3) of the Regulatory Flexibility Act. No comments were received addressing this certification in the Initial Regulatory Flexibility Analysis contained in the Notice of Proposed Rule Making in this proceeding.

Private land mobile radio, 72–76 MHz frequencies, Radio.

Amendatory Text

47 CFR parts 2 and 90 are amended as follows:

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

1. The authority citation for part 2 continues to read as follows:

Authority: Sections 4, 302, 303, and 307 of the Communications Act of 1934, as amended, 47 U.S.C. §§ 154, 302, 303 and 307, unless otherwise noted.

2. 47 CFR 2.106 is amended by adding entries in the FCC use designators column for the frequency bands 74.6–74.8 and 75.2–75.4 as listed in the United States table column to read as follows:

§ 2.106 Table of Frequency Allocations.

International table	United States table		FCC use designators

BILLING CODE 6712–01–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 217, 222, and 227

[Docket No. 921184–2284]

Sea Turtle Conservation; Restrictions Applicable to Fishery Activities

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Temporary turtle excluder device (TED) requirement and temporary observer requirement for vessels in the summer flounder trawl fishery and request for comments.

SUMMARY: NMFS will continue to require owners and operators of vessels participating in the trawl fishery for summer flounder from Cape Charles, Virginia, to the southern border of North Carolina, to use a NMFS-approved TED in any net that is rigged for fishing, for a 30-day period starting December 16, 1992, unless exempted from doing so by NMFS. In addition, NMFS, for this period, will continue to require vessels, if requested by the Director, Southeast Region, NMFS, to carry a NMFS-approved observer to monitor compliance with required conservation measures and incidental capture of sea turtles. This action is necessary to protect threatened and endangered sea turtles in the area, and is authorized by 50 CFR 227.72(e)(6). This temporary requirement to use TEDs is necessary to avoid the risk that the summer flounder fishery could jeopardize the continued existence of endangered sea turtles while allowing the fishery to continue. NMFS may extend this requirement beyond 30 days and impose additional temporary sea turtle conservation measures on the fishery for summer flounder as necessary to protect sea turtles.

DATES: This action is effective December 16, 1992, through January 14, 1993. Comments on this action must be received by January 14, 1993.

ADDRESSES: Requests for a copy of the environmental assessment for this action and comments on this action should be addressed to Dr. Michael F. Tillman, Acting Director, Office of Protected Resources, NMFS, 1335 East-West Highway, Silver Spring, MD 20910.

FOR FURTHER INFORMATION CONTACT: Phil Williams, NMFS National Sea Turtle Coordinator (301/713–2319), Charles A. Oravetz, Chief, Protected Species Program, NMFS, Southeast Region (813/893–3366) or Colleen Coogan, Protected Species Program, NMFS, Northeast Region (508/281–9291).

SUPPLEMENTARY INFORMATION:

Background

All sea turtles that occur in U.S. waters are listed as either endangered or threatened under the Endangered Species Act of 1973, U.S.C. 1531 *et seq.* (ESA). According to the National Academy of Sciences, incidental capture in shrimp trawls is by far the leading cause of human-induced mortality to sea turtles in the water, but collectively, activities in non-shrimp fisheries, which includes the summer flounder fishery, constitute the second largest source.

NMFS took emergency action pursuant to 50 CFR 227.72(e)(6)(ii) to require TED use by summer flounder bottom trawlers from November 15, 1992, through December 15, 1992 (57 FR 53603, November 12, 1992). NMFS modified that action to provide the option, for 1 week, to use limited tow times with observers instead of TEDs (57 FR 54533, November 19, 1992). The background and need for these actions was thoroughly discussed in the November 12 and November 19, 1992, **Federal Register** notices and will not be repeated here.

Recent Events

NMFS' continuing review of the available information regarding the temporary TED requirement in the summer flounder bottom trawl fishery indicates that conditions continue to necessitate the use of TEDs. Sea turtles and bottom trawling continue to co-occur in the waters off southern Virginia and North Carolina based on

observations of turtles, both at sea and from strandings on ocean beaches, monitoring of sea surface temperatures, and aerial surveys of fishing activity.

Incomplete reports show that over 94 sea turtles have stranded on ocean beaches from New Jersey through North Carolina from October 29, 1992, through December 9, 1992, coinciding with the operation of the summer flounder fishery, as well as other fisheries, in the mid-Atlantic region. The majority of the strandings (82) occurred in North Carolina. The reporting of sea turtle strandings is not meant to imply that only the summer flounder bottom trawl fishery is responsible, but rather to demonstrate the continued presence of turtles in the region. Other fisheries, including coastal gill net, fly net and long-line fisheries are operating throughout the mid-Atlantic, and are capable of incidentally capturing and killing turtles if no conservation measures are employed. NMFS is working with several states to attempt to assess the impacts of these various fisheries on sea turtles and other protected species. However, NMFS has determined, based on last year's reports from observers on-board summer flounder trawlers, that bottom trawl nets without TEDs capture and kill sea turtles at a rate comparable to that of the shrimp trawl fishery in the south Atlantic, where TED use is now required at all times. Based on this information, when turtles and summer flounder bottom trawling co-occur, the use of TEDs should be a required conservation measure.

Only one unidentified turtle (assumed to be a loggerhead turtle) has been reported captured by a summer flounder trawler during this temporary TED requirement. A NMFS observer, on board a TED-equipped trawler, observed a dead turtle in the net during retrieval, but was unable to retain it for examination because it fell into the water. Based on the advanced state of decomposition of the turtle, it was determined that it had been killed prior to the observed net retrieval.

NMFS and the U.S. Coast Guard are conducting cooperative enforcement activities in the waters off of southern Virginia and North Carolina. NMFS has determined that compliance with the TED use requirement has been very good. Only one violation of the TED requirement, an allegedly restricted escape opening, has been reported during approximately 22 at-sea boardings and continuous shore-based observations and inspections.

NMFS authorized for 1 week the use of limited tow times with observers instead of TEDs (57 FR 54533, November 19, 1992), so that fishermen would have sufficient time to purchase and install TEDs. However, only two fishermen opted to use restricted tow times with an observer. This indicated that TEDs could in fact be purchased and installed in a timely manner, and that the use of TEDs was a more acceptable option than the frequent retrieving and setting of nets necessitated by restricted tow times.

NMFS promulgated final regulations under the Magnuson Fisheries Conservation and Management Act (16 U.S.C. 1801 *et seq.*) (57 FR 57348, December 4, 1992) to require sea turtle protection measures for the summer flounder fishery in a limited area off the coast of North Carolina and southern Virginia during the fall and winter as part of Amendment 2 to the Summer Flounder Fishery Management Plan (FMP) to be codified at 50 CFR 625.72(c). Section 625.72(c) authorizes the Regional Director to impose TED requirements in the fishery. Such action, however, is limited to an area from 3 to 10 nautical miles (5.6 to 18.5 km) measured from the baseline, i.e., from the shoreward boundary of the state territorial sea. NMFS has gathered information during the 1991–1992 season that demonstrates that turtles and trawl fishing co-occur beyond the 10-nautical mile (18.5-km) boundary. NMFS, therefore has determined that the protection provided under Amendment 2 of the FMP is insufficient to protect sea turtles, and that emergency measures implemented under the authority of the ESA are necessary.

Based on continued fishing effort the 1992–1993 season and information previously discussed concerning past and present interactions between sea turtles and the summer flounder fishery, NMFS anticipates that continued unrestricted trawling activities may result in the injury or mortality of loggerhead, Kemp's ridley, green, leatherback, and hawksbill turtles. Therefore, the Assistant Administrator for Fisheries, NOAA (Assistant Administrator), extends the requirement to use TEDs in the southern Virginia-North Carolina restricted area, acting pursuant to 50 CFR 227.72(e)(6)(ii).

Comments on the November 15, 1992, Temporary TED-Use Requirement

Comment: NMFS has received a number of complaints from fishermen alleging that TEDs do not work, and that continuation of TED requirements will drive summer flounder fishermen out of business. The most commonly reported problem with TEDs is clogging and bending of bars as a result of encounters with large concentrations of angel sharks, dogfish, puffers, skates, conchs, etc. Fishermen have also complained vigorously about reduced catches of flounder and the loss of large (jumbo) fish.

Response: Allegations that TEDs will not work in the flounder fishery are not supported by the data. In fact, comparative testing of flounder nets with and without TEDs conducted by North Carolina and NMFS during 1992 indicated no significant differences in flounder catch rates or reduction in the size of fish caught. Given this information, NMFS can only conclude that, under normal fishing conditions, TEDs in flounder nets are an effective means of conserving sea turtles with minimal impacts on fishing efficiency.

While NMFS maintains that TEDs are necessary and appropriate in the summer flounder fishery, it acknowledges that large concentrations of bycatch species and debris can pose a problem to fishermen using TEDs. When large schools of some bycatch species have been encountered, TEDs have clogged and the weight of the bycatch has resulted in bending of some TED designs. In other cases, large amounts of bycatch have been released through TEDs, carrying with it large amounts of the target species. This problem does not occur in the majority of the tows, but such events are a legitimate concern to fishermen. Unfortunately, there appears to be no way to predict when and where bycatch concentrations will be encountered.

To help alleviate this problem, NMFS gear specialists are working with fishermen to determine which TEDs operate best under which conditions. Depending on the species of bycatch involved, clogging problems may be eliminated simply by reversing the escape opening of the TED to shoot upward rather than downward. If conchs or debris are the problem, however, a downward shooting TED is probably the best choice. Flounder fishermen may find it necessary to reverse the orientation of TEDs periodically to avoid clogging as bycatch species composition changes.

NMFS is also examining the potential for strengthening some TEDs to better withstand the weight of unusually large catches. Several different designs are currently being investigated, and will be field tested aboard volunteer vessels under actual fishing conditions. NMFS believes that bending problems can be corrected in most cases through use of stronger materials and or bracing (reinforcement) in TED construction.

In summary, TEDs seem to work well in the flounder fishery under normal

fishing conditions. However, when fishermen encounter large concentrations of bycatch species or debris in the course of trawling operations, clogging and bending of some TEDs has been observed. Gear specialists from NMFS and North Carolina are working with commercial flounder trawlers to investigate means of avoiding clogging problems and to increase the strength of existing and several new TEDs.

Comment: The Center for Marine Conservation supported the TED use requirement in the summer flounder fishery, noting that it should have been imposed sooner, that it should be extended an additional 30 days, and that a permanent ESA rule requiring TED use should be promulgated as soon as possible.

Response: NMFS agrees in general with these comments. The November 15, 1992, implementation of the TED-use requirement was based on NMFS' estimation of when summer flounder fishing activities would co-occur this season with turtles in waters off of southern Virginia and North Carolina. The large number of observed strandings prior to the TED-use requirement, while correlated with summer flounder fishing, also took place while other fisheries were operating. It is possible that all of these fisheries, as well as other factors, contributed to the large number of strandings.

Finally, NMFS is considering the imposition of permanent sea turtle conservation requirements for this fishery under the authority of the ESA to be in place for the next fishing season.

Sea Turtle Conservation Measures

Based on the information presented and evidence indicating that the summer flounder trawl fishery takes endangered and threatened sea turtles, the Assistant Administrator has determined that continued action is necessary to conserve sea turtles as authorized by 50 CFR 227.72(e)(6)(ii). The Assistant Administrator has determined that incidental takings of sea turtles during summer flounder fishings are unauthorized unless these takings are consistent with the applicable biological opinions and associated incidental take statements. A biological opinion on the impacts of the summer flounder trawl fishery managed under the FMP and Amendment 2 was issued on August 10, 1992; that incidental take statement allows for the documented lethal take of 18 sea turtles; three in any combination of Kemp's ridley, hawksbill, green, or leatherback sea turtles, and 15 loggerhead turtles.

A new biological opinion was prepared for this action. Authorization for this action differs from the August 10, 1992, authorization by including both lethal takes and takes by injury. Furthermore, while only documented takes will be calculated for vessels using TEDs, takings for vessels that are not using TEDs may be based on direct observations or estimates from other onboard observers, or from other sources, such reported strandings of sea turtles. Finally, if one or more Kemp's ridley, hawksbill, green, or leatherback sea turtle, or three or more loggerhead sea turtles are lethally taken or injured during the 30-day effectiveness period of this action, consultation must be reinitiated.

Requirements

This action is authorized by 50 CFR 227.72(e)(6). The definitions in 50 CFR 217.12, as revised by the final regulations (57 FR 57348, December 4, 1992), are applicable to this action, as well as all relevant provisions in 50 CFR parts 217, 222, and 227. For example, § 227.71(b)(3) provides that it is unlawful to fish for or possess fish or wildlife contrary to a restriction specified or issued under § 227.72(e) (3) or (6). Section 227.72(b)(1) states that it is unlawful to own, operate, or be onboard a vessel, unless that vessel is in compliance with all the applicable provisions of § 227.72(e).

For purposes of this action, the term "Virginia-North Carolina restricted area" means all offshore waters, which are defined to include waters seaward of the COLREGS demarcation line (International Regulations for Preventing Collisions at Sea, 1972), bounded on the north by a line along 37°05′ N. latitude (Cape Charles, Va.) and bounded on the south by a line along 33°35′ N. latitude (North Carolina-South Carolina border). A "summer flounder trawl vessel" means any vessel equipped with trawl gear that targets or is capable of taking summer flounder, or any vessel possessing summer flounder that has trawl gear onboard. For the purposes of this action, trawl gear does not include fly nets.

NMFS hereby notifies owners and operators of summer flounder trawl vessels that for a 30-day period, starting December 16, 1992, they must have an approved TED (as defined in 50 CFR 217.12) installed in each net that is rigged for fishing if the vessel is in the Virginia-North Carolina restricted area. For the purpose of this action and notwithstanding 50 CFR 227.72(e)(2)(i), a net is rigged for fishing if it is in the water or if it is shackled, tied, or otherwise connected to any trawl door or board.

The provisions of 50 CFR 227.72(e)(4) and (5), as revised by the final regulations (57 FR 57348, December 4, 1992), are applicable to summer flounder trawl vessels and summer flounder trawl gear as if they were shrimp trawlers or shrimp trawl gear. For purposes of this action, large-mesh webbing may be attached outside of the webbing flap to prevent chaffing on downward shooting TEDs, if it does not interfere or otherwise restrict the turtle escape opening. It is the responsibility of the owner and the operator of any summer flounder trawl vessel to ensure that any sea turtle taken by that vessel is handled and resuscitated in accordance with the requirements specified under 50 CFR 227.72(e)(1) (i) and (ii).

The Assistant Administrator may grant a written waiver of the requirement for a summer flounder trawler to have a TED in its net(s) if that vessel is conducting research operations approved under 50 CFR 227.72(e)(5)(ii) (for further information concerning waivers contact Director, Southeast Region, NMFS, 9450 Koger Boulevard, St. Petersburg, FL 33702, (813/893–3366)). In order for this waiver to be applicable, the written waiver issued by the Assistant Administrator must be carried onboard the vessel at all times that the vessel is in the Virginia-North Carolina restricted area and does not have a TED installed in each of its nets that is rigged for fishing.

The Assistant Administrator may consider the use of restricted tow times instead of TEDs in the future. Any allowance for trawlers to use tow times instead of TEDs may require that the vessel operators carry a NMFS-approved observer at their own expense and limit tow times to no longer than 75 minutes, measured from the time the trawl doors or boards enter the water until they are removed from the water.

NMFS hereby notifies owners and operators of summer flounder trawl vessels that they must carry a NMFS-approved observer onboard such vessel(s) if selected to do so by the Director, Southeast Region, NMFS, upon written notification sent to either the address specified for the vessel in either the NMFS or state fishing permit application, or for registration or documentation purposes, or otherwise served on the owner or operator of the vessel. A summer flounder trawl must comply with the terms and conditions specified in such written notification.

A NMFS-approved observer may be required regardless of whether the

vessel is fishing within the Virginia-North Carolina restricted area and regardless of whether the summer flounder trawl vessel has TEDs installed in its nets if observer information is necessary to document interactions with sea turtles or to determine the effectiveness of conservation measures.

All NMFS-approved observers will report any violations of the conservation measures required by this action, or other applicable regulations and laws; such information can be used for law enforcement purposes.

Any person who does not comply with any requirement in this document, including any term or condition in any written notification issued hereunder, is in violation of the final sea turtle conservation regulations, codified at 50 CFR 227.71(b)(3).

Additional Sea Turtle Conservation Measures

The Assistant Administrator may, at any time, modify the requirements of this action through notification in the **Federal Register**, if necessary, to ensure adequate protection of endangered and threatened sea turtles. Under this procedure, the Assistant Administrator will impose any necessary additional or more stringent measures, if he determines that summer flounder trawl vessels are having a significant adverse effect on sea turtles. Likewise, conservation measures may be modified if the incidental take for the fishery is projected to reach the incidental take level established by the biological opinion for this action issued as a result of consultation under section 7 of the ESA. Additional conservation measures are likely if one or more Kemp's ridley, hawksbill, green, or leatherback sea turtle, or three loggerhead turtles are lethally taken or injured by summer flounder trawlers subject to this notice during the 30-day effectiveness period of this notice.

The Assistant Administrator will impose additional conservation measures on this fishery if the incidental take level is approached or exceeded, or if significant or unanticipated levels of lethal or nonlethal takings or strandings of sea turtles associated with summer flounder fishing activities occur. Such additional measures may expand the restricted area or the time during which TEDs are required or impose requirements to take NMFS-approved observers at the expense of vessel owners or operators. The Assistant Administrator may withdraw or modify the requirement for specific conservation measures or any restriction on fishing activities if the Assistant Administrator determines that such action is warranted. Notification of any additional sea turtle conservation measures, including any extension of the 30-day requirement to use TEDs in summer flounder trawls, will be published in the **Federal Register**.

Classification

The Assistant Administrator has determined that this action is necessary to respond to an emergency situation to protect listed sea turtles, and is consistent with the ESA and other applicable law. This action does not require a regulatory impact analysis under E.O. 12291 because it is not a "major rule."

The Assistant Administrator, pursuant to section 553(b)(B) of the Administrative Procedure Act (APA), finds there is good cause to take this action without full notice and full public procedure thereon. The Assistant Administrator finds that full notice and full public procedure thereon is unnecessary, impracticable, and contrary to the public interest. Comments were requested on the initial emergency action (57 FR 53603, November 12, 1992), and have been responded to herein. The continued co-occurrence of sea turtles and summer flounder fishing effort off southern Virginia and North Carolina makes delay for further public comment inconsistent with the need to take action to insure that the activities of the summer flounder fishery are not likely to jeopardize the continued existence of sea turtles. Delay in imposing a TED requirement is likely to result in further takings of sea turtles by the summer flounder fishery, which could result in closure of the fishery.

In addition, the Assistant Administrator has determined that good cause exists to reduce the 30-day delayed effective date otherwise required by section 553(d) of the APA. Good cause exists because of the continued need to protect sea turtles, which makes it impracticable and contrary to the public interest to delay the effective date beyond December 16, 1992. Further, TEDs have been required in the summer flounder fishery off southern Virginia and North Carolina since November 15, 1992. To help the fishery use TEDs during this fishing season, NMFS, in cooperation with North Carolina and the summer flounder fishing industry, has conducted four workshops on TEDs and the requirements of the sea turtle conservation regulations, participated in a series of gear evaluation cruises, provided alternative TED designs and technical assistance for TED testing by cooperating flounder trawlers, and provided direct TED technology transfer assistance to fishermen. These research and technology transfer efforts are ongoing.

Because neither section 553 of the APA nor any other law requires that general notice of proposed rulemaking be published for this action, under section 603(b) of the Regulatory Flexibility Act, an initial Regulatory Flexibility Analysis is not required.

The Assistant Administrator prepared an environmental assessment (EA) for the final rule (57 FR 57348, December 4, 1992). A supplemental EA prepared specifically for this action concludes that this action will have no significant impact on the human environment and is available from NMFS (see **ADDRESSES**).

Dated: December 15, 1992.

Samuel W. McKeen,

Acting Assistant Administrator for Fisheries.

Proposed Rules

Federal Register
Vol. 57, No. 244
Friday, December 18, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1250

[Docket No. PY-91-002]

RIN 0581-AA59

Amendments to Egg Research and Promotion Rules and Regulations

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would amend the Egg Research and Promotion Rules and Regulations by adding a late-payment charge on all delinquent assessments. The American Egg Board approved this change at its July 17–18, 1991, meeting, and has since requested the Secretary to amend the Rules and Regulations accordingly.

A late-payment charge of 1.5 percent per month would be levied on all assessment charges more than 30 days past due. This change is proposed in order to facilitate the Board's efforts to make timely collections.

DATES: Comments must be received on or before January 19, 1993.

ADDRESSES: Written comments are to be mailed to Janice L. Lockard, Chief, Standardization Branch, Poultry Division, AMS, USDA, Room 3944-South, P.O. Box 96456, Washington, DC 20090–6456. Comments received may be inspected at this location between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. State that your comments refer to Docket No. PY–91–002.

FOR FURTHER INFORMATION CONTACT: Janice L. Lockard, 202–720–3506.

SUPPLEMENTARY INFORMATION:

Executive Orders 12291 and 12778 and Regulatory Flexibility Act

This proposed rule has been reviewed under USDA procedures implementing Executive Order 12291 and Department Regulation 1512–1 and has been classified a "non-major" rule under the criteria contained therein. It will not result in an annual effect on the economy of $100 million or more; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local Government agencies, or geographic regions; or will not have a significant impact on competition, employment, investment, productivity, innovation, or on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This proposed rule has been reviewed under Executive Order 12778, Civil Justice Reform. It is not intended to have retroactive effect. This rule would not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 14 of the Act, a person subject to an order may file a petition with the Secretary stating that such order, any provisions of such order or any obligations imposed in connection with such order are not in accordance with law; and requesting a modification of the order or an exemption therefrom. Such person is afforded the opportunity for a hearing on the petition. After a hearing, the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which such person is an inhabitant, or has his principal place of business, has jurisdiction to review the Secretary's ruling on the petition, if a complaint is filed within 20 days after date of the entry of the ruling.

The AMS Administrator has determined that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities, as defined by the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

Information collection requirements and recordkeeping provisions contained in 7 CFR part 1250 have been approved by the Office of Management and Budget and assigned OMB Control No. 0581–0098 under the Paperwork Reduction Act of 1980.

Background and Proposed Changes

The Rules and Regulations in § 1250.517 require egg handlers to pay assessments on a monthly basis. Assessments are due and collectable on or before the 15th day after the end of the reporting period. It is incumbent upon the Board's compliance department to ensure that such payments are made. However, some handlers continually remit assessments after they are due or, in some cases, refuse to pay at all.

Since the Board relies on a predictable income to fund ongoing projects, an additional mechanism is needed to facilitate the Board's efforts with regard to the timely remittance of assessments. Other commodity research and promotion boards have found that late-payment charges have been effective in facilitating timely payment of assessments. The Board has recommended the addition of such a charge and, similar to regulations governing other like programs, requested that a late-payment charge of 1.5 percent per month be incorporated into the Rules and Regulations.

List of Subjects in 7 CFR Part 1250

Agricultural research, Egg and egg products.

For the reasons set forth in the preamble, title 7, CFR part 1250 is proposed to be amended as follows:

PART 1250—EGG RESEARCH AND PROMOTION

1. The authority citation of part 1250 continues to read as follows:

Authority: Pub. L. 93–428, 88 Stat. 1171, as amended, 7 U.S.C. 2701–2718.

2. A new § 1250.519 is added to read as follows:

§ 1250.519 Late-payment charge.

Any unpaid assessments due to the Board pursuant to § 1250.347 shall be increased by a late-payment charge of 1.5 percent each month beginning with the day following the date such assessments are 30 days past due. Any remaining amount due, which shall include any unpaid charges previously made pursuant to this section, shall be increased at the same rate on the corresponding day of each month thereafter until paid. Assessments that are not paid when due because of a person's failure to submit a handler report to the Board as required shall accrue late-payment charges from the time such assessments should have been remitted. The timeliness of a payment to

the Board shall be based on the applicable postmark date or the date payment is actually received by the Board, whichever is earlier.

Dated: December 10, 1992.

Daniel Haley,

Administrator.

BILLING CODE 3410-08-M

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 357

RIN 3064-AA97

Determination of Economically Depressed Regions

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Proposed rule.

SUMMARY: The FDIC is proposing to amend its rule, which designates certain "economically depressed regions," by revising the rule to designate different economically depressed regions in light of current economic conditions. The FDIC is required by law to consider proposals for direct financial assistance by Savings Association Insurance Fund members having offices located in an "economically depressed region" and meeting certain other specified criteria, before grounds exist for the appointment of a conservator or receiver for the institution. The proposed rule reflects the FDIC's most recent periodic review and reasonable application of the factors the FDIC considers in determining which regions are economically depressed.

DATES: Comments must be received by February 16, 1993.

ADDRESSES: Send comments to Hoyle L. Robinson, Executive Secretary, FDIC, 550 17th Street, NW., Washington, DC 20429. Comments may be hand-delivered to room 400, 1776 F Street, NW., Washington, DC on business days between 8:30 a.m. and 5 p.m. (FAX number: (202) 898-3838.) Comments may be inspected in the FDIC's Reading Room, room 7118, 550 17th Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Andrew Jaske, Financial Economist, Financial and Industry Analysis Section, Division of Research and Statistics, (202) 898-6549, FDIC, 550 17th Street, NW., Washington, DC 20429; or Sandra Comenetz, Senior Attorney, Legal Division, (202) 898-3582, FDIC, 550 17th Street, NW., Washington, DC 20429.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The proposed rule does not require any collections of paperwork pursuant to section 3504(h) of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). Accordingly, no information has been submitted to the Office of Management and Budget for review.

Regulatory Flexibility Act

Pursuant to section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), it is certified that the proposed rule will not have a significant economic impact on a substantial number of small entities. The rule does not impose regulatory compliance requirements on depository institutions of any size.

Discussion

The FDIC has authority under section 13(c) of the Federal Deposit Insurance Act (12 U.S.C. 1823(c)) (FDI Act) to provide financial assistance to prevent the default of an insured depository institution. Under section 13(k)(5) of the FDI Act (12 U.S.C. 1823(k)(5)), the FDIC must consider proposals for eligible Savings Association Insurance Fund (SAIF) member institutions to receive assistance pursuant to section 13(c) before grounds exist for the appointment of a conservator or receiver for the institution. Section 13(k)(5) establishes nine criteria for such eligibility. One of the criteria is that an institution's offices must be located in an "economically depressed region." In addition, under section 13(k)(5), SAIF member applicants must separately meet the fourteen criteria under section 13(c) to qualify for assistance. However, assistance proposals with respect to SAIF member institutions under section 13(k)(5) that do not meet all nine of the criteria set forth in section 13(k)(5) may nevertheless be submitted to the FDIC for consideration under section 13(c). Thus, institutions whose offices are not located in an "economically depressed region" under section 13(k)(5) are not precluded from proposing and receiving open institution assistance.

The term "economically depressed region" is defined in section 13(k)(5)(C) to mean any geographical region which the [FDIC] determines by regulation to be a region within which real estate values have suffered serious decline due to severe economic conditions, such as a decline in energy or agricultural values or prices.

On September 17, 1990, the FDIC issued a final rule (55 FR 38043) codified at 12 CFR 357.1, which determined that certain geographical regions were "economically depressed regions" for purposes of section 13(k)(5) of the FDI Act. In determining which regions were economically depressed, the FDIC considered the following factors: (1) The ratio of poor quality real estate assets to total assets in the portfolios of banks; (2) the ratio of poor quality real estate assets to total assets in the portfolios of SAIF members; and (3) unemployment figures. The statewide percentages of impaired real estate assets for banks and SAIF members and unemployment rates were analyzed with reference to national levels. These factors are subject to periodic review and application by the FDIC in light of changing economic conditions.

The FDIC's final rule designated eight individual states as "economically depressed regions" for purposes of section 13(k)(5) of the FDI Act. They were: Alaska, Arizona, Arkansas, Colorado, Louisiana, New Mexico, Oklahoma, and Texas.

Having examined real estate and employment conditions based on the most recent information, the FDIC has determined that the eight states previously designated as "economically depressed regions" should no longer receive that designation. The FDIC has concluded that ten different states should now be classified as "economically depressed regions." These are California, Connecticut, the District of Columbia, Maine, Massachusetts, New Hampshire, New Jersey, New York, Rhode Island, and Vermont.

To determine which regions are economically depressed in light of current economic conditions, the FDIC considered, as before, the ratio of poor quality real estate assets to total assets in the portfolios of banks and SAIF members, and the unemployment situation. The FDIC considered both the overall unemployment rate and the non-farm employment growth rate, the latter of which can provide an indication of a change in the employment situation.

The FDIC intends to revisit annually the criteria used to identify regions for designation as "economically depressed regions," as well as the list of regions so designated, and may make revisions as circumstances warrant.

List of Subjects in 12 CFR Part 357

Bank deposit insurance, Grant programs—Housing and Community Development, Savings associations.

For the reasons set forth in the preamble, part 357 of Chapter III of Title 12 of the Code of Federal Regulations is proposed to be amended as follows:

PART 357—DETERMINATION OF ECONOMICALLY DEPRESSED REGIONS

1. The authority citation for part 357 is revised to read as follows:

Authority: 12 U.S.C. 1819, 1823(k)(5).

2. Section 357.1 is amended by revising paragraph (b) to read as follows:

§ 357.1 Economically depressed regions.

* * * * *

(b) *Economically depressed regions.* The FDIC has determined that the following geographical regions are "economically depressed regions" for purposes of section 13(k)(5) of the Federal Deposit Insurance Act (12 U.S.C. 1823(k)(5)): California, Connecticut, the District of Columbia, Maine, Massachusetts, New Hampshire, New Jersey, New York, Rhode Island, and Vermont,

By order of the Board of Directors.

Dated at Washington, DC this 8th day of December, 1992.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

[FR Doc. 92-30672 Filed 12-17-92; 8:45 am]

BILLING CODE 6714-01-M

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Part 707

Truth in Savings

AGENCY: National Credit Union Administration.

ACTION: Proposed rule; withdrawal of earlier proposed rule; correction.

SUMMARY: This document contains corrections to proposed part 707 of the NCUA Rules and Regulations, published November 30, 1992 (57 FR 56686). The proposed regulation will implement the Truth in Savings Act, which requires credit unions to disclose fees, dividend rates and other terms concerning deposit accounts, and limits the methods by which credit unions determine the balance on which dividends are calculated.

FOR FURTHER INFORMATION CONTACT: Margaret R. Suuberg, Staff Attorney, or Martin E. Conrey, Staff Attorney, National Credit Union Administration, 1776 G St., NW., suite 600, Washington, DC 20456, or telephone (202) 682-9630.

SUPPLEMENTARY INFORMATION:

Background

NCUA's proposed part 707, which is the subject of these corrections, will implement the Truth in Savings Act (12 U.S.C. 4301 et seq., contained in the Federal Deposit Insurance Corporation Improvement Act of 1991, Public Law 102-242, 105 Stat. 2236).

Need for Correction

As published, appendix A to the proposed regulation contains ten drafting errors that are confusing and should be clarified. An error in the supplementary information that may be confusing is also being corrected at this time.

Correction of Publication

For the reasons set forth in the preamble, the publication on November 30, 1992 of the proposed regulation in the **Federal Register** is corrected as follows.

1. On page 56691, in the third column, under the heading "Paragraph (u)—Rollback Account", in the first paragraph, the last sentence, the citation "§ 707.4(b)(2)(ii)" is corrected to read "§§ 707.4(b)(2)(iii) and 707.4(b)(3)(ii)(B)".

Appendix A [Corrected]

2. On page 56716, in the second column, under the heading "A. General Rules", in the second paragraph, the first sentence, the formula "APY=100 [(1+Dividends/Principal) $^{(365/Days\ in\ term)}$–1]"

3. On page 56716, in the second column, under the subheading "Examples", in the first example, the first sentence, the formula "APY=100 [(1+61.68/1,000 $^{(365/365)}$–1]".

4. On page 56716, at the top of the third column, under the subheading "Examples", in the second example, the first sentence, the formula "APY=[(1+30.37/1,000) (365/182)–1]" is corrected to read "APY=[(1+30.37/1,000) $^{(365/182)}$–1]".

5. On page 56716, in the third column, under the heading "B. Stepped-Rate Accounts (Different Rates Apply in Succeeding Periods)", under the subheading "Examples", in the first example, the first sentence, the formula "APY=100 [(1+26.10/1,000) (365/183)–1]" is corrected to read "APY=100 [(1+26.10/1,000) $^{(365/183)}$–1]".

6. On page 56716, in the third column, under the heading "B. Stepped-Rate Accounts (Different Rates Apply in Succeeding Periods)", under the subheading "Examples", in the second example, the first sentence, the formula "APY=100 [(1+133.13/1,000) (365/730)–1]" is corrected to read "APY=100 [(1+133.13/1,000) $^{(365/730)}$–1]".

7. On page 56717, in the first column, under the heading "D. Accounts with Tiered Rates (Different Rates Apply to Specified Balance Level)", under the subheading "Tiering Method A", in the fourth paragraph beginning "First Tier", the second sentence, the formula "APY=100 [(1+53.90/1,000) (365/365)–1]" is corrected to read "APY=100 [(1+53.90/1,000) $^{(365/365)}$–1]".

8. On page 56717, in the third column, under the heading "Part II. Annual Percentage Yield Earned for Periodic Statements", in the third paragraph, the first sentence, the formula "APY Earned=100 [(1+Interest earned/Balance) (365/Days in period)–1]" is corrected to read "APY Earned=100 [(1+Interest earned/Balance) $^{(365/Days\ in\ period)}$–1]".

9. On page 56718, in the first column, under the heading "Part II. Annual Percentage Yield Earned for Periodic Statements", under the subheading "Examples", in the first example, the third sentence, the formula "APY Earned=100 [(1+5.25/1,000) (365/30)–1]" is corrected to read "APY Earned=100 [(1+5.25/1,000) $^{(365/30)}$–1]".

10. On page 56718, in the first column, under the heading "Part II. Annual Percentage Yield Earned for Periodic Statements", under the subheading "Examples", in the second example, the fifth sentence "The annual percentage yield earned (using the formula above) is 6.69%:

APY Earned=100 [(1+6.50/1,500) (365/30)–1]

APY Earned=6.69%" is corrected to read "The annual percentage yield earned (using the formula above) is 5.40%:

APY Earned=100 [(1+6.50/1,500) $^{(365/30)}$–1]

APY Earned=5.40%".

11. On page 56718, in the first column, under the heading "Part II. Annual Percentage Yield Earned for Periodic Statements", under the subheading "Examples", in the third example, the fifth sentence, the formula "APY Earned=100 [(1+21/2,000) (365/91)–1]" is corrected to read "APY Earned=100 [(1+21/2,000) $^{(365/91)}$–1]".

By the National Credit Union Administration Board on December 11, 1992.

Hattie M. Ulan,

Acting Secretary of the Board.

BILLING CODE 7535-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 92-NM-163-AD]

Airworthiness Directives; Aerospatiale Model ATR42-300 Series Airplanes, and Model ATR72-100 and -200 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to all Aerospatiale Model ATR42-300 series airplanes, and all Model ATR72-100 and -200 series airplanes. This proposal would require replacement of certain electrical push button switches which control the cabin pressurization valves and attach the emergency battery to the standby bus. This proposal is prompted by reports of faulty electrical push button switches. The actions specified by the proposed AD are intended to prevent failure of the pressurization valves to close in the event of ditching, and to prevent interruption of electrical power to certain electrical equipment used during approach and landing.

DATES: Comments must be received by February 3, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-163-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Aerospatiale, 316 Route de Bayonne, 31060 Toulouse, Cedex 03, France. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Gary Lium, Aerospace Engineer, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055-4056; telephone (206) 227-1112; fax (206) 227-1320.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92-NM-163-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-163-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056.

Discussion

The Direction Générale de l'Aviation Civile (DGAC), which is the airworthiness authority for France, recently notified the FAA that an unsafe condition may exist on all Aerospatiale Model ATR42-300 series airplanes, and all Model ATR72-100 and -200 series airplanes. The DGAC advises that cases recently have been reported of faulty electrical push button switches which, when pushed, failed to latch in the "on" position. These switches are used to control the cabin pressurization valves, and also to attach the emergency battery to the standby bus. In the event of an airplane ditching situation, a failed switch could prevent closure of the pressurization valves, which could result in water entering the fuselage. A failed switch could also interrupt electrical power to certain electrical equipment used during approach and landing.

The faulty electrical switches, part numbers 9PD and 12HM, originated from one batch and have electro-engraved date codes of A6, A7, A8, A9, AO, AN, AD, B1, B2, B3, B4, B5, B6, or B7.

Aerospatiale has issued Service Bulletins ATR42-31-0023 and ATR72-31-1006, both dated May 15, 1992, which describe procedures for replacement of certain electrical push button switches which control the cabin pressurization valves and attach the emergency battery to the standby bus. The DGAC classified these service bulletins as mandatory and issued French Airworthiness Directives 92-122-047(B) and 92-123-013(B), both dated May 27, 1992, in order to assure the continued airworthiness of these airplanes in France.

This airplane model is manufactured in France and is type certificated for operation in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the DGAC has kept the FAA informed of the situation described above. The FAA has examined the findings of the DGAC, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require replacement of certain electrical push button switches which control the cabin pressurization valves and attach the emergency battery to the standby bus. The actions would be required to be accomplished in accordance with the service bulletins described previously.

The FAA estimates that 17 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 4 work hours per airplane to accomplish the proposed actions, and that the average labor rate is $55 per work hour. Required parts would be provided by the manufacturer at no cost to operators. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $3,740, or $220 per airplane. This total cost figure assumes that no operator has yet accomplished the proposed requirements of this AD action.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order

12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES."

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Aerospatiale: Docket 92–NM–163–AD.

Applicability: All Model ATR42–300 series airplanes, and all Model ATR72–100 and –200 series airplanes; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent failure of the pressurization valves to close in the event of ditching, and to prevent interruption of electrical power to certain electrical equipment used during approach and landing, accomplish the following:

(a) Within 30 days after the effective date of this AD, remove the electrical switches, part numbers 9PD and 12HM, and identify the date codes in accordance with Aerospatiale Service Bulletin ATR42–31–0023, dated May 15, 1992 (for Model ATR42–300 and –320 series airplanes); or Aerospatiale Service Bulletin ATR72–31–1006, dated May 15, 1992 (for Model ATR72–100 and –200 series airplanes); as applicable.

(1) If the date code is identified as A6, A7, A8, A9, AO, AN, AD, B1, B2, B3, B4, B5. B6, or B7, prior to further flight, replace the currently-installed switch with a serviceable switch marked with a date code other than those listed above.

(2) If the date code is other than those listed in paragraph (a)(1) of this AD, reinstall the switch. No further action is necessary.

(b) As of the effective date of this AD, no person shall install an electrical switch, part numbers 9PD and 12HM, having a date code of A6, A7, A8, A9, AO, AN, AD, B1, B2, B3, B4, B5, B6, or B7, on any airplane.

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM–113.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM–113.

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on December 2, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate Aircraft Certification Service.

14 CFR Part 39

[Docket No. 92–NM–112–AD]

Airworthiness Directives; Airbus Industrie Model A300 Series Airplanes Equipped with General Electric (GE) Engines

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Airbus Industrie Model A300 series airplanes. This proposal would require repetitive visual and eddy current inspections to detect wear or cracks of the inner doublers on the pylon side panel around the fire extinguisher access doors, and replacement of worn or cracked parts, if necessary. This proposal is prompted by reports that wear marks have been detected on the inner doubler of the pylon side panel around the fire extinguisher bottle access doors. The actions specified by the proposed AD are intended to prevent cracks from developing in the pylon side panel, which would result in reduced structural integrity of the engine pylon.

DATES: Comments must be received by February 12, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 92–NM–112–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Greg Holt, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98056–4056; telephone (206) 227–2140; fax (206) 227–1320.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92–NM–112–AD." The

postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-112-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056.

Discussion

The Direction Générale de l'Aviation Civile (DGAC), which is the airworthiness authority for France, recently notified the FAA that an unsafe condition may exist on certain Airbus Industrie Model A300 B2-1C, B2-203, B2K-3C, B4-2C, B4-103, and B4-203 series airplanes equipped with GE engines. The DGAC advises that numerous cases have been reported of wear marks found on the inner doubler of the pylon side panel around fire extinguisher bottle access doors 484AR and 473AL. These wear marks are the result of a high level of vibration, that has caused the door latches to chafe against the doubler (especially the version of the doors configured with 3 and 4 latches). When not repaired, these wear marks could develop into cracks. If not detected and corrected in a timely manner, such cracks could reach a certain length and spread quickly to the side panel. This condition would reduce the structural integrity of the engine pylon.

Airbus Industrie has issued Service Bulletin A300-54-070, Revision 1, dated March 17, 1992, which describes procedures for repetitive visual and eddy current inspections to detect wear or cracks of the inner doubler on the pylon side panel around the fire extinguisher access doors and replacement of the doubler, if necessary. The areas to be inspected and the recommended intervals for the repetitive visual and eddy current inspections and doubler replacement vary, depending upon the airplane's configuration. The DGAC classified this service bulletin as mandatory and issued French Airworthiness Directive 90-082-131(B), dated April 1, 1992, in order to assure the continued airworthiness of these airplanes in France.

Airbus Industrie has also issued Service Bulletin A300-54-046, dated June 24, 1982, and Change Notice, dated July 8, 1985, which describe procedures for modification of the locking system on fire extinguisher access doors. The latches are removed and replaced by a screw attachment system. The DGAC has not classified this service bulletin and change notice as mandatory.

This airplane model is manufactured in France and is type certificated for operation in the United States under the provisions of Section 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the French DGAC has kept the FAA informed of the situation described above. The FAA has examined the findings of the French DGAC, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require repetitive visual and eddy current inspections to detect wear or cracks of the inner doubler on the pylon side panel around the fire extinguisher access doors, and replacement of worn or cracked parts, if necessary. The actions would be required to be accomplished in accordance with the service bulletins and change notice described previously. An optional terminating action is also provided which, if accomplished, would eliminate the need for repetitive visual and eddy current inspections.

The FAA considers three criteria for those situations where repetitive inspections of a crack-prone area may be permitted to continue indefinitely, even though a positive fix to the problem exists: (1) the area is easily accessible, (2) the cracking is easily detectable, and (3) the consequences of the cracking are not likely to be catastrophic. In consideration of the cracking that may occur on the inner doubler on the pylon side panel around the fire extinguisher access doors, the FAA has determined that the crack-prone area addressed by this proposal meets these three criteria and that the circumstances warrant the allowance of continued repetitive inspections in lieu of a mandated design modification.

The FAA estimates that 77 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 8.5 work hours per airplane to accomplish the proposed actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $35,998, or $468 per airplane. This total cost figure assumes that no operator has yet accomplished the proposed requirements of this AD.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AIRWORTHINESS DIRECTIVES]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Airbus Industrie: Docket 92-NM-112-AD.

Applicability: Model A300 B2-1C, B2-203, B2K-3C, B4-2C, B4-103, and B4-203 series airplanes; equipped with General Electric (GE) engines on which engine Pylon Modification No. 2434, as described in Airbus Industrie Service Bulletin A300-54-070, Revision 1, dated March 17, 1992, has not been installed; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent reduced structural integrity of the engine pylon, accomplish the following:

(a) Prior to the accumulation of 22,400 total hours time-in-service, or within 1,000 hours time-in-service after the effective date of this AD, whichever occurs later, perform an initial visual and eddy current inspection to

detect wear or cracks of the inner doubler on the pylon side panel around the fire extinguisher access doors, in accordance with Airbus Industrie Service Bulletin A300–54–070, Revision 1, dated March 17, 1992. If cracks are detected, prior to further flight, accomplish the requirements of either paragraph (a)(1) or (a)(2) of this AD, as applicable:

(1) If cracks less than 5 mm (0.197 inch) are detected, prior to further flight, repair in accordance with a method approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate.

(2) If cracks greater than or equal to 5 mm (0.019 inch) are detected, accomplish either paragraph (a)(2)(i) or (a)(2)(ii), as applicable:

(i) For airplanes on which the modification described in Service Bulletin No. A300–54–046 (screwed doors) has been accomplished: Prior to further flight, replace the doubler. Replacement of the doubler constitutes terminating action for the inspections required by this AD.

(ii) For airplanes on which the modification described in Service Bulletin No. A300–54–046 (screwed doors) has not been accomplished: Prior to further flight, replace the doubler. Prior to the accumulation of 22,400 hours time-in-service after replacement of the doubler, perform the visual and eddy current inspections in accordance with paragraph (a) of this AD; and repeat those inspections thereafter in accordance with paragraphs (b), (c), (d), or (e) of this AD, as applicable.

(b) For airplanes having Configuration No. 1.A.: Repeat the visual and eddy current inspections to detect doubler wear and cracks, as required by paragraph (a) of this AD, in accordance with Airbus Industrie Service Bulletin A300–54–070, Revision 1, dated March 17, 1992, as follows:

(1) No further action is necessary for the following airplanes:

(i) Airplanes on which the modification described in Airbus Industrie Service Bulletin No. A300–54–046 (screwed doors) has been accomplished, and the measured doubler wear, as detected by any visual inspection required by this AD, is less than 0.5 mm (0.019 inch).

(ii) Airplanes on which the modification described in Airbus Industrie Service Bulletin No. A300–54–046 (screwed doors) has not been accomplished, and the measured doubler wear, as detected by any visual inspection required by this AD, is less than 0.1 mm (0.004 inch).

(2) For airplanes on which the modification described in Airbus Industrie Service Bulletin No. A300–54–046 (screwed doors) has not been accomplished, if the measured doubler wear, as detected by any visual inspection required by this AD, is equal to or greater than to 0.1 mm (0.004 inch) and less than 0.5 mm (0.019 inch): Repeat the visual and eddy current inspections at intervals not to exceed 4,400 hours time-in-service.

Note: Subsequent action to be taken (repetitive inspections or inner doubler replacement) will depend upon the "worst finding," defined as the area with the largest amount of measured doubler wear.

(3) For airplanes on which the measured doubler wear, as detected by any visual inspection required by this AD, is equal to or greater than 0.5 mm (0.019 inch) and less than 2 mm (0.078 inch): Repeat the visual and eddy current inspections at intervals not to exceed 4,400 hours time-in-service.

(4) For airplanes on which the measured doubler wear, as detected by any visual inspection required by this AD, is equal to or greater than 2 mm (0.078 inch) and less than 4 mm (0.157 inch): Repeat the visual and eddy current inspections at intervals not to exceed 1,800 hours time-in-service.

(5) For airplanes on which the measured doubler wear, as detected by any visual inspection required by this AD, is equal to or greater than 4 mm (0.157 inch) and less than 6 mm (0.236 inch): Accomplish either paragraph (b)(5)(i), (b)(5)(ii), or (b)(5)(iii) of this AD.

(i) Repeat the visual and eddy current inspection at intervals not to exceed 350 hours time-in-service. Or

(ii) If the modification described in Service Bulletin No. A300–54–046 (screwed doors) has been accomplished: Prior to further flight, replace the doubler. Replacement of the doubler constitutes terminating action for the inspections required by this AD. Or

(iii) If the modification described in Service Bulletin No. A300–54–046 (screwed doors) has not been accomplished: Prior to further flight, replace the doubler. Prior to the accumulation of 22,400 hours time-in-service after replacement of the doubler, perform the visual and eddy current inspections in accordance with paragraph (a) of this AD, and repeat those inspections thereafter in accordance with paragraph (b) of this AD.

(6) For airplanes on which the measured doubler wear, as detected by any visual inspection required by this AD, is equal to or greater than 6 mm (0.236 inch): Prior to further flight, repair in accordance with a method approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate.

(c) For airplanes having Configuration No. 1.B: Repeat the visual and eddy current inspections for doubler wear and cracks, as required by paragraph (a) of this AD, in accordance with Airbus Industrie Service Bulletin A300–54–070, Revision 1, dated March 17, 1992, as follows:

(1) No further action is necessary for the following airplanes:

(i) Airplanes on which the modification described in Airbus Industrie Service Bulletin No. A300–54–046 (screwed doors) has been accomplished, and the measured doubler wear, as detected by any visual inspection required by this AD, is less than 0.5 mm (0.019 inch).

(ii) Airplanes on which the modification described in Airbus Industrie Service Bulletin No. A300–54–046 (screwed doors) has not been accomplished, and the measured doubler wear, as detected by any visual inspection required by this AD, is less than 0.1 mm (0.004 inch).

(2) For airplanes on which the modification described in Airbus Industrie Service Bulletin No. A300–54–046 (screwed doors) has not been accomplished, if the measured doubler wear, as detected by any visual inspection required by this AD, is equal to or greater than to 0.1 mm (0.004 inch) and less than 0.5 mm (0.019 inch): Repeat the visual and eddy current inspections at intervals not to exceed 3,400 hours time-in-service.

Note: Subsequent action to be taken (repetitive inspections or inner doubler replacement) will depend upon the "worst finding," defined as the area with the largest amount of measured doubler wear.

(3) For airplanes on which the measured doubler wear, as detected by any visual inspection required by this AD, is equal to or greater than 0.5 mm (0.019 inch) and less than 2 mm (0.078 inch): Repeat the visual and eddy current inspections at intervals not to exceed 3,400 hours time-in-service.

(4) For airplanes on which the measured doubler wear, as detected by any visual inspection required by this AD, is equal to or greater than 2 mm (0.078 inch) and less than 4 mm (0.157 inch): Accomplish either paragraph (c)(4)(i), (c)(4)(ii), or (c)(4)(iii) of this AD.

(i) Repeat the visual and eddy current inspection at intervals not to exceed 300 hours time-in-service. Or

(ii) If the modification described in Service Bulletin No. A300–54–046 (screwed doors) has been accomplished: Prior to further flight, replace the doubler. Replacement of the doubler constitutes terminating action for the inspections required by this AD. Or

(iii) If the modification described in Service Bulletin No. A300–54–046 (screwed doors) has not been accomplished: Prior to further flight, replace the doubler. Prior to the accumulation of 22,400 hours time-in-service after the replacement date of the doubler, perform the visual and eddy current inspections in accordance with paragraph (a) of this AD, and repeat those inspections thereafter in accordance with paragraph (c) of this AD.

(5) For airplanes on which the measured doubler wear, as detected by any visual inspection required by this AD, is greater than or equal to 4 mm (0.157 inch): Prior to further flight, repair in accordance with a method approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate.

(d) For airplanes having Configuration No. 1.A. on which the modification described in Airbus Industrie Service Bulletin No. A300–54–008 (door with 4 latches) has been accomplished; and for airplanes having Configuration No. 2.A.: Repeat the visual and eddy current inspections for doubler wear and cracks at zones D1, D2, D3, and D4, as required by paragraph (a) of this AD, in accordance with Airbus Service Bulletin A300–54–070, Revision 1, dated March 17, 1992, as follows:

(1) No further action is necessary for the following airplanes:

(i) Airplanes on which the modification described in Airbus Industrie Service Bulletin No. A300–54–046 (screwed doors) has been accomplished, and the measured doubler wear, as detected by any visual inspection required by this AD, is less than 0.5 mm (0.019 inch).

(ii) Airplanes on which the modification described in Airbus Industrie Service Bulletin No. A300–54–046 (screwed doors)

has not been accomplished, and the measured doubler wear, as detected by any visual inspection required by this AD, is less than 0.1 mm (0.004 inch).

(2) For airplanes on which the modification described in Airbus Industrie Service Bulletin No. A300–54–046 (screwed doors) has not been accomplished, if the measured doubler wear, as detected by any visual inspection required by this AD, is equal to or greater than to 0.1 mm (0.004 inch) and less than or equal to 0.5 mm (0.019 inch): Repeat the visual and eddy current inspections at intervals not to exceed 5,800 hours time-in-service.

Note: Subsequent action to be taken (repetitive inspections or inner doubler replacement) will depend upon the "worst finding," defined as the area with the largest amount of measured doubler wear.

(3) For airplanes on which the measured doubler wear, as detected by any visual inspection required by this AD, is greater than 0.5 mm (0.019 inch) and less than 2 mm (0.078 inch): Repeat the visual and eddy current inspections at intervals not to exceed 5,800 hours time-in-service.

(4) For airplanes the measured doubler wear, as detected by any visual inspection required by this AD, is greater than 2 mm (0.078 inch) and less than 4 mm (0.157 inch): Repeat the visual and eddy current inspections at intervals not to exceed 4,300 hours time-in-service.

(5) For airplanes on which the modification described in Service Bulletin No. A300–54–046 (screwed doors) has been accomplished, if the measured doubler wear, as detected by any visual inspection required by this AD, is greater than 4 mm (0.157 inch) and less than 6 mm (0.236 inch): Repeat the visual and eddy current inspection at intervals not to exceed 2,300 hours time-in-service.

(6) For airplanes on which the measured doubler wear, as detected by any visual inspection required by this AD, is greater than 6 mm (0.236 inch) and less than 8 mm (0.315 inch): Accomplish either paragraph (d)(6)(i), (d)(6)(ii), or (d)(6)(iii), of this AD.

(i) Repeat the visual and eddy current inspections at intervals not to exceed 450 hours time-in-service. Or

(ii) If the modification described in Service Bulletin No. A300–54–046 (screwed doors) has been accomplished: Prior to further flight, replace the doubler. Replacement of the doubler constitutes terminating action for the inspections required by this AD. Or

(iii) If the modification described in Service Bulletin No. A300–54–046 (screwed doors) has not been accomplished: Prior to further flight, replace the doubler. Prior to the accumulation of 22,400 hours time-in-service after replacement of the doubler, perform the visual and eddy current inspections in accordance with paragraph (a) of this AD, and repeat those inspections thereafter in accordance with paragraph (d) of this AD.

(7) For airplanes on which the measured doubler wear, as detected by any visual inspection required by this AD, is greater than or equal to 8 mm (0.315 inch): Prior to further flight, repair in accordance with a method approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate.

(e) For airplanes having Configuration No. 1.B. on which the modification described in Service Bulletin No. A300–54–008 (door with 4 latches) has been accomplished; and for airplanes having Configuration No. 2.B.: Repeat the visual and eddy current inspections for doubler wear and cracks at zones D1, D2, D3, and D4, as required by paragraph (a) of this AD, in accordance with Airbus Service Bulletin A300–54–070, Revision 1, dated March 17, 1992, as follows:

(1) No further action is necessary for the following airplanes:

(i) Airplanes on which the modification described in Airbus Industrie Service Bulletin No. A300–54–046 (screwed doors) has been accomplished, and the measured doubler wear, as detected by any visual inspection required by this AD, is less than 0.5 mm (0.019 inch).

(ii) Airplanes on which the modification described in Airbus Industrie Service Bulletin No. A300–54–046 (screwed doors) has not been accomplished, and the measured doubler wear, as detected by any visual inspection required by this AD, is less than 0.1 mm (0.004 inch).

(2) For airplanes on which the modification described in Service Bulletin No. A300–54–046 (screwed doors) has not been accomplished, if the measured doubler wear, as detected by any visual inspection required by this AD, is greater than 0.1 mm (0.004 inch) and less than 0.5 mm (0.019 inch): Repeat the visual and eddy current inspections at intervals not to exceed 4,500 hours time-in-service.

Note: Subsequent action to be taken (repetitive inspections or inner doubler replacement) will depend upon the "worst finding," defined as the area with the largest amount of measured doubler wear.

(3) For airplanes on which the measured doubler wear, as detected by any visual inspection required by this AD, is greater than 0.5 mm (0.019 inch) and less than 2 mm (0.078 inch): Repeat the visual and eddy current inspections at intervals not to exceed 4,500 hours time-in-service.

(4) For airplanes on which the measured doubler wear, as detected by any visual inspection required by this AD, is greater than 2 mm (0.078 inch) and less than 4 mm (0.157 inch): Repeat the visual and eddy current inspections at intervals not to exceed 3,300 hours time-in-service.

(5) For airplanes on which the measured doubler wear, as detected by any visual inspection required by this AD, is greater than 4 mm (0.157 inch) and less than 6 mm (0.236 inch): Repeat the visual and eddy current inspections at intervals not to exceed 1,800 hours time-in-service.

(6) For airplanes on which the measured doubler wear, as detected by any visual inspection required by this AD, is greater than 6 mm (0.236 inch) and less than 8 mm (0.315 inch): Accomplish either paragraph (e)(6)(i), (e)(6)(ii), or (e)(6)(iii) of this AD.

(i) Repeat the visual and eddy current inspections at intervals not to exceed 400 hours time-in-service. Or

(ii) If the modification described in Service Bulletin A300–54–046 (screwed doors) has been accomplished: Prior to further flight, replace the doubler. Replacement of the doubler constitutes terminating action for the inspections required by this AD. Or

(iii) If the modification described in Service Bulletin No. A300–54–046 (screwed doors) has not been accomplished: Prior to further flight, replace the doubler. Prior to the accumulation of 22,400 hours time-in-service after replacement of the doubler, perform the visual and eddy current inspections in accordance with paragraph (a) of this AD, and repeat those inspections thereafter in accordance with paragraph (e) of this AD.

(7) For airplanes on which the measured doubler wear, as detected by any visual inspection required by this AD, is greater than or equal to 8 mm (0.315 inch): Prior to further flight, repair in accordance with a method approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate.

(f) Accomplishment of the replacement of the inner doubler on the pylon side panel around the fire extinguisher access doors, and installation of the modification (screwed doors), as described in Airbus Service Bulletin No. A300–54–046, dated June 24, 1982, and Change Notice, dated July 8, 1985, constitutes terminating action for the visual and eddy current inspections required by this AD.

(g) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM–113.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM–113.

(h) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on December 11, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–M

---

14 CFR Part 39

[Docket No. 92–NM–184–AD]

Airworthiness Directives; AMI Industries, Inc., Pilot and Co-Pilot Seats, Model 1108, as Installed in, but not Limited to, de Havilland Model DHC–8 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain AMI Industries, Inc., pilot and co-pilot seats. This proposal would require replacement of lap belt attachment links for certain pilot and co-pilot seats. This proposal is prompted by a report that a lap belt link fitting failed due to fatigue. The actions specified by the proposed AD are intended to prevent failure of the pilot's and co-pilot's lap belts during air turbulence, which could lead to reduced ability of the pilots to control the airplane.

DATES: Comments must be received by February 12, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 92–NM–184–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from AMI Industries, Inc., 1275 North Newport Road, Colorado Springs, Colorado 80916. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Pliny Brastel, Aerospace Engineer, Seattle Aircraft Certification Office, Airframe Branch, ANM–120S, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–2783; fax (206) 227–1181.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92–NM–184–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 92–NM–184–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The FAA has been advised that a lap belt link fitting installed in a pilot or co-pilot seat on a de Havilland Model DHC–8 series airplane failed recently due to fatigue. Such failure could cause the lap belts to become unattached and, therefore, unable to restrain the pilot and co-pilot in their seats during turbulent air conditions. This condition, if not corrected, could lead to reduced ability of the pilots to control the airplane.

The FAA has reviewed and approved AMI Industries, Inc., Service Bulletin 25–1108–03, dated May 20, 1992, that describes procedures for replacement of lap belt attachment links for certain pilot and co-pilot seats with an improved lap belt attachment link kit. The modification has been designed to improve reliability of the lap belt attachment links and thereby reduce fatigue and possible breakage.

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would require replacement of lap belt attachment links for certain pilot and co-pilot seats with an improved lap belt attachment link kit. The actions would be required to be accomplished in accordance with the service bulletin described previously.

This modification has already been incorporated in production on de Havilland Model DHC–8 series airplanes equipped with AMI Industries, Inc., pilot and co-pilot seats, Model 1108, having serial numbers 190 and subsequent. Therefore, the applicability of the proposal would include only those seats having serial numbers 004 to 189, inclusive.

The actual number of pilot and co-pilot seats of the affected design in the worldwide fleet is not known. However, the FAA is aware that the subject seats may be installed in, but not limited to, de Havilland Model DHC–8 series airplanes. There are approximately 109 of these airplanes in the worldwide fleet; of this number, the FAA estimates that 85 airplanes are of U.S. registry. It would take approximately 1 work hour per airplane to accomplish the proposed actions, at an average labor rate of $55 per work hour. Required parts would be supplied by the parts manufacturer at no cost to the operators. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $55 per airplane. For U.S. operators of Model DHC–8 series airplanes, these figures translate to a total cost impact of $4,675. This total cost figure assumes that no operator has yet accomplished the proposed requirements of this AD action.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

AMI Industries, Inc.: Docket 92–NM–184–AD.

Applicability: Pilot and Co-Pilot Seats, Model 1108, serial numbers 004 to 189, inclusive; as installed in, but not limited to de Havilland Model DHC–8 series airplanes.

Compliance: Required as indicated, unless accomplished previously.

To prevent failure of the pilot's and co-pilot's lap belts during air turbulence, which could lead to reduced ability of the pilots to control the airplane, accomplish the following:

(a) Within 60 days after the effective date of this AD, remove the lap belt attachment links and install the improved lap belt attachment link kit, P/N 1B9014–3R, in accordance with AMI Industries, Inc., Service Bulletin 25–1108–03, dated May 20, 1992.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on December 11, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Parts 1301 and 1311

Registration and Reregistration Application Fees

AGENCY: Drug Enforcement Administration (DEA), Justice.

ACTION: Notice of proposed rulemaking.

SUMMARY: The DEA proposes to adjust the current application fee schedule for DEA registration to adequately recover the Federal costs associated with the Diversion Control Program as mandated in the Department of Justice and Related Agencies Appropriations Act, 1993 (section 111 (b), Pub. L. 102–395).

DATES: Comments and objections must be submitted by January 19, 1993.

ADDRESSES: Comments and objections should be submitted in quintuplicate to the Administrator, Drug Enforcement Administration, Washington, DC 20537 Attention: Federal Register Representative/CCR.

FOR FURTHER INFORMATION CONTACT: Mr. Terrance Woodworth, Chief, Drug Operations Section, Office of Diversion Control, Washington, DC 20537, Telephone (202) 307–8569.

SUPPLEMENTARY INFORMATION: The Department of Justice and Related Agencies Appropriations Act, 1993 (Pub. L. 102–395) requires that the Drug Enforcement Administration (DEA) collect fees to ensure the recovery of the full costs of operating the Diversion Control Program. Section 111 (b) of that Act requires that there be established an account in the general fund of the Treasury, and in section 111 (b)(1) "there shall be deposited as offsetting receipts into that account all fees collected by the Drug Enforcement Administration, in excess of $15,000,000, for the operation of its diversion control program." In addition, section 111 (b)(3) requires "fees charged by the Drug Enforcement Administration under its diversion control program shall be set at a level that ensures the recovery of the full costs of operating the various aspects of that program."

The Controlled Substances Act of 1970 (CSA) has, for 22 years, required the registration of any person who manufactures, distributes or dispenses a controlled substance. Section 301 of the CSA (21 U.S.C. 821) authorizes the charging of "reasonable fees relating to the registration and control of the manufacture, distribution and dispensing of controlled substances." This is the only fee collection made by DEA and the administrative mechanisms for its collection and processing are well established and efficient. The fee schedule under the CSA was established in 1971 and was adjusted in 1984. The fees have remained unchanged since that time. Modifications to the fee structure have been applied equitably across all registration categories in accordance with the existing structure.

The legislation (Pub. L. 102–395) requires that the established fee recover costs during fiscal year 1993 and thereafter. The amount to be recovered is established by the Congressional appropriations process. This announcement establishes the fee structure under the existing registration system to recover the legislated appropriation. This appropriated amount required to be recovered for fiscal year 1993 will be $12 million above the fees currently set, and a total of $65.6 million will be required for fiscal year 1994.

A correction is also being made to Section 1301.11(d) to include reregistration which was inadvertently omitted in a previous change to the section.

Pursuant to section 3(c)(3) and 3(e)(2)(C) of E.O. 12291, this proposed action has been submitted for review to the Office of Management and Budget, and approval of that office has been requested pursuant to the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. et seq.

This rule is not a major rule for purposes of Executive Order (E.O.) 12291 of February 17, 1981. The vast majority of DEA registrants are considered to be small entities whose interests are to be considered under the provisions of the Regulatory Flexibility Act, 5 U.S.C. 601 et seq. However, these registrants are predominantly practitioners and pharmacies whose individual registration fees would be increased by $180 once every three years. Therefore, the Administrator has concluded that the fee increase will have no significant impact on small entities.

This action has been analyzed in accordance with the principles and criteria contained in E.O. 12612, and it has been determined that the proposed rule has no implications which would warrant the preparation of a Federalism Assessment.

List of Subjects

21 CFR Part 1301

Administrative practice and procedure, Drug traffic control, Security measures.

21 CFR Part 1311

Administrative practice and procedure, Drug traffic control, Exports, Imports.

For reasons set out above, 21 CFR part 1301 and 21 CFR part 1311 are proposed to be amended as follows:

PART 1301—[AMENDED]

1. The authority citation for part 1301 continues to read as follows:

Authority: 21 U.S.C. 821, 822, 823, 824, 871(b), 875, 877.

2. Section 1301.11 is proposed to be revised as follows:

§ 1301.11 Fee amounts.

(a) For each registration or reregistration to manufacture controlled substances, the registrant shall pay an application fee of $1,000.

(b) For each registration or reregistration to distribute controlled substances, the registrant shall pay an application fee of $500.

(c) For each registration or reregistration to dispense, or to conduct instructional activities with, controlled substances listed in Schedules II through V, the registrant shall pay an application fee of $240 for a three-year registration equating to an annualized fee of $80 per annum.

(d) For each registration or reregistration to conduct research or instructional activities with a controlled substance listed in Schedule I, or to conduct research with a controlled substance in Schedules II through V, the registrant shall pay an application fee of $80.

(e) For each registration or reregistration to conduct chemical analysis with controlled substances listed in any schedule, the registrant shall pay an application fee of $80.

(f) For each registration or reregistration to engage in a narcotic treatment program, including a compounder, the registrant shall pay an application fee of $80.

PART 1311—[AMENDED]

1. The authority citation for part 1311 continues to read as follows:

Authority: 21 U.S.C. 952, 956, 957, 958, unless otherwise noted.

2. Section 1311.11 is proposed to be revised as follows:

§ 1311.11 Fee amounts.

(a) For each registration or reregistration to import controlled substances, the registrant shall pay an application fee of $500.

(b) For each registration or reregistration to export controlled substances, the registrant shall pay an application fee of $500.

Dated: November 20, 1992.

Robert C. Bonner,

Administrator, Drug Enforcement Administration.

[IA-20-92]

RIN 1545-AQ57

Regulations Governing the Practice of Attorneys, Certified Public Accountants, Enrolled Agents, and Enrolled Actuaries Before the Internal Revenue Service; Correction

AGENCY: Treasury.

ACTION: Correction to correction of proposed regulations.

SUMMARY: This document contains corrections to the correction to proposed regulations (IA-20-92), which were published Friday, December 4, 1992, (57 FR 57400). The proposed regulations would amend the regulations governing the practice of individuals before the Internal Revenue Service. These regulations would affect individuals who are eligible to practice before the service.

FOR FURTHER INFORMATION CONTACT: David Meyer at 202-622-6232, (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

The correction notice that is the subject of this correction contains corrections to the proposed amendments to the regulations governing practice before the Internal Revenue Service (57 FR 46356, October 8, 1992). The regulations are in subtitle A, part 10, of title 31 of the Code of Federal Regulations and have been reprinted as Treasury Department Circular 230 ("Circular 230").

Need for Correction

As published, IA-20-92 contains an error which may prove to be misleading and is in need of clarification.

Correction of Publication

Accordingly, the publication of the correction to proposed regulations (IA-20-92), which was the subject of FR Doc. 92-29351, is corrected as follows:

1. On page 57400, column 1, under the heading **FOR FURTHER INFORMATION CONTACT:**, line 2, the telephone number "202-622-7606" is corrected to read "202-622-6232".

2. On page 57400, column 2, item number 5, the telephone number "202-622-7606" is corrected to read "202-622-6232" wherever it appears in that item number.

Cynthia E. Grigsby,

Alternate Federal Register Liaison Officer, Assistant Chief Counsel (Corporate).

[UT3-1-5452; FRL-4545-8]

Clean Air Act Approval and Promulgation of PM-10 Implementation Plan for Utah

AGENCY: United States Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: The EPA proposes approval of the State Implementation Plan (SIP) submitted by the State of Utah for the purpose of bringing about the attainment of the national ambient air quality standards (NAAQS) for particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers (PM10). The implementation plan was submitted by the Governor of Utah, to satisfy certain Federal requirements for an approvable nonattainment area PM-10 SIP for Utah and Salt Lake Counties.

EPA is also proposing to approve revisions to the State-wide SIP, Chapters 1 through 7 and 10 through 15, which was submitted by the Utah Air Quality Division Director as a supplement to the Governor's submittal. The State-wide revisions pertain to air program elements necessary to implement control strategies to assure attainment and maintenance of the NAAQS, such as resources, emergency episodes, monitoring program, legislative authority, public notification, etc.

DATES: Comments on this proposed action must be received in writing by February 16, 1993.

ADDRESSES: Comments should be addressed to the contact indicated below. Douglas Skie, Chief, 8ART-AP, Air Programs Branch, U.S. EPA, Region VIII, 999 18th Street, suite 500, Denver, Colorado 80202-2466.

Copies of the State's submittal and other information are available for inspection during normal business hours at the following location: U.S. Environmental Protection Agency Region VIII, Air Programs Branch, 999 18th Street, suite 500, Denver, Colorado 80202-2466.

FOR FURTHER INFORMATION CONTACT: Lee Hanley, 8ART-AP, U.S. EPA Region

VIII, 999 18th Street, suite 500, Denver, Colorado 80202–2466, (303) 293–1760.

SUPPLEMENTARY INFORMATION:

I. Background

A. Utah PM10 Statutory and Regulatory History

1. 1977 Clean Air Act (CAA) Requirements: Revision and Implementation of PM10 NAAQS

The CAA requires EPA to periodically review and, if appropriate, revise the criteria on which the NAAQS for each air pollutant are based, as well as revise the NAAQS themselves. On July 1, 1987 (52 FR 24634), EPA finalized its decision to revise the particulate matter NAAQS from "total suspended particulate" (TSP) to particles with an aerodynamic diameter less than or equal to a nominal 10 micrometers (PM10).

To implement the new particulate matter NAAQS, all areas in the country were divided into three groups, based on the probability that each area would violate the new PM10 NAAQS. "Group I" areas were those areas having violated the PM10 NAAQS or having air quality data showing a high (greater than 95%) probability of violating the NAAQS. These areas required substantial SIP adjustment. "Group II" areas were those areas estimated at having 20–95% probability of violating the PM10 NAAQS and needing less adjustment to their existing SIPs. "Group III" areas were those areas estimated as having less than 20% probability of violating the PM10 NAAQS and, therefore, only needing SIP adjustment as required under the preconstruction review program. See 52 FR 24672, 24679–82 (July 1, 1987).

In the State of Utah, Salt Lake and Utah Counties were identified by EPA as Group I areas. The rest of the State was classified as Group III (52 FR 29383, August 7, 1987). The State, therefore, under section 110(a)(1) of the 1977 CAA, was required to submit a PM10 SIP.

2. Citizen Lawsuit

In 1989, a lawsuit (*Preservation Counsel* v. *Reilly, Civil Action No. 89–C–262–G*, (D. Utah)) was filed by the Preservation Counsel, Utah Environment Center and the Utah Valley Citizens for Clean Air against EPA. The plaintiffs claimed that because the State had failed to submit a PM10 SIP within the timeframe provided under the 1977 CAA that provided for attainment of the PM10 NAAQS, the duty to issue such a plan for Utah had devolved to EPA and that EPA was required to issue a plan for Utah pursuant to section 110(c)(1) of the 1977 CAA.

A settlement agreement was signed by the parties in January 1990, which called for submittal of a SIP for Utah County and Salt Lake County and EPA approval, or EPA promulgation of a Federal Implementation Plan (FIP) for these Counties, if necessary, signed by the EPA Administrator by December 31, 1991. The settlement allowed the State to maintain the SIP development lead, but placed significant emphasis on EPA's involvement and technical oversight.

In mid–1990, the State determined that the stationary source issues in Utah County were significantly different from those of Salt Lake County and proposed to focus on one area plan at a time. The design values (levels from which to reduce emissions to attain the standard) were also different in these two areas. The Utah County area plan was adopted in September 1990 and submitted to EPA in October 1990. On November 15, 1990, the President signed into law revisions to the CAA (Pub. L. No. 101–549, 104 Stat. 2399). All former "Group I" areas and certain other areas were designated nonattainment for PM10 and classified as moderate by operation of law upon enactment of the 1990 Amendments. (Sections 107(d)(4)(B) and 188(a) of the Act.) Thus, Utah and Salt Lake County became moderate PM10 nonattainment areas (56 FR 56694, 56840, November 6, 1991) and were subject to the associated moderate PM10 nonattainment area SIP requirements.

The Salt Lake County area plan was adopted in June 1991, and submitted to EPA in November 1991. EPA's agreement as to the appropriateness of developing separate plans for the two area plans was based on its review of the various complex source contributions in these areas, the effort by the State to address the issues in an equitable and timely manner (numerous scoping and public hearings were held to obtain interested parties' comments), and the different areas' design values.

The State did consider control strategies for area and mobile sources which were common to both counties. The Utah County plan, therefore, was modified in June 1991 to be consistent with the Salt Lake County plan and resubmitted with the Salt Lake County plan in November 1991.

The parties voluntarily stipulated to dismissal of the lawsuit (agreeing to vacate the Settlement Agreement and dismiss the complaint) in August 1991.

B. Moderate PM10 Nonattainment Area SIP Requirements

The air quality planning requirements for moderate PM–10 nonattainment areas are set out in title I of the Act. The EPA has issued a "General Preamble" describing EPA's preliminary views on how EPA intends to review SIPs and SIP revisions submitted under title I of the Act, including those State submittals containing moderate PM–10 nonattainment area SIP requirements. (See 57 FR 13498 (April 16, 1992) and 57 FR 18070 (April 28, 1992).) The reader should refer to the General Preamble for a more detailed discussion of the interpretations of title I advanced in today's proposal and the supporting rationale. Today's rulemaking action will apply EPA's interpretations to the Utah PM–10 SIP taking into consideration the specific factual issues presented. EPA will consider any timely submitted comments before taking final action on today's proposal.

Part D of title I contains the provisions applicable to nonattainment areas. Moderate PM–10 nonattainment areas must meet the applicable requirements set out in subparts 1 and 4 of part D. Subpart 1, contains provisions generally applicable to all nonattainment areas and subpart 4 contains provisions specifically applicable to PM–10 nonattainment areas. At times, subparts 1 and 4 overlap or conflict. The EPA has attempted to clarify the relationship among these various provisions in the General Preamble and, as appropriate, in today's notice.

Those States containing initial moderate PM–10 nonattainment areas were required to submit, among other things, the following provisions by November 15, 1991:

1. A comprehensive, accurate, current inventory of actual emissions which provides a sufficient basis for determining the adequacy of the attainment demonstration.

2. Provisions to assure that reasonably available control measures (RACM) (including such reductions in emissions from existing sources in the area as may be obtained through the adoption, at a minimum, of reasonably available control technology—RACT) shall be implemented no later than December 10, 1993;

3. Either a demonstration (including air quality modeling) that the plan will provide for attainment as expeditiously as practicable, but no later than December 31, 1994, or a demonstration that attainment by that date is impracticable;

4. Quantitative milestones which are to be achieved every 3 years and which demonstrate reasonable further progress (RFP) toward attainment by December 31, 1994; and

5. Provisions to assure that control requirements applicable to major stationary sources of PM–10 also apply to major stationary sources of PM–10 precursors, except where the Administrator determines that such sources do not contribute significantly to PM–10 levels which exceed the NAAQS in the area. See sections 172(c), 188, and 189 of the Act.

Some provisions are due at a later date. States with initial moderate PM–10 nonattainment areas were required to submit a permit program for the construction and operation of new and modified major stationary sources of PM–10 by June 30, 1992. (See section 189(a).) Such States also must submit contingency measures by November 15, 1993, which become effective without further action by the State or EPA, upon a determination by EPA that the area has failed to achieve RFP or to attain the PM–10 NAAQS by the applicable statutory deadline of December 1994. (See section 172(c)(9) and 57 FR 13543–44.)

II. Today's Action

Section 110(k) of the Act sets out provisions governing EPA's review of SIP submittals. (See 57 FR 13565–66.) In today's action, EPA is proposing to grant approval of the plan revision submitted to EPA in a letter dated November 15, 1991. This submittal was intended to satisfy those moderate PM–10 nonattainment area SIP requirements due November 15, 1991. EPA proposes to approve the submittal as meeting all of the applicable requirements of the Act.

A. Regulatory Discussion

1. Procedural Background

The Act requires States to observe certain procedural requirements in developing implementation plans and plan revisions for submission to EPA. Section 110(a)(2) of the Act provides that each implementation plan submitted by a State must be adopted after reasonable notice and public hearing.[1] Section 110(l) of the Act similarly provides that each revision to an implementation plan submitted by a State under the Act must be adopted by such State after reasonable notice and public hearing. Utah held several public hearings after reasonable notice, evaluated the hearing comments, made changes to the SIPs and regulations as needed, and provided EPA with documentation of this process. The State documentation can be found in the State TSD, Evaluation of the PM10 SIPs Compliance with 40 CFR part 51, appendix V requirements.

The EPA also must determine whether a submittal is complete and therefore warrants further EPA review and action. (See section 110(k)(1) and 57 FR 13565.) The EPA's completeness criteria for SIP submittals are set out at 40 CFR part 51, appendix V (1991), as amended by 57 FR 42216 (August 26, 1991). The EPA attempts to make completeness determinations within 60 days of receiving a submission. However, a submittal is deemed complete by operation of law if a completeness determination is not made by EPA six months after receipt of the submission.

The Utah PM10 SIP revision was reviewed by EPA to determine completeness shortly after its submittal, in accordance with the completeness criteria set out at 40 CFR part 51, appendix V (1991), as amended by 57 FR 42216 (August 26, 1991). The submittal was found to be complete, and a letter dated January 19, 1992, was forwarded to the Governor indicating the completeness of the submittal and the next steps to be taken in the review process.

2. Emissions Inventory

Section 172(c)(3) of the Act requires that nonattainment plan provisions include a comprehensive, accurate, current inventory of actual emissions from all sources of relevant pollutants in the nonattainment area. Section 110(a)(2)(K) generally authorizes EPA to request any data necessary to perform air quality modeling for the purpose of predicting, among other things, impacts on the PM10 NAAQS. This would include, for example, a comprehensive, accurate, and current inventory of allowable emissions in the area. Because the submission of such inventories is a necessary adjunct to an area's attainment demonstration (or demonstration that the area cannot practicably attain), the emissions inventories must be received with this submission. (See 57 FR 13539.)

EPA describes the emission inventories for the Utah County and Salt Lake County plans in the discussion of these SIPs set out below. EPA proposes to approve the emission inventories as meeting the section 172(c)(3) statutory requirement.

3. RACM (Including RACT)

The General Preamble contains a detailed discussion of EPA's interpretation of the RACM (including RACT) requirement (see sections 172(c)(1) and 189(a)(1)(C), 57 FR 13539–45 and 13560–61; 57 FR 18072–74). The EPA's interpretation of this requirement is set out here only in broad terms.

The State should first identify available control measures, evaluating them for their reasonableness in light of the feasibility of the controls and the attainment needs of the area. A State may reject an available control measure if the measure is technologically infeasible or the cost of the control is unreasonable. The SIP must demonstrate attainment of the NAAQS as expeditiously as practicable, but no later than December 31, 1994 (unless the State demonstrates that attainment by that date is impracticable). Therefore, if a State adopts less than all available measures, but demonstrates, adequately and appropriately, that RFP and attainment of the PM–10 NAAQS is assured, and application of all such available measures would not result in attainment any faster, then a plan which requires implementation of less than all available measures may be approved as meeting the RACM requirement. As a suggested starting point for determining RACM, EPA has identified available control measures for sources of fugitive dust, residential wood combustion, and prescribed burning (57 FR 18072–74). The State should add to the list of available measures in an area, any measures that public commenters demonstrate may well be reasonably available in a particular circumstance.

The RACT for a particular source is similarly determined. The EPA's longstanding definition of RACT is the lowest emission limitation that a particular source is capable of meeting by the application of control technology that is reasonably available considering technological and economic feasibility (see 57 FR 13541). Thus, EPA recommends that available control technology be applied to those existing sources in the areas that are reasonable to control in light of the attainment needs of the area and the feasibility of controls.[2]

The State submitted documentation on the available control measures (including any available control technology) that explains what constitutes RACM (or RACT) for Utah County and Salt Lake County. EPA

[1] Also section 172(c)(7) of the Act requires that plan provisions for nonattainment areas meet the applicable provisions of section 110(a)(2).

[2] The EPA has issued guidance on the technological and economic parameters that should be considered in determining RACT for a particular source (57 FR 18073–74).

generally describes the control measures in the Utah County and Salt Lake County plans in the discussion of these SIPs set out below. As indicated below, EPA proposes to approve the control measures in these plans as meeting the RACM (including RACT) requirement.

A more detailed discussion of the individual source and source category contributions, their associated control measures (including available control technology) and an explanation as to why certain available control measures were not implemented, can be found in the State Technical Support Document (TSD).

4. Demonstration of Attainment

As noted, the initial moderate PM–10 nonattainment areas must submit a demonstration (including air quality modeling) showing that the plan will provide for attainment as expeditiously as practicable, but no later than December 31, 1994. (See section 189(a)(1)(B) of the Act; 57 FR 13538–39.) Alternatively, the State must show that attainment by December 31, 1994, is impracticable. In the General Preamble, EPA indicated that the attainment demonstrations for the initial moderate areas must follow existing modeling guidelines for PM10 or, if appropriate, may be developed consistent with the supplemental attainment demonstration policy issued for initial areas (see 57 FR 13539).

The 24-hour PM–10 NAAQS is 150 micrograms/cubic meter (μg/m3), and the standard is attained when the expected number of days per calendar year with a 24-hour average concentration above 150 μg/m3 is equal to or less than one. (See 40 CFR 50.6.) The annual PM10 NAAQS is 50 μg/m3, and the standard is attained when the expected annual arithmetic mean concentration is less than or equal to 50 μg/m3 (id.).

EPA describes the attainment demonstrations, including the air quality modeling utilized, for Utah County and Salt Lake County in the discussion of these SIPs set out below. Both areas demonstrate attainment by the end of 1993 with the control measures adopted. EPA proposes to approve the attainment demonstrations for both of these areas. For a more detailed description of the attainment demonstration and the control strategy used, see the TSD accompanying this notice.

5. PM–10 Precursors

The control requirements applicable to major stationary sources of PM10 precursors must also apply to major stationary sources of PM10 unless EPA determines that such sources do not contributes significantly to PM10 levels which exceed the NAAQS in the area (section 189(e) of the Act). The General Preamble contains a lengthy discussion on control requirements for PM10 precursors in moderate nonattainment areas and the type of technical information which EPA will rely on in making any determinations under section 189(e). (See 57 FR 13539–40 and 13541–42.)

An analysis of air quality and emissions data for the nonattainment area of Utah demonstrates that violations of the PM10 NAAQS are attributable to direct particulate matter emissions from PM10 and to sources of particulate matter precursor emissions of S02 and NOx.

6. Quantitative Milestones and Reasonable Further Progress (RFP)

The PM10 nonattainment area plan revisions demonstrating attainment must contain quantitative milestones which are to be achieved every three years until the area is redesignated attainment and which demonstrate RFP, as defined in section 171(1), toward attainment by December 31, 1994 (see section 189(c) of the Act; 57 FR 13539). RFP is defined in section 171(1) as such annual incremental reductions in emissions of the relevant air pollutant as are required by part D or may reasonably be required by the Administrator for the purpose of ensuring attainment of the applicable NAAQS by the applicable date.

For the initial moderate PM10 nonattainment areas, the emissions reductions progress made between the SIP submittal due date of November 15, 1991 and the attainment date of December 31, 1994, will satisfy the first milestone requirement. The de minimis timing differential makes it administratively impracticable to require separate milestone and attainment demonstrations. In implementing RFP for these initial moderate areas, EPA has reviewed the attainment demonstration and control strategy for the areas to determine whether annual incremental reductions different from those provided in the SIP should be required in order to ensure attainment of the PM–10 NAAQS by December 31, 1994. (See section 171(1).) EPA is proposing to approve the submittals for both areas as satisfying the quantitative milestone and RFP requirement.

7. Enforceability Issues

All measures and other elements in the SIP must be enforceable by the State and EPA. (See sections 172(c)(6), 110(a)(2)(A) and 57 FR 13556.) The EPA criteria addressing the enforceability of SIPs and SIP revisions were stated in a September 23, 1987 memorandum (with attachments) from J. Craig Potter, Assistant Administrator for Air and Radiation, *et al.* (See 57 FR 13541.) The criteria include, for example, ensuring that the rules contained in the SIP are clearly worded and explicit in their applicability to the regulated sources, compliance date(s) should be clearly specified, compliance periods and test methods should be clearly noted, recordkeeping requirements should be commensurate with the substantive requirements and failure to keep the required records should constitute a separate violation in itself, and any exemptions or variances should be clear in their applicability and how they are triggered. In addition to enforceable requirements, nonattainment area plan provisions must contain a program that provides for enforcement of the control measures and other elements in the SIP. (See section 110(a)(2)(C).) The State of Utah has a program that will ensure that the measures and other SIP elements are adequately enforced. EPA's confidence level on the enforceability of the PM10 measures and of continued enforcement for stationary sources can be found in the EPA staff evaluation report and in the FY91 end-of-year EPA compliance report which are included in the TSD.

8. Contingency Measures

As provided in section 172(c)(9) of the Act, all moderate nonattainment area SIPs that demonstrate attainment must include contingency measures. (See generally 57 FR 13543–44.) These measures must be submitted by November 15, 1993, for the initial moderate nonattainment areas. Contingency measures should consist of other available measures that are not part of the area's control strategy.

These measures must take effect without further action by the State or EPA, upon a determination by EPA that the area has failed to make RFP or attain the PM10 NAAQS by the applicable statutory deadline. Since contingency measures were not due with the November 15, 1991 moderate PM10 nonattainment area SIP requirements, EPA is not taking any action on this requirement in today's proposal.

C. The Utah PM10 SIP

1. Utah County

a. *Design value.* The Utah County area has three monitoring sites, each of which recorded violations of the PM10 NAAQS. For the period April 1988 through March 1990, the Lindon site

had 666 total number of days of available data; the second highest value is 254 µg/m3, measured in February 1989. For the period April 1988 through March 1990, the North Provo site had 226 days of available data; the first high is 191 µg/m3 measured in January 1988. For the period January 1989 to December 1989, the West Orem site had 339 days of available data; the first high is 263 µg/m3. These high/second high days represent the design value for these sites; they were determined using the "look-up table," Table 6–1, in the PM10 SIP Development Guideline document (EPA–450/2–86–001).

The Utah County monitoring network recorded additional data other than those stated above. However, to ensure that each season of the year is represented by the data used in determining the design value, EPA requires the use of a complete discrete 12-month data set, or sets which are multiples of 12-month periods. The use of the most recent data sets which represents the area is also encouraged.

The Utah County area had a unique data base involving the operation-shutdown-startup of Geneva Steel. The steel mill was down for the period from August 1986 to September 1987. Data comparison showed the facility as a major contributor to the PM10 violations. The days of violations, the average winter concentration, and average iron content on the filters were significantly greater during the operation of the facility than during the down period.

b. *Methods used to demonstrate attainment.* EPA recommends the use of certain methods to demonstrate whether a plan will provide for timely attainment (57 FR 13538–39). Dispersion and receptor modeling are among the recommended methods and these methods were initially used by the State to define the design value(s) and control strategies. EPA's initial review of the State's effort identified significant problems.

The State's wind data for use in the dispersion model were in vector units; scaler units were required. The meteorological conditions also affected modeling accuracy; the area experienced winds less than two meters per second. The EPA Gaussian (dispersion) model results are suspect under these stagnation conditions. The receptor modeling (Chemical Mass Balance (CMB), version 7.0) showed secondary contribution of 40%+; the dispersion model could address 20% secondary contribution. (Secondary particles are those which form in the atmosphere from gases which are directly emitted by sources. Sulfates and nitrates are the most common secondary particles in this nonattainment area and result from sulfur dioxide and oxides of nitrogen emissions.)

Within the time constraints in meeting the settlement agreement imposed deadlines to complete a SIP, there were extensive reanalyses of the monitoring network, CMB filters, and the emission inventory. The available time and software to convert the vector data to scaler were also reviewed. EPA determined that, with the information available from the detailed emission inventory (supported by a micro inventory) and new CMB analyses, the SIP would not result in additional or different control strategies if there were sufficient time to rerun a dispersion modeling analysis, adjusting for the concerns regarding stagnation and secondary contributions.

As indicated in the General Preamble, 57 FR 13539, EPA has developed a supplemental attainment demonstration policy that applies to the initial moderate PM10 nonattainment areas. ("PM10 SIP Attainment Demonstration Policy for Initial Moderate Nonattainment Areas" issued by John Calcagni on March 4, 1991.) The policy indicates that in certain circumstance (where time constraints, inadequate resources, inadequate data bases, lack of a model for some unique situations, and other unavoidable circumstances would leave an area unable to submit an attainment demonstration by November 15, 1991), "modified demonstrations" may be accepted on a case-by-case basis. The policy recommends that a modified demonstration be accompanied with the following: (1) Documentation of the procedures or analyses used in the modified method; (2) an explanation why alternative methods identified in EPA guidance were not used; (3) a description of how the modified method demonstrates, adequately and appropriately, area-wide attainment; and (4) when the design value is based on monitoring data, a showing that the SIP is based on one full year of adequate data for an approved network, a review of the monitoring data and network, and provision for appropriate followup monitoring to address issues raised during the review. For the reasons stated previously, EPA believes it was appropriate for the State to use a modified demonstration for Utah County. The State TSD describes how the Utah County analyses are consistent with this policy.

c. *Emission inventories.* The base year emission inventory was for 1988. Since the exceedances are winter-time occurrences, the State focused on a winter-time (1988–89 season) inventory and an annual inventory. Summaries of these inventories, as well as the attainment year inventory, are provided in Table 9.A.3 of the SIP. Specific details of the base year and attainment year (after controls) inventories are provided in Volume II, Utah County, State Technical Support Document. The accuracy of the emission inventory was verified through a micro inventory effort. The micro inventory effort is an analyses of the emissions in a specifically defined area around a monitor. The area is defined by looking at the sources that may impact that monitor and the wind patterns for a given 24-hour period around that monitor. The inventory analysis critically scrutinizes the source emissions in that area. For example, in evaluating fuel burning emissions, a door-to-door survey asked questions about what type of fuel was burned, how much was burned, what type of device was used for burning, and when and for how long burning occurred. This type of analysis was carried out for all the source categories; it relied on specific data gathered, rather than on general calculations such as those based on population. The results of this effort are provided in volume I, appendix D, Utah County, State Technical Support Document. The discussion comparing the results of the micro inventory to the primary PM10 average estimates for the CMB analyses is found in volume I, General Data, section 7.0, Salt Lake County, State Technical Support Document. EPA is proposing to approve the emissions inventory submitted by the State for Utah County as meeting the emissions inventory requirement of section 172(c)(3) of the Act.

Although the design values varied by site, the source apportionments were similar. The source apportionment at the West Orem monitoring site, which had the County's highest design value, was representative of the source apportionment of the Lindon and North Provo monitoring sites. Thus, if attainment can be demonstrated at West Orem, attainment could also be assured at the other two sites. The categories of sources contributing to the design day include Geneva Steel (62.5%, primary and secondary), automobile (10.9%, primary and secondary), space heating (including wood and coal burning, primary and secondary, 16.6%), and other point sources (10%, primary and secondary).

d. RACM (including RACT). To demonstrate attainment by December 1994 (and to show ongoing maintenance of the NAAQS), the SIP provided for implementation of the following control

measures (the SIP shows attainment by 1993 and maintenance to 2003):

(1) New operating parameters and emission limitations for PM10, SO_2, and NOx for existing sources of primary and secondary PM10 impacting the ambient concentrations at the monitoring sites are detailed in appendix A.1. of the Utah Air Conservation Regulation (UACR). These control measures include:

(a) A 54.4% emission reduction for Geneva Steel (primarily from the coke oven stacks and open hearth), includes facility-wide emission limitations, and reporting and recordkeeping requirements specified in appendix A.1.2.F of the SIP;

(b) Fourteen other sources, which include a nitric acid plant, power plants, and asphalt & cement plants, have emission limitations specified in appendix A.1.2.A through A.1.2.O;

(c) Provisions limiting fuel burning to natural gas or to a specific sulfur content in the fuel, with specific permitting and recordkeeping requirements, apply to all major fuel burning units or facilities in the County;

(d) General provisions relating to stack testing, opacity, compliance with annual limitations, recordkeeping requirements of consumption/production, on-site fugitive dust control requirements from unpaved operation areas, etc., are specified in appendix A.1.1;

(e) Regulations to ensure implementation and enforcement provisions were revised or added, such as definitions, general requirements applicable to all sources or source categories, permitting regulations, emission standards, and emergency episode requirements.

(2) No burn periods, beginning September 1992, will achieve 60% emission reduction from fireplaces and 50% from woodstoves (section 9.A.6(4)(a) of the SIP):

(a) Area coverage is north of the southernmost border of Payson City and east of State Route 68. (This covers virtually all the populated areas in Utah County; the area not covered is mountainous and Utah Lake);

(b) Program is triggered when ambient PM10 concentrations reach 120ug/m3 as measured by the real-time monitor located at the Lindon monitoring site;

(c) City and County Health Department commits to adopt local regulations to promulgate plan consistent with the State regulations;

(d) The State commits to eight inspectors round-the-clock during mandatory no burn periods and inspections to include investigation of calls made by private citizens;

(e) A regulation which specifically prohibits any visible emissions during the mandatory no burn period, except for those residences with burning as the sole source of heat for the entire residence and registered with the Executive Secretary or the local Health District (UACR 4.13.3);[3] and

(f) Guidelines established for assessing the amount of penalty for violation of the no burn regulation (UACR 9.A.6.(4)(c)(viii)).

(3) Reducing sand/salt/slag applied to roads during the winter time by 20% (section 9.A.6(7) of the SIP). In addition, a study is to be conducted to confirm 20% reduction. Within six months from completion of the study, agencies responsible for application of these materials on the road must submit a plan and implementation schedules to reduce initial silt loading by 25% from the amount applied during the 1990 base year. The methods included in the Plan must be implemented by 10/1/93. Regulations specifying the requirements for those who apply salt, slag or sand to road are located in UACR 3.2.7.A & B.

EPA is proposing to approve the road salting and sanding rules contained in the SIP. Further, based on the information currently available, EPA believes the 20% reduction estimated by the State is reasonable. However, the State has committed to conduct a study to confirm the appropriateness of this reduction estimate.

In addition, the State has committed to implement methods, described above, in light of the study no later than October 1, 1993, and to submit the findings of the study and any such measures to EPA as a SIP revision. In acting on any such SIP revision, EPA would review the sufficiency of any new measures in light of the new information. EPA also may find it necessary to assess the sufficiency of the area's attainment demonstration in light of such new information. See section 110(k)(6) of the Act.

e. Attainment demonstration. EPA requires that attainment be demonstrated at all sites violating the PM10 standard. The control measures discussed above are necessary for all the sites to attain the standard, although the impact of a specific source category at a site may vary. The attainment summary for the 24-hour PM10 NAAQS at each of the three monitoring sites (Lindon, North Provo, and West Orem) through the year 2003 can be found in Tables 9.A.5, 9.A.7 and 9.A.9 of the SIP, respectively. Changes in emissions between 1993 and 2003 show a slight decrease in mobile source emissions, but a slight increase in residential space heating (woodburning) emissions.

Although the State focused on the emissions and exceedances during the winter months, the control measures specific to the stationary sources are year-round. The highest annual average in Utah County occurred in 1988 at the Lindon site and was 54 ug/m3. Since attainment of the 24-hour design value results in an emission reduction of 43% in Utah County, the 24-hour emission limits are the more restrictive and will ensure attainment of the annual standard (as summarized in Table 9.A.24 of the SIP).

In sum, EPA believes the methods, including modeling, that the State has employed to demonstrate attainment are adequate and appropriate. Those methods demonstrate that the control measures described above will provide for attainment of the PM10 NAAQS in Utah County as expeditiously as practicable and no later than December 31, 1994. Therefore, EPA is proposing to approve the State's attainment demonstration. Because the State has adopted those available control measures, described above, that will provide for attainment of the PM10 NAAQS in Utah County as expeditiously as practicable and no later than December 31, 1994, these measures are "reasonably" available and EPA is proposing to approve these control measures as meeting the RACM (including RACT) requirement for the Utah County PM10 nonattainment area.

f. Additional measures. The State has also committed to adopt a diesel inspection and maintenance (I/M) program to reduce diesel particulate emissions by 20%. The SIP contains a detailed discussion of the program elements, committed to by the State, including, among other things, the following measures:

(a) Opacity inspections and mandatory repair upon failure;

(b) Compliance monitored through diesel vehicle registration;

(c) Certification of mechanics and stations upon their demonstration of adequate training, skill, and resources;

(d) Opacity compliance test methods and roadside opacity enforcement;

(e) Fleet self-certification;

(f) Limited waiver provisions;

(g) Public education on the program requirements provided to diesel vehicle owners and diesel industry organizations;

[3] The SIP requires that the County develop regulations/ordinances for fireplace and woodstove installer and operator training programs, a solid fuel burner inspection program, weatherization requirements for homes, and banning of coal burning. EPA notes that when implemented, this program should ensure maintenance of the NAAQS in the area.

(h) Enforcement program, penalties and annual program evaluation.

The SIP also contains a detailed schedule of the State's action on the program that indicates, among other things, the program provisions will become effective on July 1, 1993. If EPA takes final action approving the State's commitment, the State must submit the program to EPA as a SIP revision.

Based on information available at the time the SIP was developed, it was believed that a 20% emission reduction could be achieved by a diesel I/M program combining elements of the California and Colorado diesel I/M programs, and inclusion of the majority of diesel vehicles operating in the Wasatch Front area. Recently, EPA has examined the Colorado and California programs because of increasing interest nationwide, and has presented revised estimates of their effectiveness. This updated information suggests that more work needs to be completed on both the technical design and administrative implementation elements of the Utah program.

EPA is proposing to approve the State's commitment to implement a diesel I/M program as strengthening the SIP. The State has been holding working group meetings with the I/M counties and affected parties to draft regulations and technical specifications, and has consulted with EPA Region VIII and the EPA Office of Mobile Sources (OMS) on available technologies, experience with other programs, and program enforcement. While test procedures have not been finalized and vehicle applicability has not been defined, EPA believes that a 20% reduction may be achievable under some program scenarios similar to those currently under consideration by the State of Utah.

In sum, EPA notes that it is unnecessary at this juncture to quantify the actual emissions reductions that will be realized from this program. EPA intends to determine what emissions reductions should be assigned to this program when EPA takes rulemaking action on the SIP revision containing the program actually adopted by the State.

2. Salt Lake County

Two distinct PM10 problems have been identified in Salt Lake County: (1) The summer-time exceedances due to blowing dust from the Kennecott tailings in Magna, and (2) the winter exceedances during winter inversion periods in Salt Lake and Davis Counties.

a. Magna—design value. Based on 724 observations in a three-year period, 1987 through 1989, the design value was determined to be the third-high reading, 304 ug/m3. The exceedances were specifically caused by blowing dust from the Kennecott tailings pond while the facility was shut down. Additional analyses to determine any other source contribution were not necessary.

b. Magna—RACM (including RACT). Kennecott and the State agreed to various control measures to ensure dust control of the tailings pond during current operation, and temporary or permanent shutdown of the mine, smelter and/or associated tailings pond operations.

The control measures (which included slurry distribution throughout the periphery and surface top of the pond) were completed in July 1988. Vegetation planting was also initiated. The meteorological conditions (winds at 15 mph or greater) which caused the past exceedances have occurred since the implementation of the control measure and no exceedances were recorded. The control measures are defined in section 9.A.6(1) of the SIP and appendix A.2.2.BB.B of the Utah Air Conservation Regulation.

c. Salt Lake County—Design Value. The Salt Lake County exceedances, with the exception of the Magna area problem, occurred only during the winter season (November through February). The County has three monitoring sites (North Salt Lake, Air Monitoring Center, and Salt Lake), which recorded violations of the PM10 NAAQS. The North Salt Lake site had data from 1987 to 1990; the design value is 169ug/m3. The Air Monitoring Center had data from 1989 and 1990; the design value is 177ug/m3. The Salt Lake site had data from 1988 to 1990; the design value is 170ug/m3.

The source apportionments for these sites are fairly similar, showing significant PM10 contribution from secondary emissions. (In this nonattainment area secondary emissions, called precursors, are gaseous emissions of sulfur dioxide (SO2) and nitrogen oxides (NOx) that result in particulates due to chemical reactions in the atmosphere.) The Salt Lake area has different types of major stationary sources which emit SO2 and NOx emissions including refineries, a copper smelter, power plants, and asphalt plants. Significant emissions were also identified from industrial vehicles, trains, and planes (Salt Lake has an international airport and a major railroad distribution center), woodburning, and from gasoline vehicles. The State concluded that showing attainment at the Air Monitoring Center, where the design value was highest, would also show attainment at the remaining two sites.

Analyses of the gridded emission inventory and the CMB indicated that the Salt Lake monitors, especially the North Salt Lake site, were impacted by PM10 and its precursors (SO2 and NOx) in Davis County. Therefore, to adequately address the nonattainment problem in Salt Lake County, sources were evaluated and controls required in Davis County, as well as in Salt Lake County.

d. Salt Lake County—Methods Used to Demonstrate Attainment. As with the Utah County effort, the Salt Lake modeling analysis was receptor modeling, or CMB, due to difficulties with using dispersion modeling. Low wind speed (stagnation) and inversions were occurring meteorological conditions; they were not necessarily as severe as the conditions in Utah County. The area, however, had significant mountain-valley-lake effects. (The Wasatch Mountains are to the east and the Great Salt Lake is to the west.) The State has only vector wind data, which could not be changed to scaler units in a timely manner. Therefore, to meet the deadlines of the Settlement Agreement, EPA and the State agreed to proceed with the Salt Lake analysis using CMB and emission inventory rollback. A micro inventory and critical review of the CMB provides an adequate and appropriate analyses of the PM10 contribution and the required emission reduction necessary for attainment in Salt Lake County. In addition, Kennecott Copper performed a tracer study in February 1990 to determine if its emissions impact the Salt Lake monitoring sites. That study confirmed that the 1,215 ft. stack and emissions from low heights at the smelter do impact the monitoring sites.

One of the factors that supported the decision to evaluate the area using CMB and emission inventory data and not dispersion modeling was the acceptability of the ambient air monitoring network. The area has seven sites: (1) Bountiful is representative of the residential community to the north, (2) North Salt Lake is representative of the refinery industrial area, (3) Salt Lake City is representative of downtown Salt Lake and vehicle related emissions, (4) Air Monitoring Center also represented the downtown area, (5) Magna is representative of the Kennecott Tailings problem, (6) Breeze Drive is representative of the residential area in Magna and is not source oriented, and (7) Cottonwood is southeast of downtown Salt Lake and is a residential area of maximum woodburning impact. The State provided gridded emissions

analyses for all stationary sources of PM10, SOx, and NOx emitting greater that 40 tons per year (tpy), area source emissions (space heating emissions based on the micro inventory and population density information), and mobile source emissions (based on traffic counts, vehicle registration and population density information). The adequacy of the monitoring network's performance (i.e., quality assurance, performance and accuracy, etc.) was also evaluated as described in the TSD.

As discussed in II.C.1.b above, EPA's policy indicates that, in certain circumstances, "modified demonstrations" may be accepted on a case-by-case basis. The policy is applicable to the Salt Lake County attainment demonstration due to the meteorological and topographical concerns, as well as the secondary particulate contribution issues. These issues were documented in the TSD.

The State also adequately addressed issues associated with the complexity of collecting, analyzing, and interpreting the CMB data including: (1) Excess water or ice buildup on the filters, (2) quartz versus teflon filters, (3) refrigeration versus room temperature for storing of filters, (4) number of samples to evaluate, (5) availability of source profiles for identified source types, (6) more source profile versus chemical measurements, and (7) interpretation of mass loss. The potential uncertainties associated with the CMB were significant in Salt Lake County due to the larger impact from a variety of source types in the area and the larger area, and stationary and mobile source secondary emissions. However, the State adequately addressed this by conducting extensive analysis on additional filter media collected in 1990 which considered all the factors mentioned above. The State's documentation of this modeling analysis is found in volume I, Salt Lake County, General Data Technical Support Document.

e. *Salt Lake County—Emission Inventory.* The base year emission inventory was for 1988. Since the exceedances were winter-time occurrences, the State focused on a winter-time (1988–89 season) inventory and an annual inventory. Summaries of these inventories, as well as the attainment year inventory, are provided in Table 9.A.13 of the SIP. Specific details of the base year and attainment year (after controls) inventories are provided in volumes II through VI, Salt Lake County, State Technical Support Document. The accuracy of the emission inventory was verified through a micro inventory effort. The results of this effort are provided in volume I, appendix D, Salt Lake County, State Technical Support Document. The discussion comparing the results of the micro inventory to the primary PM10 average estimates for the CMB analysis is found in volume I, General Data, sections 4.0, 5.0 and 7.0, Salt Lake County, State Technical Support Document. Thus, EPA is proposing to approve the emissions inventory information submitted by the State for this area as meeting the requirement of section 172(c)(3) of the Act.

The Air Monitoring Center site, with the highest design value in the area, was used as the "control" site for demonstrating attainment of the PM10 NAAQS in Salt Lake County. The categories of source contribution for the highest design value site include refineries (5.35% primary), other point sources (12.42% primary), secondary sulfates (12.97%, primarily from Kennecott smelter and refineries), secondary nitrates (10.42%, primarily from Kennecott mine and refineries), automobiles (29.28% primary and secondary), space heating (including wood and coal burning, 24% primary and secondary), and other sources (trains and planes, 3.52% primary and secondary). The source contribution for all the sources, except Kennecott, are similar at the other monitoring sites. The Kennecott source contributions were 4 to 6% for primary PM10 at the North Provo and Salt Lake sites and 0% at the Air Monitoring Center.

f. Salt Lake County—RACM (including RACT). To demonstrate attainment by December 1994 (and to show on-going maintenance of the NAAQS), the SIP provides for implementation of the following control measures (the SIP shows attainment by 1993 and maintenance to at least 2000):

(1) New operating parameters and emission limitations for PM10, SO2, and NOx for existing sources of primary and secondary PM10 impacting the ambient concentrations at the monitoring sites are detailed in appendix A.2. of the UACR. These control measures include:

(a) Significant emission reduction for Kennecott's facilities (concentrator, power plant, refinery, gold mine, copper mine and smelter). The smelter's 1215 foot stack previously was allowed to emit SO2 emissions of 18,000 lbs/hr, annual average and a maximum 3-hour average of 98,400 lbs/hr. The new emission limit which requires emission reduction equivalent to that which would be realized from a double contact acid plant is 3,240 lbs/hr, annual average and 5,700 lbs/hr, 24-hour average.

(b) Emission reduction for the refineries (the major control requirements are the installation of a sulfur recovery unit, and emission limitations on the boilers, furnaces, flares, catalytic crackers, etc.);

(c) Provisions allowing the burning of only natural gas fuel during the winter time (November through February) at all power plants; year-round burning of natural gas fuel is required at Utah Power and Light (Gadsby and 40 N. 100W.) and Murray City Power;

(d) Sources are considered major if they emit 50 tpy of PM10, SO2, or NOx, or any combination of the three pollutants.

(e) General provisions relating to stack testing, opacity, compliance with annual limitations, recordkeeping requirements of consumption/production, on-site fugitive dust control requirements from unpaved operation areas, etc.

(f) Regulations to ensure implementation and enforcement provisions were revised or added, such as definitions, general requirements applicable to all sources or source categories, permitting regulations, emission standards, emergency episode requirements and malfunction provisions.

(2) No burn period, beginning September 1992, will achieve 60% emission reduction from fireplaces and 50% from woodstoves (section 9.A.6(4)(b) of the SIP):

(a) Area coverage is all of Salt Lake County and for areas in Davis County which are south of the southern-most border of Kaysville; the prohibition applies when the ambient concentration of PM10 reaches 120 μg/m3 and the forecasted weather includes a temperature inversion which is predicted to continue for at least 24 hours;

(b) The State commits to eight inspectors round-the-clock during mandatory no burn periods and inspections to include investigation of calls made by private citizens;

(c) A regulation which specifically prohibits any visible emissions during the mandatory no burn period, except for those residences with burning as the sole source of heat for the entire residence and registered with the Executive Secretary or the local health department (UACR 4.13.3); and

(d) Guidelines established for assessing the amount of penalty for violation of the no burn regulation (UACR 9.A.6(4)(c)(viii)).

(3) Reducing sand/salt/slag applied to roads during the winter-time by 20%, as described above in the Utah County plan, B.1.d.3. EPA's position regarding

this measure is also the same as described above in the discussion of the Utah County plan and is incorporated here by reference. In short, EPA is proposing to approve the road salting and sanding rules contained in the SIP. Based on the information currently available, EPA believes the 20% reduction estimated by the State is reasonable. However, in acting on any SIP revision following from the study described in B.1.d.3 above, EPA would review the sufficiency of any new measures in light of the new information. EPA also may find it necessary to assess the sufficiency of the area's attainment demonstration in light of such new information. See section 110(k)(6) of the Act.

g. *Salt Lake County—Attainment Demonstration.* The control strategies discussed above are necessary to demonstrate attainment at the three monitoring sites, although the impact of a specific source category at a site may vary. The attainment summaries for the 24-hour PM10 NAAQS at each of the monitoring sites (North Salt Lake, Air Monitoring Center, and Salt Lake City) through the year 2000 can be found in Tables 9.A.16, 9.A.a and 9.A.22, respectively. Changes in emissions between 1993 and 2000 show a slight decrease in mobile source emissions, but an increase from residential space heating (woodburning).

Although the State focused on the emissions and exceedances during the winter months, the control measures specific to the stationary sources are year-round. The highest annual average, 54μg/m3, in Salt Lake County occurred in 1988 at the North Salt Lake site. Since the 24-hour design value results in a PM10 emission reduction of 19.6% in Salt Lake County, the 24-hour emission limits are more restrictive, and will ensure attainment of the annual standard (as summarized in Table 9.A.24 of the SIP).

The methods, including modeling, that the State has employed to demonstrate attainment are adequate and appropriate. Those methods demonstrate that the control measures, including the Magna measures, will provide for attainment of the PM10 NAAQS in Salt Lake County as expeditiously as practicable and no later than December 31, 1994. Therefore, EPA is proposing to approve the State's attainment demonstration for Salt Lake County. Because the State has adopted those available control measures, described above, that will provide for attainment of the PM10 NAAQS in Salt Lake County as expeditiously as practicable and no later than December 31, 1994, these measures are "reasonably" available and EPA is proposing to approve these control measures as meeting the RACM (including RACT) requirement for the Salt Lake County PM10 nonattainment area.

h. *Additional Measures.* The State's commitment to adopt a diesel I/M program to reduce diesel particulate emission by 20% applies to Salt Lake and Davis County as well as Utah County (section 9.A.6(6) of the SIP). In the Utah County portion of this notice, EPA described in broad terms the program elements and associated schedules committed to by the State. The prior discussion of the commitment applies with equal force here. EPA's position regarding the State's commitment to adopt this program is also the same as that described in the Utah County discussion above and is incorporated here by reference. In short, EPA is proposing to approve the State's commitment to develop and implement the program as strengthening the SIP. EPA also notes that it is unnecessary, at this juncture to quantify the actual emissions reduction that will be realized from the program. EPA intends to determine what emissions reductions should be assigned to this program when EPA takes rulemaking action on the SIP revision containing the program actually adopted by the State.

D. Additional Section 110(a)(2) and Section 172 CAA Requirements

The Utah State-wide SIP was last revised in 1978 and, at that time, the State addressed major SIP elements such as resources, ambient monitoring program, emergency episodes, permitting, etc. These program elements are required by section 110(a)(2) and section 172 (Part D) of the CAA. The Utah SIP has been revised since 1978, but the revisions were only for pollutant specific nonattainment areas. To ensure adequate implementation and enforcement of the PM10 SIP, the State reviewed and updated its State-wide SIP and regulations. The regulations were revised with the PM10 SIP. The State-wide SIP, excluding section 9 (pollutant specific nonattainment area plans and section 8 (Prevention of Significant Deterioration), was revised to address changes in EPA guidance and other Federal requirements. A public hearing was held on these revisions on December 16, 1991. The revisions were made effective on March 31, 1992, and officially submitted to EPA on October 16, 1992. These revisions are set out in chapters 1–7 and 10–16 of the State-wide SIP. EPA is proposing to approve these revisions in today's notice.

Prior to this revision, the UACR were incorporated into the State-wide SIP, chapter 12. During the public hearing process, the State identified administrative and publishing concerns which justified the "rearranging" of the regulations and the document titled "SIP". The State clarified that the SIP has always been incorporated by reference into the regulations, as stated in UACR R446–2. Past inclusion of the regulations into the SIP creates a double incorporation. The State clarified that the regulations and the revised "SIP" will continue to be federally enforceable for the State-wide program. Clarification of the State's position on this issue is documented in the State's response to public hearing comments on the revisions to chapter 1–7 and 10–15; the State's internal memorandum of its response to public hearing comments is dated December 23, 1991, and is included in the State TSD.

E. Post SIP Submittal Issues

EPA reviewed the Utah PM10 submittal dated November 15, 1991, and determined the package as administratively and technically complete. This finding was documented in a letter to the Governor of Utah on January 17, 1992. EPA, however, had several concerns on the approvability of the SIP due to missing documentation. Documentation on the State's analyses on various stationary source control measures and how they were to be revised in the SIP and specified in the permits was needed. EPA has since received a majority of the documentation requested or has received an adequate State response with respect to correcting any stationary source emission limitation clarity issues. The State did not need a formal SIP revision (i.e., that which has gone to the public hearing process) to correct these changes (with the exception of the Pacific States Cast Iron opacity and the 202 test method, discussed below) because the changes were not significant substantive modifications.

The Pacific States Cast Iron Company (this source is located in Utah County) opacity limit stated in the SIP is 30%. Generally, EPA policy provides that, for any major stationary source emitting particulates in a nonattainment area, the opacity should be restricted to 20% unless the source can demonstrate that 20% is not feasible. In that case, the source must demonstrate the lowest opacity level that is feasible. The 30% opacity was a requirement that was stated in the public hearing document. This opacity limit was an oversight in the review of the Pacific States Cast Iron emission limitations. In a letter dated

October 23, 1992, the Director of the Utah Division of Air Quality committed to review the emission limit (the 20% or feasible opacity level) for this source and to adopt a SIP revision, if appropriate, by March 1993. The source permit requirements will be modified through the permit review process (as approved by EPA and which includes a public hearing). The SIP limitations will be revised accordingly. The actions proposed in today's notice do not appear to be affected by the current emission limit for this source. However, review of the emission limit may, among other things, facilitate maintenance of the PM10 NAAQS.

When the Utah PM10 SIP was finalized, Method 202 had not been promulgated by EPA. Therefore, the absence of Method 202 is not a basis for disapproving any requirements or elements in the SIP submittal being acted on today. However, Method 202 is now available and should be specified in the future as appropriate in the SIP and in the stationary source permits. The State was aware of this potential requirement and did agree to address this in a future SIP revision. This issue was discussed during the public hearing process.

During the review of the November 15, 1991 submittal, EPA and the State identified typographical errors in the final printing of the SIP. The State has committed to correct these errors in a letter dated July 1, 1992. The typographical errors are:

(1) page 42 of the SIP, section 9.A.6.(2)(a), fifth line incorrectly references the monitor site in the UACR. It should reference appendix A, section 9 of the SIP. (2) page 52 of the SIP, third paragraph, sixth line, the "* * * 1998 base year * * *" should be "* * * 1990 base year * * *" (3) page 185, section 9 of the SIP, appendix A.2.2.RR, Condition 6, needs to be deleted, this condition applies to the Kennecott tailings pond, not the Salt Lake County Asphalt-Welby Pit.

III. Implications of Today's Action

The EPA is proposing to approve the plan revision submitted to EPA for the Utah and Salt Lake Counties, Utah, in a letter from the Governor dated November 15, 1991. Among other things, the State of Utah has demonstrated that the Utah and Salt Lake Counties PM10 nonattainment areas will attain the PM–10 NAAQS by December 31, 1994. The Utah Air Quality Regulations have been revised numerous times since the early 1970's. The regulations have been renumbered and new requirements added. For that reason, EPA has proposed to replace, in its entirety, the existing UACR with that which was also submitted on November 15, 1991.

EPA is also proposing to approve the State-wide SIP revisions (chapters 1–7 and 10–15) submitted in a letter dated October 15, 1992, by the Director, Utah Air Quality Division. The October 15, 1992 submittal was referenced in the Governor's original November 15, 1991 letter.

As noted, additional submittals for the initial moderate PM–10 nonattainment areas are due at later dates. The EPA will determine the adequacy of any such submittal (i.e., new source review, contingency measures) as appropriate.

IV. Request for Public Comments

The EPA is requesting comments on all aspects of today's proposal. As indicated at the outset of this notice, EPA will consider any comments received by February 16, 1993.

V. Executive Order 12291

The OMB has exempted this rule from the requirement of section 3 of Executive Order 12291.

VI. Regulatory Flexibility

Under the Regulatory Flexibility Act, 5 U.S.C. 600 et. seq., EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over population of less than 50,000.

SIP approvals under section 110 and subchapter I, part D of the CAA do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute federal inquiry into the economic reasonableness of state action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S. E.P.A.* 427 U.S. 246, 256–66 (S.Ct. 1976); 42 U.S.C. 7410(a)(2).

List of Subjects in 40 CFR Part 52

Air pollution control, hydrocarbons, intergovernmental relations, nitrogen dioxide, particulate matter, reporting and recordkeeping requirements, and sulfur dioxide.

Authority: 42 U.S.C. 7401–7671q.

Coast Guard

46 CFR Part 28

[CGD 88–079a]

RIN 2115–AD12

Commercial Fishing Industry Vessel Regulations

AGENCY: Coast Guard, DOT.

ACTION: Supplemental notice of proposed rulemaking; extension of comment period.

SUMMARY: On October 27, 1992 the Coast Guard published in the **Federal Register** (57 FR 48670) a supplemental notice of proposed rulemaking for documented or state numbered uninspected fishing, fish processing, and fish tender vessels to implement provisions of the Commercial Fishing Industry Vessel Safety Act of 1988. Because of requests for additional time to comment on the proposed rulemaking, the comment period is being extended for an additional 60 days. Also, a toll free telephone number will be established at Coast Guard Headquarters that will allow the public another avenue to provide the Coast Guard with comments.

DATES: Comments must be received on or before February 28, 1993.

ADDRESSES: Written comments may be mailed to the Executive Secretary, Marine Safety Council (G–LRA–2/3406) (CGD 88–079a), U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593–0001, or may be delivered to room 3406 at the above address between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. Comments via the toll free (1–800–282–8724) number may be called in 24 hours a day, seven days a week. The telephone number is (202) 267–1477 for further information about submitting written comments. For further information concerning phone comments, contact LCDR Tim Skuby, (202) 267–2307.

The Executive Secretary maintains the public docket for this rulemaking.

Written comments and synopsized transcripts of verbal comments will become part of this docket and will be available for inspection or copying at room 3406, U.S. Coast Guard Headquarters. Original recordings of telephone comments may be listened to at this address with advance request to do so.

FOR FURTHER INFORMATION CONTACT: LCDR Tim Skuby, Merchant Vessel Inspection and Documentation Division, Fishing Vessel/Offshore Activities Branch (G–MVI–4), room 1405, U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593–0001, (202) 267–2307.

SUPPLEMENTARY INFORMATION:

Request for Comments

In the supplemental notice of proposed rulemaking (SNPRM) published on October 27, 1992, the Coast Guard encouraged interested persons to participate in this proposed rulemaking by submitting written comments including views, data, or arguments. Several persons requested additional time to comment citing the reason that the SNPRM will have a potentially major impact on a large segment of the fishing industry and that with the holiday season approaching, it would be difficult for them to study these proposed regulations and provide responsible feedback. Further, the Coast Guard has determined that a 60 day comment period may have been insufficient for industry publications to notify their readers of the opportunity to comment on the proposed rule in time for them to do so.

Additionally, the Coast Guard is establishing a toll free number at Coast Guard Headquarters that will allow the public another avenue to provide comments. The toll free number is 1–800–282–8724 and will be on line beginning December 28, 1992. This number will be unattended. A prerecorded message will greet the caller. Comments received using this number will be considered along with the written comments. In addition, use of this number to provide verbal comments will constitute specific permission from the caller to record the phone call.

The Coast Guard does not agree that there is a need to provide the public hearings for this rulemaking. It is the Coast Guard's position that the holding of public hearings will not measurably benefit this rulemaking.

The Coast Guard held 13 public hearings prior to the publication of a final rule (CGD 88–079) implementing other provisions of the Commercial fishing Industry Vessel Safety Act of 1988 in the **Federal Register** on August 14, 1991 (56 FR 40364). As a result of these public hearings and the written comments, three topics (stability for fishing vessels less than 79 feet in length, survival craft for fishing vessels carrying less than four individuals on board operating within 12 miles of the coastline, and the administration of exemptions) were separated from that final rule. This SNPRM is the direct result of written and verbal comments previously provided on the subject of stability for fishing vessels less than 79 feet in length, and they have been incorporated into this proposed rulemaking. By extending the comment period an additional 60 days, for a total of 120 days, and by establishing the toll free number, the Coast Guard has determined that ample opportunity to comment on these proposed regulations is provided.

Persons submitting comments, whether written or verbal, should include their name and address, identify this rulemaking (CGD 88–079a) and the specific section of this proposal to which each comment applies, and give a reason for each comment. Persons wanting acknowledgement of receipt of written comments should enclose a stamped self-addressed postcard or envelope. For those persons using the toll free number, a request for acknowledgment of receipt of their verbal comments should be made during the phone call.

The Coast Guard will consider all comments received during the comment period. It may change this proposal in view of the comments.

Dated: December 10, 1992.

R.C. North,

Captain, U.S. Coast Guard, Acting Chief, Office of Marine Safety, Security and Environmental Protection.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018–AB83

Endangered and Threatened Wildlife and Plants; Notice of Public Hearing on Proposal To List the Delhi Sands Flower-Loving Fly as Endangered

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; notice of public hearing.

SUMMARY: The U.S. Fish and Wildlife Service (Service), pursuant to the Endangered Species Act of 1973, as amended (Act), gives notice that a public hearing will be held on the proposed rule to list the Delhi Sands flower-loving fly (*Rhaphiomidas terminatus abdominalis*) as an endangered species. The hearing will be held on January 5, 1992, in San Bernardino, California. Interested parties may submit oral or written comments on the proposal to the Service at the hearing. The proposed rule was published on November 19, 1992 (57 FR 54547).

DATES: A public hearing will be held from 6 p.m. to 8 p.m. on Tuesday, January 5, 1993, in San Bernardino, California. Comments from all interested parties must be received by January 19, 1993. Any comments received after the closing date may not be considered in the final decision on this proposal.

ADDRESSES: The hearing on Tuesday, January 5, 1993, will be held at the San Bernardino County Government Center, Board Chambers, 385 N. Arrowhead Avenue, San Bernardino, California. Written comments and materials may be submitted at the hearing or may be sent directly to Mr. Jeffrey Opdycke, Field Supervisor, U.S. Fish and Wildlife Service, Carlsbad Field Office, 2730 Loker Avenue West, Carlsbad, California 92008. Comments and materials received will be available for public inspection during normal business hours, by appointment, at the above address.

FOR FURTHER INFORMATION CONTACT: Jeffrey Opdycke, Field Supervisor, at the address listed above (telephone 619/431–9440).

SUPPLEMENTARY INFORMATION:

Background

The Delhi Sands flower-loving fly (*Rhaphiomidas terminatus abdominalis*) is a large insect that is restricted to areas of the Delhi Sands formation, within an 8 mile radius in southwestern San Bernardino and northwestern Riverside Counties, California. Agricultural land conversions during the 1800's destroyed most of the Delhi Sands flower-loving fly's habitat. Intensive urban, residential, and commercial development, removal of vegetation for fire control, invasion of exotic vegetation, illegal dumping, and off-road vehicle use threaten the species' survival at present. Since 1975, 50 percent of the species' habitat has been destroyed. In the fall of 1990, only six extant colonies remained. Since then, two colonies have been destroyed and

one colony was bisected and reduced in size.

On November 19, 1992, the Delhi Sands flower-loving fly was proposed for listing as an endangered species (57 FR 54547). Section 4(b)(5)(E) of the Act requires that a public hearing be held if it is requested within 45 days of publication of a proposed rule.

Because of the level of interest in this proposed action, and in anticipation of requests for a hearing on the proposal, the Service has scheduled a public hearing at the following time and location:

Tuesday, January 5, 1993, from 6 p.m. to 8 p.m.: San Bernardino County Government Center, Board Chambers, 385 N. Arrowhead Avenue, San Bernardino, California.

Those parties wishing to make statements for the record should bring a copy of their statements to present to the Service at the start of the hearing. Oral statements may be limited in length, if the number of parties present at the hearing necessitates such a limitation. There are no limits to the length of written comments or materials presented at the hearing or mailed to the Service. Written comments will be given the same weight as oral comments. Written comments may be submitted at the hearing or mailed to the Carlsbad, California address given in the ADDRESSES section of this notice. The comment period closes on January 19, 1993.

Author

The primary author of this notice is Mr. John Hanlon, Fish and Wildlife Biologist, Carlsbad Field Office (see ADDRESSES section).

Authority

The authority for this action is the Endangered Species Act of 1973, as amended (16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500; unless otherwise noted.).

Endangered and Threatened Wildlife and Plants; Notice Reopening the Public Comment Period for the Bruneau Hot Spring Snail (Pyrgulopsis Bruneauensis)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; reopening of public comment period.

SUMMARY: The Fish and Wildlife Service (Service) is reopening the comment period on the proposal to add the Bruneau Hot Spring snail (*Pyrgulopsis bruneauensis*) to the list of endangered wildlife. The Bruneau Hot Spring snail is endemic to the complex of related thermal springs adjacent to the Bruneau River south of Mountain Home, Idaho. The major threat to this species is habitat loss due to the drastic and continuing reduction in thermal spring flows from groundwater withdrawal/mining in the Bruneau Hot Spring aquifer. The Service proposed the snail for listing as endangered on August 21, 1985 (50 FR 33803). During four public comment periods and two public hearings following the proposed rule, the Service received new information that questioned the distribution, population status, and impacts of present threats. In addition, there was substantial disagreement regarding the sufficiency or accuracy of the available data used to prepare the proposed rule. Following this period, the U.S. Congress appropriated funds to: (1) Implement a tentative draft management plan developed by the Service and five cooperating agencies: Bureau of Land Management, U.S. Geological Survey, Farmers Home Administration, Idaho Department of Fish and Game, and Idaho Department of Water Resources; (2) further study the species' current status and distribution; and (3) study hydrological conditions and groundwater withdrawal in the Bruneau River basin. A final decision concerning the proposed rule has not been published. On July 6, 1992, the Land and Water Fund of the Rockies, representing the Idaho Conservation League and the Committee for Idaho's High Desert, filed suit in Federal district court in Boise, Idaho. The suit was filed under the Endangered Species Act of 1973, as amended, over the Service's failure to make a final decision on the proposed listing of the Bruneau Hot Spring snail. Because of the concerns raised in the lawsuit and to ensure the accuracy of any final decision concerning the appropriateness of listing, the Service reopened the public comment period on October 5, 1992, for 30 days to solicit any additional new information available for consideration. However, after the comment period closed on November 4, 1992, the Service published a notice in the Idaho Statesman announcing that the comment period had reopened. In response to this newspaper notice, several individuals expressed an interest in submitting comments; however, the Service could not officially consider those comments since the public comment period had closed. For this reason, the Service reopens the public comment period on the proposed rule for 10 days. The Service's goal is to base its final decision on the best available scientific and commercial information.

DATES: The comment period on the proposal is reopened until December 28, 1992.

ADDRESSES: Written comments and materials should be sent to Charles Lobdell, Field Supervisor, Boise Field Office, Fish and Wildlife Service, 4696 Overland Road, Room 576, Boise, Idaho 83705. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the Boise Field Office at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. Stephen Duke, Fish and Wildlife Service, 4696 Overland Road, Room 576, Boise, Idaho 83705, (208) 334–1931.

SUPPLEMENTARY INFORMATION:

Background

The first collections of the Bruneau Hot Spring snail were made in 1952 and 1953. Dr. Dwight Taylor studied the anatomy of the species and determined that it represented a previously unknown genus and species of the snail family Hydrobiidae. Dr. R. Hershler (1990) formally described this species, naming it *Pyrgulopsis bruneauensis*. The thin, transparent shell of the species is less than 3.00 mm (1/10 inch) in height, with 3.75 to 4.25 whorls and roughly globose to low-conic in shape.

Based on the most recent information, the species is found in over 100 small thermal springs and seeps along an 8 km length of the Bruneau River in southwestern Idaho (Mladenka 1992). No Bruneau Hot Spring snails have been collected outside thermal plumes of hot springs entering the Bruneau River. The species is normally collected in springs with seasonally fluctuating water temperatures greater than 20°C, with the maximum temperature tolerance limit of 35°C. The species is found in these

habitats on all substrate types, including rocks, gravel, mud, silt, and algal film. These springs and proximal thermal outflows are on lands administered by the Bureau of Land Management. Some downstream habitat is on private land.

The major threat to the Bruneau Hot Spring snail is the reduction of its thermal spring habitats from groundwater withdrawal/mining in the Bruneau Hot Spring aquifer. Exacerbated by drought, the extent of seepage at spring sources has been greatly reduced in recent years. In addition, considerable habitat has been lost in recent years due to sedimentation from flash flooding. This is especially true for the Indian Bathtub area, where the snail was first discovered. Heavy sedimentation of gravel, sand, and silt has rendered a considerable amount of habitat in the Indian Bathtub unavailable to snails.

Dr. Dwight Taylor prepared a status report on the Bruneau Hot Spring snail, which was submitted to the Service in June 1982. This report was the basis for the placement of this species on the Service's comprehensive notice of review on invertebrate candidate species published in the **Federal Register** (49 FR 21664) on May 24, 1984. The Service proposed the Bruneau Hot Spring snail for listing as endangered on August 21, 1985 (50 FR 33803). The comment period on this proposal, which originally closed on October 21, 1985, was extended to December 31, 1985 (50 FR 45443). To accommodate public hearings in Boise, Idaho, and Bruneau, Idaho, the comment period was reopened until February 1, 1986 (50 FR 51894). On December 30, 1986, the public comment period was again reopened until February 6, 1987, to accommodate the receipt of additional information (52 FR 47033).

In 1990, Congress allocated approximately $400,000 for conservation measures associated with the Bruneau Hot Spring snail. This money was used to fund hydrological studies of the Bruneau Hot Spring aquifer by the U.S. Geological Survey and ecological life history studies by the Idaho State University.

The Service provided funding to implement a short-term conservation easement with Owen Ranches, Inc., owners of much of the snail habitat in Hot Creek and the Indian Bathtub. Terms of the easement included fencing to exclude cattle from grazing along snail habitats in Hot Creek. Expiration of this agreement will coincide with the completion of the hydrological studies by the U.S. Geological Survey.

On July 6, 1992, the Idaho Conservation League and the Committee for Idaho's High Desert filed a lawsuit in Federal District Court in Boise, Idaho. The lawsuit was filed under the Endangered Species Act of 1973, as amended, over the failure of the Service to make a decision regarding the listing of the Bruneau Hot Spring snail.

In order to respond to the concerns raised in the lawsuit and to ensure the accuracy of any final decision concerning the appropriateness of listing, the Service reopened the public comment period on October 5, 1992, for 30 days to solicit any additional new information available for consideration. However, after the comment period closed on November 4, 1992, the Service published a notice in the Idaho Statesman announcing that the comment period was open. In response to this newspaper notice, several individuals expressed an interest in submitting comments; however, the Service could not officially consider those comments since the public comment period had closed. For this reason, the Service reopens the public comment period on the proposed rule for 10 days. The Service's goal is to base its final decision on the best available scientific and commercial information. Written comments may now be submitted for this proposal until December 28, 1992. The Service continues to be particularly interested in comments concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to this species;

(2) The location of any additional populations of this species and the reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Endangered Species Act;

(3) Additional information concerning the range, distribution, and population size of this species; and

(4) Current or planned activities in the subject area and their possible impacts on this species.

The final decision on this issue will take into consideration the comments and any additional information received by the Service, and such communications may lead to a final decision that differs from the proposal to list the species. Comments and data concerning this species should be sent to the Boise Field Office (see **ADDRESSES** section).

Endangered and Threatened Wildlife and Plants; Notice of Reopening of Public Comment Period on Proposed Endangered Status for the Giant Garter Snake

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; notice of reopening of public comment period.

SUMMARY: The U.S. Fish and Wildlife Service (Service), pursuant to the Endangered Species Act of 1973, as amended (Act), gives notice that the public comment period is reopened on the proposed determination of endangered status for the giant garter snake (*Thamnophis gigas*). The reopening of the comment period will allow all interested parties to submit written comments on the proposal.

DATES: The comment period on the proposal is opened until December 28, 1992. Any comments received after the closing date may not be considered in the final decision on this proposal.

ADDRESSES: Written comments and materials concerning this proposal should be sent to the U.S. Fish and Wildlife Service, 2800 Cottage Way, Room E–1803, Sacramento, California 95825–1846. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Peter Sorensen (see **ADDRESSES**) at 916/978–4866.

SUPPLEMENTARY INFORMATION:

Background

The giant garter snake is restricted to valley floor wetlands, including low gradient streams, ponds, irrigation and drainage canals, and certain rice field habitats in the San Joaquin and Sacramento Valleys of California. Approximately 13 apparently isolated populations are distributed locally from Burrell, Fresno County, northward to the vicinity of Chico, Butte County. The giant garter snake is threatened by a variety of factors, including urbanization, flood control and water diversion projects, and agricultural practices.

A proposal to list the giant garter snake as an endangered species was published on December 27, 1991 at 56 FR 67046. Subsequently, the Service published a notice announcing a public hearing on May 15, 1992 (57 FR 20806) and a separate notice on May 26, 1992 (57 FR 21933) reopening the public comment period until July 15, 1992. The Service conducted the public hearing on June 1, 1992, at the Radisson Hotel in Sacramento, California. Testimony was taken from 6 p.m. to 8 p.m. The Service is aware of information on the status of the giant garter snake that has become available since that time. Reopening the comment period will allow the Service to consider this and any other information in determining whether or not the giant garter snake warrants listing as an endangered species. Additional information may now be submitted until the end of the comment period on December 28, 1992.

Author

The primary author of this notice is Peter C. Sorensen (see **ADDRESSES** section).

Authority

The authority for this action is the Endangered Species Act (16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500, unless otherwise noted).

Endangered and Threatened Species; Saimaa Seal

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Proposed rule.

SUMMARY: Based on a review of the status of the Saimaa seal (*Phoca hispida saimensis*), NMFS has determined that this species is endangered and should be added to the U.S. List of Endangered and Threatened Wildlife. NMFS used the best available scientific and commercial data to make this determination. Scientists estimate the population at about 160–180, and they are found only in Lake Saimaa, in eastern Findland.

DATES: Comments on the proposed rule should be received by February 16, 1993.

ADDRESSES: Send comments to Dr. Michael F. Tillman, Acting Director, Office of Protected Resources, NMFS, 1335 East-West Highway, Silver Spring, MD 20910.

FOR FURTHER INFORMATION CONTACT: Dean Wilkinson, Office of Protected Resources, NMFS, at 301/713–2322.

SUPPLEMENTARY INFORMATION:

Background

The Endangered Species Act of 1973 (16 U.S.C. 1531, *et seq.*; (ESA)) is administered jointly by the U.S. Fish and Wildlife Service (USFWS), the Department of the Interior, and NMFS. NMFS has jurisdiction over most marine species and makes determinations under section 4(a) of the ESA (Pub. L. 93–205) as to whether the species should be listed as endangered or threatened. The USFWS maintains and publishes the List of Endangered and Threatened Wildlife in 50 CFR part 17 for all species determined by NMFS or USFWS to be endangered or threatened. A list of threatened and endangered species under the jurisdiction of NMFS also is contained in 50 CFR 227.4 and 222.23(a), respectively.

The ESA defines "species" to include any subspecies of fish, wildlife or plants, and any distinct population segment of any species of vertebrate fish or wildlife which interbreeds when mature.

Summary of Status Review

The Saimaa seal (*Phoca hispida saimensis*) is a subspecies of the ringed seal (*Phoca hispida*) that is limited in distribution to the freshwater Lake Saimaa in eastern Finland. It has been separated from other ringed seals since the last glacial period, 8,000 years ago (Sipilä *et al.* 1990).

There are differences between the Saimaa seal and other ringed seals. In general, the pelage of the Saimaa seal is darker than ringed seals from Lake Ladoga and the Baltic Sea. Saimaa seal pups are gray, rather than white, indicating that camouflage may be less important. Morphologically, the Saimaa seal can be distinguished from other ringed seals. Measurements of bones in the skull differ from both the ringed seal in the Baltic Sea and the Ladoga seal, another subspecies of the ringed seal. The auditory bulla are higher, indicating a possible adaptation to the low visibility conditions in Lake Saimaa (Hyvärinen 1989; Hyvärinen and Vieminen 1990). There is evidence that the seals' sense of hearing has been adapted to these conditions. The Saimaa seal's vibrissae, or whiskers, may be used to detect sounds. The innervation of one vibrissa of the Saimaa seal is more than ten times greater than in any other mammal or any other ringed seal. It is hypothesized that sounds are detected through sensory elements in the vibrissae (Hyvärinen 1989).

There are only about 160–180 Saimaa seals (Sipilä 1990, 1991; Sipilä *et al.* 1990). Concern over the status of the population was first expressed in the early 1950s when the Government of Finland prohibited hunting of the seals (Sipilä and Hyvärinen 1988). The first estimate of total population was 200–250 animals, based on a limited sample area. A more comprehensive survey produced an estimate of at least 250 animals in 1971. Between 1971 and 1984, the number continued to decrease. A census conducted in 1984 produced a best estimate of 130–160 seals (Hyvärinen and Sipilä 1983; Sipilä 1990; Sipilä and Hyvärinen 1988; Sipilä *et al.* 1990). Since then, numbers have remained relatively stable. The most vigorous populations are in the central part of Lake Saimaa, both north and south of the town of Savonlinna. The northern part of Lake Saimaa has a smaller population. There has been a marked decline of the population in the

southern part of the lake. As an example, in 1971, it was estimated that the number of seals in the Petranselkä-Ilkonselkä area was 44–46. The corresponding estimate for 1984 was 14–16. In other areas in the south where seals were present historically, such as Puruvesi and Yövesi, none remain (Sipilä *et al.* 1990). Although studies of migrations between areas of the lake have not been conducted, one study indicated that there are four distinct colonies (Hyvärinen and Sipilä 1984a). The possibility of limited genetic exchange among subpopulations raises further concerns over the status of the seals in the northern and southern parts of the lake.

Although no data are available on the longevity of the Saimaa seal, the life-span for ringed seals generally is estimated at 15 to 25 years (Riedman 1990). Similar to other ringed seals, the sex ratio the Saimaa seals is 1:1 (Sipilä *et al.* 1990; Sipilä 1991). One study estimated that 55.7 percent of the population is sexually mature. The same study provided an estimate of approximately 39 reproductive females in the population. The pregnancy rate in mature females has been estimated at up to 70 percent per annum (Sipilä *et al.* 1990). The number of births has been estimated at 18–26 pups annually. Examinations of birth lairs indicated that 19 percent of the pups born were still-born or died before weaning.

The overall reproductive rate for the population is estimated at 15 percent annually, which is low when compared to other populations of ringed seals (Sipilä and Kurlin 1991; Sipilä *et al.* 1990).

The Government of Finland has taken measures to protect the species. In 1955, a law was passed to prohibit the hunting of Saimaa seals (Sipilä and Hyvärinen 1988). In 1982, another law was passed to restrict fishing in some areas during periods when interactions were occurring with seal pups. Before the fishing restrictions, entanglement in fishing gear was a significant cause of pup mortality (Sipilä *et al.* 1990). Of eight breeding areas, the Government of Finland has protected three by creating natural parks (Sipilä 1989).

It is thought that a listing action in the United States would make it easier to obtain international funds to promote conservation of the species.

Summary of Factors Affecting the Species

Section 4(a)(1) of the ESA and the NMFS listing regulations set forth procedures for listing species. The Secretary of Commerce must determine, through the regulatory process, if a species is endangered or threatened based upon any one or a combination of the following factors:

(1) The present or threatened destruction, modification, or curtailment of its habitat or range;

(2) Overutilization for commercial, recreational, scientific, or educational purposes;

(3) Disease or predation;

(4) Inadequacy of existing regulatory mechanisms; or

(5) Other natural or man-made factors affecting its continued existence.

The Present or Threatened Destruction, Modification, or Curtailment of Its Habitat or Range

Housing developments have affected the habitat of the Saimaa seal. Construction of summer cottages and increased human activity have caused the seals to abandon some breeding areas (Sipilä 1989, 1991; Sipilä and Hyvärinen 1988).

Additionally, drawing down of water levels of up to 50 centimeters for hydroelectric generation has affected habitat and breeding success (Sipilä 1990). Birth lairs are constructed in the ice and rest along the shoreline. When water levels are reduced, there is a tendency for the birth lairs to collapse, crushing the pups or rendering them homeless with no protection from the cold (Sipilä 1988, 1990; Sipilä and Hyvärinen 1988).

Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

There is no evidence that these activities have contributed to the decline of the species.

Disease or Predation

No evidence exists that disease or predation has been responsible for the decline in population. With such a small number of animals, however, the population could be vulnerable to the introduction of a disease. As an example of the potential vulnerability to disease, the introduction of phocine distemper virus into seal populations in Lake Baikal and the North Sea resulted in massive mortalities (Osterhaus *et al.* 1990). A similar outbreak could lead to the extinction of the Saimaa seal.

The Inadequacy of Existing Regulatory Mechanisms

The Government of Finland has taken measures to protect the Saimaa seal. In 1955, a law was passed to prevent direct hunting of the species (Sipilä and Hyvärinen 1988). In 1981, a law was passed to stop net-fishing in some areas of Lake Saimaa (Sipilä 1990; Sipilä *et al.* 1990;). However, not all areas of the lake are protected. Natural parks have been set up to ensure the safety of the seals in some areas (Sipilä 1989). Despite these measures, the population of seals has continued to decrease in some areas.

Other Natural or Man-made Factors

As discussed earlier, the generation of hydroelectricity has had an impact on the Saimaa seal. Although there are restrictions against fishing in some areas in Lake Saimaa, net fishing has caused the Saimaa seal's population to decline (Hyvärinen and Sipilä 1984a; Sipilä 1989; Sipilä and Hyvärinen 1988; Sipilä *et al.* 1990;). Seal pups are particularly vulnerable to fishery interactions after they have been weaned. Before fishing restrictions were imposed in 1981, mortality of pups caused by fishing interactions was estimated to be as high as 60 percent. Restrictions appear to have reduced this figure to 40 percent in those areas with restrictions. However, even that percentage represents a significant cause of mortality (Sipilä *et al.* 1990).

The genetic pool is so small that there is a serious possibility that inbreeding could result in a loss of genetic variability, resulting in the loss of capacity to adapt to changes or in genetic defects. This problem would be exacerbated if there is site fidelity and limited genetic flow between subpopulations.

Some researchers have indicated that pollution may have an impact on the population (Helle *et al.* 1985; Hyvärinen and Sipilä 1984b; Kari and Kauranen 1978; Perttilä *et al.* 1986; Sipilä and Hyvärinen 1988). However, no direct cause and effect relationship has been established. Analyses have shown that Saimaa seal tissues have relatively high levels of heavy metals such as nickel, zinc, copper, lead, and cadmium (Hyvärinen and Sipilä 1984b; Perttilä *et al.* 1986). High levels of nickel have been found in the natal hair of seal pups. High levels of nickel may be linked to the still-births of the pups (Hyvärinen and Sipilä 1984b). One study indicated high mercury and selenium levels in the seal's liver tissue. Other studies have linked mercury and selenium and it has been suggested that selenium serves a role in metabolizing mercury in seals (Kari and Kauranen 1978; Perttilä *et al.* 1986). The ratio of selenium to mercury in Saimaa seals, however, is lower than in other seals from the Baltic area, which may indicate that mercury levels may be cause for concern (Kari and Kauranen 1978).

Although levels of organochlorines in tissue are relatively high, they are lower than levels recorded in ringed seals in

the Baltic. Studies have shown a high correlation between PCBs and reproductive abnormalities in seal population in the Baltic Sea and the North Sea. A high level of uterine occlusions was found in ringed seals with high PCBs in the Baltic Sea (Helle 1980). A reduction in fertility of harbor seals in the North Sea is correlated with PCB levels (Reijnders 1984, 1986). The author hypothesized that the contaminant might affect fertility by altering hormonal levels (Reijnders 1986). Although levels of DDT in Saimaa seal blubber have fallen since the early 1970s, levels of PCBs have remained relatively constant (Helle *et al.* 1983, 1985; Perttilä 1986).

Proposed Determination

NMFS believes that the available data support the proposed endangered classification for the Saimaa seal. NMFS has determined that it is likely that this condition is caused by a combination of the factors specified under section 4(a)(1) of the ESA.

Recommended Critical Habitat

Regulations regarding listing of species and designation of critical habitat (50 CFR 424.12(h)), specify that critical habitat cannot be designated in foreign countries or other areas outside U.S. jurisdiction.

Classification

The 1982 Amendments to the ESA, in section 4(b)(1)(A), restrict the information that may be considered when assessing species for listing. Based on this limitation of criteria for a listing decision and the opinion in *Pacific Legal Foundation* v. *Andrus*, 675 F. 2d 829 (6th cir., 1981), NMFS has categorically excluded all endangered species listings from environmental assessment requirements of the National Environmental Policy Act (48 FR 4413; February 6, 1984).

As noted in the Conference report on the 1982 amendments to the ESA, economic considerations have no relevance to determinations regarding the status of species. Therefore, the economic analysis requirements of E.O. 12291 and the Regulatory Flexibility Act are not applicable to the listing process. Similarly, listing actions are not subject to the requirements of E.O. 12612. For this reason, the provisions in this rule are not subject to the moratorium on regulatory actions in accordance with paragraph 4 of the President's January 28, 1992, Directive.

The proposed rule does not contain a collection-of-information requirement subject to the Paperwork Reduction Act.

List of Subjects in 50 CFR Part 222

Administrative practice and procedure, Endangered and threatened species, Exports, Imports, Reporting and recordkeeping requirements, Transportation.

Dated: December 10, 1992.

Nancy Foster,

Acting Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set forth in the preamble, 50 CFR part 222 is proposed to be amended as follows:

PART 222—ENDANGERED FISH OR WILDLIFE

1. The authority citation for part 222 continues to read as follows:

Authority: 16 U.S.C. 1531–1543.

§ 222.23 [Amended]

2. In § 222.23, paragraph (a), introductory text, is amended by adding the phrase "Saimaa seal (*Phoca hispida saimensis*);" immediately after the phrase "Mediterranean monk seal (*Monachus monachus*);" in the second sentence.

Vol. 57, No. 244
Friday, December 18, 1992

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 92-168-1]

Availability of Environmental Assessments and Findings of No Significant Impact Relative to Issuance of Permits to Field Test Genetically Engineered Organisms

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that two environmental assessments and findings of no significant impact have been prepared by the Animal and Plant Health Inspection Service relative to the issuance of permits to allow the field testing of genetically engineered organisms. The environmental assessments provide a basis for our conclusion that the field testing of these genetically engineered organisms will not present a risk of introducing or disseminating a plant pest and will not have a significant impact on the quality of the human environment. Based on its findings of no significant impact, the Animal and Plant Health Inspection Service has determined that environmental impact statements need not be prepared.

ADDRESSES: Copies of the environmental assessments and findings of no significant impact are available for public inspection at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. Arnold Foudin, Deputy Director, Biotechnology Permits, Biotechnology, Biologics, and Environmental Protection, APHIS, USDA, room 850, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-7612. For copies of the environmental assessments and findings of no significant impact, write to Mr. Clayton Givens at the same address. Please refer to the permit number listed below when ordering documents.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 340 (referred to below as the regulations) regulate the introduction (importation, interstate movement, and release into the environment) of genetically engineered organisms and products that are plant pests or that there is reason to believe are plant pests (regulated articles). A permit must be obtained before a regulated article may be introduced into the United States. The regulations set forth the procedures for obtaining a limited permit for the importation or interstate movement of a regulated article and for obtaining a permit for the release into the environment of a regulated article. The Animal and Plant Health Inspection Service (APHIS) has stated that it would prepare an environmental assessment and, when necessary, an environmental impact statement before issuing a permit for the release into the environment of a regulated article (see 52 FR 22906).

In the course of reviewing each permit application, APHIS assessed the impact on the environment that releasing the organisms under the conditions described in the permit application would have. APHIS has issued permits for the field testing of the organisms listed below after concluding that the organisms will not present a risk of plant pest introduction or dissemination and will not have a significant impact on the quality of the human environment. The environmental assessments and findings of no significant impact, which are based on data submitted by the applicants and on a review of other relevant literature, provide the public with documentation of APHIS' review and analysis of the environmental impacts associated with conducting the field tests.

Environmental assessments and findings of no significant impact have been prepared by APHIS relative to the issuance of permits to allow the field testing of the following genetically engineered organisms:

Permit No.	Permittee	Date issued	Organisms	Field test location
92-244-02, renewal of permit 92-066-01, issued on 06-04-92.	Holden's Foundation Seeds, Incorporated.	08-31-92	Corn plants genetically engineered to express a phosphinothricin acetyl transferase (PAT) gene for tolerance to the herbicide glufosinate.	Hawaii.
92-203-01	Pioneer Hi-Bred International, Incorporated.	10-16-92	Soybean plants genetically engineered to express either the enzyme 5-enolpyruvyl shikimate-3-phosphate snythase (EPSPS) and a metabolizing enzyme for tolerance to the herbicide glyphosate; or methionine- and cysteine-rich seed storage proteins from Brazil nut.	Puerto Rico.

The environmental assessments and findings of no significant impact have been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*), (2) Regulations of the Council on Environmental Quality for Implementing the Procedural Provisions of NEPA (40 CFR parts 1500-1508), (3) USDA Regulations Implementing NEPA (7 CFR part 1b), and (4) APHIS Guidelines Implementing NEPA (44 FR 50381-50384, August 28, 1979, and 44 FR 51272-51274, August 31, 1979).

Done in Washington, DC, this 14th day of December 1992.

Lonnie J. King,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-M

[Docket No. 92-188-1]

Availability of Environmental Assessments and Findings of No Significant Impact Relative to Issuance of Permits To Field Test Genetically Engineered Organisms

AGENCY: Animal and Plant Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that five environmental assessments and findings of no significant impact have been prepared by the Animal and Plant Health Inspection Service relative to the issuance of permits to allow the field testing of genetically engineered organisms. The environmental assessments provide a basis for our conclusion that the field testing of these genetically engineered organisms will not present a risk of introducing or disseminating a plant pest and will not have a significant impact on the quality of the human environment. Based on its findings of no significant impact, the Animal and Plant Health Inspection Service has determined that environmental impact statements need not be prepared.

ADDRESSES: Copies of the environmental assessments and findings of no significant impact are available for public inspection at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. Arnold Foudin, Deputy Director, Biotechnology Permits, Biotechnology, Biologics, and Environmental Protection, APHIS, USDA, room 850, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-7612. For copies of the environmental assessments and findings of no significant impact, write to Mr. Clayton Givens at the same address. Please refer to the permit numbers listed below when ordering documents.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 340 (referred to below as the regulations) regulate the introduction (importation, interstate movement, and release into the environment) of genetically engineered organisms and products that are plant pests or that there is reason to believe are plant pests (regulated articles). A permit must be obtained before a regulated article may be introduced into the United States. The regulations set forth the procedures for obtaining a limited permit for the importation or interstate movement of a regulated article and for obtaining a permit for the release into the environment of a regulated article. The Animal and Plant Health Inspection Service (APHIS) has stated that it would prepare an environmental assessment and, when necessary, an environmental impact statement before issuing a permit for the release into the environment of a regulated article (see 52 FR 22906).

In the course of reviewing each permit application, APHIS assessed the impact on the environment that releasing the organisms under the conditions described in the permit application would have. APHIS has issued permits for the field testing of the organisms listed below after concluding that the organisms will not present a risk of plant pest introduction or dissemination and will not have a significant impact on the quality of the human environment. The environmental assessments and findings of no significant impact, which are based on data submitted by the applicants and on a review of other relevant literature, provide the public with documentation of APHIS' review and analysis of the environmental impacts associated with conducting the field tests.

Environmental assessments and findings of no significant impact have been prepared by APHIS relative to the issuance of permits to allow the field testing of the following genetically engineered organisms:

Permit No.	Permittee	Date issued	Organisms	Field test location
92-209-03	Monsanto Agricultural Company.	11-18-92	Corn plants genetically engineered to express a gene from *Bacillus thuringiensis* subsp. *kurstaki* (Btk) for resistance to lepidopteran insects, or genes for tolerance to the herbicide glyphosate, or a beta-glucuronidase (GUS) as a marker.	Hawaii.
92-260-02	Monsanto Agricultural Company.	11-19-92	Soybean plants genetically engineered to express the enzyme 5-enolpyruvyl shikimate-3-phosphate synthase (EPSPS) and a metabolizing enzyme for tolerance to the herbicide glyphosate.	Puerto Rico.
92-261-01	Monsanto Agricultural Company.	11-20-92	Soybean plants genetically engineered to express the enzyme 5-enolpyruvyl shikimate-3-phosphate synthase (EPSPS) and a metabolizing enzyme for tolerance to the herbicide glyphosate.	Florida, Illinois.
92-256-01	ICI Seeds, Incorporated	11-23-92	Corn plants genetically engineered to express genes from a non-pathogenic source organism and resistance to the herbicide glufosinate.	Hawaii.
92-262-02	Monsanto Agricultural Company.	11-23-92	Potato plants genetically engineered to express a from *Bacillus thuringiensis* subsp. *tenebrionis* (Btt) for resistance to Colorado potato beetle, and the coat protein gene of potato virus Y (PVY) for resistance to PVY.	Florida, Hawaii.

The environmental assessments and findings of no significant impact have been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*), (2) Regulations of the Council on Environmental Quality for Implementing the Procedural Provisions of NEPA (40 CFR parts 1500-1508), (3) USDA Regulations Implementing NEPA (7 CFR part 1b), and (4) APHIS Guidelines Implementing NEPA (44 FR 50381-50384, August 28, 1979, and 44 FR 51272-51274, August 31, 1979).

Done in Washington, DC, this 14th day of December 1992.

Lonnie J. King,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 92-30773 Filed 12-17-92; 8:45 am]

BILLING CODE 3410-34-M

[Docket No. 92-182-1]

Receipt of Permit Application for Release Into the Environment of Genetically Engineered Organisms

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that an application for a permit to release genetically engineered organisms into the environment is being reviewed by the Animal and Plant Health Inspection Service. The application has been submitted in accordance with 7 CFR part 340, which regulates the introduction of certain genetically engineered organisms and products.

ADDRESSES: Copies of the application referenced in this notice, with any confidential business information deleted, are available for public inspection in room 1141, South Building, U.S. Department of Agriculture, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. You may obtain copies of the document by writing to the person listed under "**FOR FURTHER INFORMATION CONTACT.**"

FOR FURTHER INFORMATION CONTACT: Dr. Arnold Foudin, Deputy Director, Biotechnology Permits, Biotechnology, Biologics, and Environmental Protection, APHIS, USDA, room 850, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-7612.

SUPPLEMENTARY INFORMATION: The regulations in CFR part 340, "Introduction of Organisms and Products Altered or Produced Through Genetic Engineering Which are Plant Pests or Which There is Reason to Believe Are Plant Pests" require a person to obtain a permit before introducing (importing, moving interstate, or releasing into the environment) into the United States certain genetically engineered organisms and products that are considered "regulated articles." The regulations set forth procedures for obtaining a permit for the release into the environment of a regulated article, and for obtaining a limited permit for the importation of interstate movement of a regulated article.

Pursuant to these regulations, the Animal and Plant Health Inspection Service has received and is reviewing the following application for a permit to release genetically engineered organisms into the environment:

Application No.	Applicant	Date received	Organisms	Field test location
92-308-01, renewal of permit 90-274-05, issued on 11-15-90.	Upjohn Company	11-03-92	Soybean plants genetically engineered to express the enzyme phosphinothricin acetyltransferase (PAT) for tolerance to the herbicide bialaphos.	Puerto Rico.

Done in Washington, DC, this 14th day of December 1992.

Lonnie J. King,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 92-30772 Filed 12-17-92; 8:45 am]

BILLING CODE 3410-34-M

[Docket No. 92-189-1]

Receipt of Permit Applications for Release Into the Environment of Genetically Engineered Organisms

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that five applications for permits to release genetically engineered organisms into the environment are being reviewed by the Animal and Plant Health Inspection Service. The applications have been submitted in accordance with 7 CFR part 340, which regulates the introduction of certain genetically engineered organisms and products.

ADDRESSES: Copies of the applications referenced in this notice, with any confidential business information deleted, are available for public inspection in room 1141, South Building, U.S. Department of Agriculture, 14th Street and Independence Avenue, SW., Washington, DC, between 8 a.m. and 4:30 p.m. Monday through Friday, except holidays. You may obtain copies of the documents by writing to the person listed under "**FOR FURTHER INFORMATION CONTACT.**"

FOR FURTHER INFORMATION CONTACT: Dr. Arnold Foudin Deputy Director, Biotechnology Permits, Biotechnology, Biologics, and Environmental Protection, APHIS, USDA, room 850, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-7612.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 340, "Introduction of Organisms and Products Altered or Produced Through Genetic Engineering Which Are Plant Pests of Which There Is Reason to Believe Are Plant Pests." require a person to obtain a permit before introducing (importing, moving interstate, or releasing into the environment) into the United States certain genetically engineered organisms and products that are considered "regulated articles." The regulations set forth procedures for obtaining a permit for the release into the environment of a regulated article, and for obtaining a limited permit for the importation or interstate movement of a regulated article.

Pursuant to these regulations, the Animal and Plant Health Inspection Service has received and is reviewing the following applications for permits to release genetically engineered organisms into the environment:

Application No.	Applicant	Date received	Organisms	Field test location
92-325-01, renewal of permit 92-036-01, issued on 05-26-92.	Washington State University	11-20-92	Potato plants genetically engineered to express disease resistance response genes from the pea.	Washington.
92-329-01	Crop Genetics International	11-24-92	Corn plants containing *Clavibacterxyli* subsp. *cynodontis* genetically engineered to express a *Bacillus thuringiensis* subsp. *kurstaki* strain HD-73 delta-endotoxin protein for resistance to European corn borer.	Iowa, Maryland, Nebraska.

Application No.	Applicant	Date received	Organisms	Field test location
92-330-01	Pioneer Hi-Bred International Incorporate.	11-25-92	Corn plants genetically engineered to express resistance to European corn borer and other insect pests of corn.	Hawaii.
92-330-02, renewal of permit 91-322-01; issued on 02-04-92.	North Carolina State University.	11-25-92	Tobacco plants genetically engineered to express a coat protein of tobacco etch virus (TEV).	North Carolina.
92-335-01, renewal of permit 92-037-03, issued on 05-19-92; of permit 92-037-05, issued on 05-01-92; of permit 92-055-01, issued on 05-20-92.	Monsanto Agricultural Company.	11-30-92	Soybean plants genetically engineered to express the enzyme 5-enolpyruvyl shikimate-3-phosphate synthase (EPSPS) and a metabolizing enzyme for tolerance to the herbicide glyphosate.	Alabama, Arkansas, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Maryland, Michigan, Mississippi, Missouri, Nebraska, Ohio, South Carolina, Tennessee, Texas, Virginia, Wisconsin.

Done in Washington, DC, this 14th day of December 1992.

Lonnie J. King,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-M

Forest Service

Midway Face Viewshed Management Project, Dixie National Forest, Iron County, Utah

AGENCY: Forest Service, USDA.

ACTION: Cancellation of notice of intent to prepare an environmental impact statement.

SUMMARY: A Notice of Intent to prepare an Environmental Impact Statement (EIS) for the Midway Face Viewshed Management project was published in the **Federal Register** on October 24, 1991 (56 FR 55116). After examining the analysis to date in light of the 10 points of significance, 40 CFR 1509.27, I believe it is unlikely that there will be a significant impact on the human environment; therefore, an EIS will not be prepared. The project analysis will be documented in an Environmental Assessment. Additional public involvement with this project is planned prior to the release of the Environmental Assessment; tentatively scheduled for May 1993.

FOR FURTHER INFORMATION CONTACT: Diana McGinn, Forester, Cedar City Ranger District, P.O. Box 627, Cedar City, Utah 84721-0627, 801-865-3200.

Dated: December 11, 1992.

Dan Deiss,

Timber Staff Officer.

[FR Doc. 92-30749 Filed 12-17-92; 8:45 am]

BILLING CODE 3410-11-M

Pacer Timber Sale, Dixie National Forest, Garfield County, Utah

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: Notice is hereby given that the Forest Service, USDA, will prepare an environmental impact statement (EIS) for a Forest Service proposal to implement a timber sale and associated road construction on the Escalante Ranger District, Dixie National Forest. The area is located approximately 25 miles northwest of Escalante, Utah. The project would be implemented in accordance with direction in the Dixie National Forest Land and Resource Management plan (DNF-LRMP).

The agency gives notice that the environmental analysis process is underway. Interested and potentially affected persons, along with local, state, and other Federal agencies, are invited to participate and contribute to the environmental analysis. The Dixie National Forest invites written input regarding issues specific to the proposed action.

DATES: Written comments to be considered in the Draft Environmental Impact Statement (DEIS) should be submitted on or before February 1, 1993.

ADDRESSES: Submit written comments to: District Ranger, Escalante Ranger District, 755 West Main, P.O. Box 246, Escalante, Utah 84726.

FOR FURTHER INFORMATION CONTACT: Direct questions about the proposed action and EIS to Kevin R. Schulkoski, District Ranger, 801-826-5400.

SUPPLEMENTARY INFORMATION: The proposed project covers an analysis area of 3,364 acres of National Forest System Lands. Timber stands in the project area cover 3,079 acres. Unevenaged stands of Engelmann spruce and subalpine fir is the dominant timber type. A few stands of even-aged Engelmann spruce is also present as are even-aged stands of aspen. Aspen remnants are also scattered throughout the Engelmann spruce/subalpine fir stands. Stands proposed for harvest are located within sections 25, 26, 35, and 36, Township 32 South, Range 1 West; and Sections 1, 2, and 11, Township 33 South, Range 1 West, Salt Lake Base Meridian.

The proposed action would implement management direction and projects identified in the DNF-LRMP. This project EIS will be tiered to the DNF-LRMP EIS, which provides goals, objectives, standards and guidelines for the various activities and land allocations on the Forest.

The purpose of the proposed action is to improve growth and yield and to reduce the potential for a spuce beetle outbreak through improved forest health. The proposed action is to harvest diseased or insect infected trees, high risk trees, and to obtain the desired stocking levels utilizing a combination of individual tree and group selection and improvement harvest methods. These treatments would be designed to move the project area towards the desired habitat conditions as described in the "Management Recommendations for the Northern Goshawk in the Southwestern United States." The proposed action would be located in Management Areas 7A (Wood Products and Utilization), 6A (Livestock Grazing), and 2B (Rural and Roaded Recreation Opportunities).

The proposed action consists of commercial timber harvest within Management Areas 7A, 6A, and 2B using uneven-aged and even-aged management and yielding approximately 5.5 MMBF of Engelmann spruce, subalpine fir, and aspen sawtimber. Post sale activities would include brush disposal, precommercial thinning and reforestation.

Approximately 333 acres (10% of the analysis area) would be managed for old growth habitat.

Road Management would include development of a transportation plan requiring approximately nine miles of road construction and 12 miles of road reconstruction and reconditioning. Seasonal gated closures would be utilized on sale area roads during post

harvest activities. After completion of these activities, the area would be closed to motorized traffic via an area closure, with the exception of three existing motorized trails which currently cross the area. This would bring the post-sale open road density down to .9 miles per square mile.

Preliminary issues that have been identified through scoping to date include project effects on: Availability of forest products; forest health; Threatened, Endangered, Sensitive, and Proposed species; Wildlife habitat; Biodiversity; Quality of the recreational experience; Old growth habitat; Watershed. Open road density and its effects on wildlife use; Cultural resources; Access and recreation opportunities; and the cost of harvest activities may affect the viability of the sale.

Tentative alternatives to the proposed action include: No action (the project will not take place but current management will continue); maximization of short term benefit by using a combination of even-aged and uneven-aged treatments in the conifer with an open road density reduction to .6 miles per square mile; an alternative to maximize timber production; and alternative to maximize the economics of the sale; and low intensity timber management to emphasize enhancement of wildlife habitat, visual, and recreational values.

As lead agency, the Forest Service will analyze and document direct, indirect, and cumulative environmental effects of a range of alternatives. Each alternative will include mitigation measures and monitoring requirements.

Hugh C. Thompson, Forest Supervisor, Dixie National Forest, is the responsible official.

The Forest Service is seeking comments from individuals, organizations, and local, state, and Federal agencies who may be interested in or affected by the proposed action.

Scoping notices have been sent to the Dixie National Forest NEPA mailing list. Other interested individuals, organizations, or agencies may have their names added to the mailing list for this project at any time by submitting a request to: Kevin R. Schulkoski, District Ranger, Escalante Ranger District, 755 West Main, P.O. Box 246, Escalante, Utah, 84726.

The entire analysis area lies within National Forest System lands. No Federal or local permits, licenses or entitlements would be needed. There are no potential conflicts with the plans and policies of other jurisdictions.

The comment period on the Draft EIS will be 45 days from the date of the EPA's notice of availability appears in the **Federal Register**. It is very important that those interested in the proposed action participate at this time. To be most helpful, comments on the DEIS should be as specific as possible and may discuss the adequacy of the statement or the merits of the alternatives discussed (see CEQ Regulations for implementing the procedural provisions of NEPA at 40 CFR 1503.3).

In addition, Federal court decisions have established that reviewers of the DEIS's must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewers' position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC, 435 U.S. 519, 553 (1978).* Environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the FEIS, *City of Angoon* v. *Hodel,* (9th Circuit, 1986) and *Wisconsin Heritages, Inc.* v. *Harris,* 490 F. Supp. 1334. 1338 (E.D. Wis. 1980). This is to ensure that substantive comments and objections are made available to the Forest Service at the time it can meaningfully consider them and respond to them in the final EIS.

The DEIS is expected to be available for review by February 15, 1993. The Record of Decision and Final Environmental Impact Statement are expected to be available by May, 1993.

Dated: December 11, 1992.

Dan Deiss,

Timber Staff Officer, Dixie National Forest.

[FR Doc. 92–30750 Filed 12–17–92; 8:45 am]

BILLING CODE 3410–11–M

Withdrawal of the Record of Decision for the South Fork Fire Recovery/ Salvage Project

SUMMARY: The Forest Service has withdrawn its August 17, 1988, Record of Decision for the South Fork Fire Recovery/Salvage Project in the Shasta-Trinity National Forests; Trinity County, California.

DATES: December 8, 1992.

FOR FURTHER INFORMATION CONTACT: Questions about the withdrawal of the Record of Decision for the South Fork Fire Recovery/Salvage Project should be directed to Jerry B. Brogan, Timber Management Officer, Shasta-Trinity National Forests, 2400 Washington Avenue, Redding, CA 96001. Telephone (916) 246–5380.

SUPPLEMENTARY INFORMATION: In 1987, the Shasta-Trinity NF was struck by a series of massive fires. Those fires damaged valuable trees and wildlife habitat, and denuded watersheds of protective vegetation. In response, the Forest Service studied how to respond to the widespread devastation, and prepared an EIS addressing the South Fork Fire Recovery/Salvage Project. That project included the harvest of the damaged trees, and provided for a series of habitat recovery actions. Shortly after the Record of Decision approving the project was signed, a number of parties filed a lawsuit in the United States District Court for the Eastern District of California seeking to enjoin the Forest Service from proceeding with the recovery project. Judge Karlton enjoined the project, and that injunction remains in place today, even though there is no decision on the merits that the Forest Service has violated any law.

A number of factors have caused me to re-evaluate the decision to proceed with the South Fork Fire Recovery/ Salvage Project, and to withdraw the Record of Decision. First, more than five years have passed since the fires, and a significant number of the dead trees that were identified for harvest are no longer of any merchantable value. With the court processes we have seen over the last five years, I consider it unlikely that we would be able to proceed with a timber sale contract prior to the 1994 field season.

Second, since the original decision was made, both the northern spotted owl and the marbled murrelet have been listed as threatened species. While the record demonstrates that we have fully complied with all obligations of the Endangered Species Act with regard to the northern spotted owl, the recent listing of the marbled murrelet would require additional analysis of the project to assure compliance with that Act.

Third, Regional Forester Ronald E. Stewart approved the Record of Decision for the South Fork Trinity River Wild and Scenic River Management Plan. While the recovery project is consistent with that plan, I believe it is appropriate to proceed to implement that plan without this litigation

Fourth, a recovery project that we would design today would vary in some respects from the recovery project that was designed in 1988. Even if we were to proceed with this particular project, we would need to make changes to the contract that was offered in 1988.

Finally, we are undergoing a significant downsizing of our staff on the Shasta-Trinity National Forests. With this reduction, I believe our limited resources are more effectively allocated to planning future activities to benefit the Forest and the community

than to continue to divert them to this litigation.

Therefore, I am withdrawing the Record of Decision for the South Fork Fire Recovery/Salvage Project, effective immediately.

Dated: December 8, 1992.

William V. Carpenter,

Acting Forest Supervisor, Shasta-Trinity National Forests.

BILLING CODE 3410-11-M

Grand Targhee Resort Master Development Plan, Targhee National Forest, Teton County, WY

AGENCY: Forest Service, USDA.

ACTION: Notice of extension of comment period.

SUMMARY: This notice extends the comment period on the Draft EIS for the Grand Targhee Master Development Plan (57 FR 56557, November 30, 1992) for a period of 43 days. This is the second extension of the comment period that has been approved for this DEIS. The original comment period ended November 20, 1992. The comment period will end February 1, 1993. The extension is granted based upon requests, from the Grand Targhee Resort and Jackson Hole Alliance For Responsible Planning, for additional time to thoroughly assess all the information contained in the document. The current deadline of December 20, 1992 falling in the middle of the holiday season and understanding the concerns of the primary parties affected by the EIS were also given as reasons for extending the deadline.

FOR FURTHER INFORMATION CONTACT: Lynn Ballard, Interdisciplinary Team Leader (208) 624-3151, Targhee National Forest, P.O. Box 208, St. Anthony, ID 83445.

Dated: December 10, 1992.

James L. Caswell,

Forest Supervisor.

DEPARTMENT OF COMMERCE

Bureau of Export Administration

The Computer Systems Technical Advisory Committee; Closed Meeting

A meeting of the Computer Systems Technical Advisory Committee (CSTAC) will be held January 13 & 14, 1993, in the Herbert C. Hoover Building, room 1617M-2, 14st Street & Pennsylvania Avenue, NW., Washington, DC. The CSTAC advises the Office of Technology and Policy Analysis with respect to technical questions that affect the level of export controls applicable to computer systems, peripherals and technology. The Committee will meet only in Executive Session to discuss matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The Assistant Secretary for Administration, with the concurrence of the General Counsel, formally determined on February 5, 1992, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, that the series of meetings of the Committee and of any Subcommittees thereof, dealing with the classified materials listed in 5 U.S.C., 552b(c)(1) shall be exempt from the provisions relating to public meetings found in section 10(a)(1) and (a)(3), of the Federal Advisory Committee Act. The remaining series of meetings or portions thereof will be open to the public.

A copy of the Notice of Determination to close meetings or portions of meetings of the Committee is available for public inspection and copying in the Central Reference and Records Inspection Facility, room 6628, U.S. Department of Commerce, Washington, DC 20230. For further information, contact Lee Ann Carpenter on (202) 482-2583.

Dated: December 10, 1992.

Betty Anne Ferrell,

Director, Technical Advisory Committee Staff.

BILLING CODE 3510-DT-M

Economics and Statistics Administration

[Docket No. 920946-2246]

Plan to Produce a National Economic, Social, and Environmental Data Bank (NESE.DB) on an Experimental Basis

AGENCY: Economics and Statistics Administration, Commerce.

ACTION: Notice and request for comments.

SUMMARY: This notice and request for comments seeks public comment(s) on the contents of a proposed National Economic, Social, and Environmental Data Bank, described herein. The Department of Commerce plans to produce a National Economic, Social, and Environmental Data Bank (NESE.DB) on an experimental basis in CD-ROM format using the Browse software and standard data formats of the National Trade Data Bank (NTDB). The NESE.DB will be a quarterly product containing core domestic data from all Federal agencies that wish to contribute. A prototype CD-ROM has been produced containing contributions from 15 agencies. The Department will prepare six quarterly issues of the NESE.DB on a test basis, starting with the fall issue of October 1992. Single issues will be sold for $95.00 and annul subscriptions (4 issues) for $360.00. If subscriptions and single disc sales are sufficient to make the project self-financing, the NESE.DB will become a permanent information product.

DATES: Comments regarding the contents of the proposed National Economic, Social, and Environmental Data Bank must be submitted on or before January 19, 1993.

ADDRESSES: Written comments should be addressed to: John E. Cremeans, Director, Office of Business Analysis, Economics and Statistics Administration, room H4878, U.S. Department of Commerce, Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Contact John E. Cremeans, 202/482-1405.

SUPPLEMENTARY INFORMATION: The Department's National Trade Data Bank has been extraordinarily successful and has made export promotion data, trade date, and international economic data available to the public throughout the country in an accessible and inexpensive form. The software, procedures, and product development work done for the NTDB can be used with no additional cost in the creation of a domestic data bank with similar advantages. A prototype disc was produced in April 1992, and extensive testing has shown that the project is practicable and that operating costs can be expected to be both modest and self-financing through sales of the discs. The startup costs are being financed through the Department's "Pioneer Fund" procedure. Single discs and subscriptions to the NESE.DB may be ordered by calling 202/482-1986.

The prototype NESE.DB contains:

Council of Economic Advisers:
- Economic Report of the President, 1992

Office of Management and Budget:
- Budget of the United States—Historical Tables

U.S. Department of Commerce

Economics and Statistics Administration

Office of Business Analysis:

International Trade Administration

Export Trade Certificate of Review

ACTION: Notice of application.

SUMMARY: The Office of Export Trade Company Affairs, International Trade Administration, Department of Commerce, has received an application for an Export Trade Certificate of Review. This notice summarizes the conduct for which certification is sought and requests comments relevant to whether the Certificate should be issued.

FOR FURTHER INFORMATION CONTACT: George Muller, Director, Office of Export Trading Company Affairs, International Trade Administration, 202/482–5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trade Company Act of 1982 (15 U.S.C. 4001–21) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. A Certificate of Review protects the holder and the members identified in the Certificate from state and federal government antitrust actions and from private, treble damage antitrust actions for the export conduct specified in the Certificate and carried out in compliance with its terms and conditions. Section 302(b)(1) of the Act and 15 CFR 325.6(a) require the Secretary to publish a notice in the **Federal Register** identifying the applicant and summarizing its proposed export conduct.

Request for Public Comments

Interested parties may submit written comments relevant to the determination whether a Certificate should be issued. An original and five (5) copies should be submitted no later than 20 days after the date of this notice to: Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, room 1800H, Washington, DC 20230. Information submitted by any person is exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552). Comments should refer to this application as "Export Trade Certificate of Review, application number 92–00013." A summary of the application follows.

Summary of the Application

Applicant: General Aviation Manufacturers Association, Inc. ("GAMA"), 1400 K Street, N.W., suite 801, Washington, DC 20005, Contact: Edward W. Stimpson, Telephone: (202) 393–1500.

Application No.: 92–00013.

Date Deemed Submitted: December 8, 1992.

Members (in addition to applicant): Advanced Industries, Inc., Wichita, KS; Aircraft Technical Publishers, Brisbane, CA; Aire-Sciences, Inc., Fairfield, NJ; Airtechnics, Inc., Wichita, KS; Allied-Signal General Aviation Avionics, Olathe, KS (Controlling Entity: Allied-Signal Aerospace, Torrance, CA); Garrett General Aviation Services, Phoenix, AZ (Controlling Entity: Allied-Signal Aerospace, Torrance, CA); Allison Gas Turbine Division, Indianapolis, IN (Controlling Entity: General Motors, Detroit, MI); American General Aircraft Corp, Greenville, MS; Ametek, Inc. US Gauge Div., Sellersville, PA (Controlling Entity: Ametek, Inc., Wilmington, MA); Aviation Simulation Technology, Inc., Bedford, MA; B & D Instruments and Avionics, Inc, Valley Center, KS (Controlling Entity: Bowthorpe Holdings, PLC, Sussex, England); Beech Aircraft Corporation, Wichita, KS (Controlling Entity: Raytheon Corporation, Lexington, MA); BFGoodrich Aerospace, Akron, OH (Controlling Entity: BFGoodrich Company, Jacksonville, FL); Century Flight Systems, Inc., Mineral Wells, TX; Cessna Aircraft Company, Wichita, KS (Controlling Entity: Textron, Inc., Providence, RI); Collins Commerical Avionics, Cedar Rapids, IA (Controlling Entity: Rockwell International Corp., Seal Beach, CA); Hydro-Aire Division, Burbank, CA (Controlling Entity: Crane Company, New York, NY); The Dee Howard Company, San Antonio, TX (Controlling Entity: Alenia S.P.A., Naples, Italy); Dukes, Inc., Northridge, CA; Elano Corporation, Dayton, OH (Controlling Entity: GE Aircraft Engines, Cincinnati, OH); ERDA, Inc., Peshtigo, WI; Fairchild Aircraft Incorporated, San Antonio, TX; FlightSafety International, Inc., New York, NY; Global-Wulfsberg Systems, Irvine, CA (Controlling Entity: Sundstrand Corporation, Rockford, IL); Gulfstream Aerospace Corp, Savannah, GA; Hartzell Propeller, Inc., Piqua, OH; Honeywell, Inc., Phoenix, AZ (Controlling Entity: Honeywell, Inc., Minneapolis, MN); Jeppesen Sandersen, Inc., Englewood, CO; Learjet, Incorporated, Wichita, KS (Controlling Entity: Bombardier, Inc., West, Montreal PQ, Canada); Lucas Aerospace Power Equip. Company, Aurora, OH (Controlling Entity: Lucas Aerospace LTD., W. Midlands, England); Marathon Power Technologies, Waco, TX, Mooney Aircraft Corp., Kerrville, TX; Parker Bertea Aerospace Group, Irvine, CA (Controlling Entity: Parker Hannifin Corp., Cleveland, OH); Piper Aircraft Corp., Vero Beach, FL; Precision

Airmotive Corporation, Everett, WA; Sabreliner Corporation, Chesterfield, MO; SimuFlite Training International, Dallas/Fort Worth, TX; Teledyne Continental Motors, Mobile, AL (Controlling Entity: Teledyne, Inc., Los Angeles, CA); Textron Lycoming Turbine Engine Div., Stratford, CT (Controlling Entity: Textron, Inc., Providence, RI); Textron Lycoming Recipicating Engine Div., Williamsport, PA (Controlling Entity: Textron, Inc., Providence, RI); Unison Industries, Inc., Jacksonville, FL; United Technologies Corporation, Longueuil, Quebec, Canada (Controlling Entity: United Technologies Corp., Hartford, CT); Universal Navigation Corporation, Tuscon, AZ; Whittaker Controls, Inc., North Hollywood, CA; Williams International, Walled Lake, MI; and Woodward Governor Company, Rockford, IL.

GAMA seeks a Certificate to cover the following specific Export Trade, Export Markets, and Export Trade Activities and Methods of Operations.

Export Trade

Export Trade Facilitation Services

Export trade promotion and facilitation activities for its Members, including: Consulting, coordination, and negotiation of the terms and conditions of participation in trade promotion activities such as air shows, trade shows, expositions, exhibitions, conferences, or similar events.

Export Markets

The Export Markets include all parts of the world except the United States (the fifty states of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands).

Export Trade Activities and Methods of Operation

GAMA and one or more of its Members may:

1. Agree on which foreign air shows, trade shows, expositions, exhibitions and conferences to attend, duration of attendance, level of participation and size or content or displays;
2. Refuse to attend specific foreign air shows, trade shows, expositions, exhibitions or conferences;
3. Jointly negotiate with sponsors or hosts of foreign air shows, trade shows, expositions, exhibitions, and conferences on frequency, duration, costs, and all other terms and conditions of participation in such events;
4. Jointly negotiate with providers of transportation services, intermodal shipments, insurance, or documentation for airframes, engines, and other equipment used at foreign air shows, trade shows, expositions, or conferences;
5. Jointly negotiate with providers of ancillary services, such as hotels, local transportation companies, and caterers, in connection with participation in foreign air shows, trade shows, expositions, exhibitions, and conferences.
6. Exchange and discuss information relevant to the conduct identified in 1–5.
7. Refuse to provide export trade promotion and facilitation services to companies who are not members of GAMA.

Dated: December 14, 1992.

George Muller,

Director, Office of Export Trading Company Affairs.

[FR Doc. 92–30710 Filed 12–17–92; 8:45 am]

BILLING CODE 3510–DR–M

Minority Business Development Agency

Business Development Center Applications: U.S. Virgin Islands

AGENCY: Minority Business Development Agency, Commerce (Service Area).

ACTION: Notice.

SUMMARY: In accordance with Executive Order 11625, the Minority Business Development Agency (MBDA) is soliciting competitive applications under its Minority Business Development Center (MBDC) program to operate an MBDC for approximately a 3-year period, subject to Agency priorities, recipient performance and the availability of funds. The cost of performance for the first Budget period (12 months) is estimated as $169,125 in Federal funds, and a minimum of $29,846 in non-Federal (cost sharing) contribution, from May 1, 1993 to April 30, 1994. Cost-sharing contributions, may be in the form of cash contributions, client fees, in-kind contributions or combinations thereof. The MBDC will operate in the U.S. Virgin Islands SMSA geographic service area.

The funding instrument for the MBDC will be a cooperative agreement. Competition is open to individuals, non-profit and for-profit organizations, State local governments, American Indian tribes and educational institutions.

The MBDC program is designed to provide business development services to the minority business community for the establishment and operation of viable minority businesses. To this end, MBDA funds organizations that can identify and coordinate public and private sector resources on behalf of minority individuals and firms; offer a full range of management and technical assistance; and serve as a conduit of information and assistance regarding minority business.

Applications will be evaluated initially by regional staff on the following criteria: The experience and capabilities of the firm and its staff in addressing the needs of the business community in general and, specifically, the special needs of minority businesses, individuals and organizations (50 points); the resources available to the firm in providing business development services (10 points); the firm's approach (techniques and methodologies) to performing the work requirements included in the application (20 points); and the firm's estimated cost for providing such assistance (20 points). An application must receive at least 70% of the points assigned to any one evaluation criteria category to be considered programmatically acceptable and responsive. The selection of an application for further processing by MBDA will be made by the Director based on a determination of the application most likely to further the purpose of the MBDC Program. The application will then be forwarded to the Department for final processing and approval, if appropriate. The Director will consider past performance of the applicant on previous Federal awards.

MBDCs shall be required to contribute at least 15% of the total project cost through non-Federal contributions. To assist them in this effort, MBDCs may charge client fees for management and technical assistance (M&%TA) rendered. Based on a standard rate of $50 per hour, MBDCs will charge client fees at 20% of the total cost for firms with gross sales of $500,000 or less, and 35% of the total cost for firms with gross sales of over $500,000.

MBDCs performing satisfactorily may continue to operate after the initial competitive year for up to 2 additional budget periods. MBDCs with year-to-date "commendable" and "excellent" performance ratings may continue to be funded for up to 3 or 4 additional budget periods, respectively. Under no circumstances shall an MBDC be funded for more than 5 consecutive budget periods without competition. Periodic reviews culminating in year-to-date

quantitative and qualitative evaluations will be conducted to determine if funding for the project should continue. Continue funding will be at the discretion of MBDA based on such factors as an MBDC's performance, the availability of funds and the Agency priorities.

Awards under this program shall be subject to all Federal and Departmental regulations, policies, and procedures applicable to Federal assistance awards.

In accordance with OMB Circular A–129, "Managing Federal Credit Programs," applicants who have an outstanding account receivable with the Federal Government may not be considered for funding until these debts have been paid or arrangements satisfactory to the Department of Commerce are made to pay the debt.

Applicants are subject to Government-wide Debarment and Suspension (Nonprocurement) requirements as stated in 15 CFR part 26. The departmental Grants Officer may terminate any grant/cooperative agreement in whole or in part at any time before the date of completion whenever it is determined that the MBDC has failed to comply with the conditions of the grant/cooperative agreement. Examples of some of the conditions which can cause termination are failure to meet cost-sharing requirements; unsatisfactory performance of MBDC work requirements; and reporting inaccurate or inflated claims of client assistance or client certification. Such inaccurate or inflated claims may be deemed illegal and punishable by law.

On November 18, 1988, Congress enacted the Drug-Free Work-place Act of 1988 (Pub. L. 100–690, title V, subtitle D). The statute requires contractors and grantees of Federal agencies to certify that they will provide a drug-free workplace. Pursuant to these requirements, the applicable certification form must be completed by each applicant as a precondition for receiving Federal grant or cooperative agreement awards. False information on the application can be grounds for denying or terminating funding.

"Certification for Contracts, Grants, Loans, and Cooperative Agreements" and SF–LLL, the "Disclosure of Lobbying Activities" (if applicable) is required in accordance with section 319 of Public Law 101–121, which generally prohibits recipients of Federal contracts, grants, and loans from using legislative Branches of the Federal Government in connection with a specific contract, grant or loan.

15 CFR part 28 is applicable and prohibits recipients of Federal contracts, grants, and cooperative agreements from using appropriated funds for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with a specific contract, grant, or cooperative agreement. Form CD–511, "Certifications Regarding Debarment, Suspension and Other Responsibility Matters; Drug-Free Workplace Requirements and Lobbying" and, when applicable, the SF–LLL, "Disclosure of Lobbying Activities," are required.

CLOSING DATE: The closing date for application is *January 20, 1993.* Applications must be postmarked on or before *January 20, 1993.*

The mailing address for submission is:

ADDRESSES: New York Regional Office, Minority Business Development Agency, Jacob K. Javits Federal Building, rm. 3720, New York, New York 10278, Area Code/Telephone Number: (212) 264–3262.

FOR FURTHER INFORMATION CONTACT: John F. Iglehart, Regional Director, New York Regional Office.

SUPPLEMENTARY INFORMATION: Anticipated processing time of this award is 120 days. Executive Order 12372 "Inter-governmental Review of Federal Programs" is not applicable to this program. Questions concerning the preceding information, copies of application kits and applicable regulations can be obtained at the above New York address.

11.800 Minority Business Development (Catalog of Federal Domestic Assistance)

Dated: December 2, 1992.

BILLING CODE 3510–21–M

National Oceanic and Atmospheric Administration

Marine Mammals

AGENCY: National Marine Fisheries Service, NMFS, NOAA, Commerce.

ACTION: Issuance of Scientific Research Permit (P368C).

On August 7, 1992, Notice was published in the **Federal Register** (57 FR 34911) that an application had been filed by Dr. James T. Harvey, Assistant Professor, Moss Landing Marine Laboratories, P.O. Box 450, Moss Landing, CA 95039–0450, for a scientific research permit to capture 200 California sea lions (*Zalophus californianus*) and to inadvertently harass up to 300 during capture activities and during efforts to collect fecal samples and regurgitated material.

Notice is hereby given that on December 11, 1992, as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), the National Marine Fisheries Service issued a Permit for the above taking, subject to certain conditions set forth therein.

The Permit and supporting documentation are available for review, by appointment, in the Permits Division, Office of Protected Resources, National Marine Fisheries Service, NOAA, 1335 East-West Hwy., Silver Spring, MD 20910; and

Director, Southwest Region, National Marine Fisheries Service, NOAA, 501 West Ocean Boulevard, suite 4200, Long Beach, CA 90802–4213 (310/980–4015).

Dated: December 11, 1992.

Michael F. Tillman,

Acting Director, Office of Protected Resources, National Marine Fisheries Service.

[FR Doc. 92–30703 Filed 12–17–92; 8:45 am]

BILLING CODE 3510–22–M

Marine Mammals

AGENCY: National Marine Fisheries Service (NMFS), NOAA, DOC.

ACTION: Notice of correction regarding Application for Scientific Research Permit (P171C).

SUMMARY: This notice revises the second paragraph of a notice previously published in the **Federal Register** on November 20, 1992 (57 FR 54771) as follows:

On page 54771, column 1, the following should be added to the end of the second paragraph: "Individuals of the following species may be approached on an opportunistic basis for observation/photo-identification up to three times each annually over the five-year period: 500 bottlenose dolphins (*Tursiops truncatus*); 500 spotted dolphins (*Stenella attenuata*); 1000 spinner dolphins (*Stenella longirostris*); 200 false killer whales (*Pseudorca crassidens*); and 100 pilot whales (*Globicephala macrorhynchus*)."

Written data or views, or requests for a public hearing on this portion of the application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, 1335 East-West Highway, room 7324, Silver Spring, Maryland 20910, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on a particular application

would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

Documents submitted in connection with the above application are available for review by interested persons in the following offices by appointment:

Office of Protected Resources, National Marine Fisheries Service, NOAA, 1335 East-West Highway, suite 7324, Silver Spring, MD 20910 (301/713–2289);
Director, Southwest Region, National Marine Fisheries Service, NOAA, 501 W. Ocean Boulevard, suite 4200, Long Beach, CA 90802–4213 (310/980–4016);
Director, Alaska Region, National Marine Fisheries Service, NOAA, Federal Annex, 9109 Mendenhall Mall Road, suite 6, Juneau, AK 99802 (907/586–7221); and
Coordinator, Pacific Area Office, National Marine Fisheries Service, NOAA, 2570 Dole Street, room 106, Honolulu, HI 96822–2396 (808/955–8831).

This notice does not affect the comment period for the portion of the application concerning humpback whale research, notification of which was previously published in the **Federal Register** on November 20, 1992 (57 FR 54771).

Dated: December 14, 1992.

Michael F. Tillman,

Acting Director, Office of Protected Resources, National Marine Fisheries Service.

[FR Doc. 92–30704 Filed 12–17–92; 8:45 am]

BILLING CODE 3510–22–M[illegible] resolution is required from each participating Tribe.

Pacific Coast Groundfish Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Issuance of experimental fishing permits.

SUMMARY: This notice announces the issuance of experimental fishing permits (EFPs) to shore-based catcher boats to implement a pilot observation program to monitor the bycatch of salmon caught incidental to Pacific whiting trawl operations. The permits authorized the retention of salmonids incidentally caught with mid-water trawl gear, for limited experimental purposes. The permits allowed fishing practices that were otherwise prohibited by Federal regulations. This action is authorized by the Pacific Coast Groundfish Fishery Management Plan (FMP) and implementing regulations.

EFFECTIVE DATES: The EFPs issued were effective from 0001 hours (local time) April 28, 1992, through 0001 hours (local time) October 31, 1992.

ADDRESSES: Rolland A. Schmitten, Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way NE, BIN C15700, Bldg. 1, Seattle, WA 98115.

FOR FURTHER INFORMATION CONTACT: William L. Robinson at (206) 526–6140.

SUPPLEMENTARY INFORMATION: The FMP and implementing regulations at 50 CFR part 663 specify that an EFP may be issued to authorize fishing that would otherwise be prohibited by the FMP and regulations. The procedures for issuing EFPs are contained in the regulations at 50 CFR 663.10. An EFP application was received from the States of Washington, Oregon, and California on March 23, 1992, requesting to delay, until offloading, the sorting of salmon caught incidental to the Pacific whiting trawl fishery in the exclusive economic zone (EEZ) off the coasts of Washington, Oregon, and California. Retention of trawl-caught salmon is prohibited by 50 CFR 663.7(b). The purpose of the EFP was to allow the states to monitor the bycatch of salmon caught incidental to Pacific whiting trawl operations on vessels that delivered shoreside. A notice acknowledging the receipt of the application, describing the proposal and requesting public comment, was published in the **Federal Register** (57 FR 11466, April 3, 1992). No written comments were received.

The application was reviewed by the Pacific Fishery Management Council (Council) at its April 7–10, 1992, public meeting. At the Council's recommendation, the Director, Northwest Region, NMFS, approved the application and granted the permits.

Between April and October 1992, 18 EFPs were issued to individual vessels designated by Oregon Department of Fish and Wildlife (ODFW) and Washington Department of Fisheries (WDF) as participants in the pilot observation program. At various times, 18 catcher boats operated in this experimental fishery. Their catch was landed at participating shore-based processing plants in Newport and Astoria, Oregon, and Ilwaco, Washington. Catcher boats landing whiting in California did not express an interest in the experimental fishery, so no EFPs were issued to them.

A number of conditions were imposed on the use of the EFPs. Each permitted vessel was required to carry an observer. The permits were valid only for landings at processing plants designated by the States of Washington and Oregon as participants in the observation program. Designated processing plants agreed to set aside salmonids for biological sampling and disposition by state agency personnel and allow state personnel to sample whiting landings. The permits were valid only for mid-water trawl fishing that targeted whiting. All salmon caught incidentally while fishing for whiting were required to be retained onboard the fishing vessel and offloaded at a designated shoreside processing plant so that the state could examine each fish. Salmon retained under the permit could not be sold. The permit holder agreed to the public release of any and all information obtained as a result of activities conducted under the permit. The results of the experimental fishery were prepared by ODFW and presented at the November 16–20, 1992, Council meeting. A copy of the permits may be obtained from the NMFS Regional Director (see **ADDRESSES**).

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 14, 1992.

Richard H. Schaefer,

Director of Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510–22–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Import Restraint Limits for Certain Cotton, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in the People's Republic of Bangladesh

December 11, 1992.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits for the new agreement year.

EFFECTIVE DATE: February 1, 1993.

FOR FURTHER INFORMATION CONTACT: Ross Arnold, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927–5850. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The Bilateral Textile Agreement, effected by exchange of notes dated February 19 and 24, 1986, as amended and extended, between the

Governments of the United States and the People's Republic of Bangladesh, establishes limits for the period beginning on February 1, 1993 and extending through January 31, 1994.

In the letter published below, the Chairman of CITA directs the Commissioner of Customs to establish limits for the period February 1, 1993 through January 31, 1994. The limit for Categories 340/640 has been reduced to account for carryforward and special carryforward used. The reduction for special carryforward used is at the rate of 1.2 dozen for every dozen used, as agreed in letters exchanged on October 14 and October 15, 1992, between the Governments of the United States and the People's Republic of Bangladesh.

A copy of the bilateral textile agreement is available from the Textiles Division, Bureau of Economic and Business Affairs, U.S. Department of State, (202) 647–3889.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 57 FR 54976, published on November 23, 1991).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the agreement, but are designed to assist only in the implementation of certain of its provisions.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 11, 1992.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1991; pursuant to the Bilateral Textile Agreement, effected by exchange of notes dated February 19 and 24, 1986, as amended and extended, between the Governments of the United States and the People's Republic of Bangladesh; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on February 1, 1993, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, man-made fiber, silk blend and other vegetable fiber textiles and textile products in the following categories, produced or manufactured in Bangladesh and exported during the twelve-month period beginning on February 1, 1993 and extending through January 31, 1994, in excess of the following levels of restraint:

Category	Twelve-month restraint limit
237	325,815 dozen.
331	825,439 dozen pairs.
334	99,399 dozen.
335	178,471 dozen.
336/636	304,170 dozen.
338/339	925,204 dozen.
340/640	1,682,731 dozen.
341	1,732,602 dozen.
342/642	299,767 dozen.
347/348	1,559,340 dozen.
351/651	476,092 dozen.
363	17,745,950 numbers.
369–S[1]	1,189,523 kilograms.
634	347,750 dozen.
635	225,301 dozen.
638/639	1,173,328 dozen.
641	725,489 dozen.
645/646	275,543 dozen.
647/648	980,718 dozen.
847	495,929 dozen.

[1] Category 369–S: only HTS number 6307.10.2005.

Imports charged to these category limits for the period February 1, 1993 through January 31, 1994 shall be charged against those levels of restraint to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

The limits set forth above are subject to adjustment in the future pursuant to the provisions of the current bilateral agreement between the Governments of the United States and the People's Republic of Bangladesh.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 92–30647 Filed 12–17–92; 8:45 am]

BILLING CODE 3510–DR–F

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Proposed Additions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed additions to procurement list.

SUMMARY: The Committee has received proposals to add to the Procurement List commodities to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

COMMENTS MUST BE RECEIVED ON OR BEFORE: January 19, 1993.

ADDRESS: Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Square 3, suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557–1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51-2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed additions, all entities of the Federal Government (except as otherwise indicated) will be required to procure the commodities listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodities to the Government.

2. The action will result in authorizing small entities to furnish the commodities to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodities proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information. It is proposed to add the following commodities to the Procurement List for production by the nonprofit agency listed:

Arming Wire Assembly
1325–00–947–6698
1325–01–155–9965
1325–01–264–5465
Nonprofit Agency: JobWorks, Inc., St. Petersburg, Florida.

Beverly L. Milkman,

Executive Director.

[FR Doc. 92–30789 Filed 12–17–92; 8:45 am]

BILLING CODE 6820–33–M

Procurement List; Additions

AGENCY: Committee for Purchase from People Who Are Blind or Severely Disabled.

ACTION: Additions to Procurement List.

SUMMARY: This action adds to the Procurement List services to be furnished by a nonprofit agency employed persons who are blind or have other severe disabilities.

EFFECTIVE DATE: January 19, 1993.

ADDRESS: Committee for Purchase from People Who Are Blind or Severely Disabled, Crystal Square 3, suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman, (703) 557–1145.

SUPPLEMENTARY INFORMATION: On October 16, 23 and 30, 1992, the Committee for Purchase from People Who Are Blind or Severely Disabled published notices (57 FR 47454, 48359 and 49176) of proposed additions to the Procurement List.

After consideration of the material presented to it concerning the capability of a qualified nonprofit agency to provide the services, fair market price, and the impact of the additions on the current or most recent contractor, the Committee has determined that the services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.6.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the services to the Government.

2. The action will not have a severe economic impact on current contractors for the services.

3. The action will result in authorizing small entities to furnish the services to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the services proposed for addition to the Procurement List.

Accordingly, the following services are hereby added to the Procurement List:

Janitorial/Custodial, Federal Service Center, 5600 Rickenbacker Road, Bell, California.
Janitorial/Custodial, Naval Facilities Engineering Command, Western Division, Naval and Marine Corps Reserve Center, San Bruno, California.
Mailroom Operation, U.S. Army Corps of Engineers, Los Angeles District, Los Angeles, California.

This action does not affect contracts awarded prior to the effective date of this addition or options exercised under those contracts.

Beverly L. Milkman,

Executive Director.

[FR Doc. 92–30791 Filed 12–17–92; 8:45 am]

BILLING CODE 6820-33-M

Procurement List; Proposed Additions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed additions to Procurement List.

SUMMARY: The Committee has received proposals to add to the Procurement List a commodity and services to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

COMMENTS MUST BE RECEIVED ON OR BEFORE: January 19, 1993.

ADDRESSES: Committee for Purchase From People Who are Blind or Severely Disabled, Crystal Square 3, suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman, (703) 557–1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed additions, all entities of the Federal Government (except as otherwise indicated) will be required to procure the commodity and services listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodity and services to the Government.

2. The action does not appear to have a severe adverse impact on the current contractors for the commodity and services.

3. The action will result in authorizing small entities to furnish the commodity and services to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodity and services proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

It is proposed to add the following commodity and services to the Procurement List for production by the nonprofit agency listed:

Commodity

Deployment Bag, Parachute
1670–01–235–0923
Nonprofit Agency: Huntsville Rehabilitation Foundation, Huntsville, Alabama.

Services

Janitorial/Custodial
Anderson National Historic Site, Rt. 1, Box 85, Andersonville, Georgia.
Nonprofit Agency: Macon County Mental Retardation Service Center, Montezuma, Georgia.

Janitorial/Custodial
Federal Building and U.S. Courthouse, 316 North 26th Street, Billings, Montana.
Nonprofit Agency: Community Options Resource Enterprises, Inc., Billings, Montana.

Janitorial/Custodial
Federal Building and U.S. Courthouse, 301 South Park Avenue, Helena, Montana.
Nonprofit Agency: Helena Industries, Inc., Helena, Montana.

Janitorial/Custodial
U.S. Army Reserve Center, 1001 and 1005 Lakecrest Road, Grand Prairie, Texas.
Nonprofit Agency: Fairweather Associates, Inc., Dallas, Texas.

Janitorial/Custodial
U.S. Army Reserve Center, 200 North New Road, Waco, Texas.
Nonprofit Agency: Heart of Texas Goodwill Industries, Inc., Waco, Texas.

Parts Machining
Naval Aviation Depot, Jacksonville, Florida.
Nonprofit Agency: West Tennessee Lions Blind Industries, Memphis, Tennessee.

Beverly L. Milkman,

Executive Director.

BILLING CODE 6820-33-M

COMPETITIVENESS POLICY COUNCIL

Notice of forthcoming meetings.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the

Competitiveness Policy Council announces several forthcoming meetings.

DATES: January 7 and 8, 1993; 8:30 to 5:30 p.m.

ADDRESS: Eighth Floor Conference Center, 11 Dupont Circle, NW., Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Howard Rosen, Executive Director, Competitiveness Policy Council, suite 650, 11 Dupont Circle, NW., Washington, DC 20036, (202) 387–9017.

SUPPLEMENTARY INFORMATION: The Competitiveness Policy Council (CPC) was established by the Competitiveness Policy Council Act, as contained in the Trade and Competitiveness Act of 1988, Public Law 100–418, sections 5201–5210, as amended by the Customs and Trade Act of 1990, Public Law 101–382, section 133. The CPC is composed of 12 members and is to advise the President and Congress on matters concerning competitiveness of the U.S. economy. The Council's chairman, Dr. C. Fred Bergsten, will chair each meeting.

Each meeting will be open to the public subject to the seating capacity of the room. Visitors will be requested to sign a visitor's register.

TYPE OF MEETING: Open.

AGENDA: The Chairman will open each meeting with a report on developments related to the activities of the Council. The work of each of the eight subcouncils will be discussed. The subcouncils include: Capital formation, corporate governance, critical technologies, education, manufacturing, public infrastructure, trade policy, and training. The Council will also consider additional business as suggested by its members.

Dated: December 14, 1992.

Dr. C. Fred Bergsten,

Chairman, Competitiveness Policy Council.

[FR Doc. 92–30748 Filed 12–17–92; 8:45 am]

BILLING CODE 6820–11–M

DEPARTMENT OF DEFENSE

Department of the Army

Office of the Secretary of the Army; Environmental Assessment for Realignment Actions at Fort Jackson, SC

AGENCY: United States Army, Department of Defense.

ACTION: Finding of no significant impact.

SUMMARY: The Department of the Army has prepared an Environmental Assessment (EA) that evaluates the impact of the realignment of the Soldier Support Center (SSC) from Fort Benjamin Harrison, Indiana, to Fort Jackson, South Carolina, in accordance with the Base Closure and Realignment Act of 1990 (Pub. L. 101–510).

The realignment will involve approximately 500 permanent party soldiers, 400 civilian employees, and an average daily student load of 1650. The realignment of the SSC requires construction and/or renovation of over 331,000 square feet of instructional and administrative space, unaccompanied enlisted soldier barracks, additional medical facilities and a child development center.

Alternatives considered in the EA include the No Action Alternative, leasing facilities in the city of Columbia, South Carolina, using existing facilities without renovation, using facilities with renovation, and new construction.

The preferred alternative to meet the requirements of this realignment is as follows:

- Time-phase the movement of personnel over a nine month period.
- Construct Soldier Support War Fighting Center (SSWFC) in the cleared area lying northwest of Lee Road and southwest of Hampton Parkway.
- Construct the Non-Commissioned Officers (NCO) Academy and the Advanced Individual Training (AIT) component of the Adjutant General and Finance School separate from SSWFC.
- Construct the NCO Academy at the site that lies northeast of Bragg and southeast of Jackson streets. Furthermore, the NCO Academy will make full use of buildings 2280 and 3200 without renovation.
- Locate the Field Training Area for the NCO Academy (NCOFTA) at the site that lies south of Sergeant Jasper Road and 320 feet east of Ivy Road. No permanent improvements are needed for this facility.
- Renovate the former cook and baker School (Building 2375) and buildings 2270 and 2210 for use as instructional classroom facilities by the AIT school.
- Collocate the Adjutant General Battle Simulator (AGBS) with the SSWFC.
- Convert buildings 3215, 3235, 3265, 3275, and 3276 to standard-design unaccompanied enlisted personnel housing to provide residence accommodations for new personnel.
- Construct a new 60-child Child Development Center (CDC) at the currently unimproved site that lies along Scales Avenue across from the existing CDC.
- Construct the addition to the Moncrief Memorial Hospital at the site adjacent to the southwest corner of the existing facility.

The proposed alternatives were evaluated for expected impacts to air quality, water resources, geology, landfills, traffic, energy, hazardous and medical wastes, plant and animal ecology, threatened and endangered species, wetlands, cultural resources, socioeconomic environment, and quality of life. The EA did not identify any significant adverse impacts to any of these environmental factors.

The EA identifies the following mitigation actions that will be implemented to provide sound stewardship of Fort Jackson's environment: Increase existing on-base law enforcement staff; continue to develop Fort Jackson's Integrated Natural Resource Management Plan; review and update all hazardous waste disposal contracts; and exercise appropriate erosion and air emissions control measures. The proposed action is environmentally sound and sufficient data are available to determine the proposed realignment will not have a significant environmental effect. Therefore, an Environmental Impact Statement (EIS) will not be prepared.

DATES: Comments must be received on or before January 19, 1993.

ADDRESSES: The EA is available for public review at the office of the Directorate of Engineering and Housing and the Fort Jackson Library, Fort Jackson, South Carolina, and the Richland County Library at Sumter Street, Columbia, South Carolina. A copy of the EA can be obtained by contacting Mr. J. B. Knight of the Environmental and Natural Resources Division at Fort Jackson at (803) 751–5011.

FOR FURTHER INFORMATION: Send all comments to: Dr. Bradley Foster, U.S. Army Corps of Engineers, Savannah District, 100 W. Oglethorpe Ave., Savannah, Georgia 31401, or call 912–652–5833.

Dated: December 14, 1992.

Lewis D. Walker,

Deputy Assistant Secretary of the Army, Environment, Safety, & Occupational Health, OASA (IL&E).

[FR Doc. 92–30688 Filed 12–17–92; 8:45 am]

BILLING CODE 3710–08–M

DEPARTMENT OF EDUCATION

National Assessment Governing Board; Meeting

AGENCY: National Assessment Governing Board, Education.

ACTION: Amendment to teleconference meeting notice for December 18, 1992.

SUMMARY: Notice is hereby given of an amendment to the notice of a teleconference meeting of the Executive Committee of the National Assessment Governing Board published in the **Federal Register** on Thursday, December 3, 1992 in Vol. 57, No. 233, page 57161. Due to the expedited action required as the result of the early resignation of the incumbent Board member in the category of Governor or former Governor (Republican), the Executive Committee will meet in partially closed session to review the Nominations Committee recommendations of nominees to fill this vacancy. The Executive Committee will formulate recommendations for the full Board to take a final action on the nominees. The meeting will be closed to the public from 11 a.m. to 11:30 a.m. to permit the Committee to discuss the qualifications of nominees for appointment to the National Assessment Governing Board. The review and subsequent discussion of the nominees' qualifications relates solely to the internal rules and practices of an agency and would disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy if conducted in open session. Such matters are protected by exemptions (2) and (6) of section 552b(c) of title 5 U.S.C.

A summary of the activities at the closed portion of the meeting and related matters, which are informative to the public consistent with the policy of 5 U.S.C., 552b, will be available to the public within fourteen days after the meeting.

Dated: December 15, 1992.

Roy Truby,

Executive Director, National Assessment Governing Board.

[FR Doc. 92–30745 Filed 12–17–92; 8:45 am]

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Floodplain Statement of Findings for a Proposed Pipeline and Outfall Structure, Weldon Spring Site Remedial Action Project, MO

AGENCY: Department of Energy.

ACTION: Floodplain Statement of Findings for Proposed Pipeline and Outfall Structure.

SUMMARY: Regulations at 10 CFR part 1022 require the Department of Energy (DOE) to evaluate actions it may take in a floodplain/wetlands in order to ensure consideration of protection of the floodplain/wetlands in decision making. In accordance with these regulations, DOE published in the **Federal Register** on September 15, 1992 (57 FR 42564), a notice of floodplain/wetlands involvement for the proposed construction of buried pipeline through wetland areas and a submerged outfall structure in the Missouri River floodplain. The public comment period for this notice ended September 30, 1992, and no comments were received. A Floodplain/Wetlands Assessment for this action was prepared in which DOE described the effects, alternatives, and measures designed to avoid or minimize potential harm to or within the affected floodplain. This Statement of Findings addresses the action in the floodplain only, as required by 10 CFR 1022.15(b). DOE will endeavor to allow 15 days of public review after publication of the statement of findings before implementing the proposed action.

FOR FURTHER INFORMATION CONTACT: Stephen McCracken, Project Manager, Weldon Spring Site Remedial Action Project (WSSRAP), U.S. Department of Energy, 7295 Highway 94 South, St. Charles, Missouri 63303, (314) 441–8978. For further information on general DOE Floodplain/Wetlands Environmental Review Requirements, contact Carol M. Borgstrom, Director, Office of NEPA Oversight, U.S. Department of Energy,1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–4600 or (800) 472–2756. DOE can provide information and maps showing the route of the proposed pipeline and 1984 FEMA Floodplain and Floodway maps showing the floodplain.

SUPPLEMENTARY INFORMATION: This is a Floodplain Statement of Findings for a proposed pipeline and outfall structure in the Missouri River near WSSRAP prepared in accordance with 10 CFR part 1022. A Notice of Floodplain/Wetlands Involvement was published in the **Federal Register** on September 15, 1992 (57 FR 42564) and a Floodplain/Wetlands Assessment was prepared. DOE is conducting response actions at the chemical plant area of the Weldon Spring Site under its Environmental Restoration and Waste Management Program. The site is located in St. Charles County, Missouri, approximately 30 miles west of St. Louis. The site became contaminated as a result of processing and disposal activities that took place from the 1940s to the 1960s. The chemical plant area of the site has been inactive since 1967 and was placed on the National Priorities List of the U.S. Environmental Protection Agency in 1989.

Cleanup of the Weldon Spring Site consists of several actions, one of which involves the treatment and discharge of approximately 57 million gallons of radioactive and chemically contaminated water currently impounded at the site. After the water is treated in a newly-constructed on-site treatment plant, it would be discharged to a buried pipeline constructed from the site to the Missouri River. Site water will be treated in the general range of drinking water quality as identified in the National Pollutant Discharge Elimination System permit for this action.

A small section of the pipeline and its outfall structure would be located in the 100-year floodplain of the Missouri River. The floodplain in this location is that area with an elevation less than 474 feet above mean sea level, as identified by the St. Charles County Planning and Zoning Department (1984 FEMA Floodplain and Floodway Maps) in accordance with the authority delegated by the Federal Emergency Management Agency (FEMA) District 7 to manage floodplains in St. Charles County.

Other discharge options were evaluated in an engineering evaluation/cost analysis (EE/CA) report which was prepared in July 1990 for the water treatment action (DOE/OR/21548–106). Further options were evaluated in a value engineering study that was conducted subsequent to a drainage flow study as part of detailed design activities for the water treatment action. Five alternate pipeline routes and two alternatives for outfall structures were evaluated in this detailed engineering study, each of which would have resulted in greater environmental impacts. Some of the alternatives were routed through environmentally sensitive resources, such as the preferred habitat area for the Cooper's Hawk and archaeological sites. The proposed route and the location of the outfall structure in the floodplain were selected because they are restricted to areas that have previously been disturbed for roads and railroads, so that the short-term incremental disturbance would be minimal.

The alternative identified in the EE/CA for the water treatment action was to discharge the treated water to a natural drainage channel, referred to as the Southeast Drainage channel. This alternative would result in minimal disturbance, but it might result in the resuspension and/or dissolution of contaminants from sediment present in the drainage as a result of past discharges and ongoing surface runoff from the site. To address this possibility, the pipeline has been

proposed as an alternate discharge option. This pipeline would follow a route of previous disturbance within the floodplain to minimize potential environmental impacts.

The treatment of contaminated water from the chemical plant area and discharge of the treated water would limit potential exposures at, and migration from, the contaminated on-site impoundments and would promote short-term and long-term protection of human health and the environment relative to the contaminated surface water.

This construction would conform to applicable State and local floodplain protection standards. This action would not require a floodplain development permit from the St. Charles County Planning and Zoning Department because the action does not involve construction of, and furnishing electricity to, an above-ground building.

Good engineering practices, such as straw bales and/or other sediment control devices, would be used during construction. Seeding would be used to maintain the pipeline and outfall structure after construction. The level of activity in the floodplain for this action would be extremely minimal. Therefore, any impacts to the floodplain would be negligible.

DOE will endeavor to allow 15 days of public review after publication of the statement of findings before implementing the proposed action.

Paul D. Grimm,

Principal Deputy Assistant Secretary for Environmental Restoration and Waste Management.

DE-FG22-93PC14876

Term of Assistance/Estimated Cost

The term of the grant is for a twelve-month period at an estimated value of $22,500. DOE's funding share will be $9,500.

Scope

Based upon the authority of 10 CFR 600.7(b)(2)(i) criteria (B) and (D), the objective of this Grant (DE-FG22-93BC14876) is to permit the DOE/BPO and the Oklahoma Geological Survey to participate in funding a workshop to enhance science and technology transfer through discussions and reports dealing with the geologic setting, depositional environments, and digenetic history of fluvial-dominated deltaic reservoirs, as well as reservoir characterization and the engineering factors that influence hydrocarbon accumulation or hydrocarbon production. The Workshop will focus on deltaic reservoirs in fluvial-dominated environments of the southern Midcontinent, including Oklahoma and contiguous parts of Kansas, Missouri, Arkansas, Texas, New Mexico, and Colorado. The presentations will address a means of technology transfer in order to provide a new source of information for oil and gas producers and does meet the *National Energy Strategy* goal of arresting the U.S. vulnerability to oil supply disruptions by increasing the domestic crude oil resource base.

Richard D. Rogus,

Contracting Officer.

BILLING CODE 6450-01-M

Bonneville Power Administration

Intent to Revise Transmission Rates to Become Effective October 1, 1993; Request for Comments

AGENCY: Bonneville Power Administration (BPA), DOE.

ACTION: Notice of intent and request for comments. BPA File No.: TR-93. BPA requests that all comments and documents to become part of the official record compiled in the process of adjusting transmission rates contain the file number designation TR-93.

SUMMARY: BPA is developing transmission rates proposed to become effective October 1, 1993. At this time, BPA announces its intent to revise its rates and seeks comments that BPA can use to develop its proposal. BPA expects to publish a notice of the proposed rates in the **Federal Register** in January 1993.

The January notice will also announce BPA's proposed schedule for formal hearings as specified in section 7(i) of the Pacific Northwest Electric Power Planning and Conservation Act (Northwest Power Act). A final schedule will be established by the Hearing Officer who presides over BPA's rate hearings. These hearings, and informal field hearings, will give interested persons an opportunity to present oral and written comments on the rate proposal.

DATES: Comments concerning the development of proposed transmission rates will be accepted through 4 p.m., January 15, 1993. Pursuant to the ex parte limitations contained in BPA's general rate proceeding procedures, BPA will not accept oral recommendations on substantive issues except in meetings for which notice has been given. 51 FR 7611 (March 5, 1986).

Responsible Official: Mr. Sydney Berwager, Director, Division of Contracts and Rates, is the official responsible for the development of BPA's rates.

ADDRESSES: Written comments should be submitted to the Public Involvement Manager, Bonneville Power Administration, P.O. Box 12999, Portland, Oregon 97212.

FOR FURTHER INFORMATION CONTACT: Mr. Shirley Price, Public Involvement Office, at the address listed above, 503-230-4366, or toll free 1-800-622-4519. Information may also be obtained from:

Mr. George Bell, Lower Columbia Area Manager, Suite 243, 1500 Plaza Building, 1500 Northeast Irving Street, Portland, Oregon 97232, 503-230-4552.

Mr. Robert N. Laffel, Eugene District Manager, Room 206, Federal Building, 211 East Seventh Avenue, Eugene, Oregon 97401, 503-465-6952.

Mr. Wayne R. Lee, Upper Columbia Area Manager, Room 561, U.S. Courthouse, 920 West Riverside Avenue, Spokane, Washington 99201, 509-353-2518.

Mr. George E. Eskridge, Montana District Manager, 800 Kensington, Missoula, Montana 59801, 406-329-3060.

Ms. Carol Fleischman, Spokane District Manager, Room 112, U.S. Courthouse, 920 West Riverside, Spokane, Washington 99201, 509-353-3279.

Mr. Ronald K. Rodewald, Wenatchee District Manager, Room 307, 301 Yakima Street, Wenatchee, Washington 98807–0741, 509–662–4377, extension 379.

Mr. Terence G. Esvelt, Puget Sound Area Manager, P.O. Box C19030, Suite 400, 201 Queen Anne Avenue North, Seattle, Washington 98109, 206–553–4130.

Mr. Thomas V. Wagenhoffer, Snake River Area Manager, 101 West Poplar, Walla Walla, Washington 99362, 509–522–6226.

Ms. C. Clark Leone, Idaho Falls District Manager, 1527 Hollipark Drive, Idaho Falls, Idaho 83401, 208–523–2706

Mr. James Normandeau, Boise District Manager, Room 540, 304 North 8th Street, Boise, Idaho 83702, 208–334–9137.

SUPPLEMENTARY INFORMATION: The Federal Columbia River Transmission System (FCRTS) is owned and operated by BPA, a Federal power marketing agency within the Department of Energy. The FCRTS encompasses approximately 80 percent of the capacity of the high-voltage electric transmission system within the Pacific Northwest. Electric power from Federal and non-Federal generating units is integrated and transmitted utilizing the FCRTS. Interregional transmission services to customers outside the Pacific Northwest are also provided by BPA.

Current rates apply to four types of transmission service: (1) Firm integration of utilities' remote resources; (2) firm interregional transactions; (3) nonfirm transactions between systems both within the outside the Pacific Northwest region; and (4) firm transmission over specified facilities. Firm transmission is sold generally pursuant to contracts for periods up to 20 years. Firm transmission on BPA's network (main grid) is available on a mileage basis as well as a postage stamp rate structure.

BPA develops a Revenue Requirement Study that projects BPA's total costs of providing services to BPA's customers, including repayment of the Federal investment in the Federal Columbia River Power system. The revenue requirement calculation will be a major factor in determining the overall level of BPA's proposed power and transmission rates.

BPA has just completed a public process for culminating in decisions on budget program levels for FY's 1994 and 1995. Accordingly, program level decisions will not be an issue in the rate case. Another focus of this public process was the development of BPA's financial goals. Consistent with BPA's pledge at the end of the 1991 rate case, implementation of the 10-Year Financial Plan will be addressed in this rate case. The Revenue Requirement Study will incorporate BPA's program levels and implement BPA's financial goals.

In developing the 1993 transmission rate proposal, BPA plans to revise the level and charges of some of the existing transmission rate schedules and possibly revise the General Transmission Rate Schedule Provisions. However, BPA anticipates that the general application and availability of these rate schedules will remain unchanged. BPA also plans to propose a new rate schedule to recover annual costs associated with possible non-Federal ownership rights on the Pacific Northwest AC Intertie.

In order to be considered in the development of BPA's initial proposal, comments must be in writing and be submitted no later than 4 p.m., January 15, 1993. Oral communications should be for the purpose of requesting either status reports or procedural information. Following publication of the initial proposal in the **Federal Register** (on or about January 20, 1993), formal public hearings will be, and general public field hearings may be, conducted by BPA. Written comments from individuals or entities other than parties to BPA's formal rate case will also be accepted through March 15, 1993. After completion of an environmental process pursuant to the National Environmental Policy Act and following the hearings, BPA will announce its final proposed transmission rates and submit them by August 2, 1993, to the Federal Energy Regulatory Commission for approval.

Issued in Portland, Oregon, on December 4, 1992.

Steven G. Hickok,

Acting Administrator, Bonneville Power Administration.

Mr. James Normandeau, Boise District Manager, Room 450, 304 North 8th Street, Boise, Idaho 83702, 208–334–9137.

SUPPLEMENTARY INFORMATION:

I. Background

BPA is a Federal power marketing agency in the Pacific Northwest. BPA markets hydroelectric power from 30 dams, including projects operated by the U.S. Army Corps of Engineers and U.S. Bureau of Reclamation on the Columbia River and its tributaries, and projects owned by the City of Idaho Falls and the Washington Public Power Supply System (Supply System). BPA also markets thermal power BPA acquires from interests in the region. In addition, BPA owns, operates, and maintains the nation's largest high-voltage transmission system grid.

BPA supplies about 45 percent of the electric energy consumed in the Pacific Northwest and maintains about 80 percent of the region's high-voltage transmission capacity. BPA sells power to 174 customers, including publicly, cooperatively, and privately owned utilities; Federal and State agencies; and direct-service industries (DSIs). The power is sold wholesale to BPA utility customers for resale to consumers and is sold directly to BPA's industrial and Federal agency customers. In addition, BPA sells power that is surplus to the needs of the Pacific Northwest to customers within and outside the region.

The rates that BPA charges its customers must produce revenues that are sufficient to repay, with interest, the Federal investment in generation, conservation, and transmission facilities. Revenues must also pay BPA's operation and maintenance expenses, purchased power costs, and other miscellaneous expenses. BPA also sets rates to recover a certain amount of positive net revenues. These planned net revenues, combined with BPA's existing financial reserves, will provide current rate period risk mitigation protection to help assure BPA's ability to recover its costs, including its annual payments to the U.S. Treasury.

BPA's current wholesale power rates became effective on October 1, 1991.

BPA is preparing studies to determine the extent to which projected revenue requirements for FY's 1994 and 1995 will exceed revenues projected under current rates. BPA will then prepare studies to establish proposed rates for the FY 1994 and 1995 period. BPA will also assess the potential environmental effects of the proposed rates.

II. Major Issues

The development of BPA's rates is complex, raising numerous issues for resolution in the hearings process. The following is a brief explanation of several major issues that are expected to be addressed in the hearing. Some of these issues have been the subject of much discussion in previous BPA rate cases.

A. Revenue Requirement

BPA develops a Revenue Requirement Study that projects BPA's total costs of providing services to BPA's customers, including repayment of the Federal investment in the Federal Columbia River Power System. The revenue requirement calculation will be a major factor in determining the overall level of BPA's power and transmission proposed rates.

BPA has just completed a public process for culminating in decisions on budget program levels for FY's 1994 and 1995. Accordingly, program level decisions will not be an issue in the rate case. Another focus of this public process was the development of BPA's financial goals. Consistent with BPA's pledge at the end of the 1991 rate case, implementation of the 10-Year Financial Plan will be addressed in this rate case. The Revenue Requirement Study will incorporate BPA's program levels and implement BPA's financial goals.

B. Revenue Forecast and Risk Analysis

The Revenue Forecast projects BPA's expected level of sales and revenue for the rate period. The Risk Analysis reviews the risks associated with the major elements of the forecast. The probabilities given to the various risk factors influence the need to adjust rates.

Projected revenues from nonfirm energy sales are credited during ratemaking against costs allocated to rates of firm power classes. Forecasts of nonfirm sales play a key role in determining the level of rate adjustments and have a large impact on BPA's ability to make its projected payments to the Treasury.

C. Loads and Resources Determinations

The energy and capacity loads and resources forecasted by BPA to occur during the forthcoming rate period determine BPA's forecasted power sales. Forecasted sales and revenue requirements determine the level of rates that must be charged to generate sufficient revenue.

D. Allocation of Costs

The rates charged each customer class reflect the classification of costs between capacity and energy and the allocation of costs to that particular customer class. Given the change in BPA's load and resource position from surplus to load/resource balance, BPA is projecting some resource acquisitions, the costs of which must be allocated to customer classes. BPA's initial rate proposal will present BPA's proposed cost classification and allocation methodologies and results. To the extent possible, the methodologies employed will be the same as were used in BPA's initial proposal in the 1991 rate case.

E. 7(b)(2) Rate Test Study

In accordance with section 7(b)(2) of the Northwest Power Act, BPA must conduct a test to determine whether it is necessary to provide rate protection for BPA's public body and cooperative customers and, if so, the amount of the protection. Since the section 7(b)(2) rate test may reallocate costs to other customers, the rate test and the assumptions used to perform the test are expected to be an issue in the rate case.

In order to be considered in the development of BPA's initial proposal, comments must be in writing and be submitted no later than 4 p.m, January 15, 1993. Oral communications should be for the purpose of requesting either status reports or procedural information. Following publication of the initial proposal in the **Federal Register** (on or about January 20, 1993), formal public hearings beginning on or about January 28, 1993, will be, and general public field hearings may be, conducted by BPA. Written comments from individuals or entities other than parties to BPA's formal rate case will also be accepted through March 15, 1993. After completion of an environmental process pursuant to the National Environmental Policy Act and following the hearings, BPA will announce its final proposed wholesale power rates and submit them on August 2, 1993, to the Federal Energy Regulatory Commission for approval.

Issued in Portland, Oregon, on December 4, 1992.

Steven G. Hickok,

Acting Administrator, Bonneville Power Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. QF93-15-000]

Central Florida Power, L.P.; Application for Commission Certification of Qualifying Status of a Cogeneration Facility

December 11, 1992.

On November 3, 1992, Central Florida Power, L.P. (Applicant), c/o Destec Energy, Inc., of 2500 CityWest Blvd., Suite 150, Houston, Texas, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207(b) of the Commission's Regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in Polk County, Florida, and will consist of a combustion turbine generator, an unfired heat recovery boiler and an extraction/condensing steam turbine generator (STG). Steam recovered from the STG will be used by Fort Meade Chemical Products (FMCP), an unaffiliated fertilizer manufacturing entity, primarily in manufacturing of concentrated phosphoric acid. Applicant states that, should FMCP's plant cease to produce fertilizer, FMCP will continue to purchase steam from the facility to evaporate the runoff water from the gypsum pile, a byproduct of the fertilizer production, in order to avoid any discharge of the acidic runoff water into the surrounding ground water. Applicant states that when the fertilizer plant is in operation the runoff water is used for the production of fertilizer. The net electric power production capacity of the facility will be approximately 206 MW. The primary energy source will be natural gas. Construction of the facility is expected to commence in the first quarter of 1993.

On December 10, 1992, Applicant tendered for filing an amendment to its filing in this docket. The amendment provides additional information pertaining to the ownership structure and clarifies certain technical information. No determination has been made that the submittal constitutes a complete filing.

Any person desiring to be heard or objecting to the granting of qualifying status should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests must be filed within 30 days after the date of publication of this notice in the **Federal Register** and must be served on the Applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-30684 Filed 12-17-92; 8:45 am]

BILLING CODE 6717-01-M

[Project Nos. 1267-000, et al.]

Applications; Hydroelectric Applications (Greenwood County & Duke Power Co., et al.)

Take notice that the following hydroelectric applications have been filed with the Commission and are available for public inspection:

1 a. *Type of Application:* New License.

b. *Project No.:* 1267-000.

c. *Date Filed:* February 3, 1982.

d. *Applicant:* Greenwood County and Duke Power Company.

e. *Name of Project:* Buzzards Roost Project.

f. *Location:* On Saluda River, Greenwood, Laurens, and Newberry Counties, South Carolina.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. *Applicant Contact:* Mr. Albert V. Carr, Jr., Associate General Counsel, Duke Power Company, 422 South Church Street, Charlotte, NC 28242, (704) 382-8129.

i. *FERC Contact:* Michael Dees (202) 219-2807.

j. *Deadline Date:* Initial Comments Due January 19, 1993; Reply Comments Due March 2, 1993.

k. *Status of Environmental Analysis:* This application has been accepted for filing and is ready for environmental analysis at this time—see attached standard paragraph D9.

l. *Description of Project:* The existing project consists of: a reservoir with a surface area of 11,400 acres and an impoundment of approximately 254,000 acre-feet; (1) a 67-foot-high and 2,400-foot-long earthfill dam with a crest elevation of 457.0 feet msl; (3) an 11-foot-high and 200-foot-long fuse plug dike; (4) a spillway structure containing four 250-foot-high and 38-foot-long Taintor gates; (5) a reinforced concrete powerhouse, integral with the spillway structure containing three generating units with a total rated capacity of 15,000 kW; (6) a trailrace; and (7) appurtenant facilities. The project generates an average of 48,557,000 kWh annually. The project is owned by Greenwood County and operated by Duke Power Company under a lease agreement approved by the Commission on June 29, 1966.

m. *Purpose of Project:* The purpose of the project is to generate electric energy to meet Duke Power Company's system load.

n. This notice also consists of the following standard paragraphs: A4 and D9.

o. *Available Location of Application:* A copy of the application, as amended and supplemented, is available for inspection and reproduction at the Commission's Public Reference and Files Maintenance Branch, located at 941 North Capitol Street, NE., room 3104, Washington, DC 20426, or by calling (202) 208-1371. A copy is also available for inspection and reproduction at Duke Power Company, 422 South Church Street, Charlotte, NC, 28242, (704) 382-8129.

2 a. *Type of Application:* New License.

b. *Project No.:* 2288-004.

c. *Date Filed:* December 26, 1991.

d. *Applicant:* Public Service Company of New Hampshire.

e. *Name of Project:* Gorham.

f. *Location:* On the Androscoggin River near Berlin in Coos County, New Hampshire.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. *Applicant Contact:* Mr. James J. Kearns, 1000 Elm Street, P.O. Box 330, Manchester, NH 03105.

i. *FERC Contact:* Ms. Julie Bernt, (202) 219-2814.

j. *Comment Date:* Initial Comments Due January 19, 1993; Reply Comments Due March 2, 1993.

k. *Status of Environmental Analysis:* This application is ready for environmental analysis at this time—see attached paragraph D9.

l. *Description of Project:* The project as licensed consists of the following: (1) a 20-foot-high timber crib dam; (2) an impoundment having a surface area of 32 acres, a gross storage capacity of 120 acre-feet with no usable storage capacity and a normal water surface elevation of

773.53 feet USGS; (3) a 415-foot-long earthen power canal; (4) a powerhouse containing four generating units with a total rated capacity of 2,150 kW; and, (5) appurtenant facilities. The applicant estimates the average annual energy generation of 13,800 MWh.

The existing project would also be subject to Federal takeover under Sections 14 and 15 of the Federal Power Act. The license will expire on December 31, 1993.

m. *Purpose of Project:* The project energy generated is produced for sales to the applicant's electric customers.

n. This notice also consists of the following standard paragraphs: A4 and D9.

o. *Available Locations of Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference and Files Maintenance Branch, located at 941 North Capitol Street, NE., room 3104, Washington, DC 20426, or by calling (202) 208–1371. A copy is also available for inspection and reproduction at 1000 Elm Street, Manchester, NH 03105 or by calling (603) 634–2799.

3 a. *Type of Application:* New Major License.

b. *Project No.:* 2300–002.

c. *Date Filed:* December 17, 1991.

d. *Applicant:* James River-New Hampshire Electric, Inc.

e. *Name of Project:* Shelburne.

f. *Location:* On the Androscoggin River near Berlin in Coos County, New Hampshire.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Mr. George W. Hill, 650 Main Street, Berlin, NH 03570–2489, (603) 752–4600.

i. *FERC Contact:* Ms. Julie Bernt, (202) 219–2814.

j. *Deadline Date:* Initial Comments Due January 19, 1993; Reply Comments Due March 2, 1993.

k. *Status of Environmental Analysis:* This application is ready for environmental analysis at this time—see attached paragraph D9.

l. *Description of Project:* The Shelburne Project's principal features consist of a dam, an integral powerhouse, an impoundment, and appurtenant facilities. For the existing condition, the project has a total nameplate generator capacity of 3.72 MW and an average annual generation of about 18,000 MWh. The applicant is proposing to raise the impoundment level by increasing the flashboards' height by 1.76 feet. Due to this proposals, the average annual generation would increase to 20,000 MWh. In detail, the existing and proposed project is described as follows:

(1) A 551-foot-long concrete gravity dam; (2) an existing impoundment having a surface area of 210 acres, having a negligible useable storage capacity and a normal pool headwater elevation of 733.6 feet msl; (3) a proposed impoundment having a surface area of 250 acres, a negligible useable storage capacity and a normal pool headwater elevation of 735.3 feet msl; (4) a powerhouse containing three generating units with a total rated capacity of 3,720 kW; and, (5) appurtenant facilities.

The existing project would also be subject to Federal takeover under Sections 14 and 15 of the Federal Power Act.

m. *Purpose of Project:* The purpose of the project is to generate electric power for use in the applicant's pulp and paper mills.

n. This notice also consists of the following standard paragraphs: A4 and D9.

o. *Available Location of Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference and Files Maintenance Branch, located at 941 North Capitol Street, NE., room 3104, Washington, DC 20426, or by calling (202) 208–1371. A copy if also available for inspection and reproduction at James River-Hampshire Electric, Inc., 50 Main Street, Berlin, NH 03570–2489, or calling (603) 752–4600.

4 a. *Type of Application:* New Major License.

b. *Project No.:* 2306–008.

c. *Date Filed:* December 23, 1991.

d. *Applicant:* Citizens Utilities Company.

e. *Name of Project:* Clyde River.

f. *Location:* On the Clyde River near Newport in Orleans County, Vermont.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Mr. Douglas C. Anderson, High Ridge Park, Stamford, CT 06905–0390, (802) 334–6538.

i. *FERC Contact:* Ms. Julie Bernt, (202) 219–2814.

j. *Deadline Date:* January 28, 1993.

k. *Status of Environmental Analysis:* This application has been accepted for filing but is not ready for environmental analysis at this time—see attached paragraph E1.

l. *Description of Project:* The licensed project consists of three existing hydroelectric generating facilities, West Charleston, Newport Dam, and Newport No. 11, on the Clyde River and two existing storage reservoirs, Seymour Lake and Echo Pond, on a tributary to the Clyde River.

Seymour Lake is a natural lake with a man-made 43-foot-long rock-filled timber crib dam outlet structure. It has a surface area of 1,750 acres, a useable storage capacity of 2,040 acre-feet and a normal water surface elevation of 1,279 feet USGS. Presently, Seymour Lake provides annual storage for the Clyde River Project but the proposed mode of operation is spillway crest controlled instantaneous run-of-river.

Echo Pond is a natural lake having a surface area of 530 acres, a useable storage capacity of 3,180 acre-feet and a normal water surface elevation of 1,249 feet USGS. Presently Echo provides annual storage for the Clyde River Project but the proposed mode of operation is spillway crest controlled instantaneous run-of-river.

West Charleston consists of: (1) a 197-foot-long rock-fill and masonry dam; (2) a reservoir named Lubber Lake having a surface area of 40 acres, a storage capacity of 220 acre-feet, and a normal water surface elevation of 1,059 feet USGS; (3) a 1,622-foot-long, 6-foot-diameter steel penstock; and, (4) a powerhouse containing one generating united with a rated capacity of 800 kW.

Newport Dam consists of: (1) a 714-foot-long concrete and masonry dam; (2) a reservoir named Clyde Pond having a surface area of 200 acres, a storage capacity of 2,400 acre-feet, and a normal water surface elevation of 879.25 feet USGS; (3) a 50-foot-long, 6-foot-diameter steel penstock which bifurcates into a 6-foot-diameter, 2,175-foot-long penstock and a 5-foot-diameter, 1,800-foot-long penstock leading to a 6-foot-diameter surge tank; (4) a 4.5-foot-diameter intake pipe leads to the powerhouse; and, (5) a powerhouse containing three generating units with a total rated capacity of 4,000 kW.

Newport No. 11 consists of: (1) a 114-foot-long concrete gravity dam; (2) a reservoir having a surface area of 1 acre, a storage capacity of 3.5 acre-feet, and a normal water surface elevation of 740.67 feet USGS; (3) an 80-foot-long, 10-foot-diameter steel penstock; and, (4) a powerhouse containing one generating unit with a rated capacity of 1,800 kW.

The applicant is proposing to operate the project in a run-of-river mode. The average annual net energy generation is 25,437 MWh. The applicant owns all the existing project facilities.

The existing project would also be subject to Federal takeover under Sections 14 and 15 of the Federal Power Act.

m. *Purpose of Project:* Project power would be utilized by the applicant for sale to its customers.

n. This notice also consists of the following standard paragraphs: B1 and E1.

o. *Available Location of Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference and Files Maintenance Branch, located at 941 North Capitol Street NE., room 3104, Washington, DC 20426, or by calling (202) 208–1371. A copy is also available for inspection and reproduction at Citizens Utilities Company, High Ridge Park, Stamford, CT 06905–0390, or by calling (802) 334–6538.

5 a. *Type of Application:* New Major License.

b. *Project No.:* 2311–001.

c. *Date Filed:* December 23, 1991.

d. *Applicant:* James River-New Hampshire Electric, Inc.

e. *Name of Project:* Gorham.

f. *Location:* On the Androscoggin River near Berlin in Coos County, New Hampshire.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Mr. George W. Hill, 650 Main Street, Berlin, NH 03570–2489, (603) 752–4600.

i. *FERC Contact:* Ms. Julie Bernt, (202) 219–2814.

j. *Deadline Date:* Initial Comments Due January 19, 1993; Reply Comments Due March 2, 1993.

k. *Status of Environmental Analysis:* This application is ready for environmental analysis at this time—see attached paragraph D9.

l. *Description of Project:* The Gorham Project's principal features consist of a dam, an impoundment, a power canal, a powerhouse, and appurtenant facilities. For the existing condition, the project has a total capacity of 4.8 MW and an average annual generation of 29,100 MWh. The applicant is proposing to replace two existing generating exciters with a new 1.3 MW capacity unit. The average annual generation would then increase to 33,500 MWh. The existing and proposed project is described as follows:

(1) A 775-foot-long earthen dam; (2) an impoundment having a surface area of 45 acres, a gross storage capacity of 370 acre-feet but a negligible useable storage capacity, and a normal pool headwater elevation of 813.3 feet msl; (3) a 3,350-foot-long, 100-foot-wide power canal; (4) a powerhouse containing four existing and one proposed generating units with a proposed total rated capacity of 6.1 MW; and, (5) appurtenant facilities.

The existing project would also be subject to Federal takeover under Sections 14 and 15 of the Federal Power Act.

m. *Purpose of Project:* The purpose of the project is to generate electric power for use in the applicant's pulp and paper mills.

n. This notice also consists of the following standard paragraphs: A4 and D9.

o. *Available Location of Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference and Files Maintenance Branch, located at 941 North Capitol Street NE., room 3104 Washington, DC 20426, or by calling (202) 208–1371. A copy is also available for inspection and reproduction at James River-New Hampshire Electric, Inc., 50 Main Street, Berlin, NH 03570–2489, or by calling (603) 752–4600.

6 a. *Type of Application:* Subsequent License.

b. *Project No.:* 2366–001 & 2367–001.

c. *Date Filed:* June 27, 1991.

d. *Applicant:* Maine Public Service Company.

e. *Name of Project:* Aroostook River Hydro Project.

f. *Location:* On the Aroostook River and Millinocket Stream, in Piscataquis and Aroostook Counties, Maine.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791 (a)—825(r).

h. *Applicant Contact:* Mr. Calvin D. Deschene, Manager, Maine Public Service Company, 209 State Street, P.O. Box 1209, Presque Isle, ME 04769–1209, (207) 768–5811.

i. *FERC Contact.* Ed Lee (202) 219–2809.

j. *Deadline Date:* Initial Comments Due January 29, 1993; Reply Comments Due March 15, 1993.

k. *Status of Environmental Analysis:* This application is ready for environmental analysis at this time—see attached paragraph D5.

l. *Description of Project:* The project as licensed consists of the following: The existing project will utilize the Millinocket storage dam and reservoir licensed under Project No. 2366 and the Caribou dam licensed under Project No. 2367. The project consists of (1) a 451-foot-long rock-filled, concrete capped, timber-crib spillway with a maximum section height in excess of 40 feet and a permanent crest elevation of 390.0 feet msl with 12-foot-high wooden flashboards; (2) a 73-foot-long by 50-foot-wide forebay with an average depth of 13 feet located on the west bank; (3) a 16-foot-wide by 80-foot-long concrete pool-type fishway situated on the west abutment between the spillway and the existing powerhouse; (4) a 51-foot-long by 34-foot-wide powerhouse containing two identical vertical, fixed-blade propeller turbines with a total nameplate capacity of 800 kilowatts; (5) a 2,400 Volt bus located in the powerhouse; (6) 5 kV, 3/0 copper cable, which is encased in an underground conduit to a 3,000 kVA transformer; (7) 4 transmission lines constructed of 2.0 F copper weld; and (8) appurtenances.

There are no lands of the United States affected by the project. The Applicant is not proposing any changes to the existing project works as licensed. The Applicant estimates the average annual generation would be 7,138 MWh and owns all existing project facilities.

m. *Purpose of Project:* All project energy generated would be utilized by the applicant for sale to its customers.

n. This notice also consists of the following standard paragraphs: D5.

o. *Available Location of Application:* A copy of the application, as amended and supplemented, is available for inspection and reproduction at the Commission's Public Reference and Files Maintenance Branch, located at 941 North Capitol Street, NE., room 3104, Washington, DC, 20426, or by calling (202) 208–1371. A copy is also available for inspection and reproduction at Maine Public Service Company, 209 State Street, P.O. Box 1209, Presque Isle, ME.

7. a. *Type of Application:* Non Project Use of Project Lands.

i. *FERC Contact:* John Costello, (202) 219–2914.

j. *Comment Date:* January 19, 1993.

k. *Description of Project:* The Pennsylvania Electric Company, licensee for the Deep Creek Lake Project, requests the Commission's authorization to permit Echo Marina, Inc. (the developer for the Echo Marina at Deep Creek Lake) to relocate its marina facilities. Echo Marina proposes to relocate its rental boat operations from its present site in North Glade Cove, an area which is zoned "residential" to a location zoned "town center". The new site, located along Glendale Road, includes a mix of commercial and residential development, as well as undeveloped land. Echo Marina's

proposal does not significantly affect the amount of buffer strip land or remove land from the project boundary (a copy of the application may be obtained by interested parties directly from the licensee).

d. *Applicant:* Rochester Gas and Electric Corporation.

e. *Name of Project:* Station 2 Project.

f. *Location:* On the Genesee River, Monroe County, New York.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Mr. David K. Fingado, Rochester Gas & Electric Corp., 89 East Avenue, Rochester, NY 14649–0001, (716) 724–8108.

i. *FERC Contact:* Robert Bell (202) 219–2806.

j. *Deadline Date:* January 29, 1993; reply comments March 9, 1993.

k. *Status of Environmental Analysis:* This application has been accepted for filing and is ready for environmental analysis at this time—see attached standard paragraph D5.

l. *Description of Project:* The existing Station No. 2 Project's principal features consist of a dam structure, a power canal, an intake house, a penstock, a powerhouse, an impoundment, a transmission line, and appurtenant facilities. The existing project has a total nameplate generator capacity of 6.5 megawatts (MW) (minimum and maximum net output capacity of 2.5 and 7.1 MW), a hydraulic capacity range of 484 to 1,250 cubic feet per second (cfs), and an average annual generation of about 44,000 megawatthours (MWh).

The applicant has proposed to replace the turbine's runners, which would increase the generating capacity of the project. The proposed project would have a total nameplate generator capacity of 6.5 MW (minimum and maximum net output capacity of 3.0 and 7.9 MW), a hydraulic capacity range of 546 to 1,400 cfs, and an average annual generation of about 47,000 MWh.

In detail, the existing proposed project is described as follows:

(1) A dam consisting of (a) a 305.6-foot-long concrete gravity primary spillway section, about 26.4 feet high at a crest elevation of 482.64 feet mean sea level (msl), topped with six vertical lift gates, each measuring 40 feet wide by 11 feet high; and (b) a timber crib diversion dam, at the head of the power canal, about 32 feet long by 11 feet high at a crest elevation of 482.6 feet msl, topped with six steel gates, each measuring 5 feet by 6 feet.

(2) An excavated power canal, about 400 feet long by 50 feet wide by 8 feet deep;

(3) An intake house, known as the Rack House, containing (a) angled trashracks with ⅜-inch steel bars at 2-inch spacing, measuring 80 feet long by 14 feet high, and an area of 1,800 square feet; and (b) a siphon spillway;

(4) An underground steel penstock, 11 feet in diameter by 235 feet long;

(5) A brick and steel powerhouse, about 42 square feet by 17 feet high, equipped with one vertical Francis electric generating unit having (a) an existing nameplate capacity of 6.5 megawatts (MW) (minimum and maximum net output capacity of 2.5 and 7.5 MW), a hydraulic capacity range of 484 to 1,250 cubic feet per second (cfs), an average annual generation of 44,000 MWh, and a net head of 86 feet; and (b) the proposed nameplate capacity of 6.5 MW (minimum and maximum net output capacity of 3.0 and 7.9 MW), a hydraulic capacity range of 546 to 1,400

cfs, an average annual generation of 47,000 MWh, and a net head of 86 feet;

(6) An impoundment, about 1,200 feet long, having (a) a surface area of 16 acres; (b) a gross storage capacity of 107 acre-feet and a negligible usable storage capacity; and (c) a normal headwater elevation of 482.6 feet msl;

(7) A 4607-foot-long, 11-kilovolt (kV), underground transmission line; and

(8) Appurtenant facilities.

The existing project would also be subject to Federal takeover under Sections 14 and 15 of the Federal Power Act.

Based on the expiration of December 31, 1993, the Applicant's estimated net investment in the project would amount to $2,741,982.

m. *Purpose of Project:* All project energy generated would be utilized in distribution to its customers.

n. This notice also consists of the following standard paragraphs: B1, and D5.

o. *Available Location on Application:* A copy of the application, as amended and supplemented, is available for inspection and reproduction at the Commission's Public Reference and Files Maintenance Branch, located at 941 North Capitol Street NE., room 3104, Washington, DC 20426, or by calling (202) 208–1371. A copy is also available for inspection and reproduction at Rochester Gas and Electric Corporation, 89 East Avenue, Rochester, NY 14649.

11 a. *Type of Application:* New License.

b. *Project No.:* 2583–004.

c. *Date Filed:* December 17, 1991.

d. *Applicant:* Rochester Gas and Electric Corporation.

e. *Name of Project:* Station 5 Project.

f. *Location:* On the Genesee River, Monroe County, New York.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Mr. David K. Fingado, Rochester Gas & Electric Corp., 89 East Avenue, Rochester, NY 14649–0001, (716) 724–8108.

i. *FERC Contact:* Robert Bell (202) 219–2806.

j. *Deadline Date:* January 29, 1993; reply comments March 9, 1993.

k. *Status of Environmental Analysis:* This application has been accepted for filing and is ready for environmental analysis at this time—see attached standard paragraph D5.

l. *Description of Project:* The existing Station No. 5 Project's principal features consist of a dam structure, an impoundment, a powerhouse, and appurtenant facilities. For the existing condition, the project has a total nameplate generator capacity of 38.25 megawatts (MW) and an average annual generation of about 165,000 megawatthours (MWh). The Applicant proposes to replace the turbines' runners and rewind the generators, which would increase the generating capacity of the project. For the proposed condition, the project would have a total nameplate generator capacity of 43.88 MW and an average annual generation of about 177,000 MWh.

In detail, the existing and proposed project is described as follows:

(1) A concrete gravity dam consisting of (a) a 200-foot-long gate section with four Taintor gates, each measuring 50 feet long by 17 feet high and having a sill elevation of about 375.0 feet mean sea level (msl), and (b) two sector gate sections, each measuring 100 feet long by 17 feet high having a sill elevation of about 375.0 feet msl, separated by (c) a gate control building, 40 feet long by 67 feet wide, adjoining to (d) an intake house, about 97 feet long by 36 feet wide by 34 feet high, having (i) a horseshoe-shaped tunnel, 1,400 feet long by 16-foot-wide base, leading to (ii) a surge tank, 60 feet in diameter by 40 feet high, and (iii) three steel penstocks, that lead to the powerhouse, each 13 feet in diameter and 30 feet long;

(2) A concrete, masonry, and steel powerhouse, about 112 feet high by 75 feet wide by 95 feet long, equipped with three vertical Francis electric generating units having (a) the total existing rated capacity of 38,250 kilowatts (kW), a maximum hydraulic capacity of 4,300 cubic feet per second (cfs), an average annual generation of 165,000 MWh, and a net head of 130 feet; and (b) the total proposed rated capacity of 43,875 kW, a maximum hydraulic capacity of 5,000 cfs, an average annual generation of 177,000 MWh, and a net head of 130 feet;

(3) An impoundment having (a) a gross storage capacity of 414 acre-feet, (b) a usable storage capacity of 150 acre-feet; and (c) a normal pool headwater elevation of 391.5 feet msl; and

(4) Appurtenant facilities.

The existing project would also be subject to Federal takeover under Sections 14 and 15 of the Federal Power Act.

Based on the expiration of December 31, 1993, the Applicant's estimated net investment in the project would amount to $12,746,877.

m. *Purpose of Project:* All project energy generated would be utilized in distribution to its customers.

n. This notice also consists of the following standard paragraphs: B1, and D5.

o. *Available Location of Application:* A copy of the application, as amended and supplemented, is available for inspection and reproduction at the Commission's Public Reference and Files Maintenance Branch, located at 941 North Capitol Street NE., room 3104, Washington, DC, 20426, or by calling (202) 208–1371. A copy is also available for inspection and reproduction at Rochester Gas and Electric Corporation, 89 East Avenue, Rochester, NY 14649.

j. *Deadline Date:* January 29, 1993; reply comments March 9, 1993.

k. *Status of Environmental Analysis:* This application has been accepted for filing and is ready for environmental analysis at this time—see attached standard paragraph D1.

l. *Description of Project:* This Project consists of: (1) An existing 334-foot-long cut stone and concrete gravity dam varying in height from 20 feet to 30 feet; (2) an impoundment having a surface area of 4.5 acres and a storage capacity of 250 acre-feet with a normal water surface elevation of 579.1 feet msl; (3) the existing intake structure; (4) the existing concrete and masonry powerhouse containing one vertical francis turbine with a normal rating of 600-hp at 19 feet rated head at 150 revolutions-per-minute, and connected to a Westinghouse vertical synchronous generator with a rated capacity of 420-kW; (5) the existing tailrace; and (6) appurtenant facilities.

The licensee is increasing the generating capacity of the powerhouse from 340-kW to 420-kW by replacing the turbine runner and rewinding the generator.

m. *Purpose of Project:* All project energy generated would be utilized in distribution to its customers.

n. This notice also consists of the following standard paragraphs: B1, and D1.

o. *Available Location of Application:* A copy of the application, as amended

and supplemented, is available for inspection and reproduction at the Commission's Public Reference and Files Maintenance Branch, located at 941 North Capital Street, NE., room 3104, Washington, DC 20426, or by calling (202) 208–1371. A copy is also available for inspection and reproduction at Rochester Gas and Electric Corporation, 89 East Avenue, Rochester, NY 14649.

13 a. *Type of Application:* Preliminary Permit.

b. *Project No.:* 11289–000.

c. *Date Filed:* May 11, 1992.

d. *Applicant:* Village of Potsdam.

e. *Name of Project:* West Dam.

h. *Applicant Contact:* Frank O. Christie, 8 East Main Street, Malone, NY 12953, (518) 483–1945.

i. *FERC Contact:* Charles T. Raabe (tag) (202) 219–2811.

j. *Comment Date:* January 28, 1993.

k. *Description of Project:* The proposed project would consist of: (1) An excavated intake; (2) a new powerhouse containing a 1,000-kW generating unit operated at a 9.5-foot net head and at a flow of 1,500 cfs; (3) an excavated tailrace; (4) a 125-foot-long, 13.8-kV underground transmission line; and (5) appurtenant facilities.

Applicant estimates that the average annual energy production would be 3,000,000 kWh and that the cost of the studies under the permit would be $20,000. Energy produced would be sold to Niagara Mohawk Power Corporation. All facilities are and would be owned by the Village of Potsdam. Exemption for Project No. 2869, held by the Village of Potsdam, includes the West Dam.

f. *Location:* On Crescent Mountain in Jefferson County, Colorado, near the town of Denver. T.2S, R.70W, sections 5 and 6; T.2S, R.71W, sections 1, 2, and 12.

g. *Filed Pursuant to:* Federal Power Act, 16 USC §§ 791 (a)–825(r).

h. *Applicant Contact:* Rich S. Koebbe, Vice President, Peak Power Corporation, 10 Lombard Street, Suite 410, San Francisco, CA 94111, (415) 362–0622.

i. *FERC Contact:* Ms. Deborah Frazier-Stutely (202) 219–2842.

j. *Comment Date:* February 5, 1993.

k. *Description of Project:* The proposed project would consist of (1) A 260-foot-high, 550-foot-long earthen dam; creating (2) a 35-acre reservoir with a storage capacity of 2,300 acre-feet and a surface elevation of 7,620 feet msl, to be used as the upper reservoir; (3) a 11-foot-diameter, 6,900-foot-long buried tunnel/penstock; (4) an underground powerhouse containing two pump-turbines with a combined installed capacity of 200,000 kW, producing an estimated average annual energy output of 12,500 GWh; (5) a tailrace; (6) a 100-foot-high, 1,250-foot-long earthen dam; creating (7) a 49-acre reservoir with a storage capacity of 2,300 acre-feet at elevation 6,200 feet msl, to be used as the lower reservoir; (8) a 100-foot-high, 1,250-foot-long earthen dam; (9) a substation; (10) a 115/230 kV, 7,000-foot-long transmission line from the substation to an existing Public Service of Colorado line.

The applicant estimates the cost of the studies to be conducted under the preliminary permit would be $1,000,000.

No new roads will be needed for the purpose of conducting these studies.

l. *Purpose of Project:* Project power would be sold to the Public Service of Colorado.

m. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, D2.

16 a. *Type of Application:* New License (Tendered Notice).

b. *Project No.:* 1922–008.

c. *Date filed:* November 19, 1992.

d. *Applicant:* The City of Ketchikan, dba Ketchikan Public Utilities.

e. *Name of Project:* Beaver Falls.

f. *Location:* On Beaver Falls Creek in Ketchikan Gateway Borough, Alaska. It occupies lands within the Tongass National Forest.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791(a)–.

h. *Applicant Contact:* Thomas W. Stevenson, General Manager, 2930 Tongass Avenue, Ketchikan, AK 99901, (907) 225–1000.

i. *FERC Contact:* Hector M. Perez at (202) 219–2843.

j. *Description of Project:* The existing project consists of the Silvis Development and the Beaver Falls Development.

The Silvis Development consists of: (1) The 60-foot-high, 135-foot-long Upper Silvis Dam with a crest elevation of 1,164 feet; (2) the Upper Silvis Spillway with a crest elevation of 1,154 feet; (3) an 800-foot-long spillway channel from the Upper Silvis Spillway to Lower Lake Silvis; (4) Upper Lake Silvis with a storage capacity of 38,000 acre-feet at maximum water surface of 1,154 feet; (5) the 980-foot-long Tunnel 1; (6) a 36-inch-diameter penstock; (7) Silvis Powerhouse containing a 2,100-kW generating unit; (8) a trapezoidal-shaped channel tailrace about 150 feet long discharging into Lower Lake Silvis; (9) a 2,900-foot-long, 5-kV submarine cable and a 7,100-foot-long, 34.5-kV aerial transmission line; and (10) other appurtenances.

The Beaver Falls Development consists of: (1) Lower Lake Silvis with a storage capacity of 8,052 acre-feet at maximum water surface elevation of 827 feet; (2) the 32-foot-high, 140-foot-long Lower Silvis Dam; (2) the 3-foot-high, 140-foot-long Lower Silvis Dam; (2) the 3-foot-high, 40-foot-long Beaver Falls Creek Diversion Dam, with 6-inch-high flashboards, about two-thirds of a mile downstream of Lower Lake Silvis; (3) an intake structure at Lower Lake Silvis; (4) the 3,800-foot-long Tunnel 2; (4) a 42-

inch-diameter penstock through Tunnel 3 feeding units 3 and 4 (2,000 kW each) in Beaver Falls powerhouse; (5) a 225-foot-long, 20-inch-diameter wood stave pipe from Tunnel 2 discharging into Beaver Falls Creek just upstream of the diversion dam; (6) a 28-inch-diameter, 4,170-foot-long penstock from the diversion dam feeding unit 1 (1,000 kW) at the Beaver Falls Powerhouse (unit 2 has been decommissioned); (7) 2 tailrace channels; and (8) other appurtenances.

k. Under § 4.32 (b)(7) of the Commission's regulations (18 CFR), if any resource agency, Indian Tribe, or person believes that the applicant should conduct an additional scientific study to form an adequate factual basis for a complete analysis of the application on its merits, they must file a request for the study with the Commission, not later than 60 days after the application is filed, and must serve a copy of the request on the applicant. (January 19, 1993).

17 a. *Type of Application:* New License (Tendered Notice).

b. *Project No.:* 2188–030.

c. *Date filed:* November 25, 1992.

d. *Applicant:* The Montana Power Company.

e. *Name of Project:* Missouri-Madison.

f. *Location:* On the Madison River in Gallatin and Madison Counties, and on the Missouri River in Lewis, Clark, and Cascade Counties, Montana.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Michael P. Manion, The Montana Power Company, 40 East Broadway, Butte, MT 59701, (406) 723–5421.

i. *FERC Contact:* Héctor M. Pérez at (202) 219–2843.

j. *Description of Project:* The existing project consists of: (1) Hebgen Lake that serves to store and regulate water; (2) the Madison Development; (3) the Hauser Development; (4) the Holter Development; (5) the Black Eagle Development; (6) the Rainbow Development; (7) the Cochrane Development; (8) the Ryan Development; and (9) the Morony Development. The project has a total generating capacity of 292.1 MW and 73.6 MW would be added.

k. Under § 4.32(b)(7) of the Commission's regulations (18 CFR), if any resource agency, Indian Tribe, or person believes that the applicant should conduct an additional scientific study to form an adequate factual basis for a complete analysis of the application on its merits, they must file a request for the study with the Commission, not later than 60 days after the application is filed (January 25, 1993) and must serve a copy of the request on the applicant.

18 a. *Type of Application:* Conduit Exemption (Tendered Notice).

b. *Project No.:* 11362–000.

c. *Date filed:* November 17, 1992.

d. *Applicant:* Cool Water, Inc.

e. *Name of Project:* Lower White.

f. *Location:* At the Dirty George pipeline, Hoosier Ditch, and Hoosier Ditch extension, in Lower Ranch, Delta, Colorado.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* G.C. Harned, President, Cool Water, Inc., 247 Rim Rock Drive, Durango, CO 81301, (303) 247–8024.

i. *FERC Contact:* Héctor M. Pérez at (202) 219–2843.

j. *Description of Project:* The proposed project would consist of a powerhouse with a 935–kW unit.

k. Under § 4.32(b)(7) of the Commission's regulations (18 CFR), if any resource agency, Indian Tribe, or person believes that the applicant should conduct an additional scientific study to form an adequate factual basis for a complete analysis of the application on its merits, they must file a request for the study with the Commission, not later than 60 days after the application is filed, and must serve a copy of the request on the applicant. (January 19, 1993).

19 a. *Type of Application:* Conduit Exemption (Tendered Notice).

b. *Project No.:* 11363–000.

c. *Date filed:* November 17, 1992.

d. *Applicant:* Cool Water, Inc..

e. *Name of Project:* Upper White.

f. *Location:* At the Dirty George Pipeline, in Lower Ranch, Delta, Colorado.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791(a)–.

h. *Applicant Contact:* G.C. Harned, President, Cool Water, Inc., 247 Rim Rock Drive, Durango, CO 81301; (303) 247–8024.

i. *FERC Contact:* Hector M. Pérez at (202) 219–2843.

j. *Description of Project:* The proposed project would consist of a powerhouse with a 565–kW unit.

k. Under § 4.32(b)(7) of the Commission's regulations (18 CFR), if any resource agency, Indian Tribe, or person believes that the applicant should conduct an additional scientific study to form an adequate factual basis for a complete analysis of the application on its merits, they must file a request for the study with the Commission, not later than 60 days after the application is filed, and must serve a copy of the request on the applicant. (January 19, 1993).

Standard Paragraphs

A4. *Development Application*—Public notice of the filing of the initial development application, which has already been given, established the due date for filing competing applications or notices of intent. Under the Commission's regulations, any competing development application must be filed in response to and in compliance with public notice of the initial development application. No completing applications or notices of intent may be filed in response to this notice.

A5. *Preliminary Permit*—Anyone desiring to file a competing application for preliminary permit for a proposed project must submit the competing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application. A competing preliminary permit application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A7. *Preliminary Permit*—Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before a specified comment date for the particular application, either a competing development application or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application. A competing license application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A9. *Notice of intent*—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, and must include an unequivocal statement of intent to submit, if such and application may be filed, either a preliminary permit application or a development application (specify which type of application). A notice of intent must be served on the applicant(s) named in this public notice.

A10. *Proposed Scope of Studies under Permit*—A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit will be 36 months. The work proposed

under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on the results of these studies, the Applicant would decide whether to proceed with the preparation of a development application to construct and operate the project.

B. *Comments, Protests, or Motions to Intervene*—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

B1. *Protests or Motions to Intervene*—Anyone may submit a protest or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, 385.211, and 385.214. In determining the appropriate action to take, the Commission will consider all protests filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any protests or motions to intervene must be received on or before the specified deadline date for the particular application.

C. *Filing and Service of Responsive Documents*—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to Director, Division of Project Review, Federal Energy Regulatory Commission, room 1027, at the above-mentioned address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D1. *Agency Comments*—States, agencies established pursuant to federal law that have the authority to prepare a comprehensive plan for improving, developing and conserving a waterway affected by the project, federal and state agencies exercising administration over fish and wildlife, flood control, navigation, irrigation, recreation, cultural or other relevant resources of the state in which the project is located, and affected Indian tribes are requested to provide comments and recommendations for terms and conditions pursuant to the Federal Power Act as amended by the Electric Consumers Protection Act of 1986, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Public Law No. 88–29, and other applicable statutes. Recommended terms and conditions must be based on supporting technical data filed with the Commission along with the recommendations, in order to comply with the requirement in section 313(b) of the Federal Power Act, 16 U.S.C. 8251(b), that Commission findings as to facts must be supported substantial evidence.

All other federal, state, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the statutes listed above. No other formal requests will be made. Responses should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the applicant. If an agency does not respond to the Commission within the time set for filing, it will be presumed to have no comments. One copy of an agency's response must also be sent to the Applicant's representatives.

D2. *Agency Comments*—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D5. *Filing and Service of Responsive Documents*—The application is ready for environmental analysis at this time, and the Commission is requesting comments, reply comments, recommendations, terms and conditions, and prescriptions.

The Commission directs, pursuant to section 4.34(b) of the regulations (see Order No. 533 issued May 8, 1991, 56 FR 23108, May 20, 1991) that all comments, recommendations, terms and conditions and prescriptions concerning the application be filed with the Commission within 60 days from the issuance date of this notice. (January 29, 1993 for Project Nos. 2366–001, 2367–001, 2582–002 and 2583–004). All reply comments must be filed with the Commission within 105 days from the date of this notice. (March 9, 1993 for Project Nos. 2366–001, 2367–001, 2582–002 and 2583–004.)

Anyone may obtain an extension of time for these deadlines from the Commission only upon a showing of good cause or extraordinary circumstances in accordance with 18 CFR 385.2008.

All filings must (1) bear in all capital letters the title "PROTEST", "MOTION TO INTERVENE", "COMMENTS," "REPLY COMMENTS," "RECOMMENDATIONS," "TERMS AND CONDITIONS," or "PRESCRIPTIONS;" (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, recommendations, terms and conditions or prescriptions must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). Agencies may obtain copies of the application directly from the applicant. Any of these documents must be filed by providing the original and the number of copies required by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. An additional copy must be sent to Director, Division of Project Review, Office of Hydropower Licensing, Federal Energy Regulatory Commission, room 1027, at the above address. A copy of any protest or motion to intervene must be served upon each representative of the applicant specified in the particular application. A copy of all other filings in reference to this application must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b) and 385.2010.

D6. *Filing and Service of Responsive Documents*—The application is ready for environmental analysis at this time, and the Commission is requesting comments, reply comments,

recommendations, terms and conditions, and prescriptions.

The Commission directs, pursuant to § 4.34(b) of the regulations (see Order No. 533 issued May 8, 1991, 56 FR 23108, May 20, 1991) that all comments, recommendations, terms and conditions and prescriptions concerning the application be filed with the Commission within 60 days from the issuance date of this notice. (January 19, 1993 for Project Nos. 2373–001 and 2532–005). All reply comments must be filed with the Commission within 105 days from the date of this notice. (March 2, 1993 for Project Nos. 2373–001 and 2532–005.)

Anyone may obtain an extension of time for these deadlines from the Commission only upon a showing of good cause or extraordinary circumstances in accordance with 18 CFR 385.2008.

All filings must (1) bear in all capital letters the title "PROTEST", "MOTION TO INTERVENE", "COMMENTS," "REPLY COMMENTS," "RECOMMENDATIONS," "TERMS AND CONDITIONS," or "PRESCRIPTIONS;" (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, recommendations, terms and conditions or prescriptions must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). Agencies may obtain copies of the application directly from the applicant. Any of these documents must be filed by providing the original and the number of copies required by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. An additional copy must be sent to Director, Division of Project Review, Office of Hydropower Licensing, Federal Energy Regulatory Commission, room 1027, at the above address. A copy of any protest or motion to intervene must be served upon each representative of the applicant specified in the particular application. A copy of all other filings in reference to this application must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b) and 385.2010.

D9. *Filing and Service of Responsive Documents*—The application is ready for environmental analysis at this time, and the Commission is requesting comments, reply comments, recommendations, terms and conditions, and prescriptions.

The Commission directs, pursuant to § 4.34(b) of the regulations (see Order No. 533 issued May 8, 1991, 56 FR 23108, May 20, 1991) that all comments, recommendations, terms and conditions and prescriptions concerning the application be filed with the Commission within 60 days from the issuance date of this notice. (January 19, 1993 for Project Nos. 1267–000, 2288–004, 2300–002, and 2311–001). All reply comments must be filed with the Commission within 105 days from the date of this notice. (March 2, 1993 for Project Nos. 1267–000, 2288–004, 2300–002, and 2311–001.)

Anyone may obtain an extension of time for these deadlines from the Commission only upon a showing of good cause or extraordinary circumstances in accordance with 18 CFR 385.2008.

All filings must (1) bear in all capital letters the title "COMMENTS", "REPLY COMMENTS", "RECOMMENDATIONS," "TERMS AND CONDITIONS," or "PRESCRIPTIONS;" (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person submitting the filing; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, recommendations, terms and conditions or prescriptions must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). Any of these documents must be filed by providing the original and the number of copies required by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. An additional copy must be sent to Director, Division of Project Review, Office of Hydropower Licensing, Federal Energy Regulatory Commission, room 1027, at the above address. Each filing must be accompanied by proof of service on all persons listed on the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b), and 385.2010.

D10. *Filing and Service of Responsive Documents*—The application is ready for environmental analysis at this time, and the Commission is requesting comments, reply comments, recommendations, terms and conditions, and prescriptions.

The Commission directs, pursuant to § 4.34(b) of the regulations (see Order No. 533 issued May 8, 1991, 56 FR 23108, May 20, 1991) that all comments, recommendations, terms and conditions and prescriptions concerning the application be filed with the Commission within 60 days from the issuance date of this notice. (January 11, 1993 for Project No. 10895–000). All reply comments must be filed with the Commission within 105 days from the date of this notice. (February 23, 1993 for Project No. 10895–000.)

Anyone may obtain an extension of time for these deadlines from the Commission only upon a showing of good cause or extraordinary circumstances in accordance with 18 CFR 385.2008.

All filings must (1) bear in all capital letters the title "COMMENTS" "REPLY COMMENTS", "RECOMMENDATIONS," "TERMS AND CONDITIONS," or "PRESCRIPTIONS;" (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person submitting the filing; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, recommendations, terms and conditions or prescriptions must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). Agencies may obtain copies of the application directly from the applicant. Any of these documents must be filed by providing the original and the number of copies required by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. An additional copy must be sent to Director, Division of Project Review, Office of Hydropower Licensing, Federal Energy Regulatory Commission, room 1027, at the above address. Each filing must be accompanied by proof of service on all persons listed on the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b), and 385.2010.

E1. *Filing and Service of Responsive Documents*—The application is not ready for environmental analysis at this time; therefore, the Commission is not now requesting comments, recommendations, terms and conditions, or prescriptions.

When the application is ready for environmental analysis, the Commission will issue a public notice requesting comments,

recommendations, terms and conditions, or prescriptions.

All filings must (1) bear in all capital letters the title "PROTEST" or "MOTION TO INTERVENE;" (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. Agencies may obtain copies of the application directly from the applicant. Any of these documents must be filed by providing the original and the number of copies required by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. An additional copy must be sent to Director, Division of Project Review, Office of Hydropower Licensing, Federal Energy Regulatory Commission, room 1027, at the above address. A copy of any protest or motion to intervene must be served upon each representative of the applicant specified in the particular application.

Dated: December 14, 1992, Washington, DC.

Lois D. Cashell,

Secretary.

[FR Doc. 92-30722 Filed 12-17-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP93-93-000, et al.]

ANR Pipeline Co., et al.; Natural Gas Certificate Filings

December 10, 1992.

Take notice that the following filings have been made with the Commission:

1. ANR Pipeline Co.

[Docket No. CP93-93-000]

Take notice that on December 7, 1992, ANR Pipeline Company (ANR), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP93-93-000 a request pursuant to §§ 157.205 and 157.211 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 an 157.211) for authorization to operate under the provisions of section 7 of the Natural Gas Act certain facilities that have been constructed pursuant to Section 311 of the Natural Gas Policy Act of 1978, all as more fully set forth in the request on file with the Commission and open to public inspection.

ANR states that the subject facilities, Shorewood facilities, are located in Will County, Illinois. ANR further states that the authorization would allow any shipper, whether or not the shipper qualifies under section 311, the opportunity to use the subject facilities when capacity is available. ANR further states that it currently renders transportation service through the Shorewood facilities, pursuant to its FERC Gas Tariff, First Revised Volume No. 1-A, Rate Schedules FTS and ITS. It is also stated that ANR is not herein requesting sales authority.

Comment date: January 25, 1993, in accordance with Standard Paragraph G at the end of this notice.

2. Colorado Interstate Gas Co.

[Docket No. CP93-91-000]

Take notice that on December 4, 1992, Colorado Interstate Gas Company (CIG), Post Office Box 1087, Colorado Springs, Colorado 80944, filed in Docket No. CP93-91-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to operate an existing delivery point and appurtenant facilities for use in a transportation service for Coastal Gas Marketing, Inc. (Coastal), in Sherman County, Texas, under CIG's blanket certificate issued in Docket No. CP83-21-000, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

CIG proposes to operate the Palo Duro Meter Station, which was installed under Natural Gas Policy Act section 311 authorization, in order to accommodate interruptible transportation service for Coastal to serve GGSI Gas Company for use in irrigation. It is stated that CIG will use the proposed delivery point for the delivery of up to 6,000 Mcf of natural gas per day for Coastal. It is asserted that the cost of installing the delivery point was $19,356. CIG states that the deliveries would have no impact on its peak day or annual deliveries. It is explained the CIG can accomplish the deliveries without detriment or disadvantage to its other customers.

Comment date: January 25, 1993, in accordance with Standard Paragraph G at the end of this notice.

3. Southern Natural Gas Co.

[Docket No. CP93-96-000]

Take notice that on December 7, 1992, Southern Natural Gas Company (Southern), P.O. Box 2563, Birmingham, Alabama 35202-2563, filed in Docket No. CP93-96-000 a request pursuant to §§ 157.205 and 157.211 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.211) for authorization to reactivate and operate an existing tap for delivery of natural gas to Mississippi Valley Gas Company (MVG) under Southern's blanket certificate issued in Docket No. CP82-406-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Southern proposes to activate an existing tap which is located at or near Milepost 6.7 on Southern's 16-inch Lake St. John-Cranfield Line in Adams County, Mississippi, for delivery of natural gas to MVG under its Rate Schedule IT (December 31, 1987, service agreement, as amended). Southern explains that MVG would redeliver the gas (up to 100 Mcf per day; 8,400 Mcf annually) to Serio Energy Corporation for use as gas lift gas at its production facilities in Adams County. Southern advises that no new facilities are required to be constructed or installed at the tap. Southern states that MVG has agreed to reimburse it for the cost of reactivating the tap, estimated to be $990. Southern further states that the gas would be transported for MVG under Southern's blanket certificate in Docket No. CP88-316-000.

Comment date: January 25, 1993, in accordance with Standard Paragraph G at the end of this notice.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

[Docket No. JD93-01630T Colorado-53]

NGPA Notice of Determination by Jurisdictional Agency Designating Tight Formation; State of Colorado

December 14, 1992.

Take notice that on December 10, 1992, the Oil and Gas Conservation Commission of the State of Colorado (Colorado), submitted the above-referenced notice of determination pursuant to § 271.703(c)(3) of the Commission's regulations, that the Codell Formation underlying certain lands in Weld County, Colorado, qualifies as a tight formation under section 107(b) of the Natural Gas Policy Act of 1978. The area of application is described on the attached appendix.

The notice of determination also contains Colorado's findings that the referenced portion of the Codell Formation meets the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18 CFR 275.206, at the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR 275.203 and 275.204, within 20 days after the date this notice is issued by the Commission.

Lois D. Cashell,

Secretary.

Appendix

The recommended area is the Codell Formation underlying certain lands in Weld County, Colorado more fully described as:

Township 5 North, Range 61 West
Sections 4–9: All
Sections 16–18: All
Township 5 North, Range 62 West
Sections 1–36: All
Township 5 North, Range 63 West
Sections 19: All
Sections 21–36: All
Township 6 North, Range 61 West
Sections 19–21: All
Sections 28–33: All
Township 6 North, Range 62 West
Sections 1–36: All
Township 6 North, Range 63 West
Sections 1–18: All
Township 7 North, Range 63 West
Sections 1–36: All

BILLING CODE 6717-01-M

Algonquin Gas Transmission Co.; Proposed Changes in FERC Gas Tariff

[Docket Nos. TQ93-2-20-001; TM 3-5-20-001 and TM 3-7-20-001]

December 14, 1992.

Take notice that Algonquin Gas Transmission Company ("Algonquin") on December 9, 1992, tendered for filing proposed changes in its FERC Gas Tariff, Third Revised Volume No. 1, as set forth in the revised tariff sheets:

Proposed To Be Effective December 1, 1992

2 Sub 16 Rev Sheet No. 21
2 Sub 16 Rev Sheet No. 22
2 Sub 16 Rev Sheet No. 25
2 Sub 16 Rev Sheet No. 26
2 Sub 16 Rev Sheet No. 27
2 Sub 16 Rev Sheet No. 28
2 Sub 16 Rev Sheet No. 29

Algonquin states that the revised tariff sheets listed above are being filed to comply with a Commission Letter Order dated November 24, 1992 ("Letter Order") in Docket Nos. TQ93-2-20-000 and TM93-5-20-000, Algonquin's latest regularly scheduled Quarterly Purchased Gas Adjustment ("PGA") and Transportation Cost Adjustment pursuant to Sections 17 and 39, respectively, of the General Terms and Conditions of its FERC Gas Tariff.

Algonquin further states that in this Letter Order, the Commission directed Algonquin to file revised tariff sheets to track CNG's currently effective winter rates within 15 days of the date of the Letter Order.

Algonquin is also filing as part of its FERC Gas Tariff, Third Revised Volume No. 1, six (6) copies each of the following tariff sheets:

Proposed To Be Effective January 1, 1993

Sub 1 Rev 16 Sheet No. 21
Sub 1 Rev 16 Sheet No. 22
Sub 1 Rev 16 Sheet No. 26
Sub 1 Rev 16 Sheet No. 27
Sub 1 Rev 16 Sheet No. 28

Algonquin states that during the intervening period it filed tariff sheets to implement the Interim Tracking Mechanism for the 1993 funding of the Gas Research Institute ("GRI") in Docket No. TM93-7-20-000. Algonquin further states that these tariff sheets reflect the same base rates tracked in Docket Nos TQ93-2-20-000 and TM93-5-20-000 and therefore must also be revised to comply with the Letter Order.

Algonquin notes that copies of this filing were served upon each affected party and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE, Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before December 21, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[Docket No. RS92-59-000]

Chandeleur Pipe Line Co.; Notice of Conference

December 14, 1992.

Take notice that on Tuesday, December 22, 1992, a conference will be convened in the captioned restructuring docket to discuss Chandeleur Pipe Line Company's proposed plan to implement Order No. 636.

The conference will be held at the Federal Energy Regulatory Commission, 810 First Street, NE., Washington, DC 20426, beginning at 10 a.m. All interested parties are invited to attend. Attendance at the conference does not convey party status. For additional information, interested persons may call Joan Dreskin at (202) 208-0738.

Lois D. Cashell,

Secretary.

[FR Doc. 92-30735 Filed 12-17-92; 8.45 am]

BILLING CODE 6717-01-M

[Docket No. TM93-6-21-001]

Columbia Gas Transmission Corp.; Notice of Proposed Changes in FERC Gas Tariff

December 14, 1992.

Take notice that Columbia Gas Transmission Corporation (Columbia) on December 4, 1992, tendered for filing the following revised tariff sheets to its FERC Gas Tariff, First Revised Volume No. 1, with the proposed effective date of January 1, 1993:

Substitute Twenty-second Revised Sheet No. 26.1
Substitute Twenty-second Revised Sheet No. 26A.1
Substitute Eighteenth Revised Sheet No. 26B.1
Substitute Twenty-sixth Revised Sheet No. 26C
Substitute Nineteenth Revised Sheet No. 26D

On November 30, 1992, Columbia filed revised tariff sheets to reflect the Federal Energy Regulatory Commission's (Commission) approved

Gas Research Institute (GRI) funding unit level for 1993. Columbia, on December 4, 1992, filed to withdraw its October 30th and November 12, 1992 rate tariff sheets reflecting the switch from straight fixed variable (SFV) rate design to enhance fixed variable (EFV) pursuant to settlement in Docket No. RP91–161, et al. The instant filing reflects the reinstatement of the SFV rate design in the base rates that were in effect prior to Columbia's October 30, 1992 filing.

Columbia states that copies of the filing were served on Columbia's jurisdictional customers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before December 21, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. TM93–2–70–001]

Columbia Gulf Transmission Co., Notice of Proposed Changes in FERC Gas Tariff

December 14, 1992.

Take notice that Columbia Gulf Transmission Company (Columbia Gulf), on December 4, 1992, tendered for filing the following revised tariff sheets to its FERC Gas Tariff, First Revised Volume No. 1, with the proposed effective date of January 1, 1993.

Substitute Seventh Revised Sheet No. 021

On November 30, 1992, Columbia Gulf filed revised tariff sheets to reflect the Federal Energy Regulatory Commission's (Commission) approved Gas Research Instituted (GRI) Funding Unit Level for 1993. Columbia Gulf on December 4, 1992 filed to withdraw its October 30th Rate Tariff Sheet reflecting the switch from Straight Fixed Variable (SFV) Rate Design to Enhanced Fixed Variable (EFV) pursuant to settlement in Docket No. RP91–160 *et al.* The instant filing reflects the reinstatement of the SFV Rate Design in the Base Rates that were in effect prior to Columbia Gulf's October 30, 1992 filing.

Columbia Gulf states that copies of the filing were served on Columbia Gulf's jurisdictional customers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before December 21, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92–30742 Filed 12–17–92; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. TM93–1–99–002]

Kern River Gas Transmission Co.; Notice of Report of Refunds

December 14, 1992.

Take notice that on November 16, 1992, Kern River Gas Transmission Company (Kern River) tendered for filing with the Federal Energy Regulatory Commission (Commission) its report of refunds made in compliance with the Commission's October 20, 1992 order in Docket No. TM93–1–99–000. Kern River's report reflects it refunded ACA surcharges prematurely collected from its customers. Kern River states that on November 15, 1992, it refunded all principal and interest amounts in excess of $1.00 and will refund all amounts of $1.00 or less upon any customer's request.

To be heard or to protest the application a person must file a motion to intervene or a protest on or before December 24, 1992. A person filing a protest or motion to intervene must follow the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). All protests or motions to intervene must be filed with the Federal Energy Regulatory Commission, Washington, DC 20426.

The Commission will consider all filed protests in deciding the appropriate action to take but filing a protest does not make a protestant a party to a proceeding. A person wanting to be a party to a proceeding or to participate as a party in a hearing must file a motion to intervene.

Lois D. Cashell,

Secretary.

[FR Doc. 92–30738 Filed 12–17–92; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CP93–84–000]

Petition for Declaratory Order; Mississippi River Transmission Corp.

December 14, 1992.

Take notice that on November 30, 1992, Mississippi River Transmission Corporation (MRT), 9900 Clayton Road, St. Louis, Missouri, 63124, filed in Docket No. CP93–84–000 a petition pursuant to Rule 207 of the Commission's Rules of Practice and Procedure (18 CFR 385.207) for a declaratory order finding that certain of MRT's facilities which have been certificated pursuant to Section 7(c) of the Natural Gas Act (NGA) as jurisdictional facilities but which have been functionalized as production and gathering facilities on MRT's books and records, in fact perform a transmission function and should be refunctionalized as transmission facilities for rate and accounting purposes.

In the event the Commission determines that any of the facilities that MRT proposes to refunctionalize to transmission does not perform a transmission function and therefore should remain refunctionalized as gathering, MRT requests that the Commission conform the jurisdictional status of the facility to its function and vacate any of the section 7(c) certificates authorizing MRT to construct and operate the facility as a transmission facility.

MRT states that the filing of this petition was prompted by the Commission's October 30, 1992, "Order Accepting and Suspending Tariff Sheets, Subject to Refund and Conditions, and Establishing Hearing Procedures" in Docket Nos. RP93–4–000 and RS92–43–000 (not consolidated). In that order, MRT was ordered to file a certificate application to refunctionalize certain facilities from production and gathering to transmission plant. MRT states that it already has certificates for the facilities at issue, and is thus seeking rehearing of the requirement that it file a certificate application. MRT states that in the event the Commission determines that there must be a separate proceeding to address the refunctionalization of MRT's facilities, it is filing this Petition for Declaratory Order in compliance with the October 30, 1992, order. MRT states that it

submits this petition subject to the outcome of its "Request for Rehearing" and, in the event the Commission determines that no separate proceeding is required, MRT respectfully requests that this filing be deemed moot and the filing fee refunded.

Any person desiring to be heard or to make any protest with reference to said petition should on or before January 4, 1993, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 384.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Lois D. Cashell,

Secretary.

[FR Doc. 92-30733 Filed 12-17-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TM93-2-26-001]

Proposed Changes in FERC Gas Tariff; Natural Gas Pipeline Company of America

December 14, 1992.

Take notice that on December 10, 1992, Natural Gas Pipeline Company of America (Natural) tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1A, Substitute First Revised Sheet No. 5 to be effective January 1, 1993.

Natural states the purpose of the filing is to correct a mathematical error on one of the tariff sheets it filed on November 20, 1992 in Docket No. TM93-2-26-000. That filing reflected revised GRI surcharges to be effective January 1, 1993 pursuant to section 26 of the General Terms and Conditions of Natural's tariff. The mathematical error was in the maximum volume injection charge of Rate Schedule BESS. The correct total rate should be $0.0400, not $0.0547.

Natural states that because the filing corrects a mathematical error that results in a reduction of the filed rate and there is only a short time before the requested effective date, that it mailed copies of the filing to interested state regulatory agencies and that it placed a notice of the filing on its Electronic Bulletin Board notifying its jurisdictional customers of the correction.

Natural requested waiver of the Commission's Regulations to the extent necessary to permit the substituted tariff sheet to become effective January 1, 1993, together with the other previously filed tariff sheets.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before December 21, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-30739 Filed 12-17-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP92-79-003, RP91-166-017 and RP93-20-001]

Change in FERC Gas Tariff; Northwest Pipeline Corp.

December 14, 1992.

Take notice that on November 25, 1992, Northwest Pipeline Corporation (Northwest) tendered the tariff sheets listed below to comply with Commission Orders issued May 1, 1992 and October 7, 1992.

Second Revised Volume No. 1

Substitute First Revised Original Sheet No. 123
Substitute First Revised Sheet No. 125
Second Revised Sheet No. 131
First Revised Sheet Nos. 132 through 135

Original Volume No. 2

Fifth Revised Sheet No. 3

Northwest states that the tariff sheets listed above are filed as a supplement to Northwest's November 6, 1992 Docket No. CP92-79 compliance filing. This filing also contains an accounting, in Annual PGA filing format, of Northwest's PGA activity for the eleven months ended October 31, 1992. Northwest requests a November 1, 1992 effective date for all tariff sheets contained in this filing.

Northwest states that copies of its filing have been served on all parties of record in Docket No. CP92-79 and upon all affected customers and state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before December 21, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-30734 Filed 12-17-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP92-166-005]

Compliance Filing; Panhandle Eastern Pipe Line Co.,

December 14, 1992.

Take notice that on December 8, 1992 Panhandle Eastern Pipe Line Company (Panhandle) tendered for filing revised tariff sheets in the above-mentioned proceeding.

Panhandle states that the revised tariff sheets to be effective November 1, 1992 and December 1, 1992 comply with the requirements of the Commission's November 16, 1992 Order on Rehearing and the Commission's December 1, 1992 Order Accepting Motion Rate-Compliance Filing Subject To Refund And Conditions in this proceeding and are without prejudice to Panhandle's rights on rehearing or judicial review in connection with the various Commission orders affecting this filing.

Panhandle states that while the December 1, 1992 Order accepted in most pertinent parts Panhandle's original motion filing of October 1, 1992, it required certain additional changes necessitating this additional filing. Panhandle states that the December 1, 1992 Order summarily required Panhandle to eliminate the system-wide access charge contained in its original filing in this Docket and replace it with a market zone only access charge. This filing complies with the Commission's requirement and eliminates the system-wide access charge.

Panhandle previously sought to move its Docket No. RP92-166-000 suspended rates into affect in a filing made October 1, 1992. However, prior to the issuance of an order respecting those motion rates, the Commission issued an order on November 16, 1992 which

indicated that certain changes would be required to the motion rates. Other orders of the Commission, particularly in connection with a Settlement of Docket Nos. RP91–229–012, *et al.*, which affected the rates in this proceeding also were issued after the October 1, 1992 motion rate filing, but prior to the issuance of an order respecting the motion rate filing. Accordingly, in light of those intervening Commission orders, on November 18, 1992 Panhandle filed revised rates to be effective November 1, 1992. Panhandle states that this filing replaces its filing in this docket of November 18, 1992 in every particular and requests that the November 18, 1992 filing be deemed to be withdrawn.

Panhandle states that in its June 1, 1992 Order Terminating Technical Conference Proceeding, Granting Rehearing in Part and Denying Rehearing in Part in Docket No. RP91–229–000, the Commission required Panhandle to alter the functionalization of its cost of service to reflect the current functionalization of facilities. 59 FERC at 61,893. Panhandle reflect that functionalization in its rates in Docket No. RP91–229–000 in a compliance filing submitted on July 31, 1992. In a subsequent Order Granting Rehearing in Part and Denying Rehearing in Part, in Docket No. RP91–229–007, 61 FERC ¶61,172 issued November 2, 1992, however, the Commission reversed itself and determined that Panhandle should be permitted to reflect the refunctionalization of facilities. On November 18, 1992 Panhandle filed an amendment to Docket No. CP90–1050–000 to clarify the material in this proceeding and to identify the specific facilities for which Panhandle seeks a certificate and/or refunctionalization from gathering to transmission. Accordingly, the rates herein reflect the changes in Docket No. CP90–1050–000 so that the certificate and rates conform to one another.

Panhandle states that it has also reflected the requirements of the November 16, 1992 Order on Rehearing to change the allocation of gathering costs between sales and transportation and to reflect what the Commission characterized as the allocation of fixed costs for the return on equity and related taxes.

In addition, Panhandle states that in its June 1, 1992 Order on Report Filed Pursuant to Opinion No. 369 and Motion Rate and Compliance Filing (59 FERC ¶61,246 (1992)), the Commission required Panhandle's rate for certain specified backhaul services to equal one-half the forward-haul rate. This requirement is reflected in the rates submitted herewith.

Panhandle states it has reflected the elimination, effective November 1, 1992 of costs associated with Trunkline Gas Company, consistent with the provisions of Article VII, Section 6 of the July 15, 1992 Settlement in Docket Nos. RP91–229–009, *et al.*, approved by Order of the Commission issued August 28, 1992.

In addition, Panhandle states that on October 29, 1992 the Commission permitted tariff sheets to become effective on November 1, 1992 implementing Rate Schedule FS. Accordingly, Panhandle has removed 10 Bcf of storage inventory and the costs assigned to Rate Schedule FS from the rates in this proceeding.

Panhandle states it has reflected the reduced settlement cost components associated with its former Canadian suppliers, as set forth in the October 2, 1992 Settlement in Docket Nos. RP91–229–012, *et al.* approved by order of the Commission issued October 30, 1992.

Panhandle states that the rates and tariffs submitted herewith also reflect ACA and PGA filings in Docket No. Docket No. TM92–4–28–000, Docket No. TM93–1–28–000, TQ92–5–28–000 and Docket No. TQ93–1–28–000, which have been made since Panhandle's rate filing of May 1, 1992, the latter of which is to be effective December 1, 1992.

Panhandle states that copies of the revised tariff sheets are being served on all jurisdictional customers, interested state commissions and all parties to this proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before December 21, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92–30737 Filed 12–17–92; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. TM93–2–18–001]

Proposed Changes in FERC Gas Tariff; Texas Gas Transmission Corp.

December 14, 1992.

Take notice that on December 9, 1992 Texas Gas Transmission Corporation (Texas Gas) tendered for filing the following revised tariff sheets to its FERC Gas Tariff:

FERC Gas Tariff, First Revised Volume No. 2–A

Substitute Fifth Revised Sheet No. 10A
Substitute Fourth Revised Sheet No. 10C
Substitute First Revised Sheet No. 106
Substitute First Revised Sheet No. 107
Substitute First Revised Sheet No. 108
Substitute Original Sheet No. 108A

Texas Gas notes that the revised tariff sheets are being filed to correct the page headings on certain sheets contained in Texas Gas's November 30, 1992, filing reflecting changes in its General RD&D Funding Units (Docket No. TM93–2–18), and are proposed to be effective January 1, 1993. No other changes are proposed herein. Texas Gas requests to withdraw the First Review Volume No. 2–A sheets filed on November 30, 1992 (Fifth Revised Sheet No. 10A, Fourth Revised Sheet No. 10C, First Revised Sheet No. 106, First Revised Sheet No. 107, First Revised Sheet No. 108, and Original Sheet No. 108A), which are being replaced by the instant filing.

Texas Gas states that copies of the filing were served on Texas Gas's jurisdictional customers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before December 21, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

Proposed Changes in FERC Gas Tariff; Williams Natural Gas Co.

December 14, 1992.

Take notice that Williams Natural Gas Company (WNG) on December 8, 1992,

tendered for filing the following tariff sheets to its FERC Gas Tariff, First Revised Volume No. 1:

Effective December 1, 1992

First Revised Thirteenth Revised Sheet No. 6
First Revised Fourteenth Revised Sheet No. 6A
First Revised Thirteenth Revised Sheet No. 9

Effective January 1, 1993

First Revised Fourteenth Revised Sheet No. 6
First Revised Fifteenth Revised Sheet No. 6A
First Revised Fourteenth Revised Sheet No. 9

WNG states that it filed a Stipulation and Agreement (Stipulation) on November 22, 1991 in the above referenced docket. Article I, Section 3, of the Stipulation requires WNG to file Revised Tariff Sheets within fifteen days after a Final Commission Order approving the Stipulation. Article I, Section 3 states that such Revised Tariff Sheets shall become effective on the first day of the billing month beginning after the date that the Commission's Order making the Stipulation effective becomes a Final Commission Order. A Final Commission Order was issued in this docket on August 5, 1992. The Revised Tariff Sheets to be effective December 1, 1992 are being filed in compliance with the Stipulation.

WNG is filing Revised Tariff Sheets to be effective January 1, 1993, to reflect the RP91–152 rates in the GRI filing made by WNG on December 1, 1992 in Docket No. TM93–2–43.

WNG states that a copy of its filing was served on all jurisdictional customers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests should be filed on or before December 21, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make Protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

Office of Conservation and Renewable Energy

[Case No. SBE–001]

Energy Conservation Program for Consumer Products; Application for Small Business Exemption

AGENCY: Office of Conservation and Renewable Energy, Department of Energy.

SUMMARY: Today's notice publishes an Application for Small Business Exemption from the January 1, 1993, standard for Single Package Air Conditioning Systems submitted to the Department of Energy (DOE) by Consolidated Technology Corporation (CTC).

DATES: Data and information submitted by CTC to support this application are available for public review at Department of Energy, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC. DOE will accept comment, data and information with respect to this application not later than (60 days from publication).

ADDRESSES: Written comments and statements shall be sent to: Department of Energy, Office of Conservation and Renewable Energy, Case No. SBE–001, Mail Station CE–90, room 6B–025, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–0561.

FOR FURTHER INFORMATION CONTACT:

Edward O. Pollock, Jr., U.S. Department of Energy, Office of Conservation and Renewable Energy, Mail Station CE–431, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–5778.

Eugene Margolis, Esq., U.S. Department of Energy, Office of General Counsel, Mail Station GC–41, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9507.

SUPPLEMENTARY INFORMATION: The Energy Conservation Program for Consumer Products (other than automobiles) was established pursuant to the Energy Policy and Conservation Act (EPCA), Public Law 94–163, 89 Stat. 917, as amended by the National Energy Conservation Policy Act (NECPA), Public Law 95–619, 92 Stat 3266, the National Appliance Energy Conservation Act of 1987 (NAECA), Public Law 100–12, the National Appliance Energy Conservation Amendment of 1988 (NAECA 1988), Public Law 100–357, and the Energy Policy Act of 1992 (EPACT), Public Law 102–486,[1] prescribes energy conservation standards for certain consumer products, including central air conditioners and heat pumps, and requires DOE to administer an energy conservation program for these products. For each of the covered products, the Act prescribes initial Federal energy conservation standards, section 325(b)-(h).

On February 7, 1989, DOE amended the prescribed procedures by adding 10 CFR part 430, subpart E, creating the small business exemption process, 54 FR 6080.

The small business exemption process allows the Assistant Secretary for Conservation and Renewable Energy to grant manufacturers of covered consumer products, with annual gross revenues that do not exceed $8 million, exemption from all or part of the applicable energy conservation standards.

The exemption terminates according to its terms but not later than twenty-four months after the effective date of the rule for which the exemption is allowed.

CTC manufactures a line of single package air conditioner heat pumps which are designed for use in manufactured/modular homes. The entire product line is designed to use a high efficiency scroll compressor. CTC claims that the manufacturer of the scroll compressor has oversold its product and efforts to expand production capabilities have been delayed; therefore, the manufacturer is unable to supply CTC with these compressors. Efforts by CTC to obtain a comparable compressor from other sources have also failed.

CTC has redesigned the product line to use a reciprocating compressor. Because reciprocating compressors are less efficient than scroll compressors and configuration and size constraints imposed by the manufactured/modular home industry limit other design changes, the units with reciprocating compressors are less efficient than the same size units with scroll compressors. For example, the CTC 2½ ton heat pump equipped with a scroll compressor having an energy efficiency ratio (EER) of 11.0, has an SEER of 10.0 and an HSPF of 6.8. The same unit equipped with a high efficiency reciprocating compressor with an EER of 10.28 in the cooling mode, has an SEER of 8.5 and an HSPF of 6.3. Since CTC product line equipped with reciprocating compressors will not meet

[1] Part B of Title III of EPCA, as amended by NECPA, NAECA, NAECA 1988 and EPACT, is referred to in this notice as the Act.

the January 1, 1993, standard for Single Package Heat Pump Air Conditioning Systems, CTC has requested a Small Business Exemption for a period of 24 months beginning January 1, 1993, though December 31, 1994, by which time CTC expects to be supplied with scroll compressors which will enable the product line to meet the standard.

CTC is an independently owned small business with gross annual sales below $8 million. Only two other companies are known to manufacture a similar product, Nordyne, Inc. and Coleman Industries. A copy of the CTC application for a Small Business Exemption has been transmitted to the Attorney General requesting a determination by the Attorney General that a failure to allow an exemption would likely result in a lessening of competition. Based upon a review of the CTC application; comments, data and information received with respect to this notice; and the Attorney General's written views, DOE will make a determination as to whether a Small Business Exemption should be granted to CTC.

Issued in Washington, DC, December 11, 1992.

J. Michael Davis,

Assistant Secretary, Conservation and Renewable Energy.

April 9, 1992.

U.S. Department of Energy,
Small Business Exemptions,
Appliance Efficiency Standards,
Assistant Secretary for Conservation and Renewable Energy,
Forrestal Building,
1000 Independence Avenue, SW.,
Washington, DC 20585.

Subject: Title 10—Energy, Chapter II, Subchapter D, Part 430—Energy Conservation Program for Consumer Products, Title III, Part B, Section 325(q)—Small Manufacturer Exemption.

Dear Sir: Consolidated Technology Corporation (CTC) manufactures central air conditioners and central air conditioning heat pumps. At this time because of circumstances beyond our control, we wish to apply for a Small Manufacture Exemption of the above subject. I am not sure as to the exact method of action needed to implement the above.

I am requesting that any information pertinent to the above be sent to me as soon as possible. Should you have any questions, please feel free to contact me. I want to thank you in advance for your timely consideration.

Sincerely,

Kevin W. Sawyer,

Vice President Engineering.

[FR Doc. 92-30768 Filed 12-17-92; 8:45 am]

BILLING CODE 6450-1-M

Office of Energy Research

Energy Research Financial Assistance Program Notice 93-05: Innovations in Tokamak Improvements and New Fusion Confinement Systems

AGENCY: Department of Energy, (DOE).

ACTION: Notice inviting grant applications.

SUMMARY: The Office of Fusion Energy (OFE) of the U.S. Department of Energy (DOE) announces its interest in receiving applications for funding to support innovations in tokamak improvements and new fusion confinement systems. This notice is issued in response to recent recommendations made by the Fusion Energy Advisory Committee (FEAC). These recommendations are summarized in the "Fusion Energy Advisory Committee Report on Program Strategy for U.S. Magnetic Fusion Research," dated September 23, 1992, which reads: "9. A Program for Innovative Fusion Concepts: In the FEAC letter to DOE dated June 12, 1992, the FEAC recommended that even as the U.S. fusion program implements a goal-oriented program strategy, the U.S. should encourage innovative ideas. In addition to the innovation encouraged by the existing Applied Plasma Physics (APP) program, FEAC recommended that a small but structured and highly visible periodic competition be established to foster new concepts and ideas that, if verified, would make a significant improvement in the attractiveness of fusion rectors. Predefined sunset clauses [see below] would help ensure that funds for new ideas were available on a periodic basis. The ideas to be funded might relate to improving aspects of the tokamak or other established confinement concepts, or to proposals from individuals and institutions that are not now part of the primary program activities. Priority should be given to testing scientifically well-founded concepts at the small-scale, proof-of-principle levels."

DATES: To permit timely consideration for award in Fiscal Year 1993, formal applications submitted in response to this notice must be received no later than 4:30 p.m., February 2, 1993. No electronic submissions of formal applications will be accepted.

ADDRESSES: Application kits and guides are available from: U.S. Department of Energy, Office of Fusion Energy, ER-542, Washington, DC 20585. Telephone requests may be made by calling (301) 903-3421. Formal applications referencing Program Notice 93-05 should be forwarded to: U.S. Department of Energy, Office of Energy Research, Acquisition and Assistance Management Division, ER-64, Washington, DC 20585, Attn: Program Notice 93-05. The following address must be used when submitting applications by U.S. Postal Express Mail Service, any commercial mail delivery service, or when handcarried by the applicant: U.S. Department of Energy, Acquisition and Assistance Management Division, ER-64, 19901 Germantown Road, Germantown, MD 20874.

FOR FURTHER INFORMATION CONTACT: Dr. Ronald A. Blanken, Division of Advance Physics & Technology, Office of Fusion Energy, ER-542, U.S. Department of Energy, Washington, DC 20585, telephone (301) 903-3421.

SUPPLEMENTARY INFORMATION: In implementing the FEAC recommendations, the DOE Office of Fusion Energy will give priority to applications that can produce proof-of-principle results within three years. In the spirit of the FEAC recommendations regarding sunset clauses, it is not anticipated that the selected applications will be renewed as a part of this innovations program; the selected applicants will, however, be eligible to apply for support under the Magnetic Fusion Energy Program after successful completion of the proof-of-principle phase.

This notice requests that the detailed description of the proposed project component of a complete grant application required by 10 CFR 605.9(b)(2) should include a detailed research plan which includes the specific results expected at the end of the three-year grant period. Evaluation of this written component against the selection criteria set forth in 10 CFR part 605 will be the principal means for selecting the successful applications.

Contingent upon availability of FY 1993 appropriated funds, it is anticipated that approximately $1,000,000 will be available to initiate one to three new grants in the range $300,000 to $1,000,000 per year. At present, it is anticipated that a total of $1,000,000 will be available to fund initiated grants, if any, in both FY 1994 and FY 1995. However, future year funding will depend on the nature of the applications, suitable experimental progress and the availability of funds.

Information about the development and submission of applications, eligibility, limitations, evaluations and selection processes, and other policies and procedures may be found in the ER Application Kit and Guide for the Special Research Grant Program and in

10 CFR part 605. The Catalog of Federal Domestic Assistance Number for this program is 81.049.

Issued in Washington, DC, on December 8, 1992.

D.D. Mayhew,

Director, Office of Management, Office of Energy Research.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-4546-6]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden.

DATES: Comments must be submitted on or before January 19, 1993.

FOR FURTHER INFORMATION OR A COPY OF THE ICR CONTACT: Sandy Farmer at EPA, (202) 260-2740.

SUPPLEMENTARY INFORMATION:

Office of Solid Waste and Emergency Response

Title: Information Collection from States in Accordance with the CERCLA Capacity Assurance Process, (EPA No. 1343.04). This is a renewal of a currently approved collection.

Abstract: Under section 104(c)(9) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), EPA requires that States provide data and program information to assure that they have adequate capacity to treat, store, or dispose of all hazardous waste expected to be generated within or imported into the State for a twenty year period. Under CERCLA, States must provide this assurance in order to be eligible for Superfund remedial funds. The information States provide for the Capacity Assurance Process (CAP) includes: Current hazardous waste management practices; waste minimization program; projected future instate generation, imports, and exports of hazardous waste; and projected future hazardous waste management.

States prepare CAPs in accordance with the Guidance Document that EPA has developed in consultation with their States. The Guidance Document was developed to lessen the burden on States by providing suggested analytical methods, data sources, and presentation formats.

Burden Statement: The estimated average public reporting burden for this collection of information is about 466 hours per State for Phase I submissions; 677 hours per State for Phase II submissions; and 381 hours per State for Phase III submissions. This estimate includes all aspects of the information collection including time for reviewing instructions, gathering data, and preparing and submitting the information to the Agency.

Respondents: States, Territories, and the District of Columbia.

Estimated Number of Responses: 54.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 73,405 hours.

Frequency of Collection: As Required.

Send comments regarding the burden estimate, or any other aspect of this collection of information, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM-223Y), 401 M Street, SW., Washington, DC 20460.

and

Jonathan Gledhill, Office of Management and Budget, Office of Information and Regulatory Affairs, 725 17th St., NW., Washington, DC 20503.

Dated: December 11, 1992.

Paul Lapsley,

Director, Regulatory Management Division.

BILLING CODE 6560-50-M

Office of Research and Development

[FRL-4546-1]

Ambient Air Monitoring Reference and Equivalent Methods; Reference Method Designation

Notice is hereby given that EPA, in accordance with 40 CFR part 53, has designated another reference method for the measurement of ambient concentrations of nitrogen dioxide. The new reference method is an automated method (analyzer) which utilizes the measurement principle (gas phase chemiluminescence) and calibration procedure specified in appendix F of 40 CFR part 50. This new designated method is identified as follows:

RFNA-1292-090, "Lear Siegler Measurement Controls Corporation Model ML9841 Nitrogen Oxides Analyzer," operated on the 0-0.5 ppm range, at any temperature in the range of 15 °C to 35 °C, with a 5-micron Teflon filter element installed in the filter assembly behind the secondary panel and the service switch on the secondary panel set to the IN position, with the following menu choices selected: Range: 0.500 ppm; Over-Ranging: Disabled; Filter Type: Kalman; Calibration: Manual; Span Comp: Disabled; Pres/Temp/Flow Comp: On; with the 50-pin I/O board installed on the rear panel configured at any of the following voltage or current output settings: 0.1, 1, 5, 10 volts or 0-20, 2-20, 4-20 mA; and with or without any of the following options: Valve Assembly for External Zero/Span (EZS); Rack Mount Assembly; Internal Floppy Disk Drive.

This method is available from Lear Siegler Measurement Controls Corporation, 74 Inverness Drive East, Englewood, CO 80112-5189. A notice of receipt of application for this method appeared in the **Federal Register** (57 FR 39401, August 31, 1992).

A test analyzer representative of this method has been tested by the applicant, in accordance with the test procedures specified in 40 CFR part 53. After reviewing the results of these tests and other information submitted by the applicant, EPA has determined, in accordance with 40 CFR part 53, that this method should be designated as a reference method. The information submitted by the applicant will be kept on file at EPA's Atmospheric Research and Exposure Assessment Laboratory, Research Triangle Park, North Carolina 27711, and will be available for inspection to the extent consistent with 40 CFR part 2 (EPA's regulations implementing the Freedom of Information Act).

As a designated reference method, this method is acceptable for use by States and other air monitoring agencies under requirements of 40 CFR part 58, Ambient Air Quality Surveillance. For such purposes, the method must be used in strict accordance with the operation or instruction manual associated with the method and subject to any limitations (e.g., operating range) specified in the applicable designation (see description of the method above). Vendor modifications of a designated method used for purposes of 40 CFR part 58 are permitted only with prior approval of EPA, as provided in 40 CFR part 53. Provisions concerning modification of such methods by users are specified under section 2.8 of appendix C to 40 CFR part 58 (Modifications of Methods by Users).

In general, this designation applies to any analyzer which is identical to the analyzer described in the designation. In some cases, similar analyzers manufactured prior to the designation may be upgraded (e.g., by minor modification or by substitution of a new operation or instruction manual) so as to be identical to the designated method and thus achieve designated status at a modest cost. The manufacturer should be consulted to determine the feasibility of such upgrading.

40 CFR part 53 requires that sellers of designated methods comply with certain conditions. These conditions are given in 40 CFR 53.9 and are summarized below:

(1) A copy of the approved operation or instruction manual must accompany the analyzer when it is delivered to the ultimate purchaser.

(2) The analyzer must not generate any unreasonable hazard to operators or to the environment.

(3) The analyzer must function within the limits of the performance specifications given in Table B–1 of 40 CFR part 53 for at least one year after delivery when maintained and operated in accordance with the operation manual.

(4) Any analyzer offered for sale as a reference or equivalent method must bear a label or sticker indicating that it has been designated as a reference or equivalent method in accordance with 40 CFR part 53.

(5) If such an analyzer has two or more selectable ranges, the label or sticker must be placed in close proximity to the range selector and indicate which range or ranges have been included in the reference or equivalent method designation.

(6) An applicant who offers analyzers for sale as reference or equivalent methods is required to maintain a list of ultimate purchasers of such analyzers and to notify them within 30 days if a reference or equivalent method designation applicable to the analyzer has been canceled or if adjustment of the analyzer is necessary under 40 CFR 53.11(b) to avoid a cancellation.

(7) An applicant who modifies an analyzer previously designated as a reference or equivalent method is not permitted to sell the analyzer (as modified) as a reference or equivalent method (although he may choose to sell it without such representation), nor to attach a label or sticker to the analyzer (as modified) under the provisions described above, until he has received notice under 40 CFR 53.14(c) that the original designation or a new designation applies to the method as modified or until he has applied for and received notice under 40 CFR 53.8(b) of a new reference or equivalent method determination for the analyzer as modified.

Aside from occasional breakdowns or malfunctions, consistent or repeated noncompliance with any of these conditions should be reported to: Director, Atmospheric Research and Exposure Assessment Laboratory, Department E (MD–77), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

Designation of this reference method will assist the States in establishing and operating their air quality surveillance systems under part 58. Technical questions concerning the method should be directed to the manufacturer. Additional information concerning this action may be obtained from Frank F. McElroy, Methods Research and Development Division (MD–77), Atmospheric Research and Exposure Assessment Laboratory, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, (919) 541–2622.

Courtney Riordan,

Assistant Administrator for Research and Development.

BILLING CODE 6560–50–M

[ER–FRL–4546–3]

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared November 30, 1992 through December 4, 1992 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 260–5076.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 10, 1992 (57 FR 12499).

Draft EISs

ERP No. D–FHW–D40255–PA Rating LO, Park Road Corridor Project, West Shore Bypass/US 422/222 and Warren Street Bypass Connection to the Outer Bypass/PA–3055, Funding and section 404 Permit, Berks County, PA.

Summary: EPA expressed a lack of objections to the project as stated. Because of planned residential and commercial development, the impacts should be minimal.

ERP No. D–FHW–D53307–PA Rating EC2, Lackawanna Valley Industrial Highway Project, Reconstruction and Redevelopment, I–81 to Dunmore and US 6 in Whites Crossing north of Carbondale, Funding and COE Section 404 Permit, Lackawanna Valley, Lackawanna County, PA.

Summary: EPA expressed concerns for the potential project impacts to natural and cultural resources in the Lackawanna Valley. Additional information is required in the FEIS on intersection analysis for air quality, the impacts of the Mayfield Shift, the Meredith Street bridge relocation, and the proposed mitigation for the unavoidable impacts.

ERP No. D–FHW–E40256–AL Rating EC2, Southern Bypass and Weatherly Road Extension Project, Hobbs Island Road to I–565 Interchange, Funding and COE Section 404 Permit, City of Huntsville, Madison County, AL.

Summary: EPA had concerns for the degradation of high quality wetlands and noise problems for residents along the highway. Additional information on wetland impacts, air quality modeling and wetland mitigation was requested.

Final EISs

ERP No. F–MMS–A02235–00 1993 Central and Western Gulf of Mexico Outer Continental Shelf (OCS) Oil and Gas Lease Sales No. 142 and No. 143, Lease Offerings, offshore AL, LA, TX and MS.

Summary: EPA continued to have concerns about the impact of leasing on biologically sensitive offshore habitats without including protective environmental stipulations. EPA encourages MMS to commit to these protective measures before concluding lease sales for the affected planning areas.

Dated: December 15, 1992.

Richard E. Sanderson,

Director, Office of Federal Activities.

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden.

DATES: Comments must be submitted on or before January 19, 1993.

FOR FURTHER INFORMATION OR TO OBTAIN A COPY OF THIS ICR, CONTACT: Sandy Farmer at EPA, (202) 260–2740.

SUPPLEMENTARY INFORMATION:

Region III: Chesapeake Bay Program

Title: Chesapeake Bay Attitudes Survey (EPA No. 1627.01).

Abstract: This ICR is a new collection in support of the Chesapeake Bay Program, a cooperative venture involving representatives from the EPA (Region III), the District of Columbia, the State of Maryland, and the Commonwealths of Pennsylvania and Virginia. Since its establishment in 1983, the Chesapeake Bay Program has been formally directing and conducting the restoration of the Chesapeake Bay. The restoration is now moving to a stage which will require greater involvement of the diverse communities that comprise the Chesapeake Bay area. To gain the active participation of these communities, it is critical that the Bay Program obtain baseline information on the attitudes, awareness and behavior of community members toward the Chesapeake Bay.

Following approval of this ICR, Chesapeake Bay Program representatives will conduct a voluntary telephone survey of randomly-selected households within the Chesapeake Bay area. One adult member of each selected household will be interviewed by a trained program representative using a standard interview guide. Respondents will be asked to provide general demographic information and specific information that includes: Their perception of the status of the Bay clean-up, the value of the Bay to their lives, their active support for the Bay clean-up and environmental efforts in general, and their knowledge of the Chesapeake Bay Program.

The information will be tabulated, analyzed, and compiled into a report which will be used by Bay Program representatives to refine their public outreach and communications strategy. A total of 2000 households will voluntarily participate in the survey.

Burden Statement: Public reporting burden for this collection of information is estimated to average 15 minutes per response including time for listening to instructions and responding to survey questions.

Respondents: Individual members of households within the Chesapeake Bay Area.

Estimated Number of Respondents: 2000.

Estimated Number of Responses Per Respondent: 1.

Frequency of Collection: One time.

Estimated Total Annual Burden on Respondents: 500 hours.

Send comments regarding the burden estimate, or any other aspect of this collection of information, including suggestions for reducing the burden, to: Sandy Farmer, U.S. Environmental Protection Agency, Information Policy

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before January 19, 1993.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA, (202) 260–2740.

SUPPLEMENTARY INFORMATION:

Office of Air and Radiation

Title: Selective Enforcement Auditing Reporting Requirements (EPA ICR No. 11.06; OMB No. 2060–0064). This ICR requests renewal of the existing clearance.

Abstract: Motor vehicle manufacturers are subject to selective audits of production vehicles to verify that the prototype design can be manufactured and still meet emission requirements. Eighteen manufacturers keep records of emission tests and submit a summary of assembly-line emission testing to the Agency. From this information EPA selects approximately 8 vehicles each year for audits. Manufacturers subject to audits provide the EPA with emission test data, significant events and vehicle data, reports of SEA results, test facility descriptions, SEA laboratory check-out data, SEA test failure reports and an audit failure report. EPA uses this information to ensure that manufacturers follow the prescribed emissions test procedures, that their test equipment accurately measures emissions and that production vehicles conform to Federal emissions requirements when they come off the assembly line.

Burden Statement: The public reporting burden for this collection of information is estimated to average 234 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Respondents: Motor vehicle manufacturers.

Estimated Number of Respondents: 18.

Estimated Total Annual Burden on Respondents: 4,216 hours.

Frequency of Collection: On occasion, quarterly and annually.

Send comments regarding the burden estimate, or any other aspect of this information collection, including suggestions for reducing the burden, to:

SUPPLEMENTARY INFORMATION:

Office of the Administrator

Title: Preaward Compliance Review Report for All Applicants Requesting Federal Financial Assistance (ICR No. 275.05; OMB No. 2090–0014).

Abstract: This ICR is for an extension of an existing information collection in support of Title VI of the Civil Rights Act of 1964, and described at 40 CFR Part 7.80 and 28 CFR Part 42.406–42.407. The information will be used by the EPA to determine preaward compliance with Federal law prohibiting discrimination on the basis of race, color, national origin, sex, handicap, or age.

Under this ICR, applicants for grants must complete a form that requests information on: (1) Disparities in the services of the applicant's program or activities between minority and non-minority populations; (2) any outstanding lawsuits alleging discrimination or civil rights compliance reviews; (3) the applicant's receipt of, or application to, other Federal agencies for financial assistance; and (4) the accessibility of proposed facility under design to handicapped individuals (if applicable).

This application form is part of the construction grant application package which must be completed by grant applicants and forwarded to EPA for review by EPA grant specialists. There is no recordkeeping requirement.

Burden Statement: Public reporting burden for those subject to this collection of information is estimated to average 0.5 hours per response including time for reviewing instructions, searching existing data sources, gathering and maintaining data, and completing and reviewing the collection of information.

Respondents: State or local governments applying for construction grants.

Estimated Number of Respondents: 4,000.

Estimated Number of Responses Per Respondent: 1.

Estimated Total Annual Burden on Respondents: 2,000 hours.

Frequency of Collection: On occasion.

Send comments regarding the burden estimate, or any other aspect of this collection of information, including suggestions for reducing the burden, to:

SUPPLEMENTARY INFORMATION:

Office of Pesticides and Toxic Substances

Title: Application for Registration of Pesticide-Producing Establishments (Form No. 3540-8) and Pesticide Report for Pesticide-Producing Establishments (Form No. 3540-16). (EPA ICR No. 0160.04; OMB No. 2070-0078). EPA ICR No. 0158, OMB No. 2070-0045, has been merged into this collection. This is a request for reinstatement of two previously approved collections.

Abstract: Under section 7(b) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), producers of pesticide products, active ingredients and devices, are required to register the establishment in which the pesticide is produced with the EPA. Under section 7(e) of the FIFRA any producer operating a registered establishment must submit a report to the Administrator of EPA 30 days after the establishment is registered, and then annually. Producers must report which types and amounts of pesticides, active ingredients, or devices are currently being produced. They are also required to disclosed the location of production, and the location of sale and distribution of pesticides. In addition, respondents must keep records of all the production data. EPA uses the information to perform risk assessments, to ensure compliance with the FIFRA, and to respond to Congressional requests.

Burden Statement: The public burden for this collection of information is estimated to average 1.2 hours per response for reporting and 0.8 hour per recordkeeper annually. This estimate includes the time needed to review instructions, search existing data sources, gather and maintain the data needed, complete the forms, and review the collection of information.

Respondents: Operators of pesticide-producing establishments

Estimated Number of Respondents: 12,382.

Estimated Number of Responses Per Respondent: 1,057.

Estimated Total Annual Burden on Respondents: 16,724 hours.

Frequency of Collection: Once and annually.

Send comments regarding the burden estimate, or any other aspect of the information collection, including suggestions for reducing the burden, to: Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM-223Y), 401 M Street, SW.,Washington, DC, 20460.

FEDERAL COMMUNICATIONS COMMISSION

Digital Audio Radio Service Satellite Systems Applications Launch Fee Required

[DA 92-1666]

December 9, 1992.

On October 13, 1992 the Commission released a Public Notice, DA 92-1408, requesting comment on the application filed by Satellite CD Radio (CD Radio). It also announced a cut-off for applications to be considered concurrently with CD Radio's and stated that concrete and comprehensive proposals must be filed by December 15, 1992 together with the appropriate fees. Commission staff have received numerous inquiries about fee issues and there appears to be confusion among potential applicants regarding what fee should accompany their proposals.

Parties wishing to file applications for U.S. domestic digital audio radio service satellite systems to operate in the downlink frequency band of 2310-2360 MHz to be considered concurrently with CD Radio's may do so on or before December 15, 1992. Consistent with our policies for domestic fixed-satellite applications, these applications must request authority to construct, launch and operate a system. An applicant seeking construction authority only will not be afforded concurrent consideration with the CD Radio proposal. Together with its detailed proposal, applicants must file, at a minimum, a construction application fee of $2030 for each space station included in its proposal. Applicants may also choose to file the fee for launch and operating authority, which is $70,000 per satellite, at this time. Because there has been some confusion about the appropriate fee to pay, applicants will be permitted to submit the launch and operating authority fee for their system proposals on or before January 15, 1993. Failure to file all fees by January 15, 1993 will result in the dismissal of the application.

For further information, contact Rosalee Chiara at 202-634-1781.

FEDERAL DEPOSIT INSURANCE CORPORATION

Statement of Policy on Assistance to Operating Insured Depository Institutions

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Policy statement.

SUMMARY: This statement of policy revises the statement of policy of the Federal Deposit Insurance Corporation (the FDIC), which was published in the **Federal Register** on April 4, 1990, to implement several provisions in the Federal Deposit Insurance Corporation Improvement Act of 1991. In particular, this statement of policy incorporates amendments under that legislation to the Federal Deposit Insurance Act with respect to (1) the statutory cost test for FDIC-assisted resolutions of failed or failing insured depository institutions, and (2) new requirements for any FDIC assistance provided to an operating institution prior to the appointment of a conservator or a receiver for that institution.

EFFECTIVE DATE: December 18, 1992.

FOR FURTHER INFORMATION CONTACT: Robert H. Hartheimer, Associate Director, Division of Resolutions, (202) 898–8789; Gail Patelunas, Assistant Director, Division of Resolutions, (202) 898–6779; Ruth R. Amberg, Senior Counsel, Legal Division, (202) 898–3736; Michael B. Phillips, Counsel, Legal Division, (202) 898–3753; Faye Cope, Senior Attorney, Legal Division, (202) 898–7265, Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, DC 20429.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

This statement of policy does not require any collections of paperwork pursuant to section 3504(h) of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* Accordingly, no information has been submitted to the Office of Management and Budget for review.

Regulatory Flexibility Act

Pursuant to section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, it is certified that this statement of policy will not have a significant economic impact on a substantial number of small entities. In addition, this statement of policy will not impose regulatory compliance requirements on depository institutions of any size.

The text of the statement of policy follows:

FDIC Statement of Policy on Assistance to Operating Insured Depository Institutions

The Federal Deposit Insurance Corporation Improvement Act of 1991 (FDICIA) contained several provisions that affect the authority of the Federal Deposit Insurance Corporation (the FDIC) to provide assistance to operating insured depository institutions under section 13(c) of the Federal Deposit Insurance Act, as amended (the FDI Act), 12 U.S.C. 1823(c). As a result of these new statutory provisions, the Board of Directors of the FDIC has concluded that the FDIC's policy for assistance to operating insured banks and savings associations (the 1990 Policy Statement), which was published in the **Federal Register** on April 4, 1990,[1] should be revised. This policy statement replaces the 1990 Policy Statement.

I. Introduction

Section 13(c) of the FDI Act authorizes the FDIC to provide assistance to operating insured institutions (1) to prevent the "default" of insured depository institutions or to assist acquisitions of insured depository institutions that are "in danger of default",[2] or (2) if severe financial conditions exist that threaten the stability of a significant number of insured institutions or of insured depository institutions possessing significant financial resources, to lessen the risk to the FDIC posed by such insured institutions under such threat of instability.

In order for the FDIC to provide assistance to an operating insured depository institution, the FDIC must determine that the assistance meets the least-cost test set forth in section 13(c) of the FDI Act. That section, as amended by FDICIA, provides that the assistance (1) must be necessary to meet the obligation of the FDIC to provide insurance coverage for the insured deposits in such institution, and (2) must be the least costly to the deposit insurance fund of all possible methods for meeting that obligation.[3]

The FDIC has the authority to provide an operating institution assistance that does not meet the least-cost test only if the Secretary of the Treasury (in consultation with the President and upon the written recommendations of two-thirds of the Board of Directors of the FDIC and two-thirds of the Board of Governors of the Federal Reserve System) determines that the FDIC's compliance with the least-cost test would have adverse effects on economic conditions or financial stability and the assistance to the operating institution would avoid or mitigate such adverse effects.[4]

FDICIA also added a new prerequisite to the FDIC's authority to provide assistance to an operating insured depository institution. The FDIC may consider providing direct financial assistance under section 13(c) to an operating insured institution before the appointment of a conservator or receiver only if the FDIC determines that (1) grounds for the appointment of a conservator or receiver exist or likely will exist in the future unless the institution's capital levels are increased,[5] and (2) it is unlikely that the institution can meet all currently applicable capital standards without assistance.[6] In addition, before the FDIC may provide assistance to an operating insured institution, (1) the appropriate federal banking agency[7] and the FDIC must determine that, for such period of time as the agency or the FDIC considers to be relevant, the institution's management has been competent and has complied with applicable laws, rules, and supervisory directives and orders,[8] and (2) the FDIC must determine that the institution's management did not engage in any

[1] 55 FR 12358 (April 4, 1990).

[2] The terms "default" and "in danger of default" are defined in section 3(x) of the FDI Act, 12 U.S.C. 1813(x).

[3] See section 13(c)(4)(A)(ii) of the FDI Act, 12 U.S.C. 1823(c)(4)(A)(ii).

[4] See section 13(c)(4)(G) of the FDI Act, 12 U.S.C. 1823(c)(4)(G).

[5] See section 13(c)(8)(A)(i)(I) of the FDI Act, 12 U.S.C. 1823(c)(8)(A)(i)(I).

[6] See section 13(c)(8)(A)(i)(II) of the FDI Act, 12 U.S.C. 1823(c)(8)(A)(i)(II).

[7] "Appropriate Federal banking agency," is defined at 12 U.S.C. 1813(q), in part, to mean: (1) The Comptroller of the Currency, in the case of a national bank; (2) the Board of Governors of the Federal Reserve System, in the case of a state member insured bank; (3) the FDIC, in the case of a state nonmember insured bank; and (4) the Director of the Office of Thrift Supervision, in the case of any savings association.

[8] See section 13(c)(8)(A)(ii)(I) of the FDI Act, 12 U.S.C. 1823(c)(8)(A)(ii)(I).

insider dealing, speculative practice, or other abusive activity.[9] Any determination made by the FDIC to provide assistance to an operating insured institution under 13(c) must be made in writing and published in the **Federal Register**.[10]

This revised policy statement reflects several changes from the FDIC's 1990 Policy Statement. First, this statement of policy reflects the mandatory provisions added to section 13(c) of the FDI Act by FDICIA, in addition to the "Sense of the Congress" in section 143 of FDICIA which encourages the early resolution of troubled insured depository institutions.[11] Second, this statement reflects the experience of the FDIC with assistance transactions under its 1990 Policy Statement. Third, this statement has been reorganized so that the criteria are grouped into subject categories and the section applicable only to savings associations (part IV) follows the section regarding assistance to any operating insured institution. These organizational changes are not intended to have any substantive impact; rather, they are intended to facilitate use of the statement.

Proposals for assistance for any operating insured institution under section 13(c) of the FDI Act will be reviewed by the FDIC under the criteria listed in section III of this policy statement. Proposals for assistance for operating savings associations under section 13(k)(5) of the FDI Act also must meet the criteria listed in section IV of this policy statement.

Prior to October 1, 1993, proposals for assistance with respect to operating savings associations may be funded by the Resolution Trust Corporation (the RTC). Until the Savings Association Insurance Fund (the SAIF) has adequate funding,[12] the FDIC may request that the RTC, with the approval of the Thrift Depositor Protection Oversight Board, provide necessary funds for the SAIF's financial assistance operations.[13]

[9] See section 13(c)(8)(A)(ii)(II) of the FDI Act, 12 U.S.C. 1823(c)(8)(A)(ii)(II).

[10] See section 13(c)(8)(B) of the FDI Act, 12 U.S.C. 1823(c)(8)(B).

[11] See FDICIA, Pub. L. 102–242, section 143, 105 Stat. 2281 (1992). The "Sense of the Congress" in section 143 of FDICIA encourages early resolution of troubled insured depository institutions, so long as the early resolution is consistent with achieving the resolution method that is least costly to the deposit insurance fund. Section 143 of FDICIA includes seven general principles that have been incorporated substantially into the criteria in this revised policy statement.

[12] See section 11(a)(6)(F) of the FDI Act, 12 U.S.C. 1821(a)(6)(F).

[13] See section 11(a)(6)(H) of the FDI Act, 12 U.S.C. 1821(a)(6)(H).

II. Timing for Open Assistance Proposals

In recent years, most of the proposals made for assistance to an operating insured depository institution have been received by the FDIC either after or, at best, shortly before grounds have existed for the appointment of a receiver. Generally, the receipt of a proposal for open assistance at that time is too late to prevent the appointment of a receiver by that institution's chartering authority.

Under section 13(c)(4) of the FDI Act, the FDIC must select the resolution alternative that involves the least cost to the relevant deposit insurance fund. Because of the cost savings inherent in FDIC-assisted transactions involving the appointment of a receiver for an institution,[14] it may be difficult for an open assistance proposal to be more cost-effective than an available closed bank resolution. Therefore, an open assistance proposal, to be acceptable, generally must be submitted substantially before grounds exist for the appointment of a receiver for the institution.[15] Moreover, because of the complexity of many transactional structures involving open assistance, the time required to negotiate terms acceptable to all parties and to obtain necessary regulatory and shareholder approvals, and FDICIA's "prompt corrective action" mandates,[16] the FDIC encourages any proposals for open assistance to be submitted well before grounds first exist for the institution's closure.[17] In general, this timing consideration will require the board of directors of the insured institution to make the difficult business judgment that the institution is likely enough to fail that the balance of their responsibilities, including those to depositors as well as shareholders, compels the board to seek assistance, and to make that judgment before it is certain that the institution will fail.

For larger institutions seeking open assistance, the FDIC believes that unless discussions commence roughly eighteen (18) months before the probable appointment of a receiver, it will be difficult to effect an open assistance transaction.

[14] See, e.g., section 11(d), (e), (g) and (i) of the FDI Act, 12 U.S.C. 1821(d), (e), (g) and (i). Among the cost advantages favoring a resolution transaction following the appointment of a receiver for an institution are the effect of the receivership on the contingent liabilities of the failed institution, the potential for uninsured depositors and other unsecured creditors to share in the loss incurred on the institution and the ability of the FDIC as receiver to repudiate burdensome contracts.

[15] Under the least-cost test in section 13(c)(4) of the FDI Act, the FDIC evaluates open assistance proposals by comparing the cost of such proposals to the estimated cost of liquidating the institution and the estimated costs of other possible resolution transactions involving a closed institution. The costs of liquidation and possible resolution transactions involving a closed institution will be estimated as of the date on which the FDIC estimates that the appropriate regulatory authority will, or will be able to, appoint a receiver for the institution.

[16] See section 38(h)(3) of the FDI Act, 12 U.S.C. 1831o(h)(3).

[17] Section 131 of FDICIA, which added the "prompt corrective action" requirements under section 38 of the FDI Act, requires, among other provisions, that an insured depository institution that is "critically undercapitalized" be placed in receivership within ninety (90) days, unless the FDIC concurs in a conservatorship or the appropriate Federal banking agency for that institution and the FDIC concur that other action would better achieve the purposes of section 38 of the FDI Act. Pursuant to statutory mandates, the FDIC and the other bank and thrift regulatory agencies have set the "critically undercapitalized" level at a ratio of tangible equity to total assets of two(2) percent or less. See 57 FR 44866, 44897 (September 29, 1992).

Moreover, section 133 of FDICIA, effective December 19, 1992, expands the grounds on which a receiver or conservator may be appointed for an insured depository institution. See, e.g., section 11(c)(5) of the FDI Act, 12 U.S.C. 1821(c)(5).

III. Criteria for the FDIC's Consideration of Proposals for Assistance to an Operating Depository Institution

A proposal for assistance to an operating insured depository institution will be evaluated pursuant to the following criteria:

A. Prerequisites for FDIC Financial Assistance

Criterion 1

The FDIC must determine that grounds for the appointment of a conservator or receiver exist or likely will exist in the future unless the depository institution's capital levels are increased.[18]

Criterion 2

The FDIC must determine that it is unlikely that the institution can meet all currently applicable capital standards without assistance.[19]

B. Financial Criteria for Open Assistance

Criterion 3

The cost of the proposal to the FDIC must be determined to be the least-costly alternative available.[20] In order to

[18] This criterion is mandatory. See section 13(c)(8)(A) of the FDI Act, 12 U.S.C. 1823(c)(8)(A).

[19] This criterion is mandatory. See section 13(c)(8)(A) of the FDI Act, 12 U.S.C. 1823(c)(8)(A).

[20] This criterion is mandatory unless the Secretary of the Treasury makes a systemic risk determination. See section 13(c)(4) (A) & (G) of the FDI Act, 12 U.S.C. 1823(c)(4) (A) & (G). The least-cost test, as amended by FDICIA, requires that resolution alternatives be evaluated on a present-

ensure that a proposal for open assistance is the least-costly alternative, the FDIC will, in many cases, also seek proposals for resolving the institution on a closed basis.

Criterion 4

The proposal must provide for sufficient tangible capitalization, including capital infusions from outside private investment sources, to meet the regulatory capital standards of the appropriate federal banking agency.[21]

Criterion 5

The amount of the assistance and the new capital injected from outside sources must provide for a reasonable assurance of the future viability of the institution.[22]

Criterion 6

Applicants must establish quantitative limits on all financial items in the proposal. For example, if applicants request indemnification from the FDIC for certain contingent liabilities, assistance proposals must include ceilings on the FDIC's financial exposure.

C. Competition

Criterion 7

The FDIC shall consider assistance proposals within a competitive context which provides for the solicitation by the FDIC of interest from qualified entities.[23]

D. FDIC Financial Contribution and Repayment

Criterion 8

The FDIC will consider on a case-by-case basis whether the proposal shall provide the FDIC with an equity or other financial interest in the resulting institution.[24]

Criterion 9

It is preferable that any proposal for FDIC assistance provide for repayment of such assistance in whole or in part.

E. Impact on Shareholders and Creditors

Criterion 10

Preexisting shareholders and debtholders of the assisted insured institution shall make substantial concessions. In general, any remaining ownership interest of preexisting shareholders shall be subordinate to the FDIC's right to receive reimbursement for any assistance provided.

F. Due Diligence

Criterion 11

An operating institution seeking assistance must consent to unrestricted on-site due diligence reviews by the FDIC (or its agents) and FDIC-monitored, on-site due diligence reviews by all potential acquirers determined by the FDIC to be qualified after consultation with the appropriate federal banking agency.

G. Acquisition Within a Holding Company Structure

Criterion 12

The proposal must ensure that the assistance will benefit the institution and the FDIC and not be diverted to other purposes. If the assisted institution is a subsidiary of a holding company, the proposal should be structured so that FDIC assistance is not provided to the holding company, except where compelling reasons require it, and then only when the holding company acts as a conduit immediately to provide the entire amount of assistance to the failing insured depository institution.[25]

Criterion 13

If the assisted institution is a subsidiary of a holding company, the proposal should be structured so that available resources from the holding company and its other insured subsidiaries and/or nondepository subsidiaries are used to make a significant contribution toward minimizing the financial exposure of the FDIC.

H. Assets

Criterion 14

Although the FDIC will consider on a case-by-case basis whether to acquire or service assets of assisted institutions, assistance proposals should generally provide for the surviving institution to service the assets of the assisted institution. Under appropriate circumstances, the FDIC may consider loss-sharing, gain-sharing and other incentive arrangements on distressed assets.

I. Supervisory Concerns With Respect to Management

Criterion 15

The appropriate federal banking agency and the FDIC must determine that, during such period of time preceding the date of such determination as the agency or the FDIC considers to be relevant, management of the institution was competent and complied with applicable laws, rules, and supervisory directives and orders. In no event will such determination, for assistance transaction purposes, estop or impair the FDIC or the appropriate federal banking agency from pursuing any enforcement, civil or criminal remedies or redress against any person.[26]

Criterion 16

The FDIC must determine that the management of the resulting institution did not engage in any insider dealing,

---

value basis, using a realistic discount rate. See section 13(c)(4)(B) of the FDI Act, 12 U.S.C. 1823(c)(4)(B). This cost determination is premised on evaluating all possible resolution alternatives and must be made as of the date the FDIC determines to provide section 13(c) assistance. See section 13(c)(4)(C) of the FDI Act, 12 U.S.C. 1823(c)(4)(C). In calculating the cost of such assistance, the FDIC must treat any tax revenues that the U.S. Treasury would forego as a result of an assistance transaction, to the extent they are reasonably determinable, as revenues foregone by the applicable deposit insurance fund.

[21] The regulatory capital requirements of the respective federal banking agencies are stated in: (1) For the Office of the Comptroller of the Currency, 12 CFR 3 6; (2) for the Board of Governors of the Federal Reserve System, Appendix A, Appendix B and Appendix D to Regulation Y, 12 CFR Appendix A, Appendix B and Appendix D to part 225; (3) for the FDIC, 12 CFR part 325, including Appendix A and Appendix B to part 325; and (4) for the Office of Thrift Supervision, 12 CFR part 567.

[22] Viability may be demonstrated by pro forma projections based on reasonable assumptions regarding the use of the assistance, earnings, reserve levels, asset quality trends, anticipated dividends, and capital levels and needs. The viability projections will be reviewed closely by the FDIC for the reasonableness of assumptions. In addition, under normal circumstances, enough new capital should come from outside private sources to represent a vote of confidence in the viability of the assisted institution. By contrast, as an example, a de minimus investment which gave the investor an option on the whole institution would not represent a market validation of the assurance of viability.

[23] The FDIC has determined that under 12 U.S.C. 1823(c)(4), in order to demonstrate that the least-costly resolution was selected, an assistance transaction generally cannot be the result of a single-party negotiation, but rather must be the result of a competitive process.

[24] Under 12 U.S.C. 1823(c)(5), the FDIC is prohibited from purchasing the voting or common stock of an insured institution; however, this restriction does not preclude the acceptance by the FDIC of non-voting preferred stock, warrants, or other forms of equity or equity-equivalent arrangements.

[25] See section 13(c)(3) of the FDI Act, 12 U.S.C. 1823(c)(3).

[26] This criterion is mandatory. See section 13(c)(8)(A) of the FDI Act, 12 U.S.C. 1823(c)(8)(A). The FDIC interprets section 13(c)(8)(A)(ii) of the FDI Act that the management criterion applies to the management of the resulting institution, including any management retained from the predecessor institution, but not including predecessor management that is not retained. This interpretation is based on the relevant statutory provisions and their legislative history and reconciles the management criteria of section 13(c)(8)(A)(ii) with the statutory mandate of minimizing the cost of resolutions and with Congress' desire to encourage early resolutions, as reflected in section 143 of FDICIA.

speculative practice, or other abusive activity.[27]

Criterion 17

The proposal must provide for adequate managerial resources. Continued service of any directors or senior ranking officers who served in a policy-making role of the assisted institution, as may be determined by the FDIC, will be subject to approval by the FDIC.

Criterion 18

Any renegotiation or termination of management contracts is to be completed prior to the granting of assistance. Further, the FDIC may review and object to any or all parts of any compensation arrangements (including termination clauses) covering these individuals during the period assistance is outstanding.[28] In no event will the failure to terminate a particular management contract estop the FDIC or the appropriate Federal banking agency from pursuing any enforcement, civil, or criminal remedies or redress against any person unless there is a written statement explicitly waiving such rights that is signed by an authorized official of the FDIC and the appropriate Federal banking agency.

J. Fee Arrangements

Criterion 19

All fee arrangements to attorneys, investment bankers, accountants, consultants, and other advisors and agents incident to requests for financial assistance must be disclosed to the FDIC and will be evaluated in determining the cost of the assistance package. Excessive fees must be avoided.

IV. Open Assistance for SAIF-Insured Institutions

Section 13(k)(5) of the FDI Act provides that the FDIC shall consider proposals for financial assistance by eligible SAIF members before grounds exist for appointment of a conservator or receiver for such institutions. Proposals under section 13(k)(5) must meet the nine criteria of the statute, as follows:[29]

(1) Grounds for the appointment of a conservator or receiver exist or likely will exist in the future unless the member's "tangible capital" is increased.[30]

(2) It is unlikely that the institution can achieve positive tangible capital without assistance.

(3) Assistance by the FDIC likely would lessen the risk to the SAIF.

(4) Before the enactment of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA), the institution was solvent under applicable regulatory accounting principles but had negative tangible capital.[31]

(5) The negative tangible capital position of the institution is substantially attributable to supervisory transactions initiated by the Federal Home Loan Bank Board (FHLBB) or the Federal Savings and Loan Insurance Corporation (FSLIC).

(6) The institution is a "qualified thrift lender"[32] or would be a qualified thrift lender if commercial real estate owned and nonperforming commercial loans acquired in supervisory transactions initiated by the FHLBB or the FSLIC were excluded from the institution's total assets.

(7) The appropriate federal banking agency has determined that the institution's management is competent and in compliance with applicable laws and regulatory directives.

(8) The institution's management did not engage in insider dealing, speculative practices, or other activities that jeopardized the institution's safety or soundness or contributed to its impaired capital position.

(9) The institution's offices are located in an "economically depressed region".[33]

Applicants seeking FDIC assistance pursuant to section 13(k)(5) generally will be required to meet all nineteen criteria listed in part III of this policy statement, in addition to the aforementioned statutory criteria in section 13(k)(5). However, with respect to Criterion 17 in part III of this policy statement, the FDIC generally will look to the determination of the Office of Thrift Supervision, but will retain discretion to review the merits of individual directors and senior ranking officers.

Assistance proposals with respect to SAIF member institutions under section 13(k)(5) that do not meet all nine of the aforementioned criteria may be submitted to the FDIC for consideration under section 13(c).

V. Other Information

Any proposal requesting assistance to prevent the closing of an insured depository institution should be addressed to the appropriate FDIC regional offices of the Division of Supervision and the Division of Resolutions and should provide the amount, terms, and conditions to the assistance requested as well as the details of the financial support to be provided. This information must be presented in sufficient detail to permit the FDIC to estimate the maximum cost that will be incurred as a result of the proposal and to determine the extent to which the proposal satisfies the criteria of this policy statement.

With respect to the management determinations set forth in Criteria 15, 16, 17 and 18 in part III, a proposal must include information about proposed management of the resulting assisted institution. Specifically, the proposal must identify all individuals who would exercise significant influence over, or participate in, major policy-making decisions of the insured depository institution proposed to be assisted, without regard to title, salary or compensation. This list would include, without limitation, all directors, the chief executive officer, the chief managing official (in an insured state branch of a foreign bank), chief operating officer, chief financial officer, chief lending officer and chief investment officer.

Copies of the proposal also should be provided to (1) the Director of the Division of Supervision, FDIC, 550 17th Street, NW., Washington, DC 20429, (2) the Director of the Division of Resolutions, FDIC, 550 17th Street, NW., Washington, DC 20429, (3) the institution's chartering authority, and, (4) if approvals under the Bank Holding Company Act are required, the appropriate Federal Reserve Bank.

By Order of the Board of Directors. Dated at Washington, DC this 8th day of December, 1992.

---

[27] This criterion is mandatory. See section 13(c)(8)(A) of the FDI Act, 12 U.S.C. 1823(c)(8)(A). See footnote 26, *supra*.

[28] In addition, under section 18(k)(1) of the FDI Act, the FDIC may "prohibit or limit, by regulation or order, any golden parachute payment or indemnification payment." See 12 U.S.C. 1828(k)(1). The terms "golden parachute payment" and "indemnification payment" are defined in 12 U.S.C. 1828(k) (4) and (5)(A), respectively.

[29] The nine criteria for proposals submitted under section 13(k)(5) of the FDI Act are listed in subsections (k)(5)(A)(i)(I)–(III) and (A)(ii)(I)–(VI) of section 13 of the FDI Act, 12 U.S.C. 1823 (k)(5)(A)(i)(I)–(III) and (A)(ii)(I)–(VI).

[30] "Tangible capital" is defined in section 5(t)(9)(C) of the Home Owners' Loan Act, as amended (the HOLA), 12 U.S.C. 1464(t)(9)(C).

[31] *See* section 13(k)(5)(A)(ii)(I) of the FDI Act, 12 U.S.C. 1823(k)(5)(A)(ii)(I). Included among the accounting changes enacted under FIRREA was a five-year phaseout of qualifying supervisory goodwill as a component of "core capital", as defined in section (5)(t)(9)(A) of the HOLA, 12 U.S.C. 1464(t)(9)(A). The requirements for the phaseout of supervisory goodwill are set forth in section 5(t)(3) of the HOLA, 12 U.S.C. 1464(t)(3).

[32] *See* section 10(m) of the HOLA, 12 U.S.C. 1467a(m), which was amended by section 301 of FIRREA.

[33] *See* section 13(k)(5)(C) of the FDI Act, 12 U.S.C. 1823(k)(5)(C); 12 CFR 357.1.

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA-3094-EM]

Rhode Island; Amendment to Notice of an Emergency Declaration

AGENCY: Federal Emergency Management Agency (FEMA).
ACTION: Notice.

EFFECTIVE DATE: November 20, 1992.
SUMMARY: This notice amends the notice of an emergency for the State of Rhode Island (FEMA-3094-EM), dated September 16, 1992, and related determinations.
FOR FURTHER INFORMATION CONTACT: Pauline C. Campbell, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-3606.
SUPPLEMENTARY INFORMATION: Notice is hereby given that the incident period for this emergency is closed effective November 20, 1992.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance.)
Grant C. Peterson,
Associate Director, State and Local Programs and Support.

BILLING CODE 6718-02-M

[Docket No. FEMA-REP-5-OH-3]

Ohio Radiological Emergency Response Plans

AGENCY: Federal Emergency Management Agency (FEMA).
ACTION: Notice.

SUMMARY: The Region V Office of the Federal Emergency Management Agency gives notice that it has received radiological emergency response plans from the State of Ohio. These plans support the State of Ohio, and include the plans of local governments near the Cleveland Electric Illuminating Company's Perry Nuclear Power Plant, located in Lake County, Ohio.
DATE PLANS RECEIVED: May 24, 1989.
ADDRESSES: Comments on the plans may be submitted in writing to Janet M. Odeshoo, Chief, Natural and Technological Hazards Division, Federal Emergency Management Agency, Region V Office, 175 West Jackson Boulevard, Fourth Floor, Chicago, Illinois 60604, on or before January 19, 1993.

Copies of the plans are available for review at the Federal Emergency Management Agency, Region V Office, 175 West Jackson Boulevard, Fourth Floor, Chicago, Illinois 60604. Please call (312) 408-5500 in advance to arrange a time to review the plans. Copies are also available upon request in accordance with the fee schedule for FEMA Freedom of Information Act requests, 44 CFR 5.26. See **SUPPLEMENTARY INFORMATION** below for further information on requesting copies of the plans.
FOR FURTHER INFORMATION CONTACT: Janet M. Odeshoo, Federal Emergency Management Agency, Region V Office, 175 West Jackson Boulevard, Fourth Floor, Chicago, Illinois 60604.
SUPPLEMENTARY INFORMATION: For continued operation of nuclear power plants, the Nuclear Regulatory Commission requires approved licensee and State and local governments' radiological emergency response plans. Under 44 CFR 350.7, "Application by State for Review and Approval," the State of Ohio submitted its Radiological Emergency Plan for the State of Ohio and Affected Counties to the Federal Emergency Management Agency, Region V Office for review and approval under 44 CFR part 350.

Included in the submission are plans for the State of Ohio and for Lake, Ashtabula and Geauga Counties which are wholly or partially within the plume exposure pathway emergency planning zone of the Perry Plant.

Copies of the plans are available for review at the Federal Emergency Management Agency, Region V Office, 175 West Jackson Boulevard, Fourth Floor, Chicago, Illinois 60604. They are also available upon request in accordance with the fee schedule for FEMA Freedom of Information Act requests, 44 CFR part 5.26. The four plans site-specific to the Perry Nuclear Power Plant are: The Ohio Plan for Response to Radiation Emergencies at Licensed Nuclear Facilities (542 pages), Lake County Emergency Response Plan for the Perry Nuclear Power Plant (442 pages), Ashtabula County Radiological Emergency Preparedness Plan (264 pages), and Geauga County Radiological Emergency Response Plan (213 pages). Reproduction fees are $.10 a page payable at the time the copies are requested.

The Perry Nuclear Power Plant public meeting was conducted February 20, 1985, at the Lakeland Community College Center, Kirtland, Ohio. Announcement of the public meeting was published in the Cleveland Plain Dealer and other local newspapers. Local radio and television stations announced the meeting.

Dated: December 14, 1992.
Arlyn F. Brower,
Regional Director, FEMA Region V.

FEDERAL MARITIME COMMISSION

Agreement(s) Filed; Puerto Rico Ports Authority, et al.

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 800 North Capitol Street, NW., 9th Floor. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224-200708
Title: Puerto Rico Ports Authority/ Antilles Shipping Terminal Agreement
Parties: The Puerto Rico Ports Authority ("Port") Antilles Shipping Corporation ("Antilles")
Synopsis: The subject Agreement permits Antilles the exclusive use of the Port's Isle Grande Terminal for $380,000 per year, subject to five percent increases every five years during the initial 25-year term of the lease. The Port will undertake necessary construction and improvements.

Dated: December 14, 1992.
By Order of the Federal Maritime Commission.
Joseph C. Polking,
Secretary.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

President's Council on Physical Fitness and Sports

AGENCY: Office of the Assistant Secretary for Health, HHS.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the President's Council on Physical Fitness and Sports. This notice also describes the functions of the Council. Notice of this meeting is required under the Federal Advisory Committee Act.

DATES: January 10, 1993–8:30 a.m. to 4 p.m.

ADDRESSES: ANA Hotel (Westin), 2401 M Street, NW., Washington, DC 20037.

FOR FURTHER INFORMATION CONTACT: Matthew Guidry, Ph.D., Deputy Executive Director, President's Council on Physical Fitness and Sports, 701 Pennsylvania Ave., NW., Suite 250, Washington, DC, 202/272–3424.

SUPPLEMENTARY INFORMATION: The President's Council on Physical Fitness and Sports operates under Executive Order #12345, and subsequent orders. The functions of the Council are:

(1) To advise the President and Secretary concerning progress made in carrying out the provisions of the Executive Order and recommending to the President and Secretary, as necessary, actions to accelerate progress;

(2) Advise the Secretary on matters pertaining to the ways and means of enhancing opportunities for participation in physical fitness and sports actions to extend and improve physical activity programs and services;

(3) Advise the Secretary on State, local, and private actions to extend and improve physical activity programs and services.

The Council will hold this meeting to apprise the members of the national program of physical fitness and sports, to report on ongoing Council programs, and to plan for future directions.

Dated: December 15, 1992.

Matthew Guidry,

Deputy Executive Director, President's Council on Physical Fitness and Sports.

[FR Doc. 92–30801 Filed 12–17–92; 8:45 am]

BILLING CODE 4160–17–M

Agency for Health Care Policy and Research

National Advisory Council for Health Care Policy, Research, and Evaluation Meeting

AGENCY: Agency for Health Care Policy and Research, HHS.

ACTION: Notice of public meeting.

SUMMARY: In accordance with section 10(a) of the Federal Advisory Committee Act, this notice announces a meeting of the National Advisory Council for Health Care Policy, Research, and Evaluation.

DATES: The meeting will be open to the public on Thursday, January 21, from 9 a.m. to 5:30 p.m., and on Friday, January 22, from 9 a.m. to 10:30 a.m.

In accordance with the provisions set forth in section 552b(c)(6), title 5, U.S. Code, and section 10(d) of the Federal Advisory Committee Act, a meeting closed to the public will be held on January 22, 1993, from 10:45 a.m. to 2 p.m. to review, discuss, and evaluate grant applications. The discussion and review of grant applications could reveal confidential personal information, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

ADDRESSES: The meeting will be at the Hyatt Regency, 7400 Wisconsin Avenue, Bethesda, Maryland 20814.

FOR FURTHER INFORMATION CONTACT: Deborah L. Queenan, Executive Secretary of the Advisory Council at the Agency for Health Care Policy and Research, 2101 East Jefferson Street, suite 603, Rockville, Maryland 20852, (301) 227–8459.

In addition, if sign language interpretation or other reasonable accommodations for a disability is needed, please contact Linda Reeves, the Assistant Administrator for Equal Opportunity, AHCPR, on (301) 227–6662 no later than January 8, 1993.

SUPPLEMENTARY INFORMATION:

I. Purpose

Section 921 of the Public Health Service Act (42 U.S.C. 299c) establishes the National Advisory Council for Health Care Policy, Research, and Evaluation. The Council provides advice to the Secretary and the Administrator, Agency for Health Care Policy and Research (AHCPR), on matters related to the activity of AHCPR to enhance the quality, appropriateness, and effectiveness of health care services and access to such services through scientific research and the promotion of improvements in clinical practice and the organization, financing, and delivery of health care services.

The Council is composed of public members appointed by the Secretary. These members are: Linda H. Aiken, Ph.D.; Edward C. Bessey, M.B.A.; Marion F. Bishop, Ph.D.; Linda Burnes Bolton, Dr.P.H.; Joseph T. Curti, M.D.; John W. Danaher, M.D.; David E. Hayes-Bautista, Ph.D.; William S. Kiser, M.D.; Kermit B. Knudsen, M.D.; Norma M. Lang, Ph.D.; Barbara J. McNeil, M.D., Ph.D.; Walter J. McNerney, M.H.A.; Lawrence H. Meskin, D.D.S., Ph.D.; Theodore J. Phillips, M.D.; Louis F. Rossiter, Ph.D.; Barbara Starfield, M.D.; and Donald E. Wilson, M.D.

There also are Federal ex officio Members. These members are: Administrator, Substance Abuse and Mental Health Services Administration; Director, National Institutes of Health; Director, Centers for Disease Control; Administrator, Health Care Financing Administration; Commissioner, Food and Drug Administration; Assistant Secretary of Defense (Health Affairs); and Chief Medical Director, Department of Veterans Affairs.

II. Agenda

On Thursday, January 21, 1993, the open portion of the meeting will begin at 9 a.m. with the call to order by the Council Chairman. The Administrator will provide an update on AHCPR activities. The AHCPR Legislative officer will conclude the morning meeting with an update on the recent AHCPR reauthorization as well as a discussion on health care reform. In the afternoon the Deputy Administrator, AHCPR, will update the Council on the issues of market forces, quality of care, and primary care, discussed by the Council at the September meeting. Following that discussion the Deputy Administrator also will provide an update on AHCPR Minority Health Resource Centers. Concluding the Thursday meeting will be discussion by the Council and AHCPR staff on guideline selection criteria. The Council will recess at 5:30 p.m.

On Friday, January 22, 1993, the Council will resume at 9 a.m. with a discussion on AHCPR technology assessment activities. The open meeting will adjourn at 10:30 a.m. The Council will begin the closed portion of the meeting to review grant applications from 10:45 a.m. to 2 p.m. The meeting will then adjourn at 2 p.m.

Agenda items are subject to change as priorities dictate.

Dated: December 14, 1992.

J. Jarrett Clinton,

Administrator.

[FR Doc. 92–30731 Filed 12–17–92; 8:45 am]

BILLING CODE 4160–90–M

Centers for Disease Control and Prevention

Interim Revision of Requirements for Content of AIDS-Related Written Materials, Pictorials, Audiovisuals, Questionnaires, Survey Instruments, and Educational Sessions in Centers for Disease Control and Prevention Assistance Programs

AGENCY: Centers for Disease Control and Prevention (CDC). Public Health Service, HHS.

ACTION: Request for comments.

SUMMARY: Since 1985, the Centers for Disease Control and Prevention (CDC), as part of the terms and conditions for receipt of CDC funds for human immunodeficiency virus (HIV) prevention programs, has required that all educational and related program materials be reviewed by a Program Review Panel designated by the funded organization. Since education about preventing HIV transmission involves effectively presenting sensitive subject matter, the purpose of this requirement has been to preclude local controversies over the use of Federal funds and thereby disrupting CDC-funded programs by requiring a careful consideration of the content and intended audience for the materials and programs. A guidance document for this review, entitled "Content of AIDS–Related Written Materials, Pictorials, Audiovisuals, Questionnaires, Survey Instruments, and Educational Sessions in Centers for Disease Control Assistance Programs," was revised and published in the **Federal Register** on March 30, 1992, (57 FR 10794).

On May 11, 1992, the U.S. District Court for the Southern District of New York found unconstitutional the use of the "offensiveness" standard by Program Review Panels which review AIDS education materials and activities in CDC assistance programs. *Gay Men's Health Crisis* v. *Sullivan*, 88–CIV–7482 (S.D.N.Y. 1992). On May 27, 1992, the court enjoined CDC from further application or enforcement of the "offensiveness" standard, as provided in paragraph 1.b. and 2.d. of the Revised Terms published on March 30, 1992.

In response to this decision, an "Interim Revision" of the content guidelines were published in the June 15, 1992, **Federal Register** (57 FR 26742) and recipients in CDC assistance programs were instructed to adhere to these revised requirements. On July 31, 1992, CDC published a notice (57 FR 33964) stating that there would be no appeal of the District Court's decision and that the interim revisions, as published in June, would continue to remain in effect for CDC-funded AIDS prevention programs.

CDC is now soliciting comments with respect to the current version of these content guidelines. A copy is included for reference in this notice.

EFFECTIVE DATE: February 16, 1993.

FOR FURTHER INFORMATION CONTACT: Gary West, National Center for Prevention Services, Centers for Disease Control and Prevention (CDC), (404) 639–1480.

SUPPLEMENTARY INFORMATION: Before making any further revisions to the guidelines, CDC requests comments from interested parties, especially state/local health departments and other current grantees, on the Interim Revision of the content guidelines and will carefully consider all comments in the revision process. In reviewing the terms and conditions which are set forth below, these questions should be addressed:

1. Program Review Panels (PRPs) were required by CDC to allow careful consideration of the content of AIDS-related information and educational materials. Such attention was thought to be necessary to preclude disruptions of HIV prevention programs as a result of local controversies over the use of Federal funds to develop or disseminate these materials. Based on the experience of your agency or organization, do you believe that the PRPs have assisted your HIV prevention efforts by precluding or minimizing such controversies?

2. Do you believe there is a continuing need for the PRPs or for some similar process involving community review of AIDS-related information or educational materials developed or disseminated with CDC funds?

3. Do you believe that important AIDS prevention information has been or will be withheld from dissemination due to the current AIDS content guidelines? Give examples.

4. What improvements could CDC make to the PRP requirements, review principles, or review process that would increase its usefulness in obtaining community input, enhance the quality and effectiveness of materials, and reduce the burden on grantees?

5. Are there ways, other than PRPs, through which careful review of materials could be accomplished with community input? Please provide detailed suggestions for consideration by CDC.

6. What additional assistance could be provided by CDC to assist grantees in developing and disseminating accurate, effective HIV/AIDS prevention educational materials that are well-supported by the communities served?

Dated: December 14, 1992.

Walter R. Dowdle,

Acting Director, Centers for Disease Control and Prevention (CDC).

Following are the interim revisions, as published on June 15, 1992:

Content of AIDS-Related Written Materials, Pictorials, Audiovisuals, Questionnaires, Survey Instruments, and Educational Sessions in Centers For Disease Control Assistance Programs—Interim Revisions June 1992

1. Basic Principles

Controlling the spread of HIV infection and AIDS requires the promotion of individual behaviors that eliminate or reduce the risk of acquiring and spreading the virus. Messages must be provided to the public that emphasize the ways by which individuals can fully protect themselves from acquiring the virus. These methods include abstinence from the illegal use of IV drugs and from sexual intercourse except in a mutually monogamous relationship with an uninfected partner. For those individuals who do not or cannot cease risky behavior, methods of reducing their risk of acquiring or spreading the virus must also be communicated. Such messages can be controversial. These principles are intended to provide guidance for the development and use of educational materials, and to require the establishment of Program Review Panels to consider the appropriateness of messages designed to communicate with various groups.

a. Written materials (e.g., pamphlets, brochures, fliers), audiovisual materials (e.g., motion pictures and video tapes), and pictorials (e.g., posters and similar educational materials using photographs, slides, drawings, or paintings) should use terms, descriptors, or displays necessary for the intended audience to understand dangerous behaviors and explain less risky practices concerning HIV transmission.

b. Written materials, audiovisual materials, and pictorials should be reviewed by Program Review Panels consistent with the provisions of section 2500(b), (c), and (d) of the Public Health Service Act, 42 U.S.C. section 300ee(b), (c), and (d), as follows:

"SEC. 2500. USE OF FUNDS.

(b) Contents of Programs.—All programs of education and information receiving funds under this title shall include information about the harmful effects of promiscuous sexual activity and intravenous substance abuse, and

the benefits of abstaining from such activities.

(c) Limitation.—None of the funds appropriated to carry out this title may be used to provide education or information designed to promote or encourage, directly, homosexual or heterosexual sexual activity or intravenous substance abuse.

(d) Construction.—Subsection (c) may not be constructed to restrict the ability of an education program that includes the information required in subsection (b) to provide accurate information about various means to reduce an individual's risk of exposure to, or the transmission of, the etiologic agent for acquired immune deficiency syndrome, provided that any informational materials used are not obscene."

c. Educational sessions should not include activities in which attendees participate in sexually suggestive physical contact or actual sexual practices.

d. Messages provided to young people in schools and in other settings should be guided by the principles contained in "Guidelines for Effective School Health Education to Prevent the Spread of AIDS" (MMWR 1988;37 [suppl. no. S–2]).

2. Program Review Panel

a. Each recipient will be required to establish or identify a Program Review Panel to review and approve all written materials, pictorials, audiovisuals, questionnaires or survey instruments, and proposed educational group session activities to be used under the project plan. This requirement applies regardless of whether the applicant plans to conduct the total program activities or plans to have part of them conducted through other organization(s) and whether program activities involve creating unique materials or using/distributing modified or intact materials already developed by others. Whenever feasible, CDC funded community-based organizations are encouraged to use a Program Review Panel established by a health department or an other CDC-funded organization rather than establish their own panel. The Surgeon General's Report on Acquired Immune Deficiency Syndrome (October 1986) and CDC-developed materials do not need to be reviewed by the panel unless such review is deemed appropriate by the recipient. Members of a Program Review Panel should:

(1) Understand how HIV is and is not transmitted; and

(2) Understand the epidemiology and extent of the HIV/AIDS problem in the local population and the specific audiences for which materials are intended.

b. The Program Review Panel will be guided by the CDC Basic Principles (in the previous section) in conducting such reviews. The panel is authorized to review materials only and is not empowered either to evaluate the proposal as a whole or to replace any other internal review panel or procedure of the recipient organization or local governmental jurisdiction.

c. Applicants for CDC assistance will be required to include in their applications the following:

(1) Identification of a panel of no less than five persons which represent a reasonable cross-section of the general population. Since Program Review Panels review materials for many intended audiences, no single intended audience shall predominate the composition of the Program Review Panel, except as provided in subsection (d) below. In addition:

(a) Panels which review materials intended for a specific audience should draw upon the expertise of individuals who can represent cultural sensitivities and language of the intended audience either through representation on the panels or as consultants to the panels.

(b) The composition of Program Review Panels, except for panels reviewing materials for school-based populations, must include an employee of a state or local health department with appropriate expertise in the area under consideration who is designated by the health department to represent the department on the panel. If such an employee is not available, an individual with appropriate expertise, designated by the health department to represent the agency in this matter, must serve as a member of the panel.

(c) Panels which review materials for use with school-based populations should include representatives of groups such as teachers, school administrators, parents, and students.

(d) Panels reviewing materials intended for racial and ethnic minority populations must comply with the terms of (a), (b), and (c), above. However, membership of the Program Review Panel may be drawn predominately from such racial and ethnic populations.

(2) A letter or memorandum from the proposed project director, countersigned by a responsible business official, which includes:

(a) Concurrence with this guidance and assurance that its provisions will be observed;

(b) The identity of proposed members of the Program Review Panel, including their names, occupations, and any organizational affiliations that were considered in their selection for the panel.

d. CDC-funded organizations that undertake program plans in other than school-based populations which are national, regional (multistate), or statewide in scope, or that plan to distribute materials as described above to other organizations on a national, regional, or statewide basis, must establish a single Program Review Panel to fulfill this requirement. Such national/regional/state panels must include as a member an employee of a state or local health department, or an appropriate designated representative of such department, consistent with the provisions of section 2.c.(1). Materials reviewed by such a single (national, regional, or state) Program Review Panel do not need to be reviewed locally unless such review is deemed appropriate by the local organization planning to use or distribute the materials. Such national/regional/state organization must adopt a national/regional/statewide standard when applying Basic Principles 1.a. and 1.b.

e. When a cooperative agreement/grant is awarded, the recipient will:

(1) Convene the Program Review Panel and present for its assessment copies of written materials, pictorials, and audiovisuals proposed to be used;

(2) Provide for assessment by the Program Review Panel text, scripts, or detailed descriptions for written materials, pictorials, or audiovisuals which are under development;

(3) Prior to expenditure of funds related to the ultimate program use of these materials, assure that its project files contain a statement(s) signed by the Program Review Panel specifying the vote for approval or disapproval for each proposed item submitted to the panel; and

(4) Provide to CDC in regular progress reports signed statement(s) of the chairperson of the Program Review Panel specifying the vote for approval or disapproval for each proposed item that is subject to this guidance.

BILLING CODE 4160–18–M

Food and Drug Administration

Advisory Committee; Notice of Meeting

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: This notice announces a forthcoming meeting of a public advisory committee of the Food and

Drug Administration (FDA). This notice also summarizes the procedures for the meeting and methods by which interested persons may participate in open public hearings before FDA's advisory committees.

MEETING: The following advisory committee meeting is announced:

Arthritis Advisory Committee Subcommittee

Date, time, and place. January 5, 1993, 8:30 a.m., Conference rm. D, Parklawn Bldg., 5600 Fishers Lane, Rockville, MD.

Type of meeting and contact person. Open public hearing, 8:30 a.m. to 9:30 a.m., unless public participation does not last that long; closed committee deliberations, 9:30 a.m. to 5 p.m.; Isaac F. Roubein, Center for Drug Evaluation and Research (HFD–9), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3741.

General function of the committee. The committee reviews and evaluates data on the safety and effectiveness of marketed and investigational human drugs for use in arthritic conditions.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before December 23, 1992, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Closed committee deliberations. The committee will review trade secret and/or confidential commercial information relevant to a pending investigational new drug application. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Each public advisory committee meeting listed above may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. The dates and times reserved for the separate portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairperson determines will facilitate the committee's work.

Public hearings are subject to FDA's guideline (subpart C of 21 CFR part 10) concerning the policy and procedures for electronic media coverage of FDA's public administrative proceedings, including hearings before public advisory committees under 21 CFR part 14. Under 21 CFR 10.205, representatives of the electronic media may be permitted, subject to certain limitations, to videotape, film, or otherwise record FDA's public administrative proceedings, including presentations by participants.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this **Federal Register** notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairperson's discretion.

The agenda, the questions to be addressed by the committee, and a current list of committee members will be available at the meeting location on the day of the meeting.

Transcripts of the open portion of the meeting will be available from the Freedom of Information Office (HFI–35), Food and Drug Administration, rm. 12A–16, 5600 Fishers Lane, Rockville, MD 20857, approximately 15 working days after the meeting, at a cost of 10 cents per page. The transcript may be viewed at the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857, approximately 15 working days after the meeting, between the hours of 9 a.m. and 4 p.m., Monday through Friday. Summary minutes of the open portion of the meeting will be available from the Freedom of Information Office (address above) beginning approximately 90 days after the meeting.

The Commissioner, with the concurrence of the Chief Counsel, has determined for the reasons stated that those portions of the advisory committee meetings so designated in this notice shall be closed. The Federal Advisory Committee Act (FACA) (5 U.S.C. app. 2, 10(d)), permits such closed advisory committee meetings in certain circumstances. Those portions of a meeting designated as closed, however, shall be closed for the shortest possible time, consistent with the intent of the cited statutes.

The FACA, as amended, provides that a portion of a meeting may be closed where the matter for discussion involves a trade secret; commercial or financial information that is privileged or confidential; information of a personal nature, disclosure of which would be a clearly unwarranted invasion of personal privacy; investigatory files compiled for law enforcement purposes; information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action; and information in certain other instances not generally relevant to FDA matters.

Examples of portions of FDA advisory committee meetings that ordinarily may be closed, where necessary and in accordance with FACA criteria, include the review, discussion, and evaluation of drafts of regulations or guidelines or similar preexisting internal agency documents, but only if their premature disclosure is likely to significantly frustrate implementation of proposed agency action; review of trade secrets and confidential commercial or financial information submitted to the agency; consideration of matters involving investigatory files compiled for law enforcement purposes; and review of matters, such as personnel records or individual patient records, where disclosure would constitute a clearly unwarranted invasion of personal privacy.

Examples of portions of FDA advisory committee meetings that ordinarily shall not be closed include the review, discussion, and evaluation of general preclinical and clinical test protocols and procedures for a class of drugs or devices; consideration of labeling requirements for a class of marketed drugs or devices; review of data and information on specific investigational or marketed drugs and devices that have previously been made public; presentation of any other data or information that is not exempt from public disclosure pursuant to the FACA, as amended; and, notably deliberative session to formulate advice and recommendations to the agency on matters that do not independently justify closing.

This notice is issued under section 10(a)(1) and (2) of the Federal Advisory Committee Act (5 U.S.C. app. 2), and FDA's regulations (21 CFR part 14) on advisory committees.

Dated: December 14, 1992.

David A. Kessler,

Commissioner of Food and Drugs.

[FR Doc. 92-30721 Filed 12-17-92; 8:45 am]

BILLING CODE 4160-01-F

Health Resources and Services Administration

Announcement of Proposed Methodology for Implementation of the Statutory General Funding Preference for Selected Grant Programs Under Titles VII and VIII of the Public Health Service Act for Fiscal Year 1993

SUMMARY: The Health Professionals Education Extension Amendments of 1992 and the Nurse Education and Practice Improvement Amendments of 1992 (Pub. L. 102-408, dated October 13, 1992) amend the Public Health Service Act (the Act) to include a general funding preference (sections 791(a) and 860(e)) for selected grant programs. For the purpose of making grant and cooperative agreement awards, funding preference is defined as the funding of a specific category or group of approved applications ahead of other categories or groups of approved applications. This notice will describe the proposed methodology for implementation of the general funding preference authorized by sections 791(a) and 860(e).

EFFECTIVE DATE: The methodology for implementing the statutory general funding preference is proposed for use in fiscal year (FY) 1993 grant cycles for the programs which are subject to this funding preference. Public comments are invited on the proposed FY 1993 methodology for implementing this statutory general funding preference and will be considered prior to the publication of the final notice.

SUPPLEMENTARY INFORMATION: Sections 791(a) and 860(e) of the Act include a general funding preference for selected grant programs under titles VII and VIII. Grant programs which are subject to this funding preference are:

Department of Family Medicine (section 747(b)),
Grants for Graduate Training in Family Medicine (section 747(a)),
** Grants for Faculty Development in Family Medicine (section 747(a)),
* Grants for Predoctoral Training in General Internal Medicine and/or General Pediatrics Predoctoral Training (section 748),
Grants for Residency Training in General Internal Medicine and/or General Pediatrics (section 748),
** Grants for Faculty Development in General Internal Medicine and/or General Pediatrics (section 748),
Residency Training and Advanced Education in the General Practice of Dentistry (section 749),
* Grants for Physician Assistant Training Program (section 750),
* Podiatric Primary Care Residency Training (section 751),
* Grants for Preventive Medicine Residency Training (section 763),
* Allied Health Traineeships (section 766),
Allied Health Project Grants (section 767),
* Advanced Nurse Education (section 821),
Nurse Practitioner and Nurse Midwife Education and Traineeships (section 822),
Professional Nurse Traineeships (section 830),
Nurse Anesthetist Education Programs (section 831(a)),
Nurse Anesthetist Traineeships (section 831(a)), and
Grants for Nurse Anesthetist Faculty Fellowships (section 831(b)).

Statutory General Funding Preference Provision

Under sections 791(a) and 860(e) of the Act, with respect to the above listed grant programs, preference will be given to any qualified applicant that—

(A) Has a high rate for placing graduates in practice settings having the principal focus of serving residents of medically underserved communities; or

(B) During the 2-year period preceding the fiscal year for which such an award is sought, has achieved a significant increase in the rate of placing graduates in such settings.

Preference will be given only for applications ranked above the 20th percentile of applications that have been recommended for approval by the appropriate peer review group.

Statutory Definition of "Graduate"

Under sections 791(c) and 860(e)(3), "graduate" is defined as an individual who has successfully completed all training (and residency requirements) necessary for full certification in the health profession selected by the individual.

Additional details concerning the definition of the word "graduate" will be included in the program materials for the grant programs which are subject to the general funding preference.

Proposed Methodology for Implementation

The methodology for implementing this statutory general funding preference includes (1) the definition of terms including "high rate," "significant increase in the rate," and "medically underserved communities," (2) a system of providing access to lists of work settings which are recognized as medically underserved areas, and (3) a system of ranking applications when multiple funding preferences are used.

To qualify for this funding preference, an applicant must meet the criteria for either part (A) or part (B) of the statutory provision cited above and be ranked above the 20th percentile of applications that have been recommended for approval by the appropriate peer review group. Information submitted to apply for this statutory funding preference will be subject to the normal monitoring and Federal audit processes.

Proposed Definitions of "High Rate" and "Significant Increase in Rate"

Ideally, the definitions of "high rate" and "significant increase in rate" might vary according to different patterns of practice for individual health professions disciplines. However, for fiscal year 1993 grant cycles, detailed and systematized data on which to base precise discipline-specific standards do not exist. Pending collection of more data through public comment, grant applications, or other means, the following definitions are proposed.

"High rate" is defined as 20 percent of graduates in academic year 1990-91 or academic year 1991-92, whichever is greater, who spend at least 50 percent of their worktime in clinical practice in the specified settings.

"Significant increase in the rate" means that, between academic years 1990-91 and 1991-92, the rate of placing graduates in the specified settings has increased by at least 50 percent and that not less than 10 percent of graduates are working in these settings.

Applications for the development of new programs should provide information about the placement of graduates from the entire school in medically underserved areas. For

---

* There will be no competitive grant cycles in FY 1993.

** For these programs focused on the development of faculty members to teach, a method of implementing the intent of this preference will be developed in FY 1993 to be implemented in FY 1994.

example, an application for a new program for nurse practitioners should provide information relative to the placement of graduates from the school of nursing.

The statutory preference for Allied Health Project grants in section 767(b)(2)(B) provides a precedent for the use of 20 percent to define "high rate" of placing graduates in medically underserved communities. With respect to "significant increase in the rate," an increase of 50 percent in the placement of graduates with at least 10 percent placed in these settings is intended to be an achievable goal, while emphasizing provision of substantial care in medically underserved areas.

Statutory Definition of "Medically Underserved Community"

Section 799(6) of the Act defines "medically underserved community" as an urban or rural area or population that—

(A) Is eligible for designation under section 332 as a health professional shortage area;

(B) Is eligible to be served by a migrant health center under section 329, a community health center under section 330, a grantee under section 340 (relating to homeless individuals), or a grantee under section 340A (relating to residents of public housing); or

(C) Has a shortage of personal health services, as determined under criteria issued by the Secretary under section 1861(aa)(2) of the Social Security Act (relating to rural health clinics).

Proposed Amplification of "Medically Underserved Community" Definition

In addition to the definition in the law, the Congressional conferees emphasized in the Statement of Managers for Public Law 102–408, that this definition should encompass not only currently designated health professions shortage areas (HPSA) and populations served by existing community (CHC), migrant (MHC) or homeless health centers but also communities and practice sites which may fit the standards for these designations, but which are not, in fact, so designated. Therefore, in implementing this funding preference for fiscal year 1993, a "medically underserved community" is proposed to include the following work settings:

Community Health Centers (section 330)
Migrant Health Centers (section 329)
Health Care for the Homeless Grantees (section 340)
Public Housing Primary Care Grantees (section 340A)
Rural Health Clinics, federally designated (section 1861(aa)(2) of the Social Security Act)
National Health Service Corps sites, freestanding (section 333)
Indian Health Service Sites (Pub. L. 93–638 for tribally operated sites and Pub. L. 94–437 for IHS operated sites)
Federally Qualified Health Centers (section 1905 (a) and (l) of the Social Security Act)
Primary Medical Care Health Professional Shortage Areas (HPSAs) (facilities and geographic) (designated under section 332) for primary care physicians and other health personnel except dentists and nurses
Dental HPSAs (facilities and geographic) (designated under section 332) for dentists only
Nurse Shortage Areas (section 836) for nurses only
Local Health Departments (regardless of sponsor—for example, local health departments who are funded by the state would qualify).

This list of work settings was developed to be objective, reasonable, practical, consistent with current definitions/usages and consistent with the law and report language (Conference Report for Public Law 102–408). There are other practice sites that serve medically underserved communities but are not included in this proposed FY 1993 implementation of the statutory funding preference. Information about such sites and suggestions of ways to categorize or define these sites for possible inclusion in FY 1994 are solicited.

Access to the Lists of Medically Underserved Work Settings

The above listed sites are proposed because medically underserved locations have been identified and compiled into listings by recognized Federal units. Beginning January 1, 1993, a listing of Community Health Centers, Migrant Health Centers, Health Care for the Homeless Grantees, Public Housing Primary Care Grantees, Rural Health Clinics, National Health Service Corps Sites, Indian Health Service Sites, and Federally Qualified Health Centers will be available through an electronic bulletin board, called the BHPr (Bureau of Health Professions) Bulletin Board. Data will be available in two formats, as a dBASE III file or as an ASCII file. The BHPr Bulletin Board can be accessed by using a personal computer with a communication package and a modem by dialing (301) 443–3997. Detailed instructions for how to proceed will appear on the screen as soon as access to the Bulletin Board is complete. Applicants who do not have the necessary equipment to access the electronic bulletin board may obtain additional information by calling the Program Official identified in the application materials for the grant programs subject to this statutory funding preference.

A list of designated Primary Medical Care Health Professional Shortage Areas (HPSAs) was published in the Federal Register on October 28, 1992 (57 FR 48854). For additional information concerning the Primary Medical Care Health Professional Shortage Areas (HPSAs), Dental HPSAs, and Nurse Shortage Areas, applicants may call the Division of Shortage Designation at (301) 443–6932.

For additional information concerning Local Health Departments, applicants may call the National Association of County Health Officers (NACHO) at (202) 783–5550.

Ranking Applications When Multiple Funding Preferences Are Used

Grant programs which are subject to the statutory general funding preference, under sections 791(a) and 860(e) of the Act, may also include another statutory funding preference and/or nonstatutory, administratively determined funding preferences. For grant programs that include multiple funding preferences, it is proposed that preference points be assigned. An application would receive one point for qualifying for a statutory funding preference and one half point for qualifying for each administrative preference, but no applicant qualifying only for an administratively determined preference would be funded ahead of an applicant qualifying for a statutory funding preference. The total number of preference points for any grant program will equal the number of statutory preferences plus half the number of administrative preferences. The preference points will (1) provide equitable treatment of applicants which qualify for more than one preference, (2) recognize that statutory funding preferences should have the most weight, and (3) give appropriate credit for administratively determined preferences.

Continued Development of Methodology

The proposed implementation methodology is intended to be a starting point in an evolutionary process. Ultimately, definitions of "high rate" and "significant increase in the rate" may be individualized for specific grant programs or for specific health professions as more data are available from public comments and specific data collection efforts. The list of acceptable

work settings may also be refined and/or expanded in the future. Changes based on public comment will be considered for fiscal year 1993 or may be implemented in future program cycles. Comments from the public are encouraged to assist in refining the methodology for implementing this funding preference. Specific efforts will be undertaken to solicit comments from affected constituency groups and institutions. For example, relevant applicants will be provided with a copy of the **Federal Register** notice and are encouraged to comment. In addition, relevant applicants will be asked to describe their methodology for obtaining information about graduates and to provide suggestions for future approaches. The goal is to attain an implementation system that adheres to the Statute and Congressional intent, and is objective and achievable without undue burden on the applicant.

Additional Information

Interested persons are invited to comment on the proposed implementation methodology. The comment period is 30 days. All comments received on or before January 19, 1993 will be considered before the final implementation methodology for fiscal year 1993 is established. No funds for competitive grants will be awarded until a final notice is published. Written comments should be addressed to: Ms. Shirley Johnson, Director, Office of Program Development, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, room 8A–55, 5600 Fishers Lane, Rockville, Maryland 20857.

All comments received will be available for public inspection and copying in the Office of Program Development, Bureau of Health Professions, at the above address, weekdays (Federal holidays excepted) between the hours of 8:30 a.m. and 5 p.m.

Dated: December 14, 1992.

Robert G. Harmon,

Administrator.

BILLING CODE 4160–15–M

Public Health Service

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Public Health Service (PHS) publishes a list of information collection requests it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. chapter 35). The following requests have been submitted to OMB since the list was last published on Friday, December 4, 1992.

(Call PHS Reports Clearance Officer on 202–690–7100 for copies of requests)

1. National Nosocomial Infections Surveillance System (NNIS)—0920–0012—The NNIS system collects data to describe the scope and magnitude of the nosocomial infection problem in the U.S., identifies risk factors associated with these infections and assists hospitals to use surveillance data to improve the quality of patient care. *Respondents:* Businesses or other for-profit; *Number of Respondents:* 165; *Number of Responses per Respondent:* 1600; *Average Burden Per Response:* 0.012 hours; *Estimated Annual Burden:* 3160 hours.

2. Farm Family Health & Hazard Surveillance in Ohio—New—This submission is for a survey of Ohio farm operators and eligible family members who are involved in cash grain farming. Data will determine prevalence and incidence of health conditions and injuries by farm demographics. The data will be used to set priorities and to develop intervention strategies in specific subpopulations in order to reduce health and safety risks in them. *Respondents:* Individuals or households; *Number of Respondents:* 6762; *Number of Responses per Respondent:* 1; *Average Burden per Response:* .998 hours; *Estimated Annual Burden:* 6747 hours.

3. Indian Health Service Loan Repayment Program—0917–0014—Respondents are American Indian Loan Repayment Health professionals applying to the Indian Health Service (IHS) Loan Repayment Program (LRP). The application provides information on training status in compliance with program requirements. *Respondents:* Individual or households, State or local governments, businesses or other for profit.

Title	Number of respondents	Number of responses per respondent	Average burden per response
Applicants	1,200	1	1.5
Leaders	1,600	1	0.25
Estimated Total annual Burden			2,200

Desk Officer: Shannah Koss

Written comments and recommendations for the proposed information collections should be sent within 30 days of this notice directly to the OMB Desk Officer designated above at the following address: Human Resources and Housing Branch, New Executive Office Building, room 3002, Washington, DC 20503.

Dated: December 14, 1992.

James Scanlon,

Director, Division of Data Policy, Office of Health Planning and Evaluation.

[FR Doc. 92–30697 Filed 12–17–92; 8:45 am]

BILLING CODE 4160–17–M

Health Resources and Services Administration; Privacy Act of 1974; New System of Records

AGENCY: Public Health Service, HHS.

ACTION: Notification of a new system of records.

SUMMARY: In accordance with the requirements of the Privacy Act, the Public Health Service (PHS) is publishing notice of a new system of records: 09–15–0058, "Faculty Loan Repayment Program, HHS/HRSA/BHPr."

DATES: PHS invites interested parties to submit comments on or before January 19, 1993. PHS has sent a Report of A New System to the Congress and to the Office of Management and Budget (OMB) on December 8, 1992. The new system will be effective 60 days from the date submitted to OMB unless PHS receives comments which would result in a contrary determination.

ADDRESSES: Please address comments to the Health Resources and Services Administration (HRSA) Privacy Act Coordinator, Department of Health and Human Services, Parklawn Building, Room 14A–20, 5600 Fishers Lane, Rockville, Maryland 20857, telephone (301) 443–3780. This is not a tool-free number.

FOR FURTHER INFORMATION CONTACT: Director, Division of Disadvantaged Assistance BHPr/HRSA, Room 8A09, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, telephone (301) 443–2100. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Health Resources and Services Administration (HRSA) proposes to establish a new system of records: 09–15–0058, "Faculty Loan Repayment Program, HHS/HRSA/BHPr." Under this program, disadvantaged graduates from certain health professions schools are offered the opportunity to enter into a contractual agreement with the Secretary under which the Public Health Services agrees to repay a specified amount of their graduate loan indebtedness. In exchange, the graduate health professional agrees to have contract with an accredited health professions school to serve as a fulltime faculty member for a minimum of 2 years.

The purposes of the records maintained in this system are to: (1) Maintain all information relative to the application for the awarding of a contract to an individual; (2) monitor recipient's continued eligibility; (3) monitor recipient's employment with the accredited health professions school; (4) monitor all repayment actions until the repayment obligation is satisfied; and (5) compile and generate managerial and statistical reports.

HRSA will permit disclosure of the records to third parties pursuant to a routine use as follows: The first routine use permits disclosure to a congressional office, to allow subject individuals to obtain assistance from their representatives in Congress, if they so desire. The second routine use allows disclosure to the Department of Justice or a court, in the event of litigation. The third routine use allows disclosure to a consumer reporting agency (credit bureau) to obtain a commercial credit report. The fourth routine use allows disclosure to debt collection agents, other Federal agencies, and other third parties who are authorized to collect a Federal debt. The fifth routine use allows disclosure to authorized persons employed at educational institutions to assist in identifying defaulted contract recipients. The sixth routine use allows disclosure to a Federal, State or local agency charged with the responsibility of investigating or prosecuting violations or potential violations of law. The seventh routine use allows disclosure to another Federal agency so that the agency can effect a salary offset, or an authorized administrative offset. The eighth routine use allows disclosure to the General Accounting Office and the Office of Management and Budget for auditing financial obligations. The ninth routine use allows disclosure to another agency that has asked the Department to effect an administrative offset to help collect a debt owed to the United States. The tenth routine use allows disclosure to the Treasury Department, Internal Revenue Service, of the written-off amount of a debt owed by an individual to the Federal Government as taxable income. The eleventh routine use allows disclosure to a third party for the purpose of obtaining the current address.

Because the payments made by the Federal Government to individuals under the program are taxable income and require HHS to file Form 1099 for each participating individual, participants will be required to furnish their Social Security number as required by the Internal Revenue Code (26 U.S.C. 6109(c)(2)).

The following notice is written in the present tense, rather than the future tense, in order to avoid the unnecessary expenditure of public funds to republish the notice after it becomes effective.

Dated: December 10, 1992.

Wilford J. Forbush,

Director, Office of Management.

09–15–0058

SYSTEM NAME:

Faculty Loan Repayment Program, HHS/HRSA/BHPr.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Division of Disadvantaged Assistance, Bureau of Health Professions, Health Resources and Services Administration, Room 8A09, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Applicants for and receipients of contracts under the Faculty Loan Repayment Program.

CATEGORIES OF RECORDS IN THE SYSTEM:

Contain name, Social Security number, school identifier, contract number, birthdate, demographic background, educational status, school location, employment status, payback status, and financial information about the individual for whom the record is maintained.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Public Health Service Act, as amended, section 761 (42 U.S.C. 294cc). This section authorizes the establishment of a program for entering into contract with individuals from disadvantaged backgrounds for repayment of educational loans in exchange for teaching services.

PURPOSES:

1. To maintain all information relative to the application for awarding a contract to an individual.
2. To monitor recipient's continued eligibility.
3. To monitor recipient's employment in fulfillment of recipient's service obligation.
4. To monitor all repayment actions until the repayment obligation is satisfied.
5. To compile and generate managerial and statistical reports.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

1. Disclosure may be made to a congressional office from the record of an individual, in responses to an inquiry from the congressional office made at the request of the individual.

2. The Department of Health and Human Services (HHS) may disclose information from this system of records to the Department of Justice, or to a court or other tribunal, when (a) HHS, or any component thereof; or (b) any HHS employee in his or her official capacity; or (c) any HHS employee in his or her individual capacity where the Department of Justice (or HHS, where it is authorized to do so) has agreed to represent the employee; or (d) the United States or any agency thereof, where HHS determines that the litigation is likely to affect HHS or any of its components, is a party to litigation or has an interest in such litigation, and HHS determines that the use of such records by the Department of Justice, the court or other tribunal is relevant and necessary to the litigation and would help in the effective representation of the governmental party, provided, however, that in such care HHS determines that such disclosure is compatible with the purpose for which the records were collected.

3. HRSA may disclose to debt collection agents, other Federal agencies, and other third parties who are authorized to collect or compromise a Federal debt, information necessary to identify a delinquent debtor. Disclosure will be limited to the debtor's name, address, Social Security number, and other information necessary to identify him/her; the amount, status, and history of the claim, and the agency or program under which the claim arose.

4. Records may be disclosed to authorized persons employed at educational institutions where the recipient received a loan. The purpose of this disclosure is to assist institutions in identifying defaulted loan recipients (hereafter called debtors) in order to enforce the conditions and terms of such loans.

5. In the event that system of records maintained by this agency to carry out its functions indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred to the appropriate agency, whether Federal, State or local charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute or rule, regulation or order issued pursuant thereto.

6. HRSA may disclose from this system of records a debtor's name, address, Social Security number, and other information necessary to identify him/her; the amount, status, and history of the claim, and the agency or program under which the claim arose, as follows: (a) To another Federal agency so that agency can effect a salary offset for debts owed by Federal employees; if the claim arose under the Social Security Act, the employee must have agreed in writing to the salary offset; (b) to another Federal agency so that agency can effect an authorized administrative offset (i.e., withhold money payable to or held on behalf of debtors other than Federal employees); (c) to the Treasury Department, Internal Revenue Service (IRS), to request a debtor's current mailing address to locate him/her for purposes of either collecting or compromising debt, or to have a commercial credit report prepared.

7. Records may be disclosed to the General Accounting Office and to the Office of Management and Budget for auditing financial obligations to determine compliance with programmatic, statutory, and regulatory provisions.

8. HRSA may disclose information from this system of records to another Federal agency that has asked the Department to effect an administrative offset to help collect a debt owed to the United States. Disclosure is limited to the individual's name, address, Social Security number, and other information necessary to identify the individual; information about the money payable to or held for the individual, and other information concerning the administrative offset.

9. HRSA will report to the Treasury Department, Internal Revenue Service (IRS), as taxable income, the written-off amount of a debt owed by an individual to the Federal Government when a debt becomes partly or wholly uncollectible, either because the time period for collection under the statute of limitations has expired, or because the Government agrees with the individual to forgive or compromise the debt.

10. HRSA may disclose information from this system of record to any third party that may have information about a delinquent debtor's current address, such as a U.S. post office, a State motor vehicle administration, professional organization, alumni association, etc., for the purpose of obtaining the debtor's current address. This disclosure will be strictly limited to information necessary to identify the individual without any reference to the reason for the agency's need for obtaining the address.

DISCLOSURES TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b)(12): Disclosures may be made from this system to consumer reporting agencies as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f) or the Federal Claims Collection Act of 1966 (31 U.S.C. 3701(a)(3)). The purpose of disclosure is to provide an incentive for debtors to repay delinquent Federal Government debts by making these debts part of their credit records. Disclosure of records will be limited to the individual's name, Social Security number, and other information necessary to establish the identity of the individual, the amount, status, and history of the claim, and the agency or program under which the claim arose.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in file folders, on magnetic tape, microfilm, and/or in disk packs.

RETRIEVABILITY:

Retrieval will be by name and/or Social Security number.

SAFEGUARDS:

1. Authorized Users: Administrative and staff personnel of the Division of Disadvantaged Assistance and other components of the HRSA.

2. Physical Safeguards: Magnetic tapes, microfilms, disk packs, computer equipment, and hard copy files are stored in areas where fire and life safety codes are strictly enforced. Twenty-four hours, 7-day security guards perform random checks on the physical security of the data. All documents are protected during lunch hours and nonworking hours in locked file cabinets or locked storage areas.

3. Procedural and Technical Safeguards: A password is required to access the terminal, and a software security system controls the release of data to only authorized users. All users of personal information in connection with the performance of their jobs protect information from public view and from unauthorized personnel entering an unsupervised area. Access to records is strictly limited to those staff members trained in accordance with the Privacy Act.

4. Implementation Guidelines: DHHS Chapter 45–13 and supplementary Chapter PHS.hf: 45–13 of the General Administration Manual; and the Department's Information Systems Security Handbook.

RETENTION AND DISPOSAL:

Records will be retained for 6 years (1 year on site and 5 years at the National Records Center) after completion of the service obligation or repayment to the Secretary in cases of default. Records on magnetic tape are retained for 5 years and then they are destroyed. Records are disposed of in accordance with the Records Control Schedule of the Health Resources and Services Administration. Contact the System Manager for disposal standard.

SYSTEM MANAGER AND ADDRESS:

Director, Division of Disadvantaged Assistance, Bureau of Health Professions, Health Resources and Services Administration, room 8A09, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

NOTIFICATION PROCEDURE:

Requests must be made to the System Manager.

Requests in person: A subject individual who appears in person at a specific location seeking access or disclosure of records relating to him/her shall provide his/her name, current address, and at least one piece of tangible identification such as driver's license, passport, voter registration card, or union card. Identification papers with current photographs are preferred but not required. Additional identification may be requested when there is a request for access to records which contain in apparent discrepancy between information contained in the records and that provided by the individual requesting access to the

records. No verification of identity shall be required where the record is one which is required to be disclosed under the Freedom of Information Act.

Requests by mail: Requests for information and/or access to records received by mail must contain information providing the identity of the writer and a reasonable description of the record desired. Written requests must contain the name and address of the requester, his/her date of birth and at least one piece of information which is also contained in the subject record, and his/her signature for comparison purposes.

Requests by telephone: Since positive identification of the caller cannot be established, telephone requests are not honored.

RECORD ACCESS PROCEDURES:

Same as notification procedures. Requesters should also reasonably specify the record contents being sought. Individuals may also request an accounting of disclosure that have been made of their records, if any.

CONTESTING RECORD PROCEDURES:

Contact the System Manager at the address specified above and reasonably identify the record, specify the information being contested, and state the corrective action and the reason(s) for requesting the correction, along with supporting justification to show how the record is inaccurate, incomplete, untimely, or irrelevant.

RECORD SOURCE CATEGORIES:

Individual contract recipients, recipient's school.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

BILLING CODE 4160-15

Social Security Administration

Agency Forms Submitted to the Office of Management and Budget for Clearance

Normally on Fridays, the Social Security Administration publishes a list of information collection packages that have been submitted to the Office of Management and Budget (OMB) for clearance in compliance with Public Law 96-511, The Paperwork Reduction Act. The following clearance packages have been submitted to OMB since the last list was published in the **Federal Register** on Friday, November 20, 1992. (Call Reports Clearance Officer on (410) 965-4142 for copies of package)

1. Statement of Death by Funeral Director—0960-0142. The information on form SSA-721 is used by the Social Security Administration (SSA) to make timely and accurate decisions in connection with the death of an individual and to determine if there are survivors who may be eligible for Social Security benefits.

Number of Respondents: 900,000
Frequency of Response: 1
Average Burden Per Response: 3.5 minutes
Estimated Annual Burden: 52,500 hours

2. Disability Report—0960-0141. The information on form SSA-3368 is used by SSA to help make a determination of disability on a claim for benefits. The respondents are applicants who have filed for disability benefits under titles II or XVI.

Number of Respondents: 1,800,000
Frequency of Response: 1
Average Burden Per Response: 45 minutes
Estimated Annual Burden: 1,350,000

3. Medical History and Disability Report—0960-0504. The information on form SSA-3820 is used by SSA to help make a disability determination in claims for disabled child's benefits. The respondents are claimants for those benefits.

Number of Respondents: 453,000
Frequency of Response: 1
Average Burden Per Response: 20 minutes
Estimated Annual Burden: 151,500 hours.

OMB Desk Officer: Laura Oliven

Written comments and recommendations regarding these information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, room 3208, Washington, DC 20503.

Dated: December 8, 1992.

Nicholas E. Tagliareni,

Acting Reports Clearance Officer, Social Security Administration.

BILLING CODE 4190-29-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Administration

[Docket No. N-92-3551]

Notice of Submission of Proposed Information Collections to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notices.

SUMMARY: The proposed information collection requirements described below have been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comment on the subject proposals.

ADDRESSES: Interested persons are invited to submit comment regarding these proposals. Comments should refer to the proposal by name and should be sent to: Angela Antonelli, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Kay F. Weaver, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 708-0050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Ms. Weaver.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposals for the collections of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. chapter 35).

The Notices list the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total number of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: December 9, 1992.

Kay Weaver,

Acting Director, IRM Policy and Management Division.

Proposal: Actions to Reduce Losses in FHA Programs (FR-2491).
Office: Housing.

Description of the Need for the Information and its Proposed Use: This information collection requires a mortgagee, when notified by the FHA Commissioner, that the mortgage had a higher than normal rate of serious defaults and claims in the processing year to submit a report to the Commissioner and, if applicable, a plan and a timetable for corrective action.

Form Number: None.

Respondents: Individuals or households, businesses or other for-profit, non-profit institutions and small businesses or organization.

Frequency of Submission: On occasion.

Reporting Burden:

	Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
Information Collection	200		1		40		8,000

Total Estimated Burden Hours: 8,000.

Status: Extension.

Contact: Andrew Zirneklis, HUD, (202) 708–1824, Angela Antonelli, OMB, (202) 395–6880.

Dated: December 9, 1992.

Proposal: Section 8 Housing Assistance Program for the Disposition/ HUD-owned Projects, Section 8 Housing Assistance Payments (HAP) Contract (Part II).

Office: Housing.

Description of the Need for the Information and its Proposed Use: The HAP Contract, Part II, form HUD–52522–D, is the legal document used to obligate Federal funds and to commit the owner to HUD regulations and necessary procedural requirements governing the purpose and use of these funds.

Form Number: HUD–52522–D.

Respondents: Individuals or households, State or local governments, businesses or other for-project and non-profit institutions.

Frequency of Submission: On occasion.

Submission of Proposed Information Collections to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notices.

SUMMARY: The proposed information collection requirements described below have been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comment on the subject proposals.

ADDRESSES: Interested persons are invited to submit comment regarding these proposals. Comments should refer to the proposal by name and should be sent to: Angela Antonelli, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Kay F. Weaver, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 708–0050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Ms. Weaver.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposals for the collections of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. chapter 35).

The Notices list the following information:

(1) The title of the information collection proposal;

(2) The office of the agency to collect the information;

(3) The description of the need for the information and its proposed use;

(4) The agency form number, if applicable;

(5) What members of the public will be affected by the proposal;

(6) How frequently information submissions will be required;

(7) An estimate of the total number of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response;

(8) Whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and

(9) The names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: December 8, 1992.

John T. Murphy,

Director, IRM Policy and Management Division.

Proposal: Request for Construction Change.

Office: Housing.

Description of the Need for the Information and its Proposed Use: This information is used by contractors, mortgagors, and mortgagees to obtain approval of changes in the contract drawings and specifications. HUD will use the information to make sure they are complying with Article 1F of the Construction Contract.

Form Number: HUD–92437, 92441, 92442 and 92442A.

Respondents: Businesses or Other For-Profit, Federal Agencies or Employees, Non-Profit Institutions and Small Businesses or Organization.

Frequency of Submission: On Occasion.

Reporting Burden:

	Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
Request for Construction change	500		20		3		30,000

Total Estimated burden Hours: 30,000.

Status: Extension.

Contact: Felix Coward, HUD, (202) 708–0743, Angela Antonelli, OMB, (202) 395–6880.

Dated: December 8, 1992.

Proposal: Section 8 Housing Assistance Payments Program, Additional Assistance Program for Project with HUD–Held Mortgages, 24 CFR part 886, subpart A Housing Assistance Payments (HAP)

Office: Housing.

Description of the Need for the Information and its Proposed Use: Owners or managing agents of certain categories of HUD-Insured or HUD-held project mortgages with immediate or potentially serious financial difficulties apply for assistance under 24 CFR Part 886, Subpart A. These contracts provide the administrative mechanism to obligate the necessary funds for the financially troubled projects or the renewal of existing HAP contracts.

Form Number: HUD–52530 and 53537.

Respondents: Individual or Households, State or Local Governments and Non-Profit Institutions.

Frequency of Submission: Annually.

Reporting Burden:

	Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
Information Collection	3,126		1		7.243		22,642

BILLING CODE 4210–01–M

Office of the Assistant Secretary for Fair Housing and Equal Opportunity

[Docket No. N–92–3542; FR–3348–N–03]

State and Local Fair Housing Laws: Notice of Certification of Substantially Equivalent Agency—State of North Carolina

AGENCY: Office of the Assistant Secretary for Fair Housing and Equal Opportunity, HUD.

ACTION: Notice and request for comments.

SUMMARY: Title 24, part 115 of the Code of Federal Regulations describes the procedure for certifying State and local fair housing laws that provide substantive rights and remedies for alleged discriminatory housing practices that are substantially equivalent to those provided in the Fair Housing Act. In accordance with 24 CFR 115.6(c), this Notice announces the Department's determination that the fair housing law of the State of North Carolina is substantially equivalent, on its face, to the Fair Housing Act. This notice also solicits comments from the public on this determination, and on whether the present practices and past performance of the agency enforcing the fair housing law for the State of North Carolina demonstrate that, in operation, the law provides rights and remedies that are substantially equivalent to those available under the Fair Housing Act.

DATES: Comment Due Date: January 19, 1993.

ADDRESSES: Interested persons are invited to submit comments regarding this Notice to the Office of General Counsel, Rules Docket Clerk, room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW, Washington, DC 20410. Communications should refer to the above docket number and title. A copy of each communication submitted will be available for public inspection and copying on weekdays between 7:30 a.m. and 5:30 p.m. at the above address.

FOR FURTHER INFORMATION CONTACT: Marcella O. Brown, Director, Funded Programs Division, Office of Fair Housing and Equal Opportunity, Department of housing and Urban Development, 451 Seventh Street, SW, room 5234, Washington, DC 20410, telephone (202) 708–0455. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

Background

Under the Fair Housing Act (42 U.S.C. 3600–3619), the Department is authorized to investigate complaints alleging discrimination in housing. (Title VIII of the Civil Rights Act of 1968 as amended by the Fair Housing Amendments Act of 1988 is cited as the Fair Housing Act. Section 810(f) of the Fair Housing Act requires the Department to refer complaints to State and local agencies that have "substantially equivalent" fair housing standards, as determined and certified by the Department. The certification standards are codified at 24 CFR part 115.)

On January 13, 1992 (57 FR 1277), the Department published the annual notice required by 24 CFR 115.6, which announced, among other things, the updated, consolidated list of all certified agencies, and a list of agencies with which an agreement for interim referrals or other utilization of services has been entered into under 24 CFR 115.11. In the January 13, 1992 notice, the Department listed eight jurisdictions which had entered into an agreement with the Department, subsequent to September 12, 1988, for interim referrals, and were considered to have interim certification in accordance with section 810(f)(4) of the Fair Housing Amendments Act of 1988 (hereafter "Act"). (The Fair Housing Amendments Act of 1988 was enacted on September 13, 1988.) Today's notice announces that the fair housing law of the State of North Carolina has been determined by the Assistant Secretary of Fair Housing and Equal Opportunity to be substantially equivalent on its face.

This Notice

In accordance with 24 CFR 115.6(c)(1), this Notice announces that the fair housing law of the State of North Carolina is, on its face, substantially equivalent to the Fair Housing Act. The Assistant Secretary for Fair housing and Equal Opportunity has determined, after application of the criteria set forth in 24 CFR 115.3 and 115.4, that the fair housing law for the State of North Carolina provides, on its face, substantive rights and remedies for alleged discriminatory housing practices that are substantially equivalent to those provided in the Fair Housing Act. Following a review of performance standards and other material, the Department expects to determine that the law in operation provides rights and remedies that are substantially equivalent to those available under the Fair housing Act. The Department intends to execute a Memorandum of Understanding with the agency charged with enforcement of the fair housing law of the State of North Carolina in accordance with 115.6(c).

In accordance with 24 CFR 115.6(b), the public is invited to submit written comments on this Notice. Specifically, the Department requests written comments on the proposed determination that the current practices and past performance of the State of North Carolina agency charged with administration and enforcement of the State' fair housing law demonstrate that, in operation, the State law provides substantive rights and remedies which are substantially equivalent to the Fair housing Act. This Notice also invites comments from the public on the Department's determination that the State of North Carolina fair housing law is, on its face, substantially equivalent to the Fair Housing Act.

Dated: December 7, 1992.

Gordon H. Mansfield,

Assistant Secretary for Fair Housing and Equal Opportunity.

[FR Doc. 92–30705 Filed 12–17–92; 8:45 am]

BILLING CODE 4210–28–M

Office of the Assistant Secretary for Community Planning and Development

[Docket No. N–92–1917; FR–3350–N–10]

Federal Property Suitable as Facilities to Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

ADDRESSES: For further information, contact James N. Forsberg, room 7262, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410; telephone (202) 708–4300; TDD number for the hearing- and speech-impaired (202) 708–2565 (these telephone numbers are not toll-free), or call the toll-free title V information line at 1–800–927–7588.

SUPPLEMENTARY INFORMATION: In accordance with 56 FR 23789 (May 24, 1991) and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1988 Court Order in *National Coalition for the Homeless* versus *Veterans Administration*, No. 88–2503–OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to HUD:

(1) Its intention to make the property available for use to assist the homeless;

(2) Its intention to declare the property excess to the agency's needs; or

(3) A statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to Judy Breitman, Division of Health Facilities Planning, U.S. Public Health Service, HHS, room 17A–10, 5600 Fishers Lane, Rockville, MD 20857; (301) 443–2265. (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 56 FR 23789 (May 24, 1991).

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the handholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1–800–927–7588 for detailed instructions or write a letter to James N. Forsberg at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the **Federal Register**, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (*i.e.*, acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: U.S. Army: Robert Conte, Dept. of Army, Military Facilities, DAEN–ZCI–P; room 1E671, Pentagon, Washington, DC 20310–2600; 693–4583; U.S. Navy: John J. Kane, Deputy Division Director, Dept. of Navy, Real Estate Operations, Naval Facilities Engineering Command, 200 Stovall Street, Alexandria, VA 22332–2300; (703) 325–0474; GSA: Ronald Rice, Federal Property Resources Services, GSA, 18th and F Streets NW., Washington, DC 20405; (202) 501–0067; Dept. of Veterans Affairs: Douglas Shinn, Management Analyst, Dept. of Veterans Affairs, room 414 Lafayette Bldg., 811 Vermont Ave. NW., Washington, DC 20420; (202) 233–8484; Dept. of Transportation: Ronald D.
